Functions of the Department of Labour

The Department of Labour of Canada has functioned for forty-four years as the agency of the Federal Government charged with the administration of labour legislation. During the present war the Department's activities have been widely expanded. The functions of the principal branches of the Department and agencies associated with it are:—

Industrial Relations.—Under the direction of the Wartime Labour Relations Board (National), the Industrial Relations Branch is charged with the administration of the Wartime Labour Relations Regulations, P.C. 1003, which provide for the certification of employees' bargaining representation and the establishment of Boards of Conciliation for the settlement of disputes.

The Branch also administers the Conciliation and Labour Act, Chap. 110, R.S.C., 1927, which empowers the Minister of Labour to inquire into the causes and circumstances of a dispute and take measures considered expedient to effect a settlement. For the purpose of administering the Act, the Department maintains a staff of Industrial Relations Officers at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, and Sydney. The office of the Director of Industrial Relations is located in Ottawa.

The administration of the Fair Wages and Hours of Labour Act, 1935, and Order in Council P.C. 7679 governing the application of minimum rates of pay to all employees of Government contractors and subcontractors, are also administered by the Industrial Relations Branch.

Wartime Labour Relations Board (National).—This Board, together with Provincial Labour Relations Boards, administers the Wartime Labour Relations Regulations, P.C. 1003.

Statistics and Research.—The collection and publication of statistics of employment, wages, hours, prices, cost of industrial agreements, also of reports on commerce and the professions; the conditions of industrial relations, labour conditions and information on these subjects.

Labour Gazette.—The monthly publication of the labour-industrial situation throughout the Dominion.

The Vocational Training Co-ordinating Committee.—The committee co-ordinates and administers vocational training in vocational schools for members of the armed forces; youth training in agriculture.

Combines Investigation Act.—The administration of the Combines Investigation Act, Chap. 26, R.S.C., 1927, an Act to provide for the investigation of combines, monopolies, trusts, and mergers.

Dominion Government Annuities.—The administration of the Government Annuities Act, Chap. 7, R.S.C., 1927, whereby provision may be made for old age by the purchase of annuities by individuals, or associations on behalf of their members or by employers on behalf of their employees.

Unemployment Insurance Commission.—The Commission administers the Unemployment Insurance Act, 1940, which provides for a national unemployment insurance system and employment service. The employment service now functions as the field organization of National Selective Service.

National War Labour Board.—This tribunal with its regional divisions administers the Government's wartime wages policy as set forth in Order in Council P.C. 9384 as amended.

National Selective Service.—This body administers the Government's manpower program.

Wartime Bureau of Technical Personnel.—The bureau organizes the placement of scientific and technical engineering personnel for war industries and the government service.

Library.—The maintenance of a library of publications on labour and economic subjects.

International Labour Organization (League of Nations).—The collection and transmission of information in connection with the work of the International Labour Conference and Office, including related correspondence with Federal and Provincial Government Departments and with organizations of employers and employees.

Notes of Current Interest

Payment of family allowances commences

The Department of National Health and Welfare announced on June 18 that the first family allowance cheques would be mailed during July to 1,234,202 families who had registered for the allowances. Applications were still being received daily at the rate of approximately 2,100, and those received before the end of June, if approved, would be in time to make the applicants eligible for the first payment.

The Department stated that it was important that every family notify the Family Allowances Regional Office of change of address, births, or deaths of children under 16, in order to facilitate the administration of family allowances.

Progress of labour-management production committees

Early in 1943, the Dominion Government set up a three-man inter-departmental committee to sponsor and encourage the formation of labour-management committees in industrial plants, (L. G. 1943, p. 304). The establishment of such committees, in certain wartime industries had already been approved, both by trade union leaders and by representatives of management. The formation in January, 1944, of the Industrial Production Co-operation Board broadened and consolidated the activities of this committee, (L. G., 1944, 144).

A brochure entitled, "Partners in Production", recently issued under the direction of Mr. H. Carl Goldenberg, chairman of the Board, presents the testimony of key officials in some 28 typical Canadian industries as to the present and the potential value of labour-management committees. It is pointed out in the brief introduction that "the best proof of the success which labour-management production committees have achieved is their steady growth since early in 1943". Added evidence is provided by the statements of the management representatives, the large majority of whom "declared their intention of retaining their committees in the post-war period".

While not claiming that labour-management committees are "a cure-all for labour problems", or that all of them have been outstanding successes, it is asserted that they have "an impressive list of accomplishments to their credit; they have increased production, lowered costs, and built up understanding and confidence between management and labour". On the other hand, it is emphasized that "committees will fail when honest, sustained effort by management and labour leadership is not forthcoming". It is declared further, that "management and labour representatives must be animated by sincerity of purpose if their joint efforts are to succeed".

The scope and functions of the committee must be clearly defined and understood by both management and labour. It is urged that "a constant flow of problems and direc-

tives from management are as essential to the well-being of the committee as are the suggestions, ideas and studies submitted by labour". Further, the committee must be organized for *action* and be "large enough to be representative, but small enough to be an effective working unit".

Check-up of men on military postponement engaged in agriculture Suspension of call-ups under National Selective Service Mobilization Regulations does not mean that men on postponement of military training for employment in agriculture are now free to engage in other industry, Mr. A. MacNamara, Director of Selective Service, declared recently.

Instructions have been sent to local Employment Offices that any man on postponement to engage in agriculture, who is working in another industry, is to be compulsorily directed back to a farm job.

The Director pointed out that the need for maintaining food production at high level is still very great, and that the farms are still in urgent need of men.

Prosecutions under N.S.S. civilian regulations A total of 114 persons were convicted during May, 1945, of failing to comply with National Selective Service Civilian Regulations. Prosecutions were commenced in 153 cases, as against 129 prosecutions in April when 68 convictions were secured.

The May convictions included 10 against employers, most of whom were found guilty of engaging workers without permits. Of 83 employees convicted, the majority were charged with leaving employment without giving notice of separation, failing to accept high priority work when referred by a Selective Service Officer, and leaving employment to which they had been compulsorily directed by Selective Service.

As the suspension of Army call-ups from May 7 terminated directives to conscientious objectors to report to an Alternative Service Work Camp, few of the 21 conscientious objectors convicted in May were charged with failure to report to a camp. Charges dealt mostly with breaches of camp discipline by conscientious objectors.

At June 1, a total of 250 cases was still pending, 34 being charges against employers, 151 against employees and 65 against conscientious objectors. This represents a slight increase over the end of the previous month in cases pending.

From August, 1942, when prosecutions were first undertaken under National Selective Ser-

vice Civilian Regulations, to June 1, 1945, a total of 2,341 charges have been laid. There have been 1,650 convictions to date, 46 acquittals and 395 cases not proceeded with, and 250 cases not yet disposed of. Up to April 1, 1945, a total of 45,293 cases of reported contraventions of the Regulations had been investigated by Selective Service. Most cases have been adjusted without the necessity of prosecution.

Employment and industrial statistics The latest statistics available reflecting industrial conditions in Canada are shown in the table on page 939.

Figures published by the Dominion Bureau of Statistics on employment indicate that for the fifth successive month there was a downward trend in industrial activity. Data tabulated from 15,232 establishments showed a reduction of 0.8 per cent in the number of employees at May 1 to 1,789,970. A greater percentage decline was recorded at May 1 in both 1943 and 1944, but in the experience of pre-war years this downward trend is seasonal. The decline in employment at May 1 was accompanied by an increase in total payments in salaries and wages of 0.9 per cent. The increase in pay rolls represented mainly a recovery from the lower levels of the previous period due to a loss of time because of the Easter holidays. Per capita weekly earnings were \$32.55 at May 1, \$32 at April 1, and \$32.26 at May 1, 1944.

Comparative figures for the employment index are 175.5 at May 1, 176.9 for the preceding month and 178.2 at May 1 in the years 1943 and 1944. With the exception of these two years the index at May 1, 1945, was higher than in any other May in the record.

A substantial decline was recorded in employment in manufacturing, due in great part to curtailment in iron and steel plants and in the chemicals and textile industries. A marked decline was recorded in logging, although on a smaller scale than at May 1, 1944. Mining and retail trade also were lower, while increases were recorded in transportation, communication and construction.

The index of the physical volume of business indicating the trend in the production and distribution of goods declined from 232.2 in April to 218.6 in May. The comparative figure for May, 1944, was 241.8. The index of the volume of mineral production advanced, but lower volume was indicated by the indexes of manufacturing, construction, electric power production, and by the index of the distribution of goods.

Interim report of Commission on Veterans' Qualifications

technical experience gained while in the Armed Forces, has submitted an interim report to the Minister of Labour, Hon. Humphrey Mitchell, containing a number of recommendations.

A preliminary recommendation concerned co-operation with the new system of re-education centres established by the Department of Labour of the Province of Quebec, and asked that the Department of Veterans Affairs at once take advantage of this system. Effect has already been given to this first recommendation.

The Royal Commission, after observing that the practice varies as among the Navy, the Army and the R.C.A.F., recommends the issue of special documents upon discharge to all members of the Armed Services, indicating occupational and educational standing obtained while in the Services. This recommendation reads as follows:—

That in the opinion of this Commission in order to ensure so far as possible the obtaining of credit in civil life, it is essential that each member of the Armed Forces be furnished with a document covering each course of instruction satisfactorily completed, the time spent in the service in the trade or other work concerned and any supplementary trade which he has acquired.

It is further essential, if such arrangements have not already been made, that the documents handed to each person discharged specify in full detail the rank and appointment and/or trade group held at that date.

The Commission recommends that through the use of Canadian Legion Text Books, by correspondence and in classes, those in the Forces should be assisted in acquiring matriculation or university entrance academic standing. The Commission observes that a good deal has been done in this line overseas, but the recommendation covers members of the Armed Forces in Canada also. The Commission suggests that many who are short of matriculation qualifications would be able to possess further technical and university training upon securing that initial standing.

After calling attention to the "tremendous asset" Canada will possess in the technical training acquired by members of the Armed Services who have been working with new inventions and new techniques, and referring

specifically to aerial photography, the Commission recommends, with a view to effectively utilizing this particular skill:

1. That the Dominion Government recommend forthwith the aerial survey of Canada.
2. That the attention of the universities be directed to the desirability of establishing courses leading to the preparatory acquirements necessary for clinical and engineering photographers.
3. That a combined school be established forthwith by the three Armed Services with the object of training:
 - (a) engineering and clinical photographers if required;
 - (b) personnel in the services who would benefit by further training and might be subsequently employed in governmental activities.

Stressing the present, and probable post-war shortage of teachers throughout the Dominion, the Commission suggests that the situation may be overcome by the training of selected instructional personnel from the three Armed Services; also, of course, this offers work opportunities for veterans. In consequence the Commission recommends on this subject as follows:

Whereas pre-professional reading and study courses are now available through Canadian Legion Educational Services for service personnel who desire to enter the teaching profession and who desire to obtain certain normal school credits for instructional and pre-professional work done while in the service, it is recommended that all who might desire to do so be made aware forthwith of the existence of such courses and that facilities be made available immediately by the Armed Services in order that as many instructors as possible may acquire such civilian credits before their demobilization.

The Commission is impressed with the avenues of employment offered by Canadian industry for persons who are specially fitted for personnel work. It is suggested that among officers and other ranks of the Services many persons will be found with a natural aptitude for posts of this kind, including several who have had opportunity of acquiring practical experience in the Forces. Therefore, the Royal Commission recommends that among veterans those who would seem to be suitable for personnel work should be earmarked, and that they should be given helpful advice in this connection, by counsellors who themselves are veterans. The Royal Commission also recommends "that universities and other educational institutions be invited to set up personnel courses in which the veterans above referred to may be made acquainted with civil requirements, including modern theory and practice, and to grant at the termination of such courses a suitable certificate."

Following its first meeting in Ottawa early in May (L. G., June, 1945, p. 796) the Commission met in Montreal where it has established headquarters and heard a considerable number of witnesses.

The Commission began its series of sittings at the several provincial capitals on June 25 in Toronto, where it conferred with provincial representatives and educational authorities.

Small increase in cost-of-living index The Dominion Bureau of Statistics cost-of-living index advanced from 119.0 on May 1, to 119.6 on June 1, 1945. Further increases in fresh vegetables were mainly responsible for this change. The food index rose from 131.7 to 133.4 between May and June, with substantial increases in fresh vegetables and lesser ones among fresh fruits, eggs, and meats, far outweighing a decline for butter. The clothing index rose fractionally from 122.0 to 122.1 but other group indexes remained unchanged as follows: rent 112.1, fuel and light 106.6, homefurnishings and services 118.9, and miscellaneous items 109.4. The wartime increase in the index has been 18.7 per cent, from 100.8 to 119.6.

Death of Mr. L. E. Westman

The death occurred on July 1, 1945, of Mr. L. E. Westman, who only recently retired as Associate Director of National Selective Service in order to return to private industry.

While serving with National Selective Service Mr. Westman was responsible for labour supply planning in connection with mining and war industries, was Chief Alternative Service Officer, and was also a member of several departmental and inter-departmental committees.

Mr. Westman, a past president of the Chemical Institute of Canada, first joined the Department of Labour in 1942 to assist in the operations of the Wartime Bureau of Technical Personnel. He had planned to return to Toronto, to resume his post of President of the Westman Publications Limited.

In a personal tribute, Mr. Arthur MacNamara, Director of National Selective Service, declared that throughout his association with the Department of Labour Mr. Westman was held in the highest personal regard by all members of the staff.

In the Department, J. F. MacKinnon, Assistant to Mr. Westman for over two years, has been promoted to the position of Associate Director and will take over Mr. Westman's duties. Mr. MacKinnon was formerly an executive with a financial firm at Toronto.

J. W. Willard awarded Harvard Fellowship

It was announced early in July that Joseph W. Willard, M.A., for the past two years on leave with the Canadian Army from the Head Office Staff of the Unemployment Insurance Commission was one of four Canadians who had been awarded Fellowships by the Graduate School of Public Administration of Harvard University.

The fellowships were established for persons with experience in Government who intend to continue such careers. They are tenable for one full academic year for intramural post-graduate study.

Mr. Willard is a graduate of the University of Toronto and for several months early in 1943 was Assistant Editor of the *LABOUR GAZETTE*. Several weeks ago, he was promoted to the rank of Major and is, at present, Executive Secretary of the Canadian Medical Procurement and Assignment Board.

Composition of government-labour legislative committee in B.C.

Reference was made in the June issue of the *LABOUR GAZETTE* (p. 797) to the establishment in British Columbia of a joint government-labour committee to study, and if possible give effect to, the legislative proposals of organized labour.

Information has now been received that the composition of this committee is as follows:

(1) *Representing the Provincial Government and government agencies:* Hon. G. S. Pearson, Minister of Labour (General Chairman); Hon. E. C. Carson, Minister of Mines; Adam Bell, Deputy Minister of Labour; James Thompson, Chief Conciliation Officer, British Columbia; Barrie Goult, Secretary-Registrar, B.C., Wartime Labour Relations Board; J. P. Hogg, Departmental Solicitor; James Dickson, Chief Inspector of B.C. Mines.

(2) *Representing Trades and Labour Congress of Canada:* Birt Showler, Vice-President, T. and L. C.; J. Stevenson, President, Vancouver and New Westminster District Building Trades Council; R. K. Gervin, Chairman, B.C. Executive Council.

(3) *Representing Canadian Congress of Labour:* D. O'Brien, Regional Director of Organization, and President, B. C. Federation of Labour; Harold Pritchett, Secretary-Treasurer, B.C. Federation of Labour; Harvey Murphy, First Vice-President, B.C. Federation of Labour.

(4) *Representing Standard Railway organizations:* H. Elliott, H. Mackey and H. Warde.

Sub-committees were chosen to deal with such matters as the Apprenticeship Act, the Boiler Inspection Act, safety and health, hours of work, labour relations regulations, minimum wages, and workmen's compensation. In addition, the committee as a whole will deal with such issues as education, immigration, rehabilitation and other matters in which labour is especially interested.

**Training
course in
accident
prevention**

Under the auspices of the University of Manitoba Evening Institute, in co-operation with the Manitoba Department of Labour, a training course in industrial accident prevention was given to employees of over forty firms in the winter of 1944-45. The course consisted of twelve lectures covering various aspects of industrial accident prevention. Nine of the lectures were given by Mr. W. Trevor Davies, Director of Safety, Department of Labour, Manitoba, Lectures on the control of electricity, the care of injuries, and the "accident expense account," were given by Mr. E. V. Caton, Chief Engineer of Power Production, Winnipeg Electric Company; Dr. Emmet Dwyer, Regional Medical Officer, Canadian National Railways; and Mr. N. Fletcher, Secretary of the Manitoba Workmen's Compensation Board. The purpose of the course was "to provide practical training in industrial safety and give material which can be applied immediately in plants to decrease accidents and keep production at its maximum by keeping the men at work."

**Training in
Britain for
boys entering
coal mines**

An Order under the Defence Regulations in Great Britain is designed to ensure that boys entering coal mining are given preliminary training and work under supervision and are physically fit for the job. The Coal Mining (Training and Medical Examination) Order, 1944, gives effect to recommendations made by the Committee on the Recruitment of Juveniles in the Coal Mining Industry.

Generally, employment in coal mining is prohibited, except under competent instruction and supervision, of any person who had no experience in the particular class of work before February 1, 1944, until he has been adequately instructed and is competent to do the work without supervision. A person, who, before February 1, 1944, has had no experience of work at the coal face, may not be employed at the coal face, except in South

Wales, unless he has had at least 16 weeks experience below ground in a coal mine.

No person is to be employed below ground, except in South Wales, until he has either (a) spent at least four weeks in the preceding four months at a Coal Mining Training Centre and, in addition, has had at least two weeks' experience of employment in coal mining under competent instruction and supervision, or (b) has had at least six weeks' experience of employment in coal mining under competent supervision and, in addition, has had adequate instruction and training in safe and efficient methods of work below ground.

In South Wales, where boys cannot be employed on haulage, new entrants must have spent at least four weeks at a Training Centre or have had at least four weeks' experience in coal mining under supervision and have received instructions in safe and efficient methods.

The Minister of Labour and National Service may notify an employer of any boy under 18 that arrangements have been made for the latter's medical examination and, after examination, the boy may be employed only in accordance with the Minister's orders.

**Report on
domestic workers
in Great Britain**

A Report on Post-War Organization of Private Domestic Employment, prepared at the instance of Hon. Ernest Bevin, until recently

Minister of Labour and National Services, has recently been made public. It recapitulates the poor status of the domestic worker and proposes sweeping reforms designed to put domestic service on an entirely new footing. The authors are Miss Violet Markham and Miss Florence Hancock.

In order to provide a service that will be available for all sections of the population the report suggests that a National Institute of Houseworkers be established. The functions of the Institute would include provision for training domestic workers for employment at standard rates and under specified conditions. Courses of training would also be available for housewives. Three classes of workers are recommended for training: those desiring full-time employment with one household; those working regularly part-time for one household; and those employed part-time by more than one household. Day work, rather than "living in" is heavily emphasized.

It is also suggested that local authorities might help the low-income mother by means of "home helps"—trained domestic workers who would be available for households where the mother is ill, the cost being recoverable in proportion as the family could repay it.

It is urged that, at the outset, the Institute should have centres in ten or twelve cities with at least one serving an agricultural area. Employers using the Institute would subscribe to its upkeep and charges would be made for workers living at the residential hostels connected with it. In these ways, it is intended to make the Institute self-supporting, except for training, which would be subsidized by the government. Answering the criticism that the proposals would make domestic service too expensive, the report suggests that if it is put on "the proper industrial basis" employers with servants should have income tax relief, just as industrial employers do not pay income tax on their wages bill.

Under the New South Wales Annual holidays legislation in "every worker . . . is entitled at the end of each year of his employment by an employer to an annual holiday of two weeks on ordinary pay. The holiday is to be taken in two consecutive weeks, or by agreement in two separate periods, but not otherwise. It must be taken within six months after the holiday becomes due, but provision is made for the postponement of the taking of such leave where the Industrial Registrar thinks it is desirable."

According to the New South Wales *Industrial Gazette*, "worker," for the purposes of the Act, means "persons employed, whether on salary or wages or piecework rates, or as a member of a butty-gang, and the fact that a person is working on a contract for labour only, or substantially for labour only, or as a lessee of any tool or other implements of production, or as an outworker, or is working as a salesman, canvasser, collector, commercial traveller or insurance agent, or in any other capacity in which he is paid wholly or partly by commission, shall not in itself prevent such person being held to be a worker."

The Act provides further, that payment in lieu of any holiday is not to be accepted by an employee and the employer must give seven days' notice of the date a worker will be required to commence his leave and pay to him in advance his ordinary pay for the holiday period. Ordinary holiday pay shall be paid to the worker where his services are terminated, and where the payment is for less than a year the employer shall pay an amount equal to one twenty-fifth of his ordinary pay for the period of employment.

Should an employee be working under an agreement or contract of employment granting more favourable provisions than those

provided under the Act, such privileges are protected under the terms of the Industrial Arbitration Act.

Social year book of Russell Sage Foundation The Social Year Book, 1945, published by the Russell Sage Foundation of New York was issued early in June. It is a volume of over 600 pages. Part I contains some 75 monographs on a wide range of social questions including adult education, child labour and welfare, employment services, labour standards, unemployment compensation, public health and welfare, vocational guidance, and many others covering a wide range of community services. Part II provides an extensive catalogue of national and voluntary agencies engaged in work designed to promote social and economic betterment in the United States. A carefully compiled index adds to the value of the volume for reference purposes.

The *Social Year Book* is designed to be an encyclopedia of organized activities in social work and related fields. The current issue is the eighth in a series commenced in 1939 and published biennially since 1933. With the exception of two articles, Foreign Relief and Rehabilitation and International Social Work, coverage has been restricted to the United States. However, the research work of the Russell Sage Foundation is of wider than national interest and the volume will be of value to promoters of social welfare in other countries.

E. C. Desormeaux awarded medal by Professional Institute of Civil Service In recognition of administrative ability and research in the field of employment and unemployment, Ernest C. Desormeaux, M.A., L.Sc., LL.D., General Secretary of the Unemployment Insurance Commission was recently awarded a medal by the Professional Institute of the Civil Service of Canada.

Dr. Desormeaux has been General President, Ontario Educational Association; President of the Ontario Trustees and Ratepayers Association; and for 25 years prior to his appointment with the Unemployment Insurance Commission was Business Administrator of the Ottawa Separate School Board. He is Professor of Political Economy and Social Science at Ottawa University.

In addition to these professional qualifications, Dr. Desormeaux submitted a thesis covering his extensive studies of the causes and prevention of unemployment and the evolution of unemployment insurance in European countries, the United States and Canada.

Ninety-fifth Session of Governing Body of I.L.O.

Employment Policy and Future Development of I.L.O. Discussed at Meeting in Quebec

MEETING for the first time on Canadian soil, the Governing Body of the International Labour Office held its 95th session in Quebec City from June 21 to 27, 1945. Representatives of 16 governments were in attendance, as well as 8 workers' delegates and 8 representatives of employers.

On the agenda were questions of employment policy and of the future of the I.L.O. in relation to the new international organization created by the United Nations at San Francisco. The Governing Body also dealt with the finances of the I.L.O., made arrangements for the next International Labour Conference to be held in Paris in October, considered the progress made so far in the development of international industrial committees, and acted on a number of other matters.

Governing Body

Like the International Labour Conference, which is composed of workers', employers' and government delegations from over 40 nations, the Governing Body of the I.L.O. is tripartite in structure. In normal times the Governing Body meets four times a year, plans the agenda of the Conference, and supervises the work of the International Labour Office.

Of the 16 Government seats on the Governing Body, 8 are elective and 8 are held permanently by the nations of chief industrial importance. Canada holds one of the permanent seats. The 8 seats held by workers and the 8 by employers are elective. Canadian workers are represented by Mr. Percy R. Bengough, President of the Trades and Labour Congress of Canada, and employers by Mr. Hugh W. Macdonnell, Legal Secretary, Canadian Manufacturers' Association, who are member and deputy member of their respective groups by virtue of their election at the Philadelphia Conference of the I.L.O. in May, 1944.

The Canadian Government member is Mr. Arthur MacNamara, Deputy Minister of Labour. Mr. MacNamara was accompanied to Quebec by Mr. Alfred Rive, Chief of Special Division, Department of External Affairs, official substitute member; Mr. Paul Renaud, Counselor, Legal Division, Department of External Affairs, and Mr. Eric Stangroom, Department of Labour, who also acted as substitutes; Mr. John Mainwaring, Department of Labour,

information officer, and Mr. J. George, External Affairs, secretary.

Hon. Humphrey Mitchell attended the opening session in his capacity as Minister of Labour and formally welcomed the members of the Governing Body.

Opening of Session

Opening the 95th session Mr. Carter Goodrich, Chairman of the Governing Body and United States Government member, welcomed the presence of former members of the Governing Body who had suffered in their own countries in Europe during the war. He mentioned in particular Mr. Leon Jouhaux, the French trade union leader, who no more than six weeks previously had been in a German concentration camp, and Mr. Justin Godart, French Government representative.

Messages from the Prime Minister of Canada and the President of the United States, affirming their countries' support of the I.L.O., were transmitted to the delegates.

The Prime Minister's message, which was read by Hon. Humphrey Mitchell, stated in part:

The threat that labour might be enslaved in a world dominated by fascism has been removed, and the high purposes for which the International Labour Office exists are once more fully capable of being realized.

The responsibilities which lie upon you are indeed unusually heavy, for in the great economic and social effort which will be required for the transition to peace, after the war against Japan has been brought to a successful conclusion, your activities can be of immeasurable importance in helping to assure the maintenance of beneficial labour conditions and wise labour relations . . .

The people of Canada will have every sympathy with the objectives which have brought you to this meeting, and I am happy to extend these greetings on their behalf as well as on behalf of the Government.

I know that they will follow with interest and concern not only the meetings of this Governing Body, but also the progress of the International Labour Office in all its activities.

Welcoming the delegates, the Minister of Labour declared that the contribution made by the I.L.O. had been the best of the machinery which was set up following the first great war. "I am confident," he added, "that this Body has an important and permanent place in the

world when the present struggle finally ends."

Referring to the Prime Minister's message he declared that the Rt. Hon. W. L. Mackenzie King had been a pioneer in the development of social measures in Canada, and that his contribution to the welfare of working men and women and his unflinching support of labour organizations was a matter of public record.

He expressed the hope that with the conclusion of the war in the Pacific, co-operation on the part of the United Nations would ensure peace for generations to come. (The text of the Minister's speech appears at the conclusion of this article.)

Hon. Antonio Barrette, Minister of Labour of the Province of Quebec, welcomed the Governing Body on behalf of his Government.

Following a tribute to the late President Roosevelt by Mr. E. J. Phelan, Acting Director of the International Labour Office, the Governing Body stood in silence as a token of respect to his memory.

Miss Frances Perkins, United States Secretary of Labour, expressed her appreciation of this tribute, and said that the purposes of the I.L.O. had been very close to the heart of the late President. Continuing, she said: "President Truman has asked me to come here and assure you of the continuation of the U.S.A. policy towards the I.L.O. He has asked me to say to you that the Government of the United States will continue to take full part in the work of the I.L.O. and will continue to look to the I.L.O. for leadership on the international plane in the improvement of labour standards and the development of measures to combat poverty everywhere."

Employment

Policies to maintain high employment and questions relating to the employment of disabled persons were discussed by the I.L.O. Employment Committee which met on June 15 and 16 and reported to the Governing Body.

Disabled Workers—In response to instructions given at the previous Governing Body meeting in London last January (L.G., April, 1945, p. 555) the International Labour Office is preparing a report on the training and employment of disabled workers. The report will consist of a comparative survey of national policies and methods for meeting the special problems of disabled workers.

The Committee was of the opinion that this report should be completed if possible before the next session of the Conference. It requested the Office that particular attention be paid in the report to the vocational guidance of disabled persons at the earliest possible stage in their medical treatment, in view of the

psychological effect of disablement. It also asked for data on the employment of disabled persons, in appropriate cases, under "sheltered conditions."

Employment Policy—The problem of maintaining high levels of employment during the period of industrial reconversion, which is on the agenda of the next session of the Conference, was the subject of preliminary discussion both by the Employment Committee and by the Governing Body. A report on the subject, which is being prepared by the Office, was outlined for the Governing Body.

During the discussion it was suggested that the I.L.O. might be exceeding its competence if it dealt with the economic aspects of employment. Mr. L. Dupriez, Belgian Government delegate and chairman of the Employment Committee, said however that although the Office report would deal primarily with the labour market aspects of employment economic aspects would also necessarily be considered. It was also pointed out that under the terms of the Philadelphia Charter the I.L.O. has the responsibility to "examine and consider" international economic policies.

The desirability that full employment be attained without sacrifice of freedom was stressed in some speeches, the British employers' delegate, Sir John Forbes Watson, pointing out that although a slave state could establish full employment by ordering everybody into jobs free countries had to attain the goal in a different way. The degree of government intervention that would be necessary to make a full employment policy effective formed the basis of considerable discussion. Contrasting views were expressed by two of the workers' delegates, Mr. Robert Watt, U.S.A., who favoured a minimum of government action, and Mr. Jacobus Oldenbroek, Netherlands, who pointed out that conditions varied from country to country, and said that in his country an extension of "collective enterprise" would be required for the rehabilitation of industry. Mr. V. Lombardo Toledano, Mexican workers' delegate, asked that the I.L.O. pay more attention to the industrialization of less developed countries (such as China, India, and those of Latin America) in order to provide larger markets for higher developed countries and thus aid employment internationally.

During the discussion Mr. Arthur MacNamara, Canadian Government delegate, outlined the White Paper, *Employment and Income*, in which the Canadian Government sets forth its post-war employment policy. (The text of Mr. MacNamara's statement appears at the conclusion of this article.)

Employment Recommendations—The Employment Committee prepared draft forms by means of which governments will be asked to report to the I.L.O. on the Employment Recommendations adopted at the Philadelphia Conference last May. These Recommendations deal with employment organization in the transition period. They contain a set of general principles together with specific proposals in regard to the re-employment of service personnel and workers in war industry, establishment of an efficient national employment service, a fair demobilization plan, a broad vocational training and apprenticeship program, and the special employment problems of young workers, women and disabled persons. Governments will be asked to report on each section of the Recommendations as to whether they have accepted the principle wholly or partly, and if so, the position in their country concerning the application of the principle.

The report forms were approved by the Governing Body.

Constitutional Questions

The future of the I.L.O. in relation to the new international organization set up by the United Nations at San Francisco was discussed in meetings of both the Committee on Constitutional Questions and the Governing Body.

The need for constitutional change stems from the fact that the I.L.O. has up to the present been part of the organization of the League of Nations. Created by the Peace Treaties of 1919 for the purpose of improving the conditions of the workers of the world through international agreement, and unique among international organizations by virtue of its tripartite structure, the I.L.O. has occupied the position of an autonomous body within the organization of the League.

As the second world war began to draw to a close, and new arrangements for international co-operation began to be evolved without provision for the continuation of the League of Nations, it became necessary to consider the place that the I.L.O. would occupy in the new framework of international organization.

Accordingly, the matter was placed on the agenda of the Philadelphia Conference in 1944. On the instigation of the Canadian Government delegates, the Conference adopted a resolution affirming the desirability of close collaboration between the I.L.O. and other international organizations (which at that time included UNRRA and the United Nations Food Commission), and establishing a committee to consider the future constitutional development of the I.L.O.

This Committee on Constitutional Questions held its first session last January in London, prior to the 94th session of the Governing Body under the chairmanship of Mr. Paul Martin, Canadian Government delegate.

By this time the Dumbarton Oaks conversations had been held and the pattern of world organization had begun to take shape. The Committee adopted a resolution, which was approved by the Governing Body, welcoming the progress made at Dumbarton Oaks and affirming the desire of the I.L.O., with its tripartite structure, for association with the new general international organization.

Subsequently the San Francisco Conference was convened. The Government of the United States, as host government, suggested that the I.L.O. be represented for informal consultation, and a small delegation representing the government, employers' and workers' groups and the Office proceeded to San Francisco.

This delegation, in reporting to the Constitutional Committee on June 16, pointed out that there had been no negotiations in the proper sense of the term between the I.L.O. and the new organization at San Francisco "for the simple reason that the new organization did not yet exist."

However the delegation attended the discussions of the competent committee of the Conference, and stated the position of the I.L.O. This was that the I.L.O. needs and desires, within the new framework, enough freedom of action to discharge its responsibilities

and particularly to assure that the voice which the workers and employers exercise in world affairs through the International Labour Organization remains a real one

and in general that the position of the I.L.O. in relation to the new organization should be not less favourable than that which it occupied in relation to the League of Nations.

During the course of the San Francisco Conference, the principles and procedures which will govern the relations between the I.L.O. and other specialized organizations and the general United Nations Organization were worked out. The relationship will be established by agreement; and negotiations will take place between the Economic and Social Council of the United Nations Organization on the one hand, and the specialized organization concerned on the other.

After examining the report of the I.L.O. representatives at San Francisco, the Committee on Constitutional Questions came to the conclusion that the I.L.O. can face the future with confidence "because it derives its authority and its vitality from the fact that, being tripartite in character, it is more broadly

based than any purely inter-governmental organization and because it continues to enjoy the support of the governments, employers and workers of its members." However the I.L.O. should "show special vigilance during the formative stages in the development of the new framework of world organization, and should pursue with vigour and efficiency its indispensable work and take effective steps to make that work and its value more fully known and understood throughout the world."

It was agreed further to be of the greatest importance that the I.L.O. should continue to seek the fullest co-operation of all of the United Nations.

The report of the Committee was approved by the Governing Body, and the mandate of the I.L.O. negotiating committee¹ to put forward the desiderata defined at the London session last January was reaffirmed.

Re-equipping and Remodelling of the I.L.O.

—The Committee also had a lengthy and important discussion on internal changes that are expected to be brought about in the I.L.O. in the light of a quarter of a century of experience. No conclusions were reached at this session, but the Office was asked to prepare a report on the various constitutional proposals made at the Philadelphia Conference and at the London and Quebec sessions of the Committee.

During the debate on this topic by the Governing Body some of these proposals were made public.

Two of the suggestions had to do with representation at I.L.O. Conferences. At present each country is entitled to send two government representatives, one worker, and one employer. Mr. Lombardo Toledano, Mexican workers' delegate and president of the Confederation of Latin-American Workers (CTAL) proposed that the workers' representation be increased to two. Such a change, he said, would be particularly convenient in a country where there were two central labour organizations. Mr. Henri Fuss, Belgian Government, supported this proposal and suggested that the principle be also applied to employers, enabling one employers' delegate to represent private enterprise and another socialized enterprise.

Considerable attention was given to the matter of International Labour Conventions. Conventions and Recommendations are adopted at sessions of the Conference, requiring a two-thirds majority of the votes cast by the delegates. They are not binding unless ratified by governments, but each member state is obligated to bring them within 12 months of their adoption¹ before the "authority

or authorities within whose competence the matters lie," for the enactment of legislation or other action. Since 1919 the Conference has adopted 67 draft Conventions, which have received approximately 900 ratifications by member countries.

Mr. Waline, French employers' delegate, advocated steps to secure a greater number of ratifications. He said that there should be a recognized moral obligation on the part of a country to ratify a Convention it had voted for at a Conference; and that countries which failed to do so should be required to report their reasons to a subsequent session of the Conference, with the possible outcome that the Convention would then be revised to make it acceptable to a larger number of countries. Mr. Toledano was of the opinion that the votes of governments should be binding. Sir John Forbes-Watson, British employer, expressed the view that Conventions sometimes represented too high a standard of labour policy for all countries to be in a position to ratify them, and that a more practical policy would be to have them represent minimum standards. Mr. E. J. Phelan, Acting Director, declared that the I.L.O. should not be judged solely by the ratifications of Conventions, pointing out that the Organization had served the people well and that conditions in backward countries had improved since the I.L.O. came into being. He questioned whether the new international organizations would achieve any better ratification record and considered that public opinion would constitute the strongest sanction on governments to improve their standards. Mr. Phelan also pointed out that the I.L.O. had already undertaken a considerable degree of remodelling, as evidenced by its plans for industrial committees and regional conferences.

Several delegates stressed the desirability that the U.S.S.R. should resume participation in the I.L.O., and that the five Latin-American countries which have not yet joined be encouraged to do so. Mr. Watt reminded the delegates that a unanimous invitation had been extended to the U.S.S.R. by the Governing Body in London in December, 1943.

Delegates were unanimous in their support of the tripartite structure of the I.L.O.

The Constitutional Committee received a telegram from Hon. Paul Martin, regretting that he was unable to continue his chairmanship of the Committee owing to his new duties as Secretary of State of Canada. Mr. Martin expressed the conviction that the I.L.O. would occupy a position of growing importance in the new world organization. The Committee elected as its new chairman Mr. Carter Goodrich, U.S. Government, who is also chairman of the Governing Body.

¹ or in exceptional cases 18 months

Industrial Committees

A brief discussion took place on the progress that has been made towards the establishment of international industrial committees. It had been previously decided that these tripartite committees would be established in the following seven industries: inland transport, textiles, coal mining, iron and steel production, the metal trades, petroleum production and refining, and building, civil engineering and public works.

The function of these committees will be to consider the special circumstances and problems of the industries concerned. Proposals may be formulated for international standards concerning the regulation of wages, conditions of employment and welfare arrangements in the various industries. These may be given effect through the adoption of International Labour Conventions, or through the negotiation between employers and workers of collective agreements of an international character.

Governments have been asked to consult with employers' and workers' organizations and to inform the Office by July 15 of the number of representatives they consider it appropriate to appoint to each committee from their respective countries. Canada will be one of the countries represented on each committee.

The Governing Body will itself have tripartite representation on the committees. At the Quebec session the government and workers' groups each appointed their representatives, but the employers' group deferred submission of its nominations. A Canadian Government delegate will represent the Governing Body on the committee dealing with the metal trades, while Mr. Percy Bengough will represent the workers' group on the building committee.

Final preliminary action in setting up the committees is anticipated at the next session of the Governing Body in October, and it is expected that two of the committees, those dealing with coal mining and inland transport, will hold their first meetings in December. The others are expected to be functioning before the 1946 session of the Conference. The Office is drafting preparatory reports for these meetings.

Future I.L.O. Meetings

The most important of these is the next committees, the Governing Body planned a number of other I.L.O. meetings for the coming months.

The most important of these is the next general session of the International Labour Conference. On the invitation of the French Government this, the 27th Session, will open

in Paris on October 15. It will be preceded by a meeting of the Governing Body on October 10.

It was agreed that invitations to the Paris Conference should be extended to signatories of the San Francisco Charter who are not members of the I.L.O. to be present as observers.

A Preparatory Technical Maritime Conference will open in London on November 15, to be followed early in 1946 by a maritime session of the International Labour Conference.

On the invitation of the Mexican Government an American Labour Conference will be held in Mexico City in the spring of 1946. Two such conferences of American countries which are members of the I.L.O. have previously been held, in Santiago, Chile in 1936, and in Havana, Cuba in 1939, at both of which Canada was represented. It was agreed that the agenda for the Mexico conference would include social and economic problems, especially in connection with the industrialization of less-developed countries, vocational training, labour inspection and labour relations. American countries which are not at present members of the I.L.O. will be invited to send observers.

The Governing Body is sending a tripartite delegation to another meeting in Mexico City, that of the Inter-American Committee on Social Security to be held on July 23, 1945. At this meeting it is expected that a date will be set for a second session of the Inter-American Conference on Social Security, which held its first meeting in Santiago in 1942.

The Governing Body discussed plans for a further extension of the regional activities of the I.L.O. In addition to the American meetings mentioned above, preparations are being made for two other regional conferences, one in South-East Asia, and the other in the Near and Middle East. These will be held when conditions permit.

Finance

The Governing Body gave approval to a budget of 11,521,510 Swiss francs¹ for the work of the Office in 1946, as compared with 11,525,505 Swiss francs in 1945.

Italy and the I.L.O.

The Governing Body agreed to refer the formal application of the Italian Government for readmission into the International Labour Organization to the Paris Conference, and expressed the hope that it would be favourably received. A number of delegates spoke in favour of readmission of Italy. Mr. Henri Hauck, French Government delegate, said that

¹ \$2,880,377

although France could not forget the circumstances under which Italy entered the war, she wished to support the democratic forces in Italy and would vote for her readmission.

An application from Iceland for membership in the I.L.O. will also be placed before the next session of the Conference.

Representation of Federal States at Conference

A proposal made by Mr. Paul Martin, Canadian Government delegate, at the previous session of the Governing Body, to the effect that the Government of a federal country be permitted to appoint representatives of a state or province to accompany its delegation to the Conference, was incorporated in a revision of the Standing Orders approved by the Governing Body for transmission to the Conference.

Other Activities of Governing Body

The Governing Body also approved forms for annual reports by governments on the

application of six Conventions that have come into force since the outbreak of war as a result of their ratification by the requisite number of countries; decided to set up a consultative committee on labour provisions in the peace settlement, consisting of the nine members of the I.L.O. negotiating committee; agreed to reconstitute the Permanent Agricultural Committee with a limited membership for two years; and decided that the Factory Safety Code Committee should meet in Montreal in August.

Thanks were expressed to the Canadian Government and to the Province of Quebec for their hospitality and for the facilities and entertainment that had been accorded the delegates.

A dinner was given for the Governing Body by the Government of Canada at which Hon. Humphrey Mitchell presided. The Government of the Province of Quebec also gave a dinner for the delegates.

Speech of Honourable Humphrey Mitchell, Minister of Labour

Mr. Chairman and members of the Governing Body of the International Labour Office, I wish to convey to you a personal message from the Right Honourable W. L. Mackenzie King, Prime Minister of Canada.

Message from The Prime Minister

It gives me great pleasure to extend to the members of the Governing Body of the International Labour Office a most sincere welcome to Canada, and to express both the hope and the expectation that your deliberations in Quebec will be harmonious and fruitful.

This moment in history, when peace has been restored to large sections of the world, and when the freedom of labour to organize under its own leadership has been vindicated, is a significant one for this meeting.

The threat that labour might be enslaved in a world dominated by fascism has been removed, and the high purposes for which the International Labour Office exists are once more fully capable of being realized.

The responsibilities which lie upon you are, indeed, unusually heavy, for in the great economic and social effort which will be required for the transition to peace, after the war against Japan has been brought to a successful conclusion, your activities can be of immeasurable importance in helping to assure the maintenance of beneficial labour conditions and wide labour relations . . .

The occasion of the meeting in Canada of the Governing Body of the International Labour Office is one of particular gratification to me personally.

For many years I have observed in this country the growth of a body of legislation and of administrative services which seek to improve the conditions of labour, and I have also had some part in these developments.

A structure of Labour Unions has been created by the workers of Canada through which they obtain energetic and constructive leadership, and between these organizations and the representatives of employers and the Government, a network of relationships has been established by which the progressive betterment of the position of labour is ensured.

The people of Canada, therefore, will have every sympathy with the objectives which have brought you to this meeting, and I am happy to extend these greetings on their behalf as well as on behalf of the Government.

I know that they will follow with interest and concern not only the meetings of this Governing Body, but also the progress of the International Labour Office in all its activities.

As you are all aware, our Prime Minister has been a pioneer in the development of social measures in the Dominion of Canada. He was our first Deputy Minister and 37 years ago he became Minister of Labour.

His contribution to the welfare of the working men and women and his unfailing support of labour organizations is a matter of public record in this Dominion.

In his book "Industry and Humanity", written over a generation ago, one can read the

unfolding pattern of the advancement of social legislation in Canada which has been an example to other forward looking countries. Its pages reflect a practical approach to the problems of industry by a great humanitarian.

Speaking for myself as Minister of Labour, I wish to add my welcome to the members of the Governing Body assembled in this historic and ancient capital of Canada which has been the scene of many gatherings of world-wide importance. It was here that the planning took place which led to the crushing of fascism in Europe and, we all hope, the speedy destruction of its counterpart in the Pacific.

At Philadelphia last year I made this observation. "Let us clearly understand that our primary duty is the destruction of the greatest menace that has ever confronted mankind. No other consideration must stand in the way."

With the inevitable completion of the final phase in the Pacific, the task will be well done. I do hope that we will show better judgment than at the conclusion of the last war and that co-operation on behalf of the United Nations will insure peace for generations to come. In this regard we must make sure that the courageous men who made victory possible will be charged by their respective peoples with carrying out the policies which will lead to world stabilization and progress.

The I.L.O. has had 25 years' experience in handling international gatherings and has a

staff of trained personnel of many nationalities. This experience should be drawn upon by the other international bodies at present being set up to meet the problems which are ahead.

The Canadian delegation at Philadelphia last year, along with others, suggested that in taking on of new staff consideration should be given to men who had fought with the Armed Forces of the United Nations.

I am very glad to learn that yesterday the Governing Body of the I.L.O. unanimously agreed on this policy. It is in line with the established practice of the Canadian Government, giving recognition to the men and women who made possible the maintenance of freedom for coming generations.

I have never been one who has avoided harsh facts. I have always stressed the necessity for dealing with stark realities. I would be the last to suggest, therefore, that our course in the next few years will be easy.

The contribution made by the I.L.O. has been the best of the machinery which was set up following the first great war. I am confident that this Body has an important and permanent place in the world when the present struggle finally ends. I wish you the fullest measure of success in your deliberations and will watch with interest, as an ardent supporter of the I.L.O. since its inception, the outcome of this vital gathering of the Governing Body.

Statement by Mr. Arthur MacNamara

Declaring that Canada had made progress towards the goal of full employment set forth in the Philadelphia Declaration adopted by the I.L.O. in 1944, Mr. Arthur MacNamara outlined the White Paper containing Canada's policy for the initial period of reconstruction recently presented to Parliament. He said:

In our White Paper the Government formally announces as a primary object of policy the maintenance of a "high and stable level of employment and income." Our goal is total employment somewhat below the abnormally high wartime level, but considerably in excess of the pre-war level, the actual estimate being about a million jobs more than in 1939.

The Paper classifies the forms of spending which produce remunerative employment as follows: (1) export trade; (2) private investment in plant, equipment, and other capital goods; (3) consumer expenditures; and (4) government expenditures.

In analyzing plans for stimulating expenditure in each of these four categories, the

Paper makes it clear that the Government expects employment to be provided primarily by private business.

In regard to the first category of spending, export trade, the Government will support every possible form of international co-operation, looking to the improvement of world trade and international prosperity. We support the Bretton Woods agreement, and we look to the reciprocal reduction of trade barriers. The Prime Minister is today in San Francisco for the purpose of committing Canada to give full support to the new United Nations Charter.

In regard to category 2, private investment from within the country, we anticipate no immediate difficulty. There is a tremendous backlog of capital expenditure to be made and while safeguarding against an inflationary boom, we will do everything possible to speed up reconversion. Our wartime restrictive tax policy will be replaced by a policy designed to encourage investment. Our Industrial Development Bank will assist

small and new enterprises. We are also anticipating and encouraging great expansion in housing.

Policies for the stimulation of consumer expenditure (category 3) will not be appropriate in the immediate post-war period, since the danger is that spending by civilians may tend to out-run our capacity to produce goods and services. Our concern will be to see that the backlog of consumer demand leads to increased production and not to sharply rising prices.

However, measures are required to offset dislocations affecting individuals in the transition period and in this connection we have such social security provisions as unemployment insurance and family allowance. We also have veterans' benefits which compare favourably with any in the world, while price support acts will aid our farming and fisheries industries.

Dislocations affecting whole communities, caused by the cancellation of war contracts, will be met by special and rapid attention to housing and public works in the areas concerned.

Further social security measures such as contributory old age pensions and health insurance will help in the future to stabilize consumer income and expenditure and are part of the Government's program.

The proposals in regard to government expenditure, the final category of spending, are perhaps the most interesting in the Paper.

We intend to follow the policy—for which there is as yet no working model in any

country—of varying government expenditure so as to compensate for fluctuations in private spending. To this end the Dominion will seek provincial and municipal co-operation in accumulating a "shelf" of employment-giving public works projects. Supplementing this will be a policy of public investment in natural resources, which, we expect, will induce private investment and not supplant it.

In regard to fiscal policy, the Government will be prepared to incur deficits—either through increased spending or through reduced taxation—in periods when unemployment threatens. These deficits will be made up in periods of buoyant employment and income.

These are merely the highlights of our White Paper. It mentions the need for a high degree of mobility of labour and, since it affects my own department, I might add that the Paper pays attention also to the importance of our National Employment Service and of our training program.

Mr. MacNamara then dealt briefly with wartime manpower controls in Canada. These controls would rapidly become a thing of the past, and the employment offices which had exercised direction would give service as free employment offices "out of which will be built—we are determined—an employment service which will compare favourably with any in the world." He expressed belief that employers and employees would willingly use the offices because of the efficient service that would be given. An accurate and complete record would be maintained of applicants for employment, vacancies and placements.

Decisions Of National War Labour Board

DURING the month of June, the National War Labour Board issued decisions in the following cases:—

Duclos and Payan, Limited, and Le Syndicat National des tanneurs et corroyeurs de St. Hyacinthe, Inc.

Eastern Furniture, Limited, J. W. Kilgour and Bro., Limited, Montmagny Furniture Limited, and Edouard Ouellet, Limitée, and Les syndicats nationaux catholiques des travailleurs du meuble de Victoriaville, Coaticook, Montmagny and Daveluyville, P.Q.

National Steel Car Corporation, Limited, and United Steelworkers of America, Local 2352.

Canadian Liquid Air Company, Limited, Vancouver, B.C., and Boilermakers and Iron Shipbuilders Union of Canada, Local No. 1.

The Bell Thread Company, Limited, Hamilton, Ont., and the Canadian Thread Makers' Union.

Modern Tool Works, Limited, Toronto, Ont. H. R. Crockett, Limited, Summerside, P.E.I.

Dominion Steel and Coal Corporation and United Steelworkers of America, Local 1064.

Twentieth Century-Fox Corporation, Toronto, Ont.

Courtaulds (Canada) Limited, Cornwall, Ont.

Canada Packers, Limited.

Northern Public Service Corporation and Winnipeg Heating Company, Limited, and the Winnipeg Central Labour Council—One Big Union.

Prince Albert Manufacturing Company, Limited, and Prince Albert Woodworkers' Union.

Regina Sash and Door Company, Limited, and National Union of Woodworkers, Local No. 7.

Modern Packers, Limited, and Montreal Packing Plant Employees' Federal Union, Local 66.

Burrard Dry Dock Company, Limited, North Vancouver, B.C., and Sheet Metal Workers' International Association, Local 280.

Canadian Industries, Limited (Windsor Works), and United Automobile Workers of America, Local 195.

Re: Duclos and Payan, Limited, and Le Syndicat National des tanneurs et corroyeurs de St-Hyacinthe, Inc.

Reasons for Decision

An appeal by the Company from a decision of the Regional Board for Quebec dated January 16, 1945, directing a general hourly increase of 5 cents to employees in its division manufacturing shoe counters. The increase was ordered effective from the date of the union's original application, namely February 10, 1944.

In substance, the Company's argument is that it is now paying the rates prescribed by provincial minimum wage ordinance No. 7 governing this industry plus the mandatory cost of living bonus, and that the increase will place it at a disadvantage in competition with other counter manufacturers. We share the view of the Regional Board in respect to this contention and we are of the opinion that minimum rates, because they are established by provincial law, are not thereby placed out-

side of enquiry as to whether there exists a "gross inequality or a gross injustice" within the meaning of section 20 (1) (a) of P.C. 9384. The Regional Board for Quebec was cognizant of all the relevant facts pertaining to the industry and we are not prepared to say that the increase was not justified under the Order.

With respect to the question of retroactivity, it does not seem to us that the decision should go back to February 10, 1944. An examination of the proceedings below reveals that the original application was not supported by the necessary details and that it was not completed until sometime in August, 1944, after the Union had been certified as the bargaining agency. Our conclusion is that the increase should be effective from September 1, 1944. Except as to this, the appeal should be dismissed.

June 1, 1945.

**Re: Eastern Furniture, Limited, J. W. Kilgour and Bro. Limited,
Montmagny Furniture, Limited, and Edouard Ouellet, Limitée, and
Les syndicats nationaux catholiques des travailleurs du meuble
de Victoriaville, Coaticook, Montmagny and Daveluyville, P.Q.**

Reasons for Decision

These four appeals were heard together and are from decisions of the Regional Board for the province of Quebec dated October 24, 1944 directing a general hourly increase of 2½ cents to production employees of the appellant-companies, except in the case of the Kilgour Company's plant in Coaticook where the increase was 3 cents. The question of vacations with pay which figured in the proceedings below is not in dispute in this appeal. Leave to appeal was granted by the Regional Board.

The argument for the appellants centred largely on the contention that the Furniture Manufacturers' Association and La Fédération Nationale Catholique du Meuble were negotiating certain amendments to the decree relating to the furniture industry following certification under the provisions of the Labour Relations Act (S.R.Q. 1941, chapter 162A), and that the Regional Board's decisions should not have been made while these discussions were taking place.

The discussions referred to may eventually bring about modifications in the minimum rates of wages prescribed by the decree if the necessary statutory steps are taken under the Collective Agreement Act (S.R.Q. 1941, chapter 163), and the provincial authorities pass the required order in council. But, while the

Wartime Wages Control Order (P.C. 9384) is in effect, the provisions of that Order must be complied with and they are in a sense paramount in respect of wage matters. Section 11 of the Quebec Labour Relations Act does, it is true, impose upon associations recognized by the Labour Relations Board the duty to negotiate under certain conditions "for the purpose of making a collective labour Agreement", but, while present wage control is in effect, a wage increase is one term of a proposed agreement concerning which parties need not negotiate, without, it seems to us, violating the spirit of the provincial statute.

As to the increases themselves, we come to the conclusion that the Regional Board's decisions should be upheld, subject to the following:

(1) the increase in the case of the Kilgour Company shall be 2½ cents per hour, no reason having been given for the larger increase directed by the Regional Board;

(2) the decisions shall respectively be retroactive to the date upon which the syndicate was recognized by the Quebec Labour Relations Board as representing the employees, or the date of the application to the Regional Board, whichever is the later.

Otherwise, the appeals are dismissed.

June 6, 1945.

**Re: National Steel Car Corporation, Limited, and United Steelworkers
of America, Local 2352**

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for the Province of Ontario, dated February 26, 1945, by which the said Board directed an increase in wage rates for female heaters and stickers from 47½ cents per hour to 50 cents per hour while working on day work rates. The appellant Union asks that the rates be 59½ cents per hour—the same rates as are paid to male heaters and stickers while on day work rates.

For about one week every two months during the changeover from one order to another piece-work rates are suspended and day rates are paid. The argument before us had to do

mainly with the question as to whether during this changeover period the female heaters and stickers did the same amount and type of work as the male heaters and stickers.

The Regional Board had the benefit of a report from a special investigator as to the facts in dispute and apparently adopted it. We are of the opinion under these circumstances that the Regional Board correctly appreciated the facts and the application of the governing order and that its decision should not be disturbed.

The appeal, therefore, will be dismissed and Finding and Direction will issue accordingly.

June 8, 1945

Re: Canadian Liquid Air Company, Limited, Vancouver, B.C., and Boilermakers' and Iron Shipbuilders' Union of Canada, Local No. 1.

Reasons for Decision

The Union appeals from a decision of the Regional Board for British Columbia dated January 22, 1945, refusing to allow the following request for premium pay for off-shift work:

- (1) Nine hours pay for 7½ hours work on the second shift;
- (2) Nine hours pay for 7 hours work on the third shift.

The system of bonus hours for off-shift work was first introduced, by Order in Council P.C. 3636 of May 1, 1942, to meet special conditions existing in the Pacific Coast shipyards. According to the information contained in the

Union's brief, it would seem that the practice was extended by the Regional Board to certain other employees whose operations through sub-contracts had presumably become shipyard operations. Although at the moment a large proportion of the products manufactured by the respondent are used in shipbuilding, the Company cannot be said to be engaged in shipbuilding.

In any event our view is that this system of bonusing off-shift work does not prevail in industry generally, and we are in agreement with the decision of the Regional Board.

June 14, 1945.

Re: The Bell Thread Company, Limited, Hamilton, Ont., and the Canadian Thread Makers' Union.

Reasons for Decision

This is an appeal by the Union from a Finding and Direction of the Ontario Regional Board dated February 19, 1945, leave to appeal having been granted by that Board.

The application was for a general wage increase of 10 cents per hour, overtime pay, a bonus for night work and an extended holidays with pay plan.

Following a hearing and presentation of all relevant information with respect to the company's classifications and wage rates as compared with those prevailing in comparable firms, the Regional Board increased the rate for firemen or fourth class engineers, but found that there was no case of a "gross inequality or gross injustice" existing upon which a deci-

sion could be founded granting a general wage increase. Overtime pay at time and one-half was directed for work after 48 hours in the week and penalty pay at the same rate for work performed on Sundays, and the six wartime statutory holidays.

On this appeal, the Union stresses that the rate for certain employees in the dye house, others doing maintenance work and other individual employees should have been increased. We have examined all of the material filed with this Board and with the Regional Board, and have come to the conclusion that it has not been shown that the decision under appeal should be modified.

The appeal is, therefore, dismissed.

June 14, 1945.

Re: Modern Tool Works, Limited, Toronto, Ont.

Reasons for Decision

This is an appeal from the Ontario Regional Board who, by decision dated March 26, 1945, refused to authorize an increase in the wage rate for the Company's "Chief Electrician" from \$1 to \$1.20 per hour. The present rate of \$1 was established pursuant to a Finding and Direction of the said Regional Board for Journeymen Electricians. The Company represents that most of this employee's time is spent on wiring of the various types of machinery designed and built by the Company and that his qualifications are higher than those

of ordinary maintenance or journeymen electricians.

On the strength of the representations made to this Board by the Company as to the nature of the work performed by the employee classified as "Chief Electrician", we are of the opinion that the increase asked for should have been allowed, and we therefore approve the rate of \$1.20 per hour for the occupational classification of "Chief Electrician" from the date of application, namely, September 1, 1944.

June 14, 1945.

Re: H. R. Crockett, Limited, Summerside, P.E.I.*Reasons for Decision*

This is an appeal from a decision of the Regional War Labour Board for Prince Edward Island dated March 8, 1945, whereby that Board refused an application for permission to increase the wage rates of its Manager and Salesman from \$2,107 to \$2,800 per year.

The Regional Board having found that there was no gross inequality or gross injustice existing in the present rates, and having exercised its discretion in the matter, we must conclude that there is no evidence of a positive character that that discretion was wrongly exercised.

The appeal must therefore be dismissed.

June 14, 1945.

Re: Dominion Steel and Coal Corporation and United Steel Workers of America, Local 1064*Reasons for Decision*

This is an appeal from the decision of the Regional War Labour Board of Nova Scotia refusing the application by the Union in which it sought the following:

- (1) A minimum rate of 55 cents per hour, exclusive of cost of living bonus, to all eight-hour employees over 18 years of age being paid hourly, tonnage or piece-work rates, or a combination of such rates, which result in present earnings of 50 to 51 cents per hour, exclusive of cost of living bonus;
- (2) Increases of 4 cents per hour to all other eight-hour employees over 18 years of age and similarly paid;
- (3) Corresponding increases to all other employees working shifts of more than 8 hours;
- (4) All increases to be retroactive to June 26, 1943.

The application was dated April 26, 1944, and was heard by the said Regional War Labour Board on the 19th day of June, 1944, and the 13th day of November, 1944. Arguments at great length and in great detail were presented to the said Regional War Labour Board, both for and against the said application, and this Board is satisfied that the said Regional War Labour Board gave careful study and close scrutiny to all phases of the said application and to the arguments of both employer and employees.

On behalf of the Union it was urged that inasmuch as pursuant to Order in Council P.C. 689 a common basic wage rate of pay was established for the employees of the Algoma Steel Corporation, Limited, and Dominion Steel and Coal Corporation, therefore, the employees of Dominion Steel and Coal Corporation were entitled to have their basic wage rates further increased by the same amounts as those awarded by the Regional War Labour Board of Ontario to the employees of Algoma Steel Corporation, Limited, on the 31st day of March, 1944. With respect to this argument, this Board points out, first, that the decision, the subject of this appeal, was made pursuant to the provisions of Order in Council,

P.C. 9384. The action taken by the Government, under Order in Council P.C. 689, with respect to the two Companies above named, was not a wage control measure, and this Board does not admit that the action of the Government, as expressed in that Order in Council, established for War Labour Boards a principle or a procedure which should necessarily be followed in the administration of the Wage Control Orders. Order in Council P.C. 689 enunciated certain policy and procedure for its special and particular purposes. It did not establish a policy of wage rate equalization which Regional or National War Labour Boards are required to follow in administering the various Wage Control Orders in force from time to time.

In this connection it should be noted also that the further increase in the basic wage rates of certain employees of Algoma Steel Corporation, Limited, as directed by the said Regional War Labour Board of Ontario on the 31st of March, 1944, was granted pursuant to Order in Council, P.C. 5963, and presumably after comparisons had been made with the wage rates being paid by the Steel Company of Canada at Hamilton, Ontario. It should be noted further that notwithstanding the procedure available to the said Company enabling it to appeal from the said decision of the said Regional War Labour Board for Ontario, the said Company neglected to exercise its right of appeal, and that, therefore, the said further increase in the basic wage rates of the employees of the said Algoma Steel Corporation was not on any occasion reviewed by this Board.

In the administration of wage control, both under Orders in Council, P.C. 5963 and P.C. 9384, this Board does not subscribe to the doctrine that of necessity wage rates should be equalized or standardized. The fact that one Regional War Labour Board directs an increase in wage rates does not necessarily justify a Regional War Labour Board in another province in directing a similar increase. The fact that wage rates in an industry may not be

uniform, or have not been equalized in all sections of Canada, does not, in itself, indicate a gross inequality or gross injustice within the meaning of the Order in Council.

The Regional War Labour Board for Nova Scotia decided that the employees had not established the existence of any gross inequal-

ity or gross injustice requiring rectification, and, therefore, dismissed the application. No evidence was produced before this Board on the hearing of the appeal to indicate that the decision of the said Regional War Labour Board should be disturbed. This appeal is, therefore, dismissed.
June 14, 1945.

Re: Twentieth Century-Fox Corporation, Toronto, Ont.

Reasons for Decision

This company applied to the Regional War Labour Board for Ontario for permission to establish a rate of \$75 per week for the new occupational classification of "press agent" and was granted a rate of \$60 per week. By leave of the Regional Board, the company now appeals to this Board from the decision of the Ontario Board dated March 22, 1945.

We first find that the duties described for this new classification are not of an executive character and that the incumbent is not above the rank of a foreman.

The powers of a war labour board to deal with an application of this kind are set out in section 20 (1) (c) (ii) of the Wartime Wages Control Order, 1943 (P.C. 9384) reading as follows:

20. (1) The National Board may . . .
(c) authorize or direct an employer . . .
(ii) to establish a single rate or range for a new occupational classifica-

tion of his employees in respect of which section seventeen of this Order is applicable . . . in such manner or at such rate or range as in the opinion of the National Board is fair and reasonable and is consistent with and will give effect to the purposes of this Order, having regard to all the circumstances deemed by it, in its discretion, to be material.

A guiding circumstance which should govern the determination of this application is the rate paid to the occupational classification by other moving picture distributing offices in Toronto. On the basis of what this Board has found to be the rate being paid by comparable firms, we conclude that the appeal should be allowed and the rate of \$75 approved, effective from the date of the original application namely October 17, 1944.

Finding and Direction accordingly.

June 14, 1945.

Re: Courtaulds (Canada) Limited, Cornwall, Ont.

Reasons for Decision

This is an appeal from Finding and Direction of Regional War Labour Board for Ontario dated March 27, 1945, in respect of an application by the Company "requesting adjustment in maximum wage rates for classifications of office and salaried personnel". The application to the Ontario Board was for approval of rates for thirty-four occupational classifications, and the Board approved rates for twenty-six classifications some at lower maximum figures than requested. The appeal is in respect of wage rates for eight classifications for which no adjustments were authorized by the Ontario Board and for four of the classifications for which certain maximum rates were authorized.

In the discussion of the appeal with representatives of the Company it developed that for a number of the occupational classifications involved the application to the Ontario Board had requested maximum wage rates higher than the Company intended to pay immediately. Had the Company in its application requested authority for payment only of maximum wage rates which it intended to make effective immediately it is possible such wage rates would have received approval, but in the

circumstances the Regional Board's disallowance of certain of the wage rates as requested was fully warranted under the provisions of Section 20 (1) Wartime Wages Control Order, 1943, P.C. 9384.

After discussion with representatives of the Company of all the conditions involved, and being informed of the materially increased duties and responsibilities under wartime conditions of employees in the various occupational classifications covered by the appeal, the relationship of wage rates now proposed for the occupational classifications involved to authorized wage rates of other of the Company's occupational classifications of lesser qualifications and responsibilities, the overtime work required for which no pay is allowed in addition to monthly wage rates, and the wage rates established in the same locality for substantially similar occupational classifications of other employers, this Board is of the opinion that it would be within the provisions of the Wartime Wages Control Order, 1943, P.C. 9384, to authorize the Company to make effective not earlier than January 12, 1945, wage rates for the occupational classifications covered by the appeal as set out in the Finding and Direction to be issued pursuant hereto.

June 13, 1945.

Re: Canada Packers, Limited

Reasons for Decision

An appeal from four decisions of the Regional Board for Saskatchewan dated February 27, February 28, March 2 and March 14, 1945.

The appellant-company operated four branches in the province of Saskatchewan at Regina, Moose Jaw, Saskatoon and Prince Albert where poultry, eggs and various produce were gathered, graded, packed and distributed. These branches are under the executive supervision of a sales manager in the company's packing plant located at St. Boniface, Manitoba. Prior to November 15, 1941, the practice had been to send from the branches buyers and graders to the various country points in the province and casual labour was engaged locally for packing, etc.

In February, 1944, the Company began the establishment of sub-branches at these country points with permanent employees working in some cases in premises newly constructed or acquired by the Company. These employees were very often trained in one of the branch offices. Each sub-branch is under the immediate direction of one of the branches. As of March, 1945, there were 54 employees distributed among 25 of these small offices where produce is received, graded, etc.

The Company did not consider that any authorization from the Regional Board was necessary; it felt that inasmuch as the rates paid were within duly established ranges for similar occupational classifications in its

employ, there was no further requirement under the Wartime Wages Control Order (P.C. 9334).

The Regional Board took a different view and found that there had been a violation of section 17 of the Order which imposes upon an employer the obligation of obtaining from the Board approval of rates paid to employees "in any establishment in which, or at any site of operations at which, the employer commenced operations after" the coming into effect of wage control. The Regional Board authorized the rates from February 1, 1945, and as a consequence the wages paid to these employees prior to February 1, 1945, will be disallowed as an abnormal expense pursuant to section 39 of the Wages Control Order.

We have had the advantage on this appeal of a very full and elaborate brief giving in detail the history and method of the Company's operations. From this information, which was not available to the Regional Board, there is no doubt that the Company operated throughout the whole of the province before wage control came into effect and, in our opinion, the sub-branches are not in the special circumstances of this case, new establishments or new sites of operations within the meaning of section 17.

The appeal should be allowed and the two small adjustments mentioned in the brief should be authorized from February 1, 1944.

June 6, 1945.

Re: Northern Public Service Corporation and Winnipeg Heating Company, Limited, and the Winnipeg Central Labour Council—One Big Union

Reasons for Decision

This is an appeal by the Companies from a decision of the Manitoba Board dated March 1, 1945, directing payment of wage increases ranging from 3 to 8 cents for hourly rated employees and of \$15 per month for monthly rated employees. Leave to appeal was granted by the Regional Board.

The companies supply a heating service to commercial and domestic users. On a comparison of rates paid to similar classifications employed by public utilities in the City of Winnipeg, the Regional Board ordered the said increases. The employers having pleaded their financial inability to pay the increases, the Regional Board gave the parties leave to return to the Regional Board, after disposition of this appeal, presumably to make representations in respect of steps to be taken to obtain

relief by way of either subsidy or increased service charges.

The Wartime Wages Control Order places upon a war labour board the duty to take into account an employer's ability to pay increased wage rates.

We have examined the financial statements for the last four years' operations and we find that, although full provision has not been made for either depreciation or interest on capital indebtedness, losses are shown in each year. It is manifest that unless the companies' rates for the heating service are increased to the customers or some other form of financial relief is provided, the companies would be unable to pay the higher wages without further impairing their financial position to the extent of about \$14,000 per year. In our opinion the

employers have made out a case of inability to pay.

Having in mind section 20 (2) of the Order, and economic stabilization which is the paramount purpose of the legislation under which

this Board and the Regional Boards have been created, we have no alternative but to allow the appeal and revoke the said Finding and Direction dated March 1, 1945.

June 6, 1945.

Re: Prince Albert Manufacturing Company, Limited, and Prince Albert Woodworkers' Union

Reasons for Decision

The Union appeals from a decision of the Regional War Labour Board for Saskatchewan dated February 5, 1945 refusing, except as to two classifications, its application for an increase in wage rates and for the establishment of new occupational classifications and wage rates therefor, on the ground that the existing wage rates were not shown to be "grossly unjust". No reason was given for refusing that part of the application which requested the establishment of new classifications. Leave to appeal was granted by the Regional Board.

The application was founded upon a finding and direction issued on March 29, 1944 by the Manitoba Regional Board for certain sash and door manufacturers located at Winnipeg. The Saskatchewan Board took the view that the Winnipeg rates were not properly comparable rates and could not be used as a reason for increasing the rates paid in the sash, door and millwork industry in Saskatchewan. With that view, we would not interfere.

However, since the Regional Board's decision, the whole matter of wage rates and standard job classifications and descriptions has been taken up by the Western Canada Sash & Door Association on behalf of its Saskatchewan members, including the respondent company which is now willing to agree to certain wage adjustments provided its competitive position in the industry is maintained. We are informed that applications in respect of other employers are pending before the Saskatchewan Board who now have the benefit of the submissions made by the Association on these various matters and also on the financial aspects of the wage problem. We should like to be as helpful as possible to the parties and with that in mind, this Board now approves of the job descriptions and schedule of occupational classifications submitted by the Association with leave to either of the parties, or both in joint application, to submit a fresh request to the Regional Board for wage rates, subject to the right of appeal to this Board.

June 14, 1945.

Re: Regina Sash and Door Company, Limited, and National Union of Woodworkers, Local No. 7.

Reasons for Decision

The Union appeals from a decision of the Regional War Labour Board for Saskatchewan dated January 8, 1945 refusing its application for an increase in wage rates and for the establishment of new occupational classifications and wage rates therefor, on the ground that the existing wage rates were not shown to be "grossly unjust". No reason was given for refusing that part of the application which requested the establishment of new classifications. Leave to appeal was granted by the Regional Board.

The application was founded upon a finding and direction issued on March 29, 1944 by the Manitoba Regional Board for certain sash and door manufacturers located at Winnipeg. The Saskatchewan Board took the view that the Winnipeg rates were not properly comparable rates and could not be used as a reason for increasing the rates paid in the sash, door and millwork industry in Saskatchewan. With that view, we would not interfere.

However, since the Regional Board's decision, the whole matter of wage rates and standard job classifications and descriptions has been taken up by the Western Canada Sash & Door Association on behalf of its Saskatchewan members, including the respondent company which is now willing to agree to certain wage adjustments provided its competitive position in the industry is maintained. We are informed that applications in respect of other employers are pending before the Saskatchewan Board who now have the benefit of the submissions made by the Association on these various matters and also on the financial aspects of the wage problem. We should like to be as helpful as possible to the parties and with that in mind, this Board now approves of the job descriptions and schedule of occupational classifications submitted by the Association with leave to either of the parties, or both in joint application, to submit a fresh request to the Regional Board for wage rates, subject to the right of appeal to this Board.

June 14, 1945.

Re: Modern Packers Limited and Montreal Packing Plant Employees' Federal Union, Local 66.

Reasons for Decision

This is an appeal by the company from a decision of the Quebec Regional War Labour Board dated February 27, 1945 fixing a base labour rate of 57 cents retroactive to the date of the Union's application, June 22, 1944. Leave to appeal was granted by the Regional Board.

The Union's original application covered a number of packing and processing plants located in the Province of Quebec, some of which are equipped with slaughtering facilities while others, including the appellant's plant, are not. The application was for a general upward revision of wage rates for the numerous classifications found in the meat-packing industry. There was a series of conferences between the employers and the Union, attended by a representative of the Regional Board who finally adopted a 57-cent base labour rate for all plants located in Montreal. That rate has not been appealed from, except in this case.

The finding and direction now under appeal was in the nature of a preliminary decision only, because after determining the labour rate, it contains the following:—

In regard to the rates for the other classifications, the Regional Board requests that a study be made by a Shop Committee, and the Representatives of the Employers, in order to determine the individual salary rates in all the other classifications, or for the other employees concerned, after which,

the Board will consider the wage schedule decided upon by both parties, in order to arrive at a final decision—as a whole.

The appellant-company argues that its operations are not at all comparable to those of the larger, more mechanized plants of Canada Packers Limited, Swift Canadian Company Limited, etc. who have a killing floor and where, it is said, labour is more arduous and the classifications more specialized. It is also alleged that the employees of this company are very often successively engaged on many types of work.

It will be noted that the Regional Board's decision leaves to the Union and the Company a job of wage evaluation founded on the base rates of 57 cents for labour (presumably, male) which now prevails in the larger plants. It is now up to the parties to prepare a list of rates, covering the various classifications and operations in this plant, turning upon this base rate for the type of labour which is now receiving it in the larger plants. In many cases the rate may have to be what has been referred to during the hearing as a "composite rate".

We are of opinion that the Regional Board gave careful consideration to the submissions made by the Company and, through its representative, carefully investigated all the factors involved, and we, therefore, feel that their decision should not be disturbed.

June 18, 1945.

Re: Burrard Dry Dock Company, Limited, North Vancouver, B.C., and Sheet Metal Workers' International Association, Local 280.

Reasons for Decision

An application by the union for an 18-cent wage rate increase, from \$1 to \$1.18 per hour, for journeymen sheet metal workers employed in the company's shipyard, with a corresponding increase to chargehands and assistant foremen.

In September, 1939 these journeymen enjoyed a differential over machinists, plumbers and steamfitters of 10½ cents per hour. As a result of the report of a Board of Conciliation dated May 2, 1940, the basic rates of all journeymen in the metal trades employed by the Company were equalized at 90 cents per hour. Subsequently, with the addition of the full cost of living bonus, the present rate of \$1 was established. In 1941 the electricians received a 10-cent differential above other journeymen. In August, 1942, the Richards Commission adopted the

90-cent rate for the metal trades and joint applications, including that of the applicant union, were made to this Board to confirm the said rate. The rates paid to all journeymen, with the exception of the electricians, have continued on the same basis since that time.

The Union argues strongly,—and this is the basis of its application, that sheet metal workers employed by contract shops and building contractors in Vancouver receive \$1.18 per hour and that this differential should be removed or, at least, be narrowed. This Company is the only shipyard operator in the district equipped with a sheet metal department of its own.

It must be noted that the differential between sheet metal workers employed by this company and those employed by contractors outside is one of long standing. In

1941, when the basic rate in the shipyard was 90 cents, the rate outside was \$1.07½.

Having regard to the foregoing facts, it is impossible to determine that there exists in the rate under consideration a "gross

inequality or gross injustice" which calls for rectification by this Board.

The application must be dismissed.

June 18, 1945.

Re: Canadian Industries, Limited (Windsor Works), and United Automobile Workers of America, Local 195.

Reasons for Decision

This is an appeal by the Union from a decision of the Ontario Board dated November 17, 1944 in so far as said decision:—

- (1) approved for certain classifications a rate schedule based on job evaluation instead of the schedule proposed by the Union;
- (2) directed payment of a 3-cent differential, instead of 5 cents, for a female group leader;
- (3) refused approval of the 5-cent per hour off-shift premium proposed by both Company and Union.

The Company undertook an exhaustive job survey and applied for approval of the resulting schedule. The Union does not contest the majority of the new rates, and we have come to the conclusion that the

Regional Board's finding and direction with respect to item (1) above should be sustained, because it has not been demonstrated that the rates objected to are not in keeping with the general result of the evaluation.

As to item (2), there is one female group leader in the plant supervising women performing what is normally female work. There is no reason why the differential in favour of male supervisors should necessarily be paid to this employee.

We are not prepared to deal now with the off-shift premium and on that point our decision will be reserved.

The appeal is dismissed as to items (1) and (2) above.

June 19, 1945.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every

province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for two days' during the month of June. During this period the Board received seven applications, held two hearings, issued six certificates designating bargaining representatives, and rejected one application.

Certificates Issued

1. *Seafarers' International Union of North America (A.F. of L.) and British Columbia Coast Steamship Service, Canadian Pacific Railway Company, Vancouver, B.C.* (L.G. April, 1945, page 479). Following an investigation of the application and a representation vote the union and Messrs. H. Murphy, J. Scotland, E. Markey and D. Joyce were certified as bargaining representatives for employees engaged as unlicensed personnel in the deck and engine room departments of the vessels, tugs and barges operated by the British

Columbia Coast Steamship Service, Canadian Pacific Railway Company, Victoria, B.C.

2. *Royal City Waterfront Workers Association, International Longshoremen's and Warehousemen's Union, Local 502 and Empire Stevedoring Company Limited, New Westminster, B.C.* (L.G. June, 1945, p. 829). The Union and Messrs. C. C. Lavery and C. P. Latham were certified as bargaining representatives for the longshoremen employed by the Empire Stevedoring Company of Canada Limited, New Westminster, B.C. Foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an Officer of the Board.

3. *Royal City Waterfront Workers Association, International Longshoremen's and Warehousemen's Union, Local 502 and Consolidated Mining and Smelting Company of Canada Limited, New Westminster, B.C.* (L.G. June, 1945, p. 829). Following an investigation of

the application by an Officer of the Board, the Board certified the union and Messrs. C. C. Lavery and C. P. Latham as bargaining representatives for longshoremen employed by the Consolidated Mining and Smelting Company of Canada Limited, New Westminster, B.C. Foremen were excluded from the bargaining unit.

4. *Royal City Waterfront Workers Association, International Longshoremen's and Warehousemen's Union, Local 502 and Canadian Stevedoring Company Limited, New Westminster, B.C.* (L.G. June, 1945, p. 830). The Union and Messrs. C. C. Lavery and C. P. Latham were certified as bargaining representatives for the longshoremen employed in New Westminster, B.C., by the Canadian Stevedoring Company Limited, Vancouver, B.C. Foremen were excluded from the bargaining unit. Certification followed an investigation of the application by an Officer of the Board.

5. *Canadian Radio Officers Association, Pacific District, Local No. 4, and Park Steamship Company Limited, Vancouver, B.C.* (L.G. June, 1945, p. 830). Following an investigation of the application by an Officer of the Board, the union and Messrs. J. H. Holmes and D. A. MacLeod were certified as bargaining representatives for the radio officers employed on dry cargo vessels operated from Pacific coast ports by the Park Steamship Company Limited, Vancouver, B.C. The chief radio officers were excluded from the bargaining unit.

6. *International Longshoremen's Association, Local 163 and ten shipping companies presently represented by the Shipping Federation of British Columbia, Vancouver, B.C.* (L.G. May, 1945, p. 665). The union and Messrs. James Darwood and R. McBeath were certified as bargaining representatives for the longshoremen employed by the Border Line Transportation Company; Packers Steamship Company Limited; Union Steamships Limited; B.C. Coast Steamship Service, (C.P.R.); Canadian National Steamships; Frank Waterhouse and Company of Canada, Limited; Coastwise Pier Limited; B.C. Steamships Limited; Bervin Steamship Company; Coastwise Steamship and Barge Company, Limited; presently represented by the Shipping Federation of British Columbia, Vancouver, B.C., loading and unloading or handling cargoes to and from coastwise ships, scows and barges in the Vancouver, B.C., area. Certification followed an investiga-

tion of the application by an Officer of the Board.

Application for Certification Rejected

1. *Royal City Waterfront Workers Association, International Longshoremen's and Warehousemen's Union, Local 502 and Victoria and Vancouver Stevedoring Company Limited, New Westminster, B.C.* L.G. June, 1945, p. 829). Following an investigation of the application by an Officer of the Board, the Board rejected the application for the reason that the Company concerned presently has no employees at New Westminster, B.C.

Application for Certification Under Investigation

(1) Canadian Seamen's Union on behalf of the unlicensed personnel in the engine room, deck and stewards departments of vessels operated by the Island Tug and Barge Company Limited, Vancouver, B.C.

(2) Canadian Seamen's Union on behalf of the unlicensed crew members of the deck, engine room and stewards departments of vessels operated by the Vancouver Tug and Barge Company Limited, Vancouver, B.C.

(3) Canadian Brotherhood of Railway Employees and Other Transport Workers Div. 199 on behalf of scowmen, carpenters, scow foremen, carpenter foremen, and tug boat crews, including mates, tug hands, engineers, firemen, cooks, captains and machinists of the Canadian National Railways, Moncton, N.B.

(4) Seafarer's International Union of North America, Vancouver Branch, Pacific District (A.F. of L.) on behalf of the unlicensed personnel in the deck department on boats operated by Vancouver Tug Boat Company Limited, Vancouver, B.C.

(5) Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of the "grain door gang", consisting of foreman, leading hand and labourers of the Canadian National Railways, Vancouver, B.C.

(6) Canadian Seamen's Union, Pacific District, on behalf of the unlicensed personnel of deck, engine room and stewards department on vessels operated by the Pacific Coyle Navigation Company, Limited, Coal Harbour, Vancouver, B.C.

(7) Canadian Seamen's Union, Pacific Coast District, on behalf of unlicensed personnel in deck, engine room, and stewards department on the Oil Tanker, S.S. *Albertalite* operated by the Imperial Oil Limited, Vancouver, B.C.

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdiction. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During June reports were received from seven Boards of Conciliation:—

Concerning Dominion Tar and Chemical Company Limited, Montreal, P.Q., and Dominion Tar and Chemical Company Limited Employees Federal Union, Local 173 (T. & L.C. of Canada).

Concerning R.C.A. Victor Co. Ltd., and International Union of Electrical Workers, Local 1028-B.

Concerning Midland Shipyards Ltd., Midland, Ont., and Industrial Union of Marine and Shipbuilding Workers, Local No. 9.

Concerning Dominion Engineering Works Limited, Longueuil, P.Q., and Local 1596, International Association of Machinists.

Concerning American Can Company Ltd., Vancouver, B.C., and Local 2821 United Steelworkers of America.

Concerning Massey-Harris Company Ltd. (Toronto Works), Toronto, Ontario, (Weston Works) Weston, Ontario, and (Verity Street and Market Street Works) Brantford, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Concerning Federal Wire & Cable Company Limited, Guelph, Ontario, and United Steelworkers of America, Local 3021.

Boards Fully Constituted

During June nine Boards of Conciliation were fully constituted:—

Cockshutt Plow Company Limited, Brantford, Ont.—The Board of Conciliation established to deal with a dispute between Cockshutt Plow Company Limited, Brantford, Ont. and Local 458, United Automobile, Aircraft and Agricultural Implement Workers of America, was fully constituted on June 29, with the appointment of His Honour Judge Egerton Lovering, Toronto, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. K. C. Berney, Brantford and Mr. Bora Laskin, Toronto, were appointed on the recommendation of the employer and employees respectively.

Canadian Automotive Trim, Limited, Windsor, Ont.—The Board of Conciliation established to deal with a dispute between Canadian Automotive Trim, Limited, Windsor, Ont., and International Union, United Automobile, Aircraft & Agricultural Implement Workers of America, (UAW-CIO) Local 195, was fully constituted on June 27, with the appointment of His Honour Judge E. A. Shaunnassy, Sandwich, Ont., as chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. David M. Brodie, Windsor, Ont. and Mr. Bora Laskin, Toronto, were appointed on the nomination of the employer and employees respectively.

St. Clair Processing Company, Sarnia, Ont.—The Board of Conciliation established to deal with a dispute between St. Clair Processing Company, Sarnia, Ont. and United Gas, Coke and Chemical Workers (C.I.O.) was fully constituted on June 18, with the appointment of His Honour Judge F. H. Barlow, Toronto, as chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. R. A. Carscallen, Wallaceburg, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

York Knitting Mills Limited (Knitting Division), Toronto, Ont.—The Board of Conciliation established to deal with a dispute between York Knitting Mills Limited (Knitting Division), Toronto, Ont., and

National Union of Textile Workers, Local No. 4, was fully constituted on June 25, with the appointment of Dr. Alexander Brady, Toronto, as chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. E. Macaulay Dillon, K.C., Toronto, Ontario, and Mr. Lawrence Sefton, Toronto, Ontario, were appointed on the nomination of the employer and employees respectively.

Guelph Stove Company, Guelph, Ont.—The Board of Conciliation established to deal with a dispute between Guelph Stove Company, Guelph, Ont., and Local 3305, United Steelworkers of America, was fully constituted on June 26, with the appointment of His Honour Judge Ian Macdonell, Toronto, Ont., as chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. E. M. Dillon, Toronto, Ontario and Mr. F. W. Dowling, Toronto, Ontario, were appointed on the nomination of the employer and employees respectively.

Godfredson Limited, Windsor, Ont.—The Board of Conciliation established to deal with a dispute between Godfredson Limited, Windsor, Ontario and Local 195, International Union, United Automobile, Aircraft & Agricultural Implement Workers of America (UAW-CIO) was fully constituted on June 7, with the appointment of His Honour Judge J. J. Coughlin, Sandwich, Ontario, as chairman of the Board on the joint recommendation of the other two members of the Board. Mr. David M. Brodie, Windsor, Ontario and Mr. Bora Laskin, Toronto, Ontario, were appointed on the nomination of the employer and employees respectively.

Chrysler Corporation of Canada, Limited, Chatham, Ont.—The Board of Conciliation established to deal with a dispute between Chrysler Corporation of Canada, Limited, Chatham, Ont. and Local 127, International Union, United Automobile Aircraft & Agricultural Implement Workers of America, (UAW-CIO) was fully constituted on June 8, with the appointment of His Honour Judge J. J. Coughlin, Sandwich, Ont., as chairman of the Board on the joint recommendation of the other two members of the Board. Mr. J. A. McNevin, Chatham, Ont. and Mr. Bora Laskin, Toronto, were appointed on the nomination of the employer and employees respectively.

Canadian Rogers Sheet Metal and Roofing Limited, Winnipeg, Man.—The Board of Conciliation established to deal with a dispute between Canadian Rogers Sheet Metal and

Roofing Limited, Winnipeg, Man., and Local 3238, United Steelworkers of America, was fully constituted on June 25, with the appointment of His Honour Judge A. R. MacDonell, Winnipeg, Man., as chairman of the Board on the joint recommendation of the other two members of the Board. Mr. L. J. Raycraft, K.C., Winnipeg, Man., and Mr. George Stapleton, Winnipeg, Man., were appointed on the nomination of the employer and employees respectively.

Bendix-Eclipse of Canada Limited, Windsor, Ont.—The Board of Conciliation established to deal with a dispute between Bendix-Eclipse of Canada, Limited, Windsor, Ont., and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, was fully constituted on June 4, with the appointment of His Honour Judge J. J. Coughlin, Sandwich, Ont., as chairman of the Board on the joint recommendation of the other two members of the Board. Mr. David M. Brodie, Windsor, Ont. and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

Boards Established

During June ten Boards of Conciliation were established but not fully constituted:—

Concerning John Inglis Company Limited (Ordnance Division) Toronto, Ontario, and Local 2900 United Steelworkers of America.

Concerning Holeproof Hosiery Company of Canada, Limited, London, Ontario and United Textile Workers of Canada, Local 22.

Concerning Greater Winnipeg Sanitary District, Winnipeg, Manitoba, and Greater Winnipeg Sanitary District Employees Unit of the One Big Union.

Concerning Firestone Tire & Rubber Company of Canada Limited, Hamilton, Ontario, and Local 113, United Rubber Workers of America.

Concerning Canadian Marconi Co., Limited, Montreal, P.Q., and Commercial Telegraphers Union, Canadian Marconi System, Division No. 59.

Concerning Truscon Steel Corporation of Canada, Limited, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195.

Concerning Windsor Tool and Die Limited, Windsor, Ontario, and International Union, United Automobile Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195.

Concerning Frost and Wood Company Limited Plant No. 1, Smiths Falls, Ontario,

and United Steelworkers of America, Local 3140.

Concerning Dominion Fabrics, Limited, Dunnville, Ontario, and Textile Workers Organizing Committee, Local 21, CCL.

Concerning Bell Thread Company, Hamilton, Ontario, and Canadian Thread Makers' Union.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and the signing of an agreement:—

Concerning Medcalf Shoe Company, St. Thomas, Ontario, and Boot & Shoe Workers Union, Local 531.—William Dunn, Conciliation Officer.

Concerning Libby, McNeill & Libby, Chatham, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.—William Dunn, Conciliation Officer.

Concerning A. R. Kaufman, Kitchener, Ontario, and United Rubber Workers of America.—William Dunn, Conciliation Officer.

Concerning Hoyt Transport Limited, Truro, N.S., and Canadian Brotherhood of Railway Employees and Other Transport Workers, Local 195.—H. R. Pettigrove, Conciliation Officer.

Concerning Dominion Fire Brick & Clay Products Limited, Moose Jaw, Sask., and Claybank Workers Union.—R. H. Hooper, Conciliation Officer.

Concerning Canadian Cannery Branch No. 17, Simcoe, Ontario, and Canadian Cannery Union No. 23728, H. Perkins, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:—

Concerning Morton Engineering & Drydock, Quebec, P.Q., and Union Canadienne des Chaudronniers et Constructeurs de Navire en fer.—L. Pepin, Conciliation Officer.

Concerning Motor Companies: MacFarlane Motors Limited; Valley Motors Limited; J. Clark & Son, Limited; Smith Motors Limited; Capitol Garage; Wood Motors Limited, Fredericton, N.B. and Fredericton Automobile Mechanics and Garage Workers, Union, Fredericton, N.B.—H. R. Pettigrove, Conciliation Officer.

Concerning McGavin Bakeries, Limited, Brandon, Manitoba, and Canadian Bakery Workers' Local No. 1, C.C.L.—Thos. Williams, Conciliation Officer.

Concerning McCord Corporation, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195, (UAW-CIO).—J. P. Nicol, Conciliation Officer.

Concerning Nineteen Retail Stores: Cretzski's Department Store; Wolch's Department Store; Adrienne Styles; Atkinson's Limited; Claires Limited; Clifford's Ladies Wear; Co'Ed Ladies Wear; Dales Ladies Ready to Wear; Delmar's Ladies Ready to Wear; Helene's Ladies Apparel; Grayson's; Nu-Mode Dress Shoppe; Lido Ladies Apparel; John Pollock; Toronto Ladies Ready to Wear; State Shoe Store; Stroller Shoe Store; Surprise Shoe Store; Varsity Shoppe, Winnipeg, Manitoba, and Retail Clerks International Protective Association.—Thomas Williams, Conciliation Officer.

Concerning Schultz Die Casting Company, Wallaceburg, Ontario, and Local 251, International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO).—F. J. Ainsborough, Conciliation Officer.

Concerning Standard Steel Construction Company, Welland, Ontario and United Steelworkers of America, Local 2986.—F. J. Ainsborough, Conciliation Officer.

Concerning MacDonald Bros. Aircraft, Limited, St. James, Manitoba, and Spitfire Lodge No. 741, International Association of Machinists.—Mr. Thomas Williams, Conciliation Officer.

Concerning Ford Motor Company of Canada Limited, Toronto, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO).—J. P. Nicol, Conciliation Officer.

Concerning Fahrloy Corporation Canada Limited, Orillia, Ontario, and United Electrical Radio & Machine Workers of America, Local 511.—J. P. Nicol, Conciliation Officer.

Concerning John East Iron Works, Limited, Saskatoon, Sask., and United Steelworkers of America, Local 3493.—H. S. Johnston, Conciliation Officer.

Concerning Dominion Wire Rope & Cable Company Limited, Montreal, P.Q., and International Association of Machinists Lodge 1288.—R. Trepanier, Conciliation Officer.

Concerning Dominion Forge and Stamping Company, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), Local 195.—F. J. Ainsborough, Conciliation Officer.

Concerning Canadian Bridge Company Limited (Plant No. 3), Windsor, Ontario, and In-

ternational Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO), Local 195.—J. P. Nicol, Conciliation Officer.

Concerning Canadian Bridge Company—Plants 1 and 2, Walkerville, Ontario, and United Steelworkers of America, Local 2471.—Mr. William Dunn, Conciliation Officer.

Concerning Bryce Bakeries, Limited, Brandon, Manitoba, and Canadian Bakery

Workers, Local No. 1. Thomas Williams, Conciliation Officer.

Concerning Atlantic Sugar Refineries, Limited, Saint John, N.B., and Sugar Refinery Workers' Union, Local No. 2.—H. R. Pettigrove, Conciliation Officer.

Concerning Anglo-Canadian Wire Rope Company Limited, Montreal, P.Q., and International Association of Machinists, Lodge 1288.—R. Trepanier, Conciliation Officer.

Report of Board in Dispute between the Dominion Tar and Chemical Co., Ltd., Montreal, P.Q., and Dominion Tar and Chemical Co., Ltd., Employees, members of Federal Union Local 173, Trades and Labour Congress of Canada

On June 29 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Dominion Tar and Chemical Co., Ltd., Montreal, P.Q., and Dominion Tar and Chemical Co., Ltd., Employees, members of Federal Union Local 173, Trades and Labour Congress of Canada.

The personnel of the Board was as follows: Hon. Mr. Justice Alfred Savard, Chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. D. A. Paterson and Rene-Louis Beaudoin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and Dominion Tar & Chemical Co., Ltd., Montreal, and Dominion Tar & Chemical Co., Ltd., employees, members of Federal Union Local 173, Trades and Labour Congress of Canada.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR,—

The Conciliation Board appointed under your seal hereby submits its report in the above matter.

Meetings were held in Montreal on May 28, 29, June 1, 16, 26, 27 and 28, 1945. Some delay has been unavoidable due to the fact that Mr. Rene-Louis Beaudoin, K.C., was a candidate in the last Federal Elections in Vaudeuil-Soulanges County.

The Company was represented by Mr. O. C. Steinmayer, superintendent of timber production, and Mr. R. Peever, superintendent in charge of operations at the plant.

The Local was represented by Mr. Rene Duquette, representing the Trades and Labour

Congress, and Messrs. Charles Richardson, Roger Dumas, Chester Boudreau and Isidore Brassard, employees of the plant.

The Dominion Tar & Chemical Co., Ltd., operates a plant at Delson, near Montreal, treating wood with creosote. This plant has been in existence since 1925. Actually from 50 to 60 employees are at work, in the Spring the number of employees rises up to 80, and during the Winter the Company only keeps a skeleton staff.

The workers at the plant come from Delson and around Delson which is a farming community. A good percentage of the men are farmers and come to work when the work on their farms is not too pressing. Since the operations started it has been admitted that the labour relations between the Management and the employees have always been friendly and full of understanding. Any grievance that could have existed was always considered without delay and adjusted satisfactorily. The wages paid are those provided under the Fair Wages Act of the Province of Quebec averaging about 80 cents per hour.

In the Fall of 1944, the employees were organized as a Union and were granted a charter which is Local 173 of the Trades and Labour Congress of Canada.

Immediately negotiations for the signing of a Collective Agreement were begun on January 29, 1945, and both parties have agreed on the following:—

1. Preamble of Agreement.
2. Recognition of the Union.
3. Hours of work and overtime.
4. Seniority.
5. Grievance procedure.
6. Pledge as to strikes and lock-outs.
7. Union business.
8. Transfers.
9. Lost time.
10. Company Union meetings.
11. Duration of Agreement.

The provisions relating to the vacations were to be submitted by the Union to the

Quebec Regional War Labour Board for consideration and approval.

The points on which the parties could not agree were the following:—

1. Union Security and check-off of the Union dues by the employer.
2. Limitation to one week's pay of the indemnity to be paid to the employee who should happen to be found to have been unjustly dismissed.

Several recesses and adjournments were granted in order to try and bring together the Management and the officials of the Local. Suggestions were made by the Board and fortunately negotiations have come to a happy ending.

The Company has agreed to deduct every month the fees due to the Union upon written request and authorization signed by the employees.

With regard to the indemnity to be paid to an employee who should be found to have been unjustly discharged, it has been agreed that as soon as an aggrieved employee wishes to present his case, an Arbitration Board will

be formed of three members, one representing the Union, one representing the Management and the President of this Board has agreed to act whenever called. This will assure a speedy disposal of any case, and if the decision favours the employee, the Company will pay him the indemnity to which he is entitled from the date that he has been laid off.

In addition the Company will grant paid holidays of one week to the employees who have been with the Company for a year, the date of those holidays to be fixed so as not to interfere with the production of the plant.

The Board wishes to express its gratification for the way each side has presented its case and for the goodwill which has prevailed throughout the course of the deliberations.

(Sgd.) ALFRED SAVARD,
Chairman.

(Sgd.) D. A. PATERSON,
Member.

(Sgd.) L. R. BEAUDOIN,
Member.

Report of Board in Dispute between R.C.A. Victor Co., Limited, and International Union of Electrical Workers, Local 1028-B.

On June 4 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between R.C.A. Victor Company, Ltd., and International Union of Electrical Workers, Local 1028-B.

The personnel of the Board was as follows: Hon. Mr. Justice Alfred Savard, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. D. A. Paterson and Robert Haddow, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations and of a dispute between R.C.A. Victor Co. Ltd. and International Brotherhood of Electrical Workers, Local 1028-B, Employees.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Parliament Buildings,
Ottawa, Ont.

Dear Sir,

The Board of Conciliation appointed under the terms of Section 13 of P.C. 1003 begs herewith to report the result of its work and its findings and recommendations.

The Board held sittings in Montreal on May 14, 17, 18, 29, 30 and June 2, 1945, at which sittings written and oral submissions were made by representatives of the Company and of the Union in support of their respective contentions.

The Company was represented by Mr. D. McCallum and Mr. H. P. Prinsky.

The Union was very ably represented by Miss Lea Roback, Miss Rae Routtenberg, Mr. Victor Walker and Mr. Daniel McGee.

At the outset of the discussion, Miss Roback stated that the labour relations between the Company and its employees had always been of the best and that both employer and employees had always treated each other with a feeling of understanding and good will. She stated that they had the utmost confidence in the Board, would submit to its decision and would comply with its findings and recommendations.

There are presently 1,500 employees working for the Company and whom 75 per cent are members in good standing with the Local. The Local was established in 1942 when the first Collective Agreement was signed. At that time 95 per cent of the employees were members of the Local. The Agreement was renewed in 1943.

In the fall of 1944 both the Company and the Union convened and discussed the renewal of an Agreement for the following year. They

agreed upon 17 clauses which were the following:—

1. General purpose
2. Co-operation
3. Employees right to organize
4. Hours of work
5. Overtime
6. Classification of employees
7. Piece work
8. Company organization
9. Safety and health
10. Bulletin boards
11. Rest period
12. Annual vacations
13. Seniority
14. Discharges
15. Leave of absence
16. Shop committee
17. Renewal and termination

There were two points on which the parties had not agreed, namely:—

1. Recognition of Union
2. Procedure of appointing the Chairman of the Arbitration Committee to deal with cases of violation or interpretation of any provision of the Agreement.

Those were the two points which were submitted to this Board for consideration.

The Union requested a clause authorizing a Union shop, by virtue of which all hourly paid employees of the Company would be required to join the Union within a period of time. The Union modified its demand and proposed a maintenance of membership clause. In support of its demand, the Union representatives felt that during negotiations for the two first contracts, an issue had not been made of the demand for Union security. However, the representatives of the Union stated that the period of trial was over and during the past three years the Local had given proof of the responsible character of its organization and had amply demonstrated its ability and desire to maintain and to further good employer-employee relationships in the plant. From the very beginning all difficulties had been ironed out with the management, on the basis of round-table discussions, negotiations, arbitrations, and all issues were dealt with, with a view to cementing long term co-operation on labour relations within the plant.

However, the Local stated that it finds that in the carrying out of this policy, it is badly handicapped by the fact that the present Agreement contains no form of Union security. Under these conditions the Union is confronted with the task of simultaneously carrying on continuous organization in order to maintain its membership and seriously shouldering its responsibilities for good labour relations and the solving of production problems.

The Union claimed that the status quo is filled with dangerous possibilities. At each

time some foreman or other supervisory official takes some action which is resented by the workers and a story is spread that it is a manoeuvre to smash the Union. Each time a non-Union member is promoted it is whispered that it is a reward for not joining the Union. This leaves the workers believing that the Management refuses to consent to a Union shop, or a maintenance of membership clause in the Agreement, in the hope to hasten the end of the Union in the plant. Therefore, the difficulty of keeping stable labour relations under these circumstances is apparent.

As against the Union's demand, the Company submitted that an Agreement accepting the Union shop or maintenance of membership clause would be detrimental to the continued welfare of the company and its employees.

Union security obtained through compulsion and restriction of individual freedom has undesirable social consequences because it is undemocratic, monopolistic and its functioning places unwarranted power in the hands of a particular group. Union security would be wrong because it restricts the employee's freedom to earn his living where he pleases and forces him to conform with the policies of the Union whether or not he agrees with them. Also an employer is limited in his choice of employees to those who are prepared to accept employment not only according to the employers' terms but according to the terms of the Union.

A further argument against the demand of the Local for Union-shop is that it places on the employer the onus of disciplining any employee who is unwilling to join the Union or an employee who, having joined the Union, wishes to withdraw. The employer then becomes the object of the employee's ill-will and not the Union for whose sole benefit the penalty has been applied.

Finally the Company argued that a Union security Agreement would place the Company in a precarious competitive position.

Many additional firms have become established in the production of wireless communications equipment. R.C.A. Victor Co. Ltd. has taught competitors and potential post-war competitors much of its manufacturing knowledge and experience. Several of those firms will enter the domestic radio field when they return to peace-time production.

Under those circumstances, the Management of the R.C.A. Victor Co. Ltd. feels that it must avoid entering into any long term commitments that would reduce the flexibility of its operating conditions.

There were 10 firms which constituted the Canadian radio manufacturing industry prior

to the war, all of which will be re-entering this field when the war is over. While two or three other firms are at various stages of organization, only one firm other than the R.C.A. Victor Company has signed a Collective Agreement with an international Union and the Company feels that it is in an unfavourable position with most of its competitors who have not signed such Agreements.

It was evident that the Company was not inclined, at least for the present, to subscribe to a clause involving Union-shop or maintenance of membership.

It was then that a suggestion was made to the Company by the representatives of the Local for a voluntary check-off of Union members contributions to be made each pay-day. After considering the demand, the representatives of the Company suggested an adjournment in order to discuss the proposition.

The Board was adjourned until a later date when the Company reported that it was agreeable to complying with the request and was prepared to embody in the Collective Agreement the terms under which the check-off should be carried out.

The representatives of the Local then agreed not to press further their demand for closed or Union-shop or maintenance of membership.

There remained the question of the selection of a Chairman for arbitration committees. The agreement between the Company and the Union that expired on the 12th of September, 1944, provided, in the final step of the grievance procedure, an arbitration of disputes by a Committee of 3, one to be appointed by the Company, another by the Union, and a third, the Chairman, to be agreed to by the other two; but if an agreement were not reached, he was to be appointed by the Minis-

ter of Labour. The limitation of the Minister's discretion, to the effect that his appointee must not be an employee of his Department, was insisted upon by the Company, because it was believed to be necessary to ensure the selection of a completely impartial Chairman.

The Company further added that when a disagreement must be resolved by arbitration, the Chairman must be one who has no immediate interest on one side of the issue or the other. The suggestion was made by the Company that the arbitration be taken to a Judge of the Superior Court or to a permanent impartial umpire, satisfactory to both the employer and the Union, be selected.

It was finally suggested by Mr. D. McCallum for the Company that the Chairman of the Board, the Honourable Mr. Justice Savard, be requested to act as Chairman of the Arbitration committee. This suggestion was acceptable to the Union and the Chairman agreed to serve if it was thought that he could be of service in such capacity.

This ended the work of conciliation of this Board.

All three members of the Board take this opportunity to emphasize the excellent spirit which prevailed throughout the meetings and the goodwill shown by both employer and employees.

A copy of the Collective Agreement will be forwarded to your Department as soon as it is completed and duly signed.

The whole is respectfully submitted.

Report of Board in Dispute between Midland Shipyards, Ltd., Midland, Ont., and Industrial Union of Marine and Shipbuilding Workers, Local No. 9.

On June 11 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between Midland Shipyards, Ltd., Midland, Ont., and Industrial Union of Marine and Shipbuilding Workers, Local No. 9.

The personnel of the Board was as follows: Hon. Mr. Justice F. H. Barlow, Chairman, appointed on the joint recommendation of the other two members, Messrs. Frank Wilkin-son, K.C., and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

38283—3½

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, as Amended, and in the Matter of a Dispute between Midland Shipyards Limited, Midland, Ontario, and Industrial Union of Marine and Shipbuilding Workers, Local No. 9.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour of Canada,
Ottawa, Ontario.

Sir:

The Board of Conciliation appointed by you in the above matter begs to report as follows:

Hearings were held in the City of Toronto, at which the Company was represented by J. R. Leitch, President, and H. J. Whitmell, General Manager; and the Union by T. B. MacLachlan, General Representative, and by H. Blair and J. Clayton, members of the Union negotiating committee.

The dispute between the parties, which arose during negotiations between them for a first collective agreement, centred on the following items:

- (1) the request of the Union for full recognition by way of union shop and check-off;
- (2) differences concerning the reservation by the Company of a discretion in applying the seniority provisions of the agreement;
- (3) differences concerning the meaning of "dirty work" for which a premium rate had been agreed upon;
- (4) the request of the Union for inclusion in the agreement of a clause covering vacations with pay.

There were a number of other items of dispute, but since they concerned wages, it was recognized that they would have to be taken up with the National War Labour Board.

Submissions were made to the Board on behalf of each of the parties on each of the items in dispute and copies of their respective draft agreements were filed with the Board. These submissions revealed that the parties were not far apart on items (2), (3), and (4) listed above, and in fact, a method of resolving the dispute over items (2) and (3) was agreed upon before the Board. So far as the clause for union security was concerned, the Union stated at the outset that it would not press for a complete union shop but only for a modified form which would leave present non-union employees free of any obligation to join the Union; and it conceded further that it would except casual part-time labourers from the scope of any union security clauses.

The evidence adduced before the Board disclosed that the Company commenced operations in January, 1941, in shipyards which had been closed since 1932, and it was represented by the Company that the future continued operation of these shipyards was by no means certain. The Union commenced organizing in November, 1943, and bargaining representatives which it put forward were certified by the Ontario Wartime, Labour Relations Board without a vote on August 16, 1944, after the initiation of proceedings which were not contested by the Company. The Union claims that it had at the time of the certification proceedings about 480 members out of the 600 employees who then constituted the bargaining unit, and although there are at present only 450 employees in the

unit, the Union contends that it has continued to have a membership support of 80 per cent of eligible employees.

The Board is unanimously of the opinion that

- (1) a clause should be inserted in the collective agreement which would cover vacation with pay, as follows:
"Vacations with pay shall be granted by the Company in accordance with the vacation plan approved by the National War Labour Board from time to time. Vacations shall be taken at a time agreed upon between the Management and the Union.
Any dispute arising under this article shall be dealt with under the grievance procedure."
- (2) the clause covering "dirty work" set out in the Company's draft agreement should be amended by substituting for the second paragraph thereof the following:
"Claims for dirty work other than that listed above shall be allowed when approved by the Management and the Union, provided that any disagreement between them in this respect shall be subject to settlement in accordance with the grievance procedure".
- (3) the grievance procedure should be available to resolve any dispute concerning the operation of the seniority provisions of the agreement. Accordingly, the seniority clause, as proposed by the Company and by the Union respectively, should be amended to read as follows:
"The principle of seniority, subject to ability and fitness to do the work, shall be the ruling factor (1) in the matter of promotions; and (2) when it becomes necessary to reduce forces.
"The re-hiring of employees who have been laid off shall be subject to seniority. Employees laid off due to lack of work in any department shall be given the option of employment in other departments, should work be available therein, and they shall be paid the rates prevailing in those departments provided they are capable of performing the work.
"Employees of the Company who enter the Armed Forces directly from this plant shall be re-employed after honourable discharge in accordance with government laws and regulations.
"The Company may grant any employee leave of absence, reserving his seniority rights and return to his former classification.
"Any dispute arising in connection with the application or administration of any of the clauses of this article shall be deemed a grievance for the settlement of which resort may be had to the grievance procedure."
- (4) A provision for union security should be included in the agreement in the following form:
"All employees covered by this agreement who are or who during its currency become members of the Union shall, as a condition of continued employment, remain members of the Union in good standing for the duration of this agreement; provided, however, that the obligation of this clause shall not be operative

during the two week period preceding the expiry date of this agreement or during the two-week period preceding any anniversary date of this agreement, as the case may be."

So far as the claim for check-off is concerned, the Board recognizes that an employee may properly lodge with the Company an order for the payment to the Union out of wages due to him such amount as he may therein designate, and that the Company could hardly object to honouring such order according to its terms.

A further point raised in a written submission by the Union to the Board concerned the application of the proposed collective agreement to guards and watchmen, classi-

fications which the Company seeks to exclude. This matter would seem to be concluded by the certification order of the Ontario War-time Labour Relations Board which defined the bargaining unit as including all employees, save and except foremen and office employees.

All of which is respectfully submitted.

Dated at Toronto this eighth day of June, 1945.

Report of Board in Dispute between Dominion Engineering Works, Ltd., Longueuil, P.Q., and Local 1596, International Association of Machinists

On June 28 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between Dominion Engineering Works, Limited, Longueuil, P.Q., and Local 1596, International Association of Machinists. A minority report was submitted by Mr. Alex Gauld.

The personnel of the Board was as follows: Hon. Mr. Justice Alfred Savard, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. C. G. Heward and Alex Gauld, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

*Re: Board of Conciliation, Dominion Engineering Works Ltd., Longueuil, and Local 1596—
International Association of Machinists.*

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:—

The Board appointed under your seal has received written and oral submissions of both parties and begs herewith to present its findings, conclusions and recommendations.

Meetings took place in Montreal on May 31st, June 2nd, 9th, 16th, 25th, 26th and 27th.

The Company was represented by Mr. W. M. Baker, Assistant Manager of Manufacturing of Dominion Engineering Works and Mr. A. F. Hale, Manager of Personnel, Longueuil Plant.

The Local was represented by Mr. Robert Haddow, Romeo Mathieu, A. T. Whelan and Louis Gosselin.

An Agreement has been in existence between the two parties to this dispute since November, 1942, governing wage rates and working conditions in the Longueuil plant of the Company.

This Agreement has come up for amendment and renewal each year of its existence. On each occasion, the Union has made a request for some form of union security along the lines of the union shop, but it was reported that such a request was refused due to the government policy covering government-owned plants.

This year the Local does not press its demand for a closed shop or maintenance of membership, but proposes to the Company that it should agree to the check-off of Union dues as follows:—

Upon the receipt of a written request from any employee forwarded through the Shop Committee, the Company agrees to deduct the monthly dues of such employee from his or her pay and transmit the funds so collected to the duly accredited officials of the Union, in similar manner to the Company's method of dealing with the deductions which any employee may voluntarily request the Company to make from his or her pay on account of war loans or for any other cause. It is understood that, as in the case of other voluntary deductions, the employee shall at any time be at liberty to cancel his or her request for the making of such deductions upon giving notice in writing to the Company through the Shop Committee.

In support of its proposition the Local urged that it prevail in various other plants; furthermore it lends itself to stability in union membership, thus eliminating the necessity for the carrying on of a continuous organizational campaign by the union leadership; a further advantage is that it obviates the necessity of committee men collecting dues in the shop.

As against the proposition of the officers of the Local, the management of the Company has represented that it is firmly of the opinion that whereas the economic policies of this country are based on the practice of competitive enterprise, as opposed to a state planned and controlled economy, monopolies supported by compulsion in any form are contrary to the public interest. The Company believes that freedom from such compulsion necessarily includes the freedom of the individual without intimidation or coercion to follow the vocation of his or her choice regardless of membership or non-membership in an employees' organization or union. In conforming to these principles the Company declined to become a party with any employees' organization or union to a collective agreement embodying any of the following conditions: the "closed shop", the "union shop", "maintenance of membership" or "check-off" and was unwilling to agree to the inclusion in a collective agreement of any variation of these provisions which in the opinion of the Company have a similar effect or appear to the Company to violate the principles in which the Company believes. The Company also submitted that there is nothing in P.C. 1003 or in any Provincial legislation to require the Company to negotiate for or to include any provision for "union security" or check-off of union dues in a collective agreement. In this connection the Company's representatives argued orally that the check-off has no place in a collective agreement as defined by Section 2 (1) (d) of P.C. 1003.

Several adjournments took place and the representatives of both sides met apart from the Board in order to see if some sort of compromise could not be reached.

After several meetings the Company presented the following suggestions:

1. The Company declared its unwillingness to make a signed agreement with anybody in regard to the check-off but stated:

2. That if arrangements were made to withhold Union dues from the pay of employees on a voluntary basis it would have to be done upon the following terms:

- (a) applications would be made direct to the Company by the employees concerned.
- (b) revocations by the respective employees would have to be made direct to the Company.
- (c) the arrangements would be terminable at any time either by the individual employee or by the Company itself.
- (d) the wording of the authorization for deduction of pay would have to be in such form as the Company might determine.

3. The arrangement would not in any event be adopted unless and until authorizations were received from a majority of the hourly rated employees.

Upon subsequent enquiries by the Board of the Company the latter supplemented the foregoing suggestions as follows:

- (a) The Company expressed its willingness to wait for a period of thirty days after the decision of this Board giving a delay in which authorizations were to be received from the employees and to ascertain whether authorizations were thus received from a majority of the hourly rated employees.
- (b) That if the Company terminated the arrangement of the kind above indicated for deduction of pay it would notify all employees of the Shop Committee.

The Company in making this compromise suggestion urged that if what the Union was seeking was service in the collection of dues it would get that service under such an arrangement.

Prior to the receipt of the supplementary suggestions referred to above the representatives of the Union made a compromise suggestion that the collective agreement should contain a clause to the following effect:

CHECK-OFF—

It is agreed between the management of Dominion Engineering Works Ltd., Longueuil plant, and the Committee of Lodge 1596, International Association of Machinists, that:

Upon the receipt of written instructions from any employee, in any classification covered by the collective labour Agreement existing between the parties hereto, on or before the second pay-day in any month, the Company agrees to deduct the monthly dues of such employee for membership in Lodge 1596, International Association of Machinists from his or her pay on the third pay-day of each month, and to transmit same to the Financial Secretary of the Lodge. In the case where the employee receives no pay or insufficient pay on this day, a double deduction shall be made the following month. These deductions shall continue until these instructions are cancelled in writing by the employee concerned.

Any employee wishing to cancel his/her instructions for the deductions for union dues shall give notice, in writing, stating his/her desire for deductions to stop. Such notice of cancellation must be delivered on or before the last pay-day of the month preceding the month in which the cancellation is to become effective.

Instructions and cancellations, as described in the foregoing, shall be made out by the employee on printed forms furnished by the Company, and delivered to the personnel office of the Company; the personnel office shall inform the Chairman of the Shop Committee of all instructions and cancellations within seven (7) days of receipt thereof.

The Company objected to that clause upon the following grounds:

- (a) That it involves a signed agreement between the Union and the Company.
- (b) That it does not provide freedom for the Company to cancel the arrangement at any time.
- (c) That it does not provide that the arrangement would only be operative if a majority of the hourly rated employees signed authorizations.

The Company informed the Board that the compromise suggestion made by the Union was unacceptable.

The suggestion for compromise by the Union and the suggestion for compromise made by the Company as supplemented in the manner above indicated were fully discussed at a Meeting of the Board held on the 25th June. It was represented on behalf of the Union that while it was recognized that some concession had been made by the Company, it could not be accepted because it did not go far enough and the acceptance thereof would put the Union in a difficult position as regards other Companies where the check-off or a clause such as suggested by the Union by way of compromise had been adopted.

It was represented to the Board by the Company that in spite of the refusal by the Union of the concession granted by the Company, its offer still stood and that it was ready and willing to try it out.

When it was seen that any further discussion and Meetings could not possibly bring a complete agreement acceptable to both parties, the Meeting was adjourned for the preparation of the report.

The majority of this Board feels that while the concession granted by the Company does not meet the full demands of the Local, nevertheless it shows goodwill and a spirit of co-operation with the Union and goes part way towards meeting their requirements and affording to them an easier way of collecting their dues.

The majority of the Board therefore recommend that the offer of the Company be accepted and their suggestions carried out for the duration of the current year of the contract. We feel that if the problem is faced with the spirit of co-operation from the management to the union and from the union to the management the working out of this plan would make for satisfactory relations between the management and employees and bring to

the Local some form of union stability which they had not in the past.

The whole respectfully submitted,

ALFRED SAVARD,
Chairman;
C. G. HEWARD,
Member.

Minority Report

HON. HUMPHREY MITCHELL,
Minister of Labour,
Parliament Buildings,
Ottawa, Ont.

DEAR SIR:—

As a member of the Board established to conciliate a difference between the Dominion Engineering Works, Longueuil, and Lodge 1596, International Association of Machinists, and which pertained to the petition of the Union for a voluntary check-off clause in the agreement, permit me to submit this minority report:

The original proposal of the union requested that all employees desirous of having their dues deducted from their wages, notify the company to this effect. In the case of employees wishing to discontinue this practice, it was required that employees notify the company through the shop committee.

The refusal of the company to agree to these conditions resulted in the following proposals being submitted by the Union:

Upon the receipt of written instructions from any employee, in any classification covered by the collective labour agreement existing between the parties hereto, on or before the second pay-day in any month, the Company agrees to deduct the monthly dues of such employee for membership in Aircraft Lodge 712, International Association of Machinists from his or her pay on the third pay-day of each month, and to transmit same to the Financial Secretary of the Lodge. In the case where the employee receives no pay or insufficient pay in this day, a double deduction shall be made the following month. These deductions shall continue until these instructions are cancelled in writing by the employee concerned.

Any employee wishing to cancel his/her instructions for the deduction for union dues shall give notice in writing, stating his/her desire for deductions to stop. Such notice of cancellation must be delivered on or before the last pay-day of the month preceding the month in which the cancellation is to become effective.

Instructions and cancellations, as described in the foregoing, shall be made out by the employee on printed forms furnished by the Company, and delivered to the personnel office of the Company. The personnel office shall inform the Chairman of the Shop Committee of all instructions and cancellations within seven (7) days of receipt thereof.

It was understood that the name Lodge 1596 would be substituted for the name Aircraft Lodge 712.

In response the company stated its willingness to introduce the check-off in the plant, provided a majority of the employees signify their desire for the establishment of this condition, with the understanding that employees wishing to have their dues deducted from their pay envelope must notify the company to this effect. Employees desirous of cancelling this arrangement must notify the company of their desires. The company further announces its unwillingness to enter into any written agreement with the union in this matter but states its willingness to agree verbally to this understanding.

In P.C. 2685 a number of principles are enunciated which are fundamental to a relationship between employees and employers if that relationship would serve the interests of our national economy. It is intended that these principles should serve as a guide in all negotiations, between company representatives and the duly elected representatives of employees, in hopes that these representatives will adopt an attitude to the differences in dispute, in keeping with what should be a common concern for our national interests.

I cannot but feel that the final response of the company to the request of the union constitutes a violation of these principles in the sense that:

1. In general the reply of the company reflects a denial of the following quotation from the minutes of council of P.C. 2685 which reads as follows:

The best interests of industry and labour are inseparable and since organized society alone makes possible industrial production to the mutual benefit of those engaged therein, the needs of the community at large, especially under war conditions, must be regarded as paramount.

In contrast to the requirements of the above paragraph, the company in its treatment of the proposals of the union has displayed an antagonistic attitude. This presupposes that management differentiates between the interests of the company and its employees and consequently does not accept the truth embodied in this section of the preamble to the order in council. In this regard the final statement of the company constitutes a major violation of the intent of existing labour laws and especially of P.C. 1003.

2. The company is unwilling to enter into a written agreement respecting the check-off.

The union representatives are opposed to the idea of a verbal understanding. Since the merits of this decision cannot be judged by

abstract discussion but only on the basis of past experience, I cannot but feel, after having taken this matter up with the committee that the refusal of the union to accept this proposal, is well founded.

This proposal of the company is definitely in opposition to the spirit of collective agreements and reflects a skepticism or doubt towards the unions, unworthy of those at the helm of any section of industry. Unaware that objective reality holds no place for opposition to the legitimate aspirations or organized labour, which of necessity coincide with our national interests, the company representatives fail to note the injurious effects of this proposal for our mutual interests, and further, that it constitutes a denial of the right of organized labour to enter into collective agreements.

On the whole the proposal of the company is not conducive to the removal of misunderstandings and to the extension of common interest and national purpose and would, in the opinion of the committee, tend to disrupt any semblance of worthwhileness in existing relationship between the company and the union, should it be complied with. Once an understanding of this nature is agreed to, all control is vested in the company and all basis of future co-operation ceases to exist. Such a proposal constitutes a denial of partnership in industry and of the right and need for organizational independence, to best serve our common interests.

It is my opinion that Paragraphs 7 and 8 of P.C. 2685 substantiates this opinion:

7. That employees through the officers of their trade union or through other representatives chosen by them should be free to negotiate with employers or the representatives of employers' association concerning rates of pay, hours of labour and other working conditions, with a view to the conclusion of a collective agreement;

8. That every collective agreement should provide machinery for the settlement of disputes arising out of the agreement, and for its removal or revision, and that both parties should scrupulously observe the terms and conditions of any agreement into which they have entered.

It is obvious that every agreement presupposes a continuity of joint effort by the contracting parties. This precludes the right of any party to delegate its authority to the other, if the purpose of an agreement would be realized.

The union also rejects the proposal of the company because of the likelihood of jeopardizing other agreements in effect, should it do so.

Here it is necessary to acknowledge that the proposal of the company is not in keeping

with other check-off conditions established between the International Association of Machinists and several other companies.

In these circumstances it would be prejudicial to the future of these agreements should the union consent to enter into an agreement with the Dominion Engineering on the basis of the company's proposals. In this case it is impossible for the union to consider this proposal in isolation from the situation as a whole, since to do so would impair its

more widespread obligations and definitely disrupt relationships of far reaching significance for our national economy.

These are the reasons for the union's non-compliance with the recommendations of the company and I sincerely hope, Honourable Sir, that you will grant them your considerate attention and render an opinion in keeping with their merits.

Respectfully submitted,

(sgd.) ALEXANDER GAULD.

Report of Board in Dispute between the American Can Co., Ltd., Vancouver, B.C., and Local 2821, United Steelworkers of America

On June 15 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the American Can Co., Ltd., Vancouver, B.C., and Local 2821, United Steelworkers of America.

The personnel of the Board was as follows: Mr. J. Edwin Eades, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. R. H. Pooley, K.C., and Herbert Gargrave, M.L.A., appointed on the nomination of the employer and employees respectively. Following the first meeting of the Board, Mr. Gargrave resigned and his place was taken by Mr. George A. Wilkinson.

The text of the Board report and of the minority report was as follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations P.C. 1003 and in the matter of a dispute between United Steel Workers of America, Local No. 2821 and American Can Company Limited.

To:

The Honourable the MINISTER OF LABOUR,
Ottawa, Ontario.

The Board comprising James Edwin Eades, Chairman, Robert Henry Pooley, K.C., and Herbert Gargrave, M.L.A., held its first meeting at the City of Victoria on February 27, 1945. The Order of the Minister appointing the Board dated February 14, 1945, was filed as Ex. 1 and the Order of the Minister naming the members as of the same date was filed as Ex. 2. The members were sworn, and the Statement of Dispute was filed and the procedure to be followed was discussed and agreed upon. It was left to the Chairman to fix the time and place at which the parties would be heard and to make the necessary arrangements with the parties so that they would be prepared

without delay to adduce evidence if they so desired and to make submissions or deliver arguments.

Mr. Herbert Gargrave, M.L.A., resigned as a member of the Board before a further meeting could be held and subsequently Mr. George A. Wilkinson was appointed in his place and stead. The Board met on the 11th day of May at the Board Room in the Hall Building, 789 Pender Street West, Vancouver, B.C. The Order of the Minister, dated May 4, 1945, appointing Mr. Eades as Chairman on the recommendation of Mr. Pooley and Mr. Wilkinson, the members appointed on the recommendation of the employer and employees respectively, was duly filed. Mr. Wilkinson was sworn as a member of the Board.

Mr. James Robertson appeared on behalf of United Steel Workers of America, Local 2801 and Mr. D. N. Hossie, K.C., and Mr. H. G. Shaler appeared on behalf of the Company.

Evidence was submitted by both the employees and the employer and the witnesses were examined in chief, cross examined and re-examined. 19 Exhibits were filed. Arguments were then submitted by both parties and replied to.

The evidence adduced showed that the relationship between the Union and the Company was excellent. There had been collective bargaining between the parties which had resulted in a First Agreement (Ex. 9) signed in August, 1941, embodying Union recognition; a Second Agreement (Exhibit 10), executed in August, 1942; a Third Agreement (Ex. 11), executed in August, 1943, embodying a maintenance-of-membership clause and a Fourth Agreement (Ex. 6) executed as of August, 1944; Article IIA of Exhibit 6 is as follows:—

This Agreement does not contain any provisions with regard to "Union Shop" or "Check-off", both of which subjects have been

and still are the subject of negotiations between the parties. These two subjects are to be dealt with entirely independently, and are not in any way to affect the Agreement which is final between the parties on the subjects dealt with herein.

It was shown that the Union had proposed "Union Shop" and "Check-off" clauses in the bargaining prior to each agreement, but the Company had been unwilling to concede any form of union security in the first agreement and when the same was discussed in 1942 had stated that the policy of the Company would be decided following a decision of a United States War Labour Board then sitting in California. This Board awarded a form of maintenance-of-membership and the Company then agreed to Article III of the 1943 Agreement (Ex. 11) which reads as follows:—

Article III—Maintenance of Membership

Section 1. All employees who, fifteen (15) days after the date of signing this Agreement, are members of the Union in good standing in accordance with the constitution and by-laws of the Union, and all employees who thereafter become members shall, as a condition of employment, remain members of the Union in good standing for the duration of the contract.

Section 2. The Union shall promptly furnish the American Can Company Ltd. a notarized list of its members in good standing as of the fifteenth (15) day after the date of signing the agreement. If any employee named on that list asserts that he withdrew from membership in the Union prior to that day, and any dispute arises, or if any dispute arises as to whether an employee is or is not a member of the Union in good standing, the question as to withdrawal or good standing, as the case may be, shall be submitted to the grievance machinery.

Section 3. The Union agrees that neither it nor any of its officers or members will intimidate or coerce employees into membership in the Union. If any dispute arises (as to whether there has been any violation of this pledge or whether any employee affected by this clause has been deprived of good standing in any way contrary to the constitution and bylaws of the Union), the dispute shall be regarded as a grievance and submitted to the grievance machinery.

The Union now requested that the Company agree that there be included in the present agreement (Ex. 6) the following Article IIA:—

Section 1. The Company and the Union mutually agree that as a condition of employment, each employee covered by this Agreement shall within thirty (30) days from the execution of this Agreement, or thirty (30) days from the date of hiring, become and thereafter remain in good standing with the Union, during the life of the agreement.

Section 2. The Company agrees to deduct from the earnings of all employees covered by this agreement, the first payday of each

month, the sum of one dollar (\$1.00) or such additional amount, not to exceed one dollar and fifty cents (\$1.50) as determined in accordance with the provision of the Constitution of the International Union.

The Company expressed itself as being resolutely opposed to the proposed Article IIA and to be opposed to the inclusion in the present agreement of the maintenance of membership clause above mentioned, which was in the 1943 Agreement. The parties, however, had agreed that during the negotiations they should carry on as if Article 3 of the 1943 Agreement was still in effect.

Evidence was adduced by the Union to show that it had been of substantial value to the employees in respect of increased and better standardized wages, overtime pay, a more satisfactory system of and increased holidays with pay, the establishment of a satisfactory safety committee elected by the Union and the introduction of a workable system of grievance procedure. It was proved that of 337 employees as at April 30, 1945, both male and female, 280 were members of the Union, and that in no case had a member been asked to resign or expelled. The constitution was filed (Ex. 15) and it was pointed out that provision was made for proper elections of officers, for proper financial returns and an audit of the Company's books semi-annually. It was also shown that there were 188 employees of the company serving overseas of whom about 170 were hourly-rated, of these 25 had enlisted prior to the formation of the Union and of the balance 125 were Union men and of these Union men 62 had been in front line service and 15 had lost their lives. The evidence of the employees further disclosed that the present maintenance of membership clause had not affected membership in the Union but that "Union Shop" and "Check-off" would be of great value in obtaining the maximum of production and harmonious relations.

While agreeing that the Union had a good deal to do with increase in wages and better working conditions since 1941, the evidence of the Company showed that two general increases in wages had been made prior to that time and that wages in industry generally were higher since the war and that apart from the Union activities, a survey had been in effect and would have resulted in an increase. The existing maintenance of membership clause had not been detrimental to the Company's interest, nor, as far as the evidence disclosed, to the employees. "Union Shop" was felt to be detrimental to the Company and to the employees.

The arguments of Mr. Robertson on behalf of the employees and Mr. Hossie on behalf of

the company were in great part those which are generally advanced for and against "Union" or "Closed Shop" and "Check-off" and it is not proposed to detail them. Mr. Hossie in effect, objected to the jurisdiction of the Board to deal with the questions before it. He argued that the question of "Union Shop" and "Check-off" did not come within the purview of the Board.

The Board does not consider it necessary to deal with these submissions. The Board's duties are defined in P.C. 1003 which reads as follows:—

13 (2) A Conciliation Board appointed under this section shall, upon its appointment, endeavour to effect an agreement between the parties in the matters in which they have not agreed and, in any event, shall report the result of its endeavours and its findings and recommendations to the Minister . . .

14. If a Conciliation Board's report to the Minister shows that it has been unable to effect an agreement between the parties, the Minister shall cause a copy thereof to be sent forthwith to the parties . . .

The Board has given careful thought to what if any recommendation should be made in respect to what are usually called union security clauses. The Company is resolutely opposed to the two proposed sections dealing with "Union Shop" and "Check-off" and as previously stated, is opposed to the maintenance of membership clause which was in the 1943 Agreement. Both parties had agreed that during negotiations this Article was to be considered still in effect. Both parties have agreed that this maintenance of membership clause has not affected the relationship, the one with the other. It is a measure of Union security. Mr. Robertson was very definite that the Union wished the good relations between employees and management to continue and would not wish anything to be said or done which might in any way interfere with such relationship. The Board feels that recommendation of a Union shop would not be accepted by the Company, and such recommendation might endanger this splendid spirit of co-operation. On the other hand, the Company has been and is to the date hereof satisfied to work under the said maintenance of membership clause and the Board recommends that the clause previously set out with such amendments as the parties may agree upon be inserted in the present agreement as Article IIA.

The Board has reviewed the arguments with reference to check-off and also perused the submissions to the British Columbia Legislature made on behalf of a very large number of employers at the last session of the legislature. The arguments against the voluntary check-

off of monthly Union dues of \$1.00 per month do not weigh heavily against the argument in favour, where, as here a maintenance of membership is in effect or recommended. This Company makes seven payroll deductions for hourly-rated employees. Three of them are compellable deductions, namely those in respect of income tax, unemployment insurance and poll tax. The Crown obviously realizes the difficulty of effecting individual collections from the worker and places upon the employer the onerous duty, not only of making the collection and remitting, but of making proper returns. This is a compulsory check-off. Other weekly deductions are made for medical aid, the Red Cross, victory loan and war savings certificates where the employee signifies his willingness to have the deductions made. The Committee in charge of sales on behalf of the Red Cross Association, victory loan and war savings certificates realize the difficulty of effecting individual collections and with the voluntary assistance of the Company made their collections through a check-off. The Company recognizes the value to the community and it is fair to assume to the employee to have these voluntary deductions made. Recently the Company circulated its employees, both hourly-rated and salary, suggesting that they become members of the Blue Cross Hospital Service and if 40 per cent agreed, then the Company voluntarily agreed to make deductions from those desiring to join the scheme. These are cases of voluntary "check-off". The Company has in its evidence before the Board, recognized the value of the Union to the employees and from the evidence given on behalf of the Union, this particular Union has been of substantial value to the community. There seems therefore no substantial reason why the Company should not recognize an order voluntarily given by an employee for the payment to the proper union official of the worker's monthly dues.

The Company did in 1943 agree to the maintenance of the membership clause previously referred to under which it is imperative, from the point of view of the Union member, that he should promptly pay his dues. Therefore it is essential that he should be assisted in the payment of these dues. On the other hand the Company undoubtedly has a number of valued employees who are members of the union and paid weekly and yet are so impecunious that a dollar represents a sum difficult to retain and this valued man may have to be discharged. Such men should be assisted by the Company in their acceptance of his desire that his dues be deducted.

It is therefore recommended that Article II should contain a clause in such form as the parties may decide upon which will provide that upon a Union member requesting the Company to deduct from his wages the amount of his monthly dues to the Union that the Company shall recognize and act upon such request.

Following the unanimous agreement reached by the Board as to its finding and recommendations Mr. George A. Wilkinson has advised the Chairman that, after a very serious study of the entire proceedings and while hesitant to upset the unanimity of the Board, he feels that he would not be acting in the best interests of the employees if his previous decision was not reversed. Mr. Wilkinson therefore proposes to file a minority report.

All of which is respectfully submitted.

Minority Report

In the matter of the Wartime Labour Regulations: Regulations P.C. 1003, and in the matter of a dispute between the United Steelworkers of America, Local No. 2821 and the American Can Company Limited, Vancouver, B.C.

The Hon. HUMPHREY MITCHELL,
Minister of Labour,
Dominion Government,
Ottawa, Ont.

DEAR SIR:

As Mr. J. E. Eades, chairman of the Board constituted to deal with the above-mentioned dispute has stated in his report, after further and serious consideration, following an unanimous opinion first arrived at by members of the Board, I am now filing a minority report, dealing solely with the matter of union security.

I am in full agreement with the other two members of the Board on the question of voluntary checkoff, and feel that it would be to the interest of both parties to the dispute to have this procedure adopted as speedily as possible.

On the matter of union security, however, I feel that a stronger clause should be inserted than the proposed maintenance of membership. My reasons are as follows:

In evidence presented to the Board, both the Company and the Union offered sufficient proof that excellent relations had been established and maintained between both parties.

It was also proven to the Board that there is a considerable influx of new employees annually. The Financial Secretary of the Union submitted that there had been 1,100 union members registered over a four-year period. There were 337 employees on the company payroll as of April 30, 1945, and I take it that that is normal for this season.

The Union contended that the influx of workers during the busy seasons made it almost an impossible task for individual checkups by Union representatives, and it could be deduced that the shop stewards might have to neglect their duties to the Company if they attempted to give individual attention to each person who was diffident about becoming a Union member.

One objection raised by the Company's lawyer, Mr. D. N. Hossie, was to the effect that inclusion of a union shop clause would interfere with the rights of some 160 workers who are at present in the armed forces. Evidence was submitted that a very large majority of these persons in the armed forces were members of the Union. It was also clearly established that as such they would have had the same rights as other members in voting on union security proposals at union meetings from year to year. The Union established that they had sought a union shop clause consistently for three years during negotiation of the annual agreement.

It was further established that the Union had protected these employees now in the armed forces while absent by bettering conditions of employment and wages in the plant through negotiations. By the Company's admittance and the Union's claim it was clearly established also that the Union had been responsible for a considerable increase in wages since the first negotiations in 1941.

Under the present maintenance of membership clause it was proven to the satisfaction of the Board that the Union had never requested the employer to discharge an employee. In the writer's opinion this is an important point. It is a reasonable assumption that a stronger union security clause would not work any hardship on the employer or employees. The executive members of the Union are apparently employees who have had many years' service with the Company. Such employees can usually be relied upon to be fair and reasonable in dealings with the employer, and I am fully convinced that a stronger union security clause will be adequate to ensure harmonious relations from year to year.

While the Company may have some merit in their claim that a union shop clause would cause them to lose the services of some em-

ployees of long and valuable service, I believe the Union is also justified by the facts presented to the Board that all employees have received many benefits from the Union's negotiations and should consequently assume a fair share in the responsibilities of the Union. Therefore, I feel that the least the company should offer would be a simple maintenance of membership clause which would call for all new workers to join the Union within a thirty-day probationary period after commencing employment. By embodying such a clause the Company would be free to retain any employees of long service who still refuse to join the Union (the number of which is not a large factor according to the evidence) as well as to hire any employees

for a testing period to see if their work is satisfactory.

In conclusion, I would like to state that the sooner the federal and provincial governments can arrange satisfactory legislation covering union security clauses in agreements, the sooner this matter will be removed from its present eminent position as the primary matter in dispute before most conciliation and arbitration boards.

All of the foregoing is respectfully submitted by

(Sgd.) GEO. A. WILKINSON,
Member.

Report of Board in Dispute between Massey-Harris Co., Ltd., Toronto, Weston and Brantford, Ont., and Int. Union, United Automobile, Aircraft and Agricultural Implement Workers of America

On June 18 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between Massey-Harris Co., Ltd., Toronto, Weston and Brantford, Ont., and Int. Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

The personnel of the Board was as follows: Hon. Mr. Justice W. D. Roach, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. John J. Robinette and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Massey-Harris Company Limited (Toronto Works) Toronto, Ontario, (Weston Works) Weston, Ontario, and (Verity Street and Market Street Works) Brantford, Ontario, (Employer) and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (Employees)

To the Honourable the MINISTER OF LABOUR

The undersigned chairman and members of the Board of Conciliation established in this matter pursuant to the provisions of section 13(1) of the Wartime Relations Regulations P.C. 1003, beg to report as follows:

Massey-Harris Company Limited, hereinafter called the Company, operates four plants in Ontario, one at Toronto, two at Brantford

and one at Weston. In each of these plants the Company had a collective bargaining agreement with its employees, which agreement in each instance was made to expire on December 31, 1944. This expiration date had been fixed in contemplation of a master collective bargaining agreement, which would apply to all the plants and supersede the earlier collective bargaining agreements. On or about December 6, 1944, the parties commenced negotiations for such master collective bargaining agreement. Those negotiations extended over several months and the parties were finally in agreement as to all the terms of such master agreement save only the question of "Union security." The Union demanded a union shop in all the plants. The Company opposed this demand, and the parties being unable to reconcile their opposing views this Board was established. The Board met with the parties at the City of Toronto on May 5, May 18, and May 25, 1945.

At all those meetings the Company was represented by Mr. John S. D. Tory, K.C., Counsel; Edward Burgess, Vice-President in charge of production; C. B. C. Scott, Superintendent of the Toronto plant and head of the department of personnel; H. R. Ellis, Personnel Manager. The Union was represented by Mr. John Eldon, International Representative in the Toronto District; Mr. Robert Stacey, International Representative in the Brantford District; Mr. Thomas McLean, International Representative in the Weston District, and the representatives from the individual plants were as follows: Mr. Harold Taylor, President of Local No. 439 and an employee of the Toronto plant; Mr. Harvey Barber, President of Local No. 458 and an

employee at the Brantford plant; Mr. Malcolm Murdoch, President of Local 382 and an employee at the Weston plant; Mr. James Templeton, member of the negotiating committee and an employee at the Weston plant; Mr. John Henson, Secretary of Local 382 and an employee at the Weston plant.

The Board desires to record its appreciation of the unstinted assistance and co-operation given to it by the representatives of the respective parties. From the outset it was most obvious that the parties were anxious to find some common ground upon which they might agree and the proceedings before the Board were most harmonious and marked by a real and sincere desire on the part of the Company and the Union to reconcile their opposing views. If, as this Board hopes, its efforts have been fruitful, the result is due in

- (e) the proportion of skilled and unskilled employees at each plant;
- (f) comparative figures as to production in the plants;
- (g) the record of the growth of the Union and the maintenance of its membership in each plant.

It is both desirable and necessary that this information be allocated to the respective plants to which it applies.

FIRST, THE TORONTO PLANT

This plant is presently being operated for the manufacture of farming implements. During the years of the war in Europe it was also engaged in certain war work and the peak of production of war work was reached in the third quarter of 1943, from which time the number of employees engaged in war work at this plant steadily declined.

Comparative information as to number of employees on nominal pay roll

	1937	1938	1939	1940	1941	1942	1943	1944

February	195	nil							April	177 nil

large measure to the co-operation and assistance of the parties.

Having regard to the importance of the issue and the history of employer-employee relations between this Company and its employees and the large number of employees to be affected by this proposed master agreement, this Board thought it necessary to obtain from the parties considerable statistical information. That information included,

- (a) the number of employees on the nominal pay roll in each of the years 1937 to date, dividing each year into quarterly periods;
- (b) the number of female employees on the nominal pay roll;
- (c) the seniority record;
- (d) the number of former employees who have joined any branch of the armed forces and who upon return to civil employment will be entitled to their former jobs with the Company;

Seniority Record

Length of Employment

From 0 to 6 months.....	332
" 6 months to 1 yr.....	192
" 1 yr. to 2 yrs.....	316
" 2 yrs. to 5 yrs.....	680
" 5 yrs. to 10 yrs.....	200
" 10 yrs. and up.....	412
	2132

The total number of employees formerly employed by this plant who have joined any branch of the armed forces, 716.

As between skilled, semi-skilled and ordinary labour the present proportions are as follows:

Skilled	21.9 per cent
Semi-skilled	53.9 per cent
Ordinary	24.2 per cent

The production of farm machinery only, taking 1937 as the normal for each of the succeeding years, shows variation and is as follows:

	Per cent
1937	100
1938	86.9
1939	60.1
1940	120
1941	130
1942	118.1
1943	114.9
1944	150
1945	170.9

The Company estimated that for the next succeeding three years the number of employees to be engaged at this plant steadily would approximate 2,400. The growth of the Union and the maintenance of its membership is reflected by the following statistics quarterly.

1942, as of December 31.....	331
1943, as of March 31.....	1152
as of June 30.....	1032
as of September 30.....	1437
as of December 31.....	1550
1944, as of March 31.....	1417
as of June 30.....	1259
as of September 30.....	1140
as of December 31.....	1170
1945, as of March 31.....	1179

Those figures must be read in the light of certain other statistics. For example, there is a labour turn-over in this plant of approximately 9 per cent monthly. During the war years a substantial number of employees were brought to this plant from Eastern and

Western Canada, these employees not intending to remain as permanent employees.

Prior to the organization of the employees by the Union, there was an industrial council operating in this plant. In October, 1942, the Steel Workers Organizing Committee, C.I.O., began to organize the employees, and in January, 1943, the employees who had belonged to the Union transferred their affiliation to the United Automobile Workers, C.I.O. In July, 1943, the Union applied to the Ontario Labour Court for certification as the collective bargaining representative of all the employees. The Court directed that a vote be taken and the result of the voting was as follows:

Number of eligible employees...	2697
Number of ballots cast.....	2181
Number of rejected ballots....	21
Number of ballots marked in favour of Union.....	1569
Number of ballots marked in favour of Industrial Council..	591

By an order of the Ontario Labour Court dated November 5, 1943, the Union was certified as the collective bargaining representative under The Ontario Collective Bargaining Act.

SECOND, BRANTFORD PLANTS

There are two plants operated in Brantford, one known as the Market Street Plant and the other the Verity Plant. In the Board's meetings with the parties these plants were regarded as one. This plant is primarily a farm implement production plant. It has been engaged in some war work, namely, the production of metal fittings for aircraft.

Comparative information as to the total number of employees on the nominal pay roll quarterly

	1937	1938	1939	1940	1941	1942	1943	1944	1945

“ 6 months to 1 yr.....	204
“ 1 yr. to 2 yrs.....	431
“ 2 yrs. to 5 yrs.....	207
“ 5 yrs. to 10 yrs.....	40
“ 10 yrs. and up.....	588
	1920

Number of former employees who have joined any branch of the armed forces, 356. Of these 30 have returned and been re-employed.

The percentage of skilled, semi-skilled and ordinary labour as at present:

Skilled	23 %
Semi-skilled	50.2%
Ordinary	26.8%

Comparative figures as to production, taking the year 1937 as normal for farm machinery only.

	%
1937	100
1938	113
1939	68
1940	128
1941	110
1942	110
1943	105
1944	120
1945	150

Prior to the entry of the Union there was also an industrial council in these plants. In October, 1943, the Union applied to the Ontario Labour Court for certification as the bargaining representative of the employees. A vote was taken on the direction of the Court with the following result:

Number of eligibles.....	1593
Number of ballots cast.....	1430
Number of ballots rejected....	8
Number of ballots in favour of the Union.....	1039
Number of ballots in favour of the Industrial Council.....	383

The Union was certified by the Ontario Labour Court as the collective bargaining representative under the Ontario Collective Bargaining Act on February 4, 1944.

The growth of the Union and the maintenance of its membership at these plants is reflected by the following figures:

1943, November	1546
December	1581
1944, January	1609
February	1657
March	1783
April	1858
May	1919
June	1957
July	1049
August	1068
September	1110
October	1088
November	1161
December	1202
1945, January	1241
February	1285
March	1315
April	1327

These figures should be read in the light of the following fact, that in July, 1944, there were 937 employees suspended from the Union.

It would appear that at the Market Street plant as of May of this year approximately 60 per cent of employees at this plant having ten years or more seniority were members of the Union, and that at the Verity plant as of May of this year approximately 65 per cent of employees of this plant having ten years or more seniority were members of the Union.

THIRD, THE WESTON PLANT

This plant had been closed entirely from 1919 until 1940 in which latter year it was re-opened for the production solely of war equipment, namely, aircraft. When the necessity for the production of war equipment at this plant no longer exists it is problematical just to what use the plant will be put. The Federal Government of Canada has constructed a number of buildings on the land under an agreement with the Company. Notwithstanding the uncertainty as to the future so far as this plant is concerned, in contrast with the Toronto and Brantford plants, the parties were still anxious that a master collective bargaining agreement should apply to this plant.

Comparative figures as to the total number of employees on a nominal pay roll quarterly from 1940 to date

	<hr/>
	1460

It is obvious that some of the employees at this plant are regarded as having acquired seniority rights by reason of their employment in some other plant operated by the Company.

The number of employees from this plant who have become members of any branch of the armed forces, 500. Of these 25 have returned and been re-employed.

The arguments advanced by the representatives of the Union in favour of a union shop and those advanced by the Company against it were not new. They were substantially the arguments generally advanced, for and against where such issues arise between employers and employees and this Board does not think it necessary to enumerate them.

After exploring the situation and making various suggestions the Board suggested as a compromise that the Union abandon its request for a union shop and that the Company accede to a form of check-off. This suggestion was fruitful of some results. Labour relations between the Company and its employees have always been good, and having regard to the representations and arguments made by the parties to this Board, this Board would expect that they would continue to be good. The Union representatives intimated to the Board that for the sake of harmony and a continuance of these good labour relations that it would relinquish its demand for a union shop and accept in lieu thereof an irrevocable check-off for the life of the contract. The Company's representatives suggested with conviction that the check-off should be revocable. From that point forward the Board's discussions with the parties were limited to the subject of check-off, but the parties were unable to agree. It

is the Board's opinion, in view of the strength of the Union in all these plants and the good relations that have existed heretofore between the Company and the Union, that something more than mere voluntary check-off revocable at will should be granted by the Company. It was pointed out to the Board by the Union, and not denied by the Company, indeed agreed to by the Company, that there have been occasions when the Union in addition to serving its employees has been of substantial service and assistance to the Company when misunderstandings arose and improper inferences had been drawn and rumors circulated, both among the employees and the public, as to matters affecting the employees of the Company in connection with the war effort, and the attitude of the Company.

This Board, therefore, unanimously recommends, that the Union withdraw its request for a union shop.

The undersigned Chairman and the employer's nominee, Mr. John J. Robinette, K.C., recommend that in lieu thereof the parties agree to a voluntary check-off revocable by any employee on ninety days' notice to both the Union and the Company.

The employees' nominee on this Board, Mr. Bora Laskin, is unable to join in the foregoing recommendation because he is of the opinion that, in the light of the turn towards compromise which the proceedings before the Board took, a check-off voluntary in inception but irrevocable for the life of the collective agreement is the minimum which the Union should be urged to accept.

All of which is respectfully submitted.

Report of Board in Dispute between Federal Wire and Cable Co., Ltd., Guelph, Ont., and Local 3021, United Steel Workers of America.

On June 25 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between Federal Wire and Cable Company, Ltd., Guelph, Ont., and Local 3021, United Steel Workers of America. A minority report was submitted by Mr. E. MacAulay Dillon, K.C.

The personnel of the Board was as follows: His Honour Judge J. E. Lovering, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. E. MacAulay Dillon, K.C., and Herbert Orliffe, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between the Federal Wire and Cable Company, Ltd., Guelph, Ontario, and the United Steel Workers of America, Local 3021.

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

SIR:

This is a majority report of the Board of Conciliation established by you by instrument bearing date the 22nd February, 1945.

The members of the Board were Judge Egerton Lovering, E. Macaulay Dillon, K.C., and Herbert Orliffe, all of Toronto.

The preliminary meeting of the Board members themselves was held on March 28, 1945. The Board and the parties first met on April 16. Those present, apart from the members of the Board, were: W. F. C. Kidd, John Mitchell and Charles Pinson, representing the United Steel Workers of America; and J. C. Adams, representing the Federal Wire and Cable Company, Limited.

There were several points at issue, chief among them being Union Security.

Oral and written submissions were heard, and a further adjournment agreed upon to permit a written brief on behalf of the Company, and a written reply thereto by the Union representatives.

The next hearing was held on April 30, with the same parties present. The briefs before referred to were filed, and further oral submissions heard; but efforts to have the parties agree on any form of Union Security failed.

Another adjournment was agreed upon.

The Board met the parties again on June 1. Mr. J. C. Adams again appeared on behalf of the Company, Mr. W. F. C. Kidd for the local Union, and Mr. Charles Pinson for the International United Steel Workers of America. Further submissions and arguments were heard.

The parties advised the Board that they had agreed on all points at issue except that of Union Security. Further efforts of the Board to conciliate were devoted entirely to that issue. The Union representative was persuaded to forego his request for Union Shop and Maintenance of Membership, and to limit his request to that of Voluntary Check-off.

The Company could not be persuaded to agree to the Voluntary Check-off, and the Union was equally adamant in refusing to renew the old agreement, which expired on December 1, 1944, or to enter into a new agreement unless such agreements contained a Voluntary Check-off clause.

The Board met again on June 7 and June 12 for consideration of the problems raised by both parties, during the course of which it became clear that a unanimous report could not be submitted.

From the beginning of negotiations between the Union and the Company, both parties had made up their mind that neither would yield on the point of Union Security. Any form of Union Security was in the circumstances unnecessary and impractical from the Company's viewpoint. The Company alleged that the relationship between itself and the employees was harmonious, that a satisfactory agreement for bargaining was already agreed upon and ready for signature, except for the unnecessary clause providing for the Check-off; and to such clause it was emphatically opposed. Mr. Adams, for the Company, said, however, that if the Union would agree that in a year from now it would not make further requests the Company would now agree to the Voluntary Check-off. To this proposal or suggestion the Union would not agree.

The Company now has two hundred and seventy employees, and there are two hundred and forty-three of these who belong to the Union Local 3021. The majority opinion of this Conciliation Board is that since such a large percentage of the employees are members of the Local Union, and have expressed a desire for some form of Union Security, a continuation of the good relationship that has existed will be maintained and furthered if the Company will undertake such

slight additional service to its employees as the Check-off will involve.

The Company tacitly admits that it has no serious fault to find with the Voluntary Check-off in itself, and would agree to it if the Union would agree not to ask for anything more. We think this is an unreasonable attitude, and we urge the Company to change its mind, believing that such a gesture of goodwill would bear fruit in the increased efficiency and co-operation on the part of the employees.

We therefore recommend that the parties include in their new agreement a clause providing for the Voluntary Check-off.

All of which is respectfully submitted.

Dated at Toronto this 21st day of June, 1945.

(Sgd.) EGERTON LOVERING,
Chairman.

(Sgd.) HERBERT ORLIFFE,
Member.

Minority Report

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between the Federal Wire and Cable Company, Ltd., Guelph, Ontario, and the United Steel Workers of America, Local 3021.

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

SIR:

This is a minority report of the Board of Conciliation established by you on the 22nd day of February, 1945.

Collective bargaining has been in effect in this plant under an Agreement between the parties which expired on the 1st December, 1944. Since then the parties have been negotiating for a renewal of the Agreement. Since this Board of Conciliation was convened, the parties, by the usual process of mutual concessions, have agreed on all matters in dispute except the thorny problem of "union security", to adopt the term which organized labour uses to cover various forms of restrictive clauses, all of which (except the device of voluntary check-off) tend in greater or less degree to make continuous union membership a condition precedent to the continued employment of the individual employee by the employer.

During the hearings, the Union intimated that its demand under this heading had been reduced to voluntary check-off. To this the Company would not accede. This Board made every effort to conciliate and compromise these opposing positions so that the

difficulty might be resolved, but without success. In fact it would appear from the letter of the employer to the local representative of the Union, dated the 20th December, 1944, that the Union's position at that time was that if the Company did not agree to closed shop, maintenance of membership and check-off, that it would forthwith apply for the intervention of a Board, which it did early in January, 1945. (See Pinson's letter of the 3rd January, 1945.)

It is to be observed that the Union did not at that time suggest to the Company in any way that it would be satisfied with a voluntary check-off. It may well be that if the Union had done so instead of saying to the Company in effect, "As you refused to give us a closed shop, maintenance of membership and check-off, we will apply for the intervention of a Board", the lesser demand of voluntary check-off might have been granted by the Company.

I do not agree with the majority of the Board that the Company was unreasonable in refusing to concede the voluntary check-off, unless the Union would agree not to ask for some further elements of "union security". Granted an opposition in principle to the harsher and individually more restrictive clauses demanded by unions all over the country under this heading of "union security", then I see no reason why employers should concede the voluntary check-off as the first step or entering wedge which unions can, and do, use as a lever to obtain their more extremely repressive demands, unless the union concerned is willing to give some assurance (however unenforceable it might be) that when the agreement is re-negotiated at its expiration, no further demands under this heading would be made.

At a sitting of this Board on the 1st June, 1945, both parties agreed to the following statement dictated by the undersigned—"The parties agree that apart from union security, they are in substantial agreement about all other clauses heretofore discussed." At the same sitting, it developed that by what both parties called a "gentleman's agreement", relations in the plant had been and were now governed under the provisions of the expired Agreement above referred to. Both parties also agreed that present relations were now better and more harmonious under the "gentleman's agreement" than they had been during the period covered by the expired Agreement. In fact, Charles Pinson, who describes himself as "International Representative of the Union who services this plant" gave this rather peculiar reason for the present harmony. He said in effect that

relations were good because the Union was deliberately holding back important and contentious grievances until the Agreement was signed.

This demonstrates a regrettable lack of faith in the employer on the part of the Union and is quite unjustified by the facts disclosed at the sittings of the Board. This attitude, of itself, would make me very much loath to make any recommendations that this Union be afforded any form of union security whatsoever until it had demonstrated its willingness and ability to work harmoniously and with mutual trust and confidence with the employer.

But there are stronger and more compelling reasons against a Conciliation Board making any recommendations which tend to force the views of either party to any labour-management dispute on the other party, *where it is obvious to the Board that any such recommendation would not be implemented by the parties if it were made.* In this case the Union made it clear before this Board that they would not sign any agreement that did not contain provisions for the voluntary check-off. The employer was equally emphatic that it would not sign any agreement with such a provision in it. There is no possibility that a recommendation either for or against a voluntary check-off would be accepted by the party whose demand such recommendation denied.

Boards of Conciliation are just what their name implies. Their recommendations are not binding on the parties. Their duties are to try and bring the disputants to agreement by the ordinary process of give and take and mutual concession, in fact, to conciliate. Where, as in this case, that has proved impossible, then any recommendation which adopts the claim of either party and rejects the claim of the other, does not tend to conciliate but rather to antagonize. However,

the sanction of a recommendation by a Board of Conciliation, even though unenforceable, may give the successful party a lever by which it may extract from the other party a grudging and unwilling consent under pressure to concede the matter in dispute. If that happens then the document when signed should hardly be dignified by calling it an agreement, for it would not be the result of completely free and voluntary mutual negotiation and concession.

It may be that where there is a middle ground between two opposing demands, a Board of Conciliation might be justified in recommending that middle ground for the reason that it would probably be acceptable and, of course, would of necessity contain mutual concessions. Here no such middle ground exists. It is, of course, true that given the proper conditions, employers must bargain collectively with their employees, but so far, the state has very carefully refrained from requiring either employers or employees to agree to any specific terms (apart from the machinery for the settling of wage disputes) and has seen to it that Boards of Conciliation have no power to do so either. In my view, Boards of Conciliation therefore, should not, where there is no reasonable prospect of acceptance or no middle ground of compromise available, make any recommendations in respect to a dispute which falls in either or both of these categories.

It is with regret, therefore, that I find myself unable to concur in the majority report of this Board and take the position that in respect to the matter of voluntary check-off, no recommendation whatever should be made.

All of which is respectfully submitted.

Dated at Toronto, this 21st day of June, 1945.

(Sgd.) E. MACAULAY DILLON,

Member of the Board.

Settlement in Case of Montreal Tramways Company and its Employees

On May 31, 1945, an agreement was signed between the Canadian Brotherhood of Railway Employees and Other Transport Workers and Montreal Tramways Company, Montreal, P.Q. Following the signing of the agreement, Order in Council P.C. 6416, which authorized the appointment of two controllers to have custody of the business, undertaking, affairs and operations of the Montreal Tramways Company was revoked by Order in Council P.C. 4154 of June 9, 1945, and such custody and control of the property and assets were

revested in the company, effective June 11, 1945.

In May, 1944, a Conciliation Board was established to deal with a dispute which arose over the union's request for the inclusion of certain clauses including the closed shop and check-off of union dues in a collective labour agreement. The report of the Board was received on June 8 but the chairman was requested by the Minister of Labour to reconvene the Board for the purpose of clarifying certain of its recommendations and to make a

further effort to mediate the main items in dispute. The reports of the Board were reported in the August, 1944, issue of the *LABOUR GAZETTE*, pp. 976-981.

On August 2, 1944, a strike of the employees occurred and by August 11 there seemed to be no indication of a settlement being reached. Consequently, the Dominion Government, by Order in Council, P.C. 6416, appointed two controllers to have custody and control of the property of the company in so far as it relates to the operations of its transportation system, for a period commencing August 14, 1944, and ending at such time as the order was revoked.

Under the terms of the Order in Council, the parties were enjoined to continue negotiations with a view to reaching a final settlement. During these negotiations, a submission was made by the union to the Regional War Labour Board in connection with rates of wages and working conditions. On December 5, 1944, the Regional Board announced its decision. The company sought leave to appeal from the decision of the Regional Board but this was denied. In view of the special circumstances of this case and having regard also to the important and far-reaching effect on the company's whole wage structure which would result from the finding and direction appealed from, because of the elimination of ranges of wage rates and the substitution therefore of single rates, the National Board granted the application of the company for leave to appeal. At the same time, the representative of the union indicated to the Board that his organization was not opposing the company's application for leave to appeal.

In its Finding and Direction, the National Board refrained from disturbing the decision

of the Quebec Regional War Labour Board in so far as it reduced the number of classifications but expressed the opinion that it would be neither fair to the company nor fair to the employees in the circumstances of this case to direct so drastic a change from existing ranges of wage rates to single wage rates as proposed by the Regional Board. In order that there should be no opportunity for discrimination in this connection the National Board directed that the ranges of wage rates for each classification be so designed that employees if they acquire the necessary skill and experience, may, within reasonable time, progress to the top of the range. The Board considered it advisable that the schedule of ranges of wage rates should be in actual operation for a period of two months in order to assist it in determining whether or not revision or amendment was desirable in a certain number of classifications for which evidence and exhibits were presented to both the Regional and National Boards.

Following the Finding and Direction of the National War Labour Board, there were further negotiations between the parties which resulted in an agreement being reached.

The company recognizes the Brotherhood as the sole bargaining agency of the employees of the company. The company also agrees to deduct from wages, upon authorization by the individual employee, the amount of union dues, such authorization being irrevocable during the term of the agreement.

A summary of the agreement appears in the article *Recent Collective Agreements* elsewhere in this issue.

Conciliation Work of the Industrial Relations Branch During June, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

OFFICERS of the Industrial Relations Branch dealt with 17 industrial disputes during the month of June, involving 11,384 work-people employed in 35 separate establishments. Of these, eleven were new disputes which originated during the month and six were situations which had been unterminated as of May 31 and received further attention in June. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed

under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, and Glace Bay. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers

in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton,, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Brief summaries of a few of the cases of chief interest are given below:—

Coal Miners, Nova Scotia and New Brunswick—In previous issues of the *LABOUR GAZETTE*

(March, April, June, 1945) reference was made to a threatened strike by members of District 26, United Mine Workers of America, who are employed by 17 coal mine companies in the Maritime Provinces, and to the recommendations of an Industrial Disputes Inquiry Commission under the chairmanship of the Honourable Mr. Justice W. F. Carroll, of Halifax, N.S. Following the release of the Commission's report, the District Executive of the Union extended its collective agreement for 15 days to July 15th, in order to conduct a referendum among the union members. The miners voted by 5132 to 4072 to reject the Commission's recommendations as the basis of a new agreement with the operators. The Union then extended its contract for a further 15-day period to permit further negotiations with Government representatives. To prevent any misunderstanding, the Minister of Labour on June 19, notified the Union Executive that the considered attitude of the Government was that it was prepared to authorize an increase of 25 cents per ton in the price of coal for the duration of the war and for at least 12 months. The offer provided that the amount produced by the increase in the price of coal would be set aside and divided among the workers in such proportion to each worker as might be agreed upon between the Union and the operators. The Minister's proposal was not acceptable by the District Executive Board, and the Union then extended its contract to July 15th and requested further direct conversations with the Minister and Officers of the Department of Labour. Negotiations were scheduled to take place on July 4 and 5.

Packing Plant Workers, Hamilton, Ont.—On May 31, the Department received advice that an industrial dispute had occurred at the plant of Fowler's Canadian Co., Ltd., Hamilton, Ont. It was variously reported that a strike had occurred over the discharge of one worker and that the Company had ordered the workers from the plant after a slow-down occurred. The workers involved were members of Local 188, United Packinghouse Workers of America. Mr. R. H. Hooper, Industrial Relations Officer, investigated the situation and reported that the predominant cause of the dispute was a delay which had occurred in negotiations for a new collective agreement to replace one signed two years previously. The negotiations followed the report of a Board of Conciliation, to which reference has been made elsewhere in the *LABOUR GAZETTE*. At Mr. Hooper's suggestion, negotiations were at once resumed and mutual agreement was reached on the points at issue in regard to grievance procedure and hours of work. After the employees decided to return to work and

resume normal production on June 4, a collective agreement was signed on the same day.

Coal Miners, Blairmore, Bellevue and Coleman, Alta.—During May, on joint request of District 18, United Mine Workers of America, and the Western Canada Bituminous Coal Operators' Association, the Minister of Labour appointed Mr. R. K. Henderson, of Nanaimo, B.C., to act as Independent Chairman to arbitrate certain disputes affecting coal miners in the Crow's Nest Pass area. The decisions of the Independent Chairman were made early in June. One dispute involved the fixing of a price of a new Slope Contract at the Blairmore No. 5 Mine, No. 2 Seam, of the West Canadian Collieries Limited, in connection with which the Union asked for the same rates that were paid by the Company in driving a slope at another mine, plus increases in proportion to the angle of inclination. After visiting the mine the Chairman ruled that the price offered by the Company was fair and reasonable and should be accepted by the men.

Another dispute involved the claims of three employees of the Bellevue Mine of the same Company for an additional half shift credit on their holidays with pay. The men claimed that on the day in question they had properly gone home without completing their shift because the chute was full and they could not continue work at the mine face. The Arbitrator agreed with the Company that the situation could have been quickly remedied, and dismissed the men's claim on the ground that they did not make any complaint to the official in charge.

A third dispute concerned the tonnage rate to be paid to four miners employed in the Bellevue Mine of West Canadian Collieries

Limited. The question was whether the room price of 65 cents per ton or the pillar price of 53 cents per ton should be paid for certain work performed. Pointing out that the Fireboss had instructed the men to do the work in the most practical and safest way, the Chairman ruled that the men were entitled to the room tonnage rate of 65 cents for driving through the pillar.

Another dispute involved claims for holidays with pay by two employees of the Bellevue Mine, West Canadian Collieries Limited, who had been absent through illness and injury. The ruling was that under the terms of the collective agreement the men were entitled to claim three days in each calendar month as working time.

In connection with a claim for holidays with pay by an employee of the McGillivray Creek and Coal and Coke Company, Limited, Coleman, Alta., the Chairman decided that the reasons for the man's quitting work during the period in dispute were beyond his control and that he was entitled to six days' holidays with pay earned in 1944.

The final matter submitted to arbitration related to the payment of certain miners of Hillcrest-Mohawk Collieries Limited, Bellevue, Alta., after they had elevated a chute. The Company claimed that the men had ignored instructions to lay the chute on the bottom coal and continue on a certain pitch. The men contended that it was necessary to elevate the chute and claimed extra pay of 16 cents per ton. The Chairman accepted the explanation of the men and decided that they should be paid the extra amount for all coal loaded from the upper 27 feet of the Room but were not entitled to extra pay for the lower portion.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the **LABOUR GAZETTE** from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Transportation and Public Utilities: Electric Railways and Local Bus Lines

MONTREAL, QUEBEC.—THE MONTREAL TRAMWAYS COMPANY AND THE CANADIAN BROTHERHOOD OF RAILWAY EMPLOYEES AND OTHER TRANSPORT WORKERS

As noted on page 986 of this issue, this agreement was signed May 31. It is to be in effect from June 1, 1945, to May 31, 1946, and thereafter until revised or superseded. The company recognizes the Brotherhood as the sole bargaining agency of the employees and agrees to negotiate with the General Adjustment Committee selected by the Brotherhood for the settlement of any grievances. New employees will be informed of this.

Representatives of the Brotherhood may have leave of absence for union business. Routine notices of interest to the employees may be posted by representatives of the Brotherhood, and no other documents may be posted without the permission of the head of the department concerned.

Check-off: the company agrees to deduct and pay over to the union, for the duration of the agreement, the fixed union dues of employees who so authorize this. No organization will be permitted to collect union dues on company's premises.

Additional remuneration: the total gross receipts from passenger bus and tramway fares is calculated once each year and if such annual receipts exceed \$15,000,000, 25 per cent of the amount in excess of \$15,000,000 will be paid out to employees of at least one year's standing who have earned \$2,500 or less, in proportion to their earnings.

Apprentices are limited to less than 5 per cent of the regular employees, and no employee is to be classed as an apprentice for more than three years.

Vacation: one week's annual vacation with pay to employees with one year's service, except employees of the cashier's department who have 2 weeks' vacation.

Provision is made for seniority rights, safety and health and for the settlement of grievances.

Transportation Department

Hours: the choice of runs is by seniority. One day off in seven. As many runs as possible, but not less than 65 per cent of runs listed will be straight runs with or without a break for meals, varying between 7½ hours and 8½ hours including pulling-out and pulling-in time and completed within a maximum of 13 hours, but not less than 50 per cent of all assigned runs will be completed in 11 hours or less; not more than 10 per cent of the runs may be for less than 7½ hours, to be completed within 13 hours (secondary assignments). The remaining 25 per cent are odd runs with not more than two breaks, to be completed within 14 hours (voluntary assignments), and the booking of such runs is not obligatory except for employees in the rotating spare list. Employees accepting secondary or voluntary assignments, as well as spare employees, are guaranteed a minimum of 6 hours' pay at basic rates multiplied by the number of working days in a pay period.

Overtime: time worked over 8½ hours either on any week day, on Sunday or on a holiday is payable at time and one half the employee's basic rate. Employees required to work on Sunday when Sunday is one of their ordinary work days will be paid 5 cents per hour extra. Employees required to work on their weekly day off or on seven specified holidays to be paid at time and one quarter.

Uniforms and protective clothing are supplied by the Company. Seniority governs in case of lay-off and rehiring after lay-offs.

Hourly wage rates: conductors, motormen and car starters, 56 cents during first year, 61 cents during second year and 66 cents thereafter; operators of one-man cars, 61 cents during first year, 66 cents during second year and 71 cents thereafter; autobus chauffeurs 67 cents during first year and 71 cents thereafter; hillmen and switchmen 48 cents during first year and 50 cents thereafter. A premium of 10 cents per hour over basic rates is payable to employees training platform men or autobus chauffeurs, to employees in charge of sweepers, plows and other snow equipment, to crane operators on crane cars, etc., a premium of 5 cents per hour is payable to helpers on sweepers and other snow equipment, on crane cars, etc.

Rolling Stock Department

In the Youville shops, hours are 9 per day, 5 on Saturday, a 50-hour week, with overtime and Sunday and holiday work payable at time and one half; for a special call to work overtime, a minimum of 2½ hours' pay at time and one half is guaranteed. Gloves (where necessary), goggles, and half cost of overalls is payable by the company.

In the car barns, hours are 9 per day for 5 days, 5 on the short day, a 50-hour week, with

overtime on regular working days and on Sundays and holidays payable at time and one-half; for a special call to work overtime, a minimum of $2\frac{3}{4}$ hours' pay at time and one-half is guaranteed; work on Sundays and holidays at time and one-quarter, with a minimum of $3\frac{1}{5}$ hours pay at time and one-quarter. Gloves (where necessary), goggles, and half cost of overalls is payable to the employer.

Hourly wage rates in Youville shops: machinists 66 to 78 cents, machine operator 58 to 62 cents, fitter 69 to 73 cents, millwright 74 to 78 cents, welder 72 to 76 cents, toolmaker 80 to 84 cents, blacksmith 66 to 76 cents, electrician 70 to 74 cents, wireman 60 to 64 cents, carpenters 65 to 75 cents, upholsterer 70 to 74 cents, painter 64 to 74 cents, car scrubber 48 to 52 cents, labourer 48 cents.

Hourly wage rates in car barns: truck, brake and motor, fender, electrical inspectors 62 to 66 cents; troubleman, pitman, 62 to 66 cents; car starter 56 to 66 cents, car and shop cleaners 48 cents, stationary fireman 60 and 70 cents.

Construction Department

For the track department, regularly assigned hours (except for switchmen) are 9 per day, 5 on Saturdays, a 50-hour week, but employment is regulated to conform to this standard only so far as work is available and when weather conditions and other contingencies permit; switchmen's regular assigned hours are 9 per day, 6 days per week, a 54-hour week. Overtime for track department employees: day shifts employees, time and one-quarter until midnight and time and one-half thereafter; for overtime commencing between midnight and 5 a.m. is payable at time and one-half with minimum payment for $2\frac{3}{4}$ hours; for night shift employees, overtime is payable at time and one-quarter until noon and double time thereafter; for a special call for overtime work, time and one-half with a minimum of $2\frac{3}{4}$ hours at overtime pay; overtime rates are not applicable to night watchmen; work on Sundays and seven specified holidays is at time and one-quarter, with a minimum of $3\frac{1}{2}$ hours' pay. Protective clothing is supplied to section foremen, switch inspectors and others required to work in the rain; suitable shelters for use of watchman in inclement weather are supplied.

For construction shops, buildings and structures division, regularly assigned hours are 9 per day for 5 days, 5 hours on the short day (a 50-hour week) but employment is regulated so far as work is available and weather conditions, etc., will permit. Overtime conditions are similar to those noted above for the track department. Gloves and goggles are provided where necessary.

Hourly wage rates in track division: rail bender 71 cents, senior trackman 62 cents, driller and switch inspector 62 cents, trackman 54 to 60 cents, labourer 48 cents. Hourly wage rates in track service division: welder 64 to 68 cents, grinder 56 to 60 cents, blacksmith 66 to 76 cents, mechanic 70 to 76 cents. Hourly wage rates in building and structures division: carpenter 65 to 75 cents, plumber 68 to 78 cents, electrician 68 to 78 cents, bricklayer 66 to 74 cents, painter 66 to 74 cents, truck drivers 66 cents, labourer 48 cents.

Autobus Mechanical Department

Hours: 9 per day for 5 days, 5 hours on the short day, a 50-hour week. Overtime is pay-

able at time and one-half, with a minimum of $2\frac{3}{4}$ hours' pay at overtime rates when overtime is a special call to work outside regular hours; work on Sundays and seven specified holidays is at time and one-quarter for regular hours, with a minimum of $3\frac{1}{5}$ hours' pay, and time and one-half for work outside regular assigned hours: protective clothing and goggles are supplied by the company when necessary.

Hourly wage rates: machinists 66 to 78 cents, engine repairmen 65 to 77 cents, unit overhaul men 60 to 77 cents, chassis repairmen 61 to 77 cents, welder and solderer 61 to 76 cents, electrical repairmen 61 to 77 cents, body repairman 63 to 77 cents, brake repairman 60 to 77 cents, helpers 52 to 56 cents, apprentices 34 to 54 cents, tire repairman 56 to 60 cents.

Power Department

For power houses and substations, hours are 8 per day, 6 days per week, a 48-hour week, with overtime at straight time for the first half hour and at time and one-half thereafter: if overtime is a special call, a minimum of $2\frac{3}{4}$ hours' pay at overtime rates is payable. Each employee shall as far as practicable, have a regular seventh day off duty each week (preferably Sunday). Maintenance employees required to work on Sundays or holidays to be paid at time and one-half with a minimum of $2\frac{3}{4}$ hours' pay at overtime rates. Operating employees required to work on Sundays and holidays will be paid 5 cents per hour over regular basic wage rate and any overtime on these days at same rate as overtime on other days.

Hourly wage rates: station operators 72 to 76 cents, dynamo tenders 65 cents, inspector and supervisor \$200 per month, meter inspector \$140 per month; electrical maintenance—electrician 68 to 78 cents, helper 58 to 62 cents, fitter 68 to 72 cents; mechanical division—shift enginemen 91 cents, assistant engineman 72 cents, fireman 58 to 64 cents.

Overhead Department

Hours: 9 per day for 5 days and 5 hours on the short day, a 50-hour week. Overtime is payable at time and one-quarter to midnight and time and one-half thereafter; employees commencing work between midnight and 5 a.m. and employees working overtime on a special call are to be paid a minimum of $2\frac{3}{4}$ hours at time and one-half, and time and one-half thereafter; work on Sundays and holidays at time and one-quarter, with a minimum of $3\frac{1}{2}$ hours' pay, for regular hours and time and one-half thereafter; protective clothing is supplied.

Hourly wage rates: lineman 66 to 68 cents, groundman 64 cents, motor truck driver 62 and 64 cents, motorman (trans.) and conduit inspector 66 cents.

Cashier's Department

Hours: 8 hour shifts, employees working on a 3 shift basis one day off every eight days and two days (Saturday and Sunday) in the seventh week. The choice of positions and shifts is by seniority. The present practice of sick leave with pay is to be continued. Monthly wage rates: ticket clerks \$135 and \$142, branch ticket clerks \$107 and \$112, general clerks \$135 to \$175.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (MOTORMEN, CONDUCTORS, ONE-MAN CAR OPERATORS, BUS DRIVERS, AND TROLLEY BUS OPERATORS' UNIT OF ONE BIG UNION).

Agreement to be in effect from December 1, 1944, to April 30, 1946, and thereafter until 30 days' notice. Neither the company nor the employees shall discriminate against any employee for being or not being a member of the union.

Hours of work: standard working day to be 7 hours, with a minimum day of 7 hours and a maximum day of 7 hours and 40 minutes including "reporting time" and "putting away time" except that for duration of the war these times are 7 hours and 30 minutes and 8 hours and 10 minutes respectively. Overtime: time and one-half for all work in excess of the maximum working day and for all time worked on their day off. Employees shall be supplied with transportation on all city and suburban car lines and bus lines where regular city fares apply. The company will pay all excess of premium over sixty cents per month on \$1,000 insurance on the life of each employee insured under its group life policy and it is understood that all new permanent male employees are required to carry this insurance. Vacation: one day with pay for each 24 days worked not exceeding 12 days, to each employee who has completed 12 months continuous service.

Wage rates: two-man car operators first six months 66 cents per hour, next succeeding twelve months 70 cents, after 18 months 74 cents; one-man car operators, busmen and trolley bus operators 5 cents per hour additional; Sunday work 5 cents per hour extra; training new men, 20 cents per hour extra.

Provision is made for seniority rights and grievance procedure.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (MOTOR BUS AND TRUCK DEPARTMENT EMPLOYEES UNIT OF ONE BIG UNION).

This agreement is similar to the above with the motormen, conductors, etc. unit with the following exceptions:

Hours of work: 8 per day, excepting for such men as are required for the over-lapping of shifts; truck drivers 8½ hours per day. Overtime: time and one-half for work in excess of the above hours and when called for work on Sundays and Dominion holidays. Double time for work over 16 consecutive hours.

Wage rates: classification "A"—Air brakemen, wiremen, tiremen, painters, welders, electricians, battery men and class A mechanics and body shopmen 89 cents per hour; classification "B"—air brakemen and class B mechanics and body shopmen 79 cents; classification "C"—oilers, greasers, gas and dispatcher men and learner mechanics and body shopmen 74 cents; classification "D"—utility men and truck drivers 69 cents; classification "E"—general helpers with established seniority 59 cents. Four years experience in the particular class of work involved, including the period as "learner" shall be required before promotion to classification

"A". There is no mention of free transportation.

WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (MECHANICAL DEPARTMENT EMPLOYEES' UNIT OF ONE BIG UNION).

This agreement is similar to the above with the motormen, conductors, etc. unit with the following exceptions:

Hours of work: mechanics and other car house employees except general helpers, 8 per day, 88 per 2 weeks, general helpers 8 per day 48 per week. Overtime: time and one-half for all time worked outside of the above hours.

Wage rates: classification "A"—machinists, sheet metal workers, blacksmiths, welders, armature winders, trolley bus repairmen, carpenters, pipe fitters, upholsterers, painters, air brakemen, and wiremen 89 cents per hour; classification "B"—wheelmen, electric repairmen, motor inspectors, trolley bus repairmen (3 years experience) 79 cents; classification "C"—oilers, pitmen and trolley bus repairmen (2 years experience) 74 cents; classification "D"—motor repairmen, babbittmen, machinist helpers, blacksmith helpers, armature winder helpers, trolley bus repairmen (one year's experience), fendermen, supply truck driver, trolley men 69 cents; classification "E"—trolley bus repairmen (6 months experience) 64 cents; classification "F"—general helpers with established seniority 59 cents; apprentices 43 cents in first 6 months increased every 6 months to 83 cents for second 6 months in fifth year. An apprenticeship plan is in effect.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (TRACK DEPARTMENT EMPLOYEES' OF ONE BIG UNION).

This agreement is similar to the above with the motormen-conductors unit, with the following exceptions:

Hours of work: 48-hour week May 1 to September 30, and a 44-hour week October 1 to April 30.

Wage rates: electric welders 84 cents per hour; leading trackmen 79 cents; acetylene cutters 74 cents; electric welders' assistants, switch inspectors and switch and diamond repairmen, emergency men, grinder men, flat car motormen, tool repairmen, truck drivers, compressors and derrick men 69 cents; flat car motormen (part time) shimmers 64 cents; labourers with established seniority 59 cents.

Track workers to be put on the seniority list of truck helpers and to be given every opportunity to qualify as truck drivers, according to seniority.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (TICKET SELLERS' UNIT OF ONE BIG UNION).

This agreement is similar to the above with motormen-conductors, etc. with the following exceptions:

Hours of work: 7½ hours per day weekdays, 7½ on Sundays including 15 minutes "taking over" time and 15 minutes "balancing" time.

Wage rates: \$135 per month after six months' service. There is no mention of sick benefit fund.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (STORE-KEEPERS' UNIT OF ONE BIG UNION).

This agreement is similar to the above with the motormen-conductors, etc. with the following exceptions:

Hours of work: $7\frac{1}{2}$ per day Monday through Friday, 4 on Saturday for day men, 8 hour shift for nightmen including 20 minutes for lunch.

Wage rates: senior store clerks \$137 to \$157 per month, warehousemen \$94 to \$132, female clerks \$94 to \$109. There is no mention of sick benefit fund.

Transportation and Public Utilities: Electricity and Gas

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (ELECTRIC POWER PRODUCTION AND DISTRIBUTION UNIT OF ONE BIG UNION).

Agreement to be in effect from December 1, 1944, to April 30, 1945, and thereafter until 30 days' notice. Neither the company nor the employees shall discriminate against, or intimidate any employee for being or not being a member of the union.

The company will pay all excess of premium over sixty cents per month on \$1,000 insurance on the life of each employee insured under its Group Life policy and it is understood that all new permanent male employees are required to carry this insurance. Employees shall be supplied with transportation on all city and suburban car lines and bus lines where regular city fares apply. All monthly rated employees shall be allowed pay while absent from work on account of illness up to a maximum of 15 working days in any one year; country patrolmen, who are not allowed equivalent time off for overtime worked, are allowed up to 30 days.

Vacation: monthly rated employees who have completed 12 months' continuous service shall receive one day with pay for each full month worked; hourly rated employees with 12 months' continuous service shall receive one day with pay for each 24 days worked, not exceeding 12 days.

Hours of work: power plants—operating staff 8 per day, 48-hour week, maintenance staff 8 per day Monday through Friday 4 on Saturday, a 44-hour week; substations—three-shift stations 8 consecutive hours per shift, 48 per week: in two-shift stations $9\frac{1}{2}$ hours per shift 5 days per week, patrolmen (city) 8 per day a 44-hour week (country) 8 per day a 48-hour week; substation maintenance and construction department, meter department and telephone and signal section of railway distribution department—day-men 8 per day Monday through Friday, 4 on Saturday a 44-hour week, shift men 8 per shift 88 per two weeks; truck drivers assisting journeymen, 8 per day a 48-hour week. Overtime: substations—time and one-half for first four hours worked in excess of regular hours, thereafter double time, and for work on "off day"; substation maintenance, etc.—day men, time and one-half for work after regular hours up to 12 midnight, thereafter and for work on Sundays and all legal holidays double time. Employees not to be laid off to balance overtime worked.

\$106 to \$148: at Pinawa—oilers \$148 to \$160, cleaners \$106 to \$138; maintenance—electrician \$202, utility man \$185, blacksmith, machinist \$177, labourers (after 6 months) 59 cents per hour; substation operators—71 cents to $94\frac{1}{2}$ cents per hour, floormen 58 to $66\frac{1}{2}$ cents, patrolmen \$168 per month; substation maintenance and construction department, meter department and telephone and signal section of railway distribution department—station maintenance man (journeyman) \$1.01 per hour, helpers and apprentice helpers 53 to 82 cents, truck drivers assisting journeymen 74 cents, labourers with seniority 59 cents; meter department—instrument man, installer, $97\frac{1}{2}$ cents per hour, installer improver 89 cents, meterman $51\frac{1}{2}$ cents (first year) to 79 cents after two years, telephone and signal section of railway distribution department—senior repairman 97 cents, machinist, welder signal maintainer 89 cents, assistant signal maintainer 82 cents, helpers 43 to 69 cents; railway distribution (emergency) truck drivers assisting journeymen $76\frac{1}{2}$ cents.

Provision is made for seniority rights, apprenticeship plan and grievance procedure.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (METER READERS' UNIT OF ONE BIG UNION).

This agreement is similar to the one with the Electric Power Production and Distribution Unit, noted above, with the following exceptions:

Hours of work: $7\frac{1}{2}$ per day Monday through Friday, 4 on Saturday, a 40 $\frac{1}{2}$ -hour week.

Wage rates: \$120 per month after first six months to \$150 per month during second six months of third year and thereafter.

Manufacturing: Vegetable Foods

KELOWNA, B.C.—MEMBERS OF THE OKANAGAN FEDERATED SHIPPERS ASSOCIATION INC. AND FRUIT AND VEGETABLE WORKERS' UNION

Agreements to be in effect from May 1, 1945, to May 1, 1946, and thereafter subject to 60 days' notice. The employers recognize the union as the sole collective bargaining agency for their employees covered by this agreement. All present employees who are now or later become members of the union must as a condition of employment maintain their union membership. The employers recommend to all eligible employees membership in the union. There shall be no discrimination against any member of the union by the employers because of union activities. Check-off: provision is made for deducting union dues from pay of those who so authorize and remitting of same to union monthly. Overtime: time and one half for work in excess of 10 hours per day and double time for work after 12 hours per day.

Wage rates: receiver, 62 to 67 cents per hour; dumpers and nailer operator 57 to 62 cents; truckers, stackers, skidmen, car bracing and swampers, 57 cents; hand pressmen 62 to $64\frac{1}{2}$ cents; truck drivers 57 to 67 cents; wiring, electrician, mechanic, stacking, dispatchers and cold storage help 62 cents; coopering and acid men 67 cents; processing plant:—general help, male 57 cents, female 46 cents including sorters; checkers 46 to 55 cents; packing and box making are at piece rates. All female workers placed on any job or any classification formerly

occupied by a male worker, must receive the rate for the male classification, provided, however, she is capable of doing the work without further assistance.

Vacation: one week with pay to all steady employees working on an hourly basis after one year's continuous service, to be taken at a time not to interfere with packing operations. Provision is made for seniority rights and grievance procedure.

Manufacturing: Metal Products

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (ELECTRIC APPLIANCE REPAIR DEPT EMPLOYEES' UNIT OF ONE BIG UNION)

Agreement to be in effect from December 1, 1944 to April 30, 1946, and thereafter to 30 days' notice. Neither the company nor the employees shall discriminate against or intimidate any employee for being or not being a member of the union.

Hours of work: 8-hour day, Monday through Friday, 4 on Saturday, a 44-hour week. Overtime: employees required to work over half an hour after completion of the regular working day shall be allowed 40 cents for lunch. Employees shall be supplied with transportation on all city and suburban car lines and bus lines where regular city fares apply. The company will pay all excess of premium over sixty cents per month on \$1,000 insurance on the life of each employee insured under its group life policy and it is understood that all new permanent male employees are required to carry this insurance. Vacation: all employees upon completion of one year's continuous service shall receive one day with pay for each full month worked in the preceding 12 months.

Wage rates: Senior repairmen \$153 per month, junior repairmen \$138, helpers \$88 to \$108.

Provision is made for seniority rights and grievance procedure.

Manufacturing: Non-Metallic Minerals, Chemicals

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (GAS PRODUCTION EMPLOYEES' UNIT OF ONE BIG UNION)

Agreement to be in effect from December 1, 1944, to April 30, 1946, and thereafter until 30 days' notice. Neither the company nor the em-

ployees shall discriminate against any employee for being or not being a member of the union.

Hours of work: men on battery and steam boilers 8 per day, a 48-hour week; yardmen, labourers, etc., 9 per day, a 50 hour week; two mechanics, coal unloaders and labourers on routine operations 9 per day, a 54-hour week. Overtime: time and one half after regular hours. Vacation: one day with pay for each 24 days worked, not exceeding twelve days in total, for each employee who has completed twelve months' continuous service prior to April 1. Employees shall be supplied with transportation on all city and suburban car lines and bus lines where regular city fares apply. The company will pay all excess of premium over sixty cents per month on \$1,000 insurance on the life of each employee insured under its group life policy and it is understood that all new permanent male employees are required to carry this insurance.

Wage rates: millwright 89 cents per hour; shift engineer 83 cents; heaters, producer operator, repairmen 79 cents; pusher operator, door lifter operator 78 cents; quenching car operator, coal elevator and mixer operator. 76 cents; boiler washer 71 cents; boiler man, oiler 69 cents; utility operators 67 cents; coal unloaders 66 cents; repair helpers 63 to 69 cents; laboratory helpers, machine operators 63 cents; yardmen and labourers 59 cents.

Provision is made for seniority rights and grievance procedure.

WINNIPEG, MANITOBA.—WINNIPEG ELECTRIC COMPANY AND WINNIPEG ELECTRIC EMPLOYEES' FEDERATED COUNCIL (GAS DISTRIBUTION EMPLOYEES' UNIT OF ONE BIG UNION)

This agreement is similar to the above agreement with the gas production employees' unit with the following exceptions:

Hours of work: 8 per day, a 44-hour week except troublemen on day shift shall work 9 hours per day, 54 per week, and troublemen on night shift shall work 8 hours per night, 48 per week, certain men in charge of stored trucks 8½ hours per day, 47 per week.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the

trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the

LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of one new agreement and the amendment of four others, all of which are noted below. Requests for the amendment of the agreement in the corrugated paper box industry for the province, retail trade for Quebec city, and barbers and hairdressers at Chicoutimi were published in the *Quebec Official Gazette*, May 19. A request for the amendment of the building trades agreement at Montreal was gazetted May 26 and corrected in the June 2 issue. Requests for the amendment of the agreements for bakers at Quebec, barbers and hairdressers at St. Jean and Iberville, grocery store employees etc. at Sherbrooke, and manufacturers of sheet metal products at Montreal, were gazetted June 2. A request for a new agreement for municipal employees at Sherbrooke was also gazetted June 2. Requests for the amendment of the railway car and bus manufacturing industry at Montreal, for barbers and hairdressers at Valleyfield, and for hardware and paint stores at Quebec were published June 9.

In addition, Orders in Council were published approving or amending the constitution and by-laws of certain parity committees, and others approving the levy of assessment on the parties.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL

An Order in Council, dated May 24, and gazetted June 2, amends the previous Orders in Council for this industry (L.G. June, 1945, p. 873, May, p. 720; February, p. 182, and previous issues). The amendment does not affect the summary already given.

Manufacturing: Metal Products

RAILWAY CAR AND BUS MANUFACTURING, MONTREAL

An Order in Council, dated May 24, and gazetted June 2, makes obligatory the terms of an agreement, between The Canadian Car and Foundry Company Limited, and The Association of Employees of Turcot and Dominion Works and refers to these two plants only. Hourly wage rates: Turcot Works, bolt and nut department—bolt and nut maker 85 cents, bolt threading machine operator 65 and 70 cents, die setter 80 and 85 cents, heater 65 cents, nut tapper 55 and 60 cents, rivet maker 75 to 85 cents, shear man 65 and 70 cents; cabinet shop—cabinet maker 80 to 90 cents, improver 76 cents, glue-press operator 70 cents; cabinet mill and lumber yard—machine operator wood mill 75 to 85 cents, elevator operator 60 cents, machine operator freight mill woodwork 70 to 80 cents; lumber yard—inspector of lumber 65 to 75 cents, tally man 60 cents, kiln attendants 65 to 90 cents; freight wood mill—general and special machine operator helpers 55 and 60 cents; toolroom—saw filer 75 to 85 cents, saw filer—improver 70 cents, labourer (outside) 58 cents; canteen—checker 59 cents, cashiers 51 and 54 cents, salad woman, counter girl, sandwich girl 41 and 47 cents; electrical department—crane operator 74 and 78 cents, electrician 80 to 90 cents; foundry—wheel-maker 70 cents, coremaker and moulder 85 to 95 cents, wheel roller 65 to 75 cents, repairman 70 to 80 cents, cupola operator 80 and 85 cents, boring mill operator 70 cents, sandblast machine operator 65 and 70 cents, tread grinder operator 70 to 80 cents, sand mullers operator 65 to 75 cents, scrap breaker operator 65 and 70 cents, maintenance man on wheel making equipment 65 to 75 cents, fettler (chipper, grinder) 70 and 75 cents, flask maker 75 and 80 cents, foundry crane operators 74 and 78 cents; freight car assembly—bucker 75 cents, chipper 65 and 70 cents, car builder 75 cents, crater and packer 75 and 80 cents, car hauler 65 cents, rivetter and caulker 85 and 90 cents, slinger 85 cents, welder 80 to 95 cents, burner 75 and 80 cents; general stores—storemen 70 to 80 cents, checker 65 to 75 cents, truck driver 65 and 70 cents, labourers 55 and 58 cents; labour department—crane follower (yard) 63 cents, carter 58 cents, electric truck driver 60 cents, tractor operator 65 cents; machine shop—storeman 75 cents, car bench specialist 70 to 80 cents, die maker \$1.05, drill operator 70 cents, machinist 85 to 95 cents, tool maker \$1, metal pattern shop—pattern maker 90 cents to \$1, storekeeper 80 cents; millwrights—beltman 85 cents, carpenters 80 and 90 cents, engineer of yard crane 88 cents, cement finisher 75 cents, millwrights 85 to 95 cents, welder 80 to 95 cents, burners 75 and 80 cents, paint department—dippers 65 and 70 cents, glazier 75 and 80 cents, letterer 85 and 90 cents, painter and varnisher 70 to 80 cents, sprayer of passenger cars 80 to 90 cents, sprayer of freight cars 70 to 80 cents, stenciller 70 and 75 cents; passenger car assembly—inside finisher and trimmer 80 to 90 cents, toolroom charge hand 95 cents, storeroom attendant 70 to 80 cents, welder 80 to 95 cents, burner 75 and 80 cents; pipe fitting department—plumber and steamfitter 80 to 95 cents, maintenance man for heating system 80 cents; power house—boiler repairman 82 cents, coal trimmer 60 cents, enginemen from 69 to 82 cents, firemen 65 cents; security department—deputy chief 73 cents, sergeant 70 cents, corporal 66 cents, constable 63 cents; shell department—cooler bin hand 70 cents, cutoff operator 75 cents, inspector 70 and 75 cents, pressman 75 cents, press operator 85 cents, sandblast operator 80 cents, furnace charge and furnace heater 80 cents; spring and forge department—blacksmith 75 to 85 cents, bulldozer operator 60 and 65 cents, draft gear assemblers 70 and 95 cents, coil spring maker 70 cents, punch and shear operators 65 and 70

cents, spring grinder 70 cents, taper machine operator 70 and 75 cents, testing machine operator 70 cents; switching and traffic department—brakemen 80 cents, conductor 88 cents, locomotive engineer 88 cents, fireman 75 cents, hostler 75 cents, switchman 80 cents, track man 60 cents; tinsmith department—tinsmith 75 to 85 cents, die setter 75 and 80 cents, machine operator 65 to 75 cents, welder 80 to 95 cents, burner 75 and 80 cents; template department—template maker 85 cents to \$1; upholstering department—upholsterers from 70 to 85 cents.

Hourly wage rates at Dominion Works: bolster shop—riveter, bolster builder, 85 cents, break beam builder 75 cents, assembler 65 cents, lathe hand, special shear man 75 cents; Cardwell draft gear—gear builder 65 cents, labourer 58 cents; die shop—die checker and gauge maker \$1.10, die finisher \$1.15, die sinker \$1.10, dual saw operator 70 cents; erection track department—riveter 85 cents, buckler 75 cents, stickler, reamer, heater, assembler 65 cents, caulker 85 cents, chipper, portable grinder 70 cents, sprayman 75 cents; forge shop—blacksmith 85 cents to \$1, furnace heater, stamper, grinder 65 cents, shear operator 70 cents, drop hammer operator 85 cents, forging hammer operator 95 cents, hammer man 65 cents, tool hardener \$1.05, inspector 65 to 79 cents; labour department—derrick engineer 85 cents, crane follower 62 cents, tractor driver 70 cents, slinger 65 cents, labourer 58 cents, sandblast hose man 85 cents, sandblast machine operator 65 cents, material chaser 65 to 75 cents; machine shop—machinist 90 cents to \$1, lathe hand 85 to 95 cents, shaper hand 75 to 85 cents, boring mill operator 90 cents, slotting machine operator 90 and 95 cents, bench hand 85 and 95 cents; master mechanic's department—beltman and oiler 82 cents, millwrights 82 and 87 cents, steam-fitter 90 cents, carpenter 87 cents, electrician 81 and 90 cents, crane operator 75 cents, power house engineer 78 cents, fireman 65 cents, trimmer 58 cents, cleaner 57 cents; punch, shear and press department—operator 70 cents, heater 65 cents, marker 70 cents, grinder 65 cents, template chaser 60 cents; stores department—storemen 70 to 80 cents, checkers 65 to 75 cents;

security department—deputy chief 73 cents, sergeant 70 cents, corporal 66 cents, constable 63 cents; template shop—template makers 90 cents and \$1; traffic—trackman 60 cents; truck shop—assembler 65 cents, axle turner 65 and 75 cents, wheel press operator, wheel borer, wheel roller, axle polisher, waste packer, drill operator 65 cents; welding department—electric welder 75 to 90 cents, burners 65 and 75 cents, assembler 65 cents; canteen department—checker 59 cents, cashiers 51 and 54 cents, salad woman, counter girl, sandwich girl 41 and 47 cents.

Manufacturing: Non-Metallic Minerals and Chemicals

PAINT MANUFACTURING INDUSTRY, PROVINCE OF QUEBEC

An Order in Council dated May 24, and gazetted June 2, amends the previous Orders in Council for this industry (L.G., July, 1942, p. 856, Sept., p. 1097; Nov., 1943, p. 1530; Sept., 1944, p. 1141) by providing that employees be paid for New Year's Day and Christmas Day, if they work the first working day following these holidays.

Trade

RETAIL FOOD STORES, QUEBEC

An Order in Council dated May 24, and gazetted June 2, amends the previous Orders in Council for this industry (L.G., June, 1944, p. 754) by deleting L'Union fédérale des Bouchers et Coupeurs de Viande local 77, as one of the contracting parties.

Service: Business and Personal

LADIES HAIRDRESSERS, MONTREAL

An Order in Council dated May 24, and gazetted June 2, extends the time of the agreement (L.G., Oct., 1941, p. 1315, Dec., p. 1573, July, 1942, p. 857; April, 1943, p. 490, June, p. 813) to June 7, 1946.

Labour Law

Labour Legislation in Manitoba and Saskatchewan in 1945

Manitoba

THE Manitoba Legislature, which was in session from February 6 to April 7, 1945, provided for the publication and filing of regulations made under statutory authority and amended Acts relating to workmen's compensation, minimum wages, old age pensions and mothers' allowances.

Workmen's Compensation

Amendments in the Workmen's Compensation Act carry out the recommendations made in the majority report of a Committee appointed during the 1944 session of the Legislature (L.G., 1944, p. 1281) to review the Act, including the advisability of an amendment providing that if disability lasts more than three days compensation is to be payable from the first day.

The Committee, in its report, endorsed the principle of uniformity in Canada of workmen's compensation legislation. It referred to the Department of Labour a suggestion for setting up industrial accident prevention associations. A proposal to bring hotels and restaurants under Part I of the Act was referred to the Workmen's Compensation Board with the request that it consult hotel and restaurant-keepers' associations and submit its findings to the Minister. The committee considered that both industry and labour should have the right when legislation is under discussion to consider, in the light of experience, the merits of the proposals.

Several of the amendments noted below bring the Manitoba Act into line with those of other provinces. The section prohibiting an action by a workman or his legal representative against his employer or against another employer under Part I of the Act was amended to bar an action by a workman against a workman of another employer under Part I, unless the accident did not occur in operations usual in or incidental to the employer's industry. Provision was made for apportioning compensation costs between classes where the accident is due in part to the negligence of an employer or his workmen in another class.

If the injury disables a workman longer than 14 days compensation is payable from the date of disability instead of from the fourth day.

The Board is authorized to pay the cost of replacing or repairing artificial limbs broken by accidental injury arising out of and in the course of employment. A workman entitled to compensation or medical aid is also entitled to have eye-glasses broken in the same accident replaced or repaired.

The time for filing accounts for medical services was extended from six months to twelve.

In addition to other compensation, a widow or foster-mother is to receive a lump sum of \$100. Provision is also made for paying not more than \$100 to cover the cost of transporting the body of a workman who is killed at a distance from his usual place of residence.

The Board was authorized to add, by regulation, to the schedule of diseases for which compensation is payable additional classes of workers whose employment renders them liable to dermatitis.

Permanent full-time employees who are engaged in the maintenance and operation of an apartment block and are not otherwise covered by the Act may be admitted by the Board on application of a majority of such employees, subject to such conditions as the Board deems proper.

The Board was authorized to enter into agreement with any insurer who underwrote the liability of employers under the Workmen's Compensation Act, 1916, which was repealed in 1920, to assume on terms satisfactory to the Board the outstanding liability of such insurer.

In addition to the above changes recommended by the Legislative Committee, two other amendments were made. Compensation to a widow was raised from \$40 to \$45 a month and provision was made whereby contributions for pension purposes of provincial civil servants who become members, officers or employees of the Board may continue to be paid to the Civil Service Superannuation Fund instead of to the fund established under the Workmen's Compensation Act.

Wages

An amendment in the Minimum Wage Act forbids an employer to pay an employee over

18 years of age at a lower rate than that prescribed in the regulations under the Act which are applicable to his occupation.

Mothers' Allowances

Amendments in the Child Welfare Act abolish the Child Welfare Board and provide that the Director of Public Welfare appointed under the Health and Public Welfare Act shall be charged with enrolment of bereaved and dependent children for allowances.

Old Age Pensions

The Old Age and Blind Persons' Pensions Act was amended to authorize the Minister in charge of the Act, as well as the local authority, to receive applications for pensions in the first instance.

Physical Fitness

The Manitoba Physical Fitness Act authorizes the Minister of Health and Public Welfare to take steps to promote physical fitness and provides for appointment of a Council and a Director and for the making of agreements with the Dominion Government and with municipalities and organizations.

Filing and Publication of Regulations

The Regulations Act, which will come into effect on Proclamation, is generally similar to a statute of like title passed in Ontario in 1944. The Act requires the filing with the Registrar of Regulations appointed under the Act, of two certified copies of every "regulation", which is defined as any regulation, rule, order or by-law of a legislative nature made or approved under any Act of the Legislature, including those made by any board, commission, association or similar body, whether incorporated or unincorporated, all the members of which, or all the members of the board of management or board of directors of which, are appointed by an Act of the Legislature or by the Lieutenant-Governor in Council. By-laws of a local authority are not included nor, except where otherwise stated, are those made by a corporation incorporated under the laws of the Province.

Unless it is otherwise stated, a regulation is to come into force on and after the date of filing. Unless it is expressly provided to the contrary in another Act, a regulation that is not filed is of no effect and, except for regulations in effect when the Act comes into force, a regulation that is not published is not valid

as against a person who has not had actual notice of it. Regulations made before the coming into force of the Act are to remain in effect until December 31, 1945, but must be filed on or before that date.

Resolutions

On March 20, a Resolution was adopted by the Legislature urging that no deduction "from the Provincial Government family or welfare allowances" or from any payments for relief or social assistance granted by any municipality should be made in consequence of the Dominion Government's family allowances scheme.

On April 5 the Legislature recommended that the Government of Manitoba co-operate with other Provincial Governments in transferring jurisdiction to the Dominion Government in order to help in setting up a contributory old age pension scheme and, if this be impossible, that the Manitoba Government urge the Dominion Government to assume the whole cost of the present scheme and to increase the pension and to lower the age to the point where the aggregate assistance for old age pensioners will be in fairer relation to that provided by the Dominion, for children under the Family Allowances Act.

A further Resolution adopted on the same date recommended to the Dominion Government the consideration of improvements in the Wartime Labour Relations Order (P.C. 1003), including provision for naming bona fide unions and employee organizations as the certified bargaining agency, in addition to or in substitution for individually named bargaining representatives, such union and organizations to be empowered to name the individuals who are to act as spokesmen in negotiations; continuance of the present practice under which such union security clauses as maintenance of membership, union shops, closed shops and the check-off may be included in collective agreements. It was further urged that no change should be made in the basic principle of the Order that employees shall be free to associate themselves in organizations of their own choice, without domination, coercion, intimidation or unfair pressure from employers or from other workers' organizations, and that, within the limitations essential for reaching sound decisions based on a review of relevant facts, the provisions of the Order in Council (P.C. 1003) for expediting certification and providing conciliation services be given full effect.

Saskatchewan

In Saskatchewan the Legislature, in session from February 15 to March 29, amended laws relating to collective bargaining, workmen's compensation, minimum wages, weekly rest-day, early closing of shops, boiler inspection and mothers' allowances.

Collective Bargaining

Sections added to the Trade Union Act, 1944 relate merely to procedure. They provide that a majority of the members of the Labour Relations Board shall constitute a quorum and in the absence or disability of the chairman, the vice-chairman shall act as chairman; that a decision of the majority of those present and constituting a quorum shall be the decision of the Board and in the event of a tie the chairman shall have a casting vote; that orders, decisions, and regulations of the Board shall be signed by the chairman or vice-chairman or, in their absence or disability, by any one member; and that where an order, decision, or regulation purports to be signed by a member other than the chairman or vice-chairman it shall be presumed that he acted in the absence or disability of the chairman or vice-chairman. The chairman or acting chairman of a board of conciliation is vested with the powers of a commissioner under the Inquiries Act and a board may receive and accept such evidence on oath, affidavit or otherwise as it may deem proper.

Workmen's Compensation

Amendments in the Workmen's Compensation (Accident Fund) Act will come into force on July 1, 1945. Where disability lasts longer than three days compensation is to be paid from the date of the accident instead of from the fourth day. The maximum amount of average earnings to be taken into account in computing compensation was increased from \$2,000 to \$2,500 a year. Compensation for disability was raised from 66 $\frac{2}{3}$ per cent to 75 per cent of average earnings or, in the case of partial disability, of the diminution of average earnings, with a minimum in total disability cases of \$15 a week or average earnings, if less, instead of \$12.50 per week or average earnings, as formerly. This increase in the compensation rate applies to all payments after the amending Act comes into force, whether the accident happened before or after that time, but this provision is not to entitle any person to additional compensation for any period before that date. The minimum weekly payment in partial disability cases is, as heretofore, a corresponding amount in

proportion to the impairment of earning capacity. A new section provides that where the workman's weekly earnings at the time of the accident are higher than his average weekly earnings during the preceding twelve months, the Board must award compensation on the basis of his earnings at the time of the accident.

A further new section stipulates that, at least every four years, the Lieutenant-Governor in Council shall appoint a Committee of five or more members to review and report upon such matters concerning the Act, the regulations under it, and their administration, as he may specify. The Committee must include equal representation of employers and organized employees and one or more representatives of the Board.

The Workmen's Compensation Act, 1911, under which the employer is individually liable and which applies to certain classes of workers not covered by the Workmen's Compensation (Accident Fund) Act, was also amended. Any person belonging to any of the classes of railway workers excluded from the Workmen's Compensation (Accident Fund) Act is to be deemed to be a workman within the meaning of this Act, whether or not his remuneration exceeds \$3,500 a year. Under this Act, non-manual workmen earning over \$3,500 have been excluded from compensation. The employer is not liable for compensation if the injury does not disable the workman for more than three days instead of one week as formerly.

Where there is no executor or administrator of the deceased workman or where the executor or administrator fails to bring an action within six months after the workman's death, the action may be brought by any of the persons for whose benefit it would have been had it been brought by the executor or administrator. Every such action is, as far as possible, to be for the benefit of the same persons and subject to the same regulations and procedure as if it had been brought by the executor or administrator.

The time limit for bringing an action under the Act was extended from six months to one year.

The maximum compensation recoverable is either the equivalent of the estimated earnings of a workman in similar employment during the three years preceding the injury or the sum of \$2,500, whichever is greater, but in no case exceeding \$3,000. Formerly, earnings of a workman in similar employment or \$2,000, whichever was greater, were payable, with a maximum of \$2,500.

The Blind Workmen's Compensation Act, which is generally similar to statutes in force in Ontario, Quebec and Nova Scotia, authorizes the Department of Labour to pay to the employer, if individually liable, or to the Workmen's Compensation Board, all costs of compensation in excess of \$50 payable in respect of an accident to a blind workman. The Canadian National Institute for the Blind, or other organization designated for the purpose by the Government, is given exclusive jurisdiction as to the proper placing and nature of work of a blind workman. An employer giving employment to such a workman without the approval of the Institute forfeits all right to the benefits of the Act. Officers of the Institute are to have access at all times to the place of employment of a blind workman.

In making an award to a blind workman under the Workmen's Compensation (Accident Fund) Act, the Board may have regard to previous awards to the workman under that Act. The assessment to be levied on an employer of a blind workman is to be fixed by the Board at such amount as it deems fair, having regard to the Workmen's Compensation (Accident Fund) Act.

Minimum Wages

Amendments in the Minimum Wage Act include a revision, without material change, of the section which enables the scope of the Act to be widened to cover additional employments. This section now enables the Board, with the approval of the Lieutenant-Governor in Council, to make Orders declaring the Act to apply to any industry, business, trade or occupation. Such Orders are to have the force of law upon publication in the *Saskatchewan Gazette*.

Sections dealing with Orders of the Board were also revised. Such Orders may:—define classes of employment; subject to the Factories Act, determine the number of hours of work which shall constitute the normal work-week of workers in any class of employment; fix the minimum wage for workers for the normal week and for those working short time and overtime; fix the period in any day within which the hours of work shall be confined; fix the maximum price which an employer may charge for board and lodging; fix the minimum age for employment in any industry, business, trade or occupation; determine the number or proportion of apprentices, learners, inexperienced or part-time employees who may be employed in any establishment and what employees belong to those classes, and fix a wage lower than the ordinary minimum for handicapped employees, apprentices, learners or inexperienced employees.

A new section forbids an employer to require an employee to return to him or to accept from an employee all or part of the minimum wage paid to such employee under the provisions of the Act or of any Order made under it.

Orders of the Board are to be signed by the chairman or, if he is absent or disabled, by any member of the Board.

The penalty sections of the Act were also revised. Any person who fails to comply with the Act or any Order under it or, with intent to deceive, makes a false or misleading statement to an authorized representative of the Minister or interferes with or obstructs such a representative or fails to do anything which such representative has power to require of him, is liable to a fine not exceeding \$100 or to 30 days' imprisonment, for a first offence, and \$200 or 90 days for a subsequent offence. Formerly, the penalty for obstructing any representative of the Minister or failing to comply with his lawful requests was from \$25 to \$100, or ten days' to one month's imprisonment. For violation of the Act or any order, a similar fine might be imposed for a first offence and from \$50 to \$200 or 30 days to three months for a subsequent offence. As previously, an employer convicted of paying less than the minimum rate may be ordered to pay the difference, but payment must now be made to the Deputy Minister of Labour for the employee, instead of directly to the latter. The provisions were re-enacted which enabled such an order to be made notwithstanding the expiration of the time limit of six months for taking action under the Act, and which provided for a counsel fee not exceeding \$25 to the complainant's solicitor to be added to the amount payable by the convicted employer. If an employer fails to pay the money as ordered, the Magistrate may impose a further prison term of from 30 to 90 days. Formerly, the term in such cases was 20 days to three months. A new section provides that where an authorized representative of the Minister finds that an employer has failed to pay the fixed minimum wage, he may determine the difference between the amount paid and that to which the employee was entitled. If the amount is agreed to in writing between the employer and employee and paid by the former within two days to the Deputy Minister of Labour, for the employee, the employer is not liable to prosecution. The Deputy Minister must keep a record of all sums received and paid by him under the above provisions.

Attachment of Wages

The Attachment of Debts Act was amended to exclude persons employed by the hour from

the provisions of the section enabling the Government of the Province to be garnished with regard to moneys due or accruing due to any member of the Public Service or to any person temporarily employed under the Public Service Act. Formerly, only those employed by the day were excluded. No such moneys are attachable unless the plaintiff or judgment creditor has given to the Provincial Treasurer or his Deputy thirty days' written notice of intention to issue a garnishee summons. Such notice ceases to have effect unless the summons is served on or before the last day of the month following that in which the notice was served.

The amount of wages or salary exempt from attachment was raised from \$75 to \$100, in the case of a married person or an unmarried person, widow or widower who has dependants, and from \$40 to \$60 in the case of those without dependants, and in cases where the garnishee order is issued under a judgment or order for alimony or a judgment founded upon a separation agreement.

Hours of Labour

The section added to the Fire-Departments Platoon Act in 1944 to enable city councils to pass by-laws for a three-platoon system was amended to provide that where the estimates of expenditure of a city and the proposed rate of taxation are required to be submitted annually to the Local Government Board for revision and approval, the city council shall not introduce the by-law for a three-platoon system or submit it to a vote of the electors unless directed to do so by the Board.

The section of the One Day's Rest in Seven Act which enumerates classes of workers exempt from the Act was revised. As formerly, persons who are not usually employed for more than five hours a day and those employed solely as watchmen or janitors or in a managerial capacity are excluded, but a new provision gives the Minister power to determine whether or not an employee is employed solely in such a capacity. Workers employed by reason of an emergency which necessitates immediate remedial action are now excluded. Formerly, exemption was given to any class of workers in hotels, restaurants and cafés where there were not more than two of that particular class, provided they were given at least two half-days' rest in every seven days. This exemption has now been cancelled.

Identical provisions which were added to the City Act and the Town Act and will come into force on July 1, 1945, deal with early closing by-laws. Fresh fruit is added to the list of "exempted merchandise" which

may be sold after closing hours. A new section provides that no shop may be kept open after closing time for the sale of exempted merchandise unless the proprietor or manager has filed with the town clerk a written statement that the principal trade or business carried on in such shop is that of a tobacconist, news agent, hotel, refreshment house, confectionery, bakery or druggist. In case of a prosecution for an alleged violation of the provisions relating to exempted merchandise, such a statement will be received in evidence and if no statement has been filed, the principal trade or business carried on at the time of the alleged violation is to be deemed to be that named in the information.

A further amendment in the City Act provides that notice of intention to pass an early closing by-law without a petition from the occupiers of the class of shops affected is to be given at a regular meeting of the city council held not less than thirty days before the meeting at which such by-law is to be passed, instead of, as formerly, at the last preceding regular meeting.

Steam Boilers

Amendments in the Steam Boilers Act provide for the making of regulations by the Lieutenant-Governor in Council instead of by the Minister. Such regulations may govern inspection, construction, operation, and maintenance of refrigerating plants, oxy-acetylene plants and pressure vessels, prescribe conditions for issuing inspection certificates, require posting of such certificates, provide for examinations for certificates of qualification as refrigerating engineers, require the display of such certificates on the premises where the holder is employed, and impose penalties for violation of the regulations. Such regulations when published in the *Saskatchewan Gazette* are to have the force of law.

A new section permits any person to be a candidate for a fourth-class certificate if he has, in respect of each of two years, held a fireman's certificate under the Act and satisfies the Minister that he has had, during the currency of such certificates, two years' experience in the firing of low pressure boilers exceeding 40 h.p. or high pressure boilers of not less than 10 h.p. and that he holds a diploma from an approved school of engineering.

Vocational Education

Under an amendment in the School Grants Act, special grants are authorized for schools providing adequate accommodation and such equipment as is approved by the Minister of Education, other than ordinary classroom

equipment, for instruction above Grade VI in agriculture, health, shop work, motor mechanics, or other practical subjects approved by the Minister. The grant is 50 per cent of the cost of such equipment purchased after January 1, 1945, but is not to exceed \$125 for any academic year. Formerly, grants for such classes were given for work above Grade VIII only.

Mothers' Allowances and Old Age Pensions

The sections of the Child Welfare Act which provide for mothers' allowances were amended so as to render the mother eligible for an allowance whether her husband or the father of the children is in a Canadian penal institution, sanatorium for tuberculosis or mental hospital or in one elsewhere. An applicant who has lived in the Province for at least one year but had not lived there for a year immediately before the date of her application is now eligible for an allowance if she is then residing in Saskatchewan and has not acquired residence in another province.

A new section enables allowances to be paid to the mother or foster-mother of a child born out of wedlock where such person has, in the opinion of the Social Welfare Board, made a reasonable effort to provide a suitable home for the child and has assumed the responsibilities of motherhood and where every reasonable effort has been made to enforce a Court order against the putative father or an agreement with the putative father approved by the Director of Child Welfare.

In the case of deserted wives, the Board may authorize payment of an allowance where it considers that every reasonable effort has been made to secure and execute an order of the Court under the Deserted Wives and Children's Maintenance Act or under the Criminal Code sufficient for the maintenance of such a wife and her children. The Lieutenant-Governor in Council may authorize the payment of an allowance to a mother who is divorced. Subject to the Regulations, monthly payments may be made to mothers of children in receipt of mothers' allowances and also to such mothers on behalf of husbands who are physically incapacitated.

The Old Age and Blind Persons' Pensions Act was revised with the following changes. The Lieutenant-Governor in Council was authorized to make supplementary agreements with the other provinces respecting payments to pensioners over and above the limits fixed by the Old Age Pensions Act (Canada) and the regulations made under it. The limit of \$1.25 a month on the supplemental allowance which may be provided for

pensioners was removed. The Social Welfare Board was authorized to recover from the estate of a deceased pensioner the sum of the pension payments made to him, together with interest at 5 per cent per annum compounded annually. No such claim may be made by the Board, however, against a pensioner's estate which passes to another pensioner or to any person who has, since the granting of the pension or during the last three years of its payment, contributed regularly to the support of the deceased pensioner to an extent which the Board considers reasonable, having regard to the means of such person. It is no longer provided that all pension payments shall be a charge on land owned by the pensioner or that a caveat may be lodged against such land. A notice of the granting of a pension may, however, be filed in the proper land titles office. Provision is made for discharging such notices and caveats registered under the former provisions.

Miscellaneous

Identical sections added to the City Act and the Town Act enable city and town councils to enter into agreements with Wartime Housing Limited for the provision of houses.

The Municipal Medical and Hospital Services Act was amended to raise the maximum tax per family from \$50 to \$60 and to provide for exemption from tax of residents of a municipality who belong to a class of persons designated by the Lieutenant-Governor in Council under the Health Services Act and for whom such services are provided under that Act. The section authorizing resolutions of the council requiring payment of the tax in advance was amended to provide that the council may, similarly, provide for payment of the tax by the employer of the person liable for it, in which case the employer must deduct the tax from wages.

As amended, the Health Services Act requires agreements for such services to be approved by the Health Services Planning Commission appointed under the Act.

A section added to the Department of Reconstruction and Rehabilitation Act enables the Government to authorize the Provincial Treasurer to guarantee loans made for purposes of the Act which are approved by the Lieutenant-Governor in Council, and also enables the Minister in charge of the Act to make loans for such purposes.

An amendment in the Department of Social Welfare Act provides for appointment of a Social Welfare Board consisting of the Deputy Minister of Social Welfare, the Directors of Child Welfare, Old Age Pensions and Social

Aid, and such additional persons, not exceeding three, as may be appointed by the Lieutenant-Governor in Council.

The Credit Union Act was amended to enable credit unions to make loans to other credit unions, co-operative associations and

co-operative marketing associations which are members, to raise from \$50 to \$100 the limit on loans which a credit union may make without security, and to enable an official of a credit union to obtain a loan without having all the officials present when the vote is taken.

Recent Regulations Under Dominion and Provincial Legislation

THE Post-Discharge Re-establishment Order and the War Service Gratuity Order have been amended. Under the former, a grant may be paid, subject to certain conditions, to a person resuming or beginning a course to qualify for university attendance, or a university course to which he is regularly admitted within one year and three months after discharge. The gratuity payable for war service to a dependent of a deceased member of the Forces may not be paid to that dependent's estate, in case of his death. Provision has been made for agreements between the Dominion and the provinces for the organization and use, during this fiscal year, of agricultural manpower.

Provincial regulations include an Order adding new trades to the Apprenticeship Act,

and an Order providing that work in excess of eight hours in any one day and in excess of 48 in any one week must be paid at the rate of time and one-half. Regulations in British Columbia governing freight and passenger elevators have been amended with respect to the rules as to hoistway gates and doors. Manitoba has issued its fair wage schedule for 1945-46. Two sets of regulations in Ontario lay down the conditions under which barbering and hairdressing schools may be operated, and concerning the employment and training of apprentices in these trades. Trade unions in Saskatchewan making application to bargain collectively must state that either a majority or less than a majority of employees have given the union written authority to represent them.

Dominion

Post-Discharge Re-establishment Order Amended

An Order in Council made May 29, 1945, gazetted June 11, rescinds that section of the Post-Discharge Re-establishment Order (L.G. 1944, p. 935) governing the grant payable to discharged members of the Forces, under specified conditions, for the duration of a university course resumed or begun one year and three months after discharge, except in particular circumstances, in which case a longer period may be permitted.

A new section stipulates that a grant may be paid, subject to the same conditions as before, to a person resuming or beginning a course to qualify for university admittance as well as to a person regularly admitted to a university course within one year and three months after discharge. In particular circumstances a longer period after discharge may be permitted.

War Service Gratuity Regulations Amended

By Order in Council of May 29, 1945, gazetted June 11, amending the War Service Gratuity Regulations (L.G. 1945, p. 101) a change in the War Service Gratuity Regulations stipulates that where a gratuity is payable to a certain dependent of a deceased member of the Forces and that dependent dies before payment is made in full, the

gratuity may not be paid to the estate of the deceased dependent but is to be paid to another person, qualified under the Act and regulations to receive it, or if there is no such person it must be paid to the deceased member's service estate.

Agreements with Provinces for the Use of Manpower

An Order in Council, May 31, 1945, gazetted June 11, enables agreements to be made by the Government of Canada and the nine provinces, between April 1, 1945, and March 31, 1946, for the organization and use of agricultural manpower in each province, and for recruiting workers suitable for farm work in one province and transporting them and placing them on farms in another province.

With two exceptions, the provisions of this Order are the same as those in the Order for last year (L.G. 1944, p. 713). The new Order stipulates that a maximum of \$500,000, an increase of \$200,000, may be furnished by the Government of Canada to pay cost of transporting workers from one province to another where the Dominion is responsible for such costs. It is also provided that expenditure incurred in carrying out the Order is to be charged to the War Appropriation allotted to the Department of Labour for assisting the provinces in recruiting, transporting and placing labour on farms.

Provincial

Alberta Apprenticeship Act

The following trades were brought under the provisions of this Act by an Order made May 31, 1945, gazetted June 15: carpentry; plumbing, steamfitting, gasfitting; sheet-metal working; painting, paper-hanging, decorating; electrical trades; plastering.

Alberta Female Minimum Wage Act

Order 16 (L.G. 1945, p. 767) governing female employees in the Province, with certain exceptions, has been amended as regards pay for overtime, by an Order made May 31, 1945, gazetted June 15. The Order now stipulates that hours worked in excess of eight in one day and 48 in one week must be paid at the rate of time and one-half the regular rate. Previously, women in Alberta were eligible for the overtime rate of time and one-half the regular rate after nine hours in a day and after 48 hours in a week.

Alberta Licensing of Trades and Businesses Act

The "beauty culture" trade has been designated as a business under the Act by an Order made May 19, 1945, gazetted and effective June 15. Each person carrying on the trade must be the holder of a licence for which he must pay \$5 where one operator is employed, and an extra \$1 for each additional operator.

British Columbia Factories Act

Regulations governing the installation, operation, and maintenance of freight and passenger elevators, February 5, 1935, have been amended as regards the rule concerning hoistway gates and doors, by an Order of May 11, 1945, gazetted May 17, effective January 1, 1946.

The amended rule stipulates that all hoistway gates made of grille, lattice, or other open work, with the exception of collapsible-type gates, must reject a ball two inches in diameter. All hoistway gates when closed must guard the full width of the landing opening and extend from the sill to a height of five feet six inches.

All hoistway doors or gates, provided with interlocks, are to be governed by this rule.

Manitoba Fair Wage Act

The annual schedule for rates of wages and maximum hours prescribed for certain public and private construction works in Manitoba was gazetted May 26, and is to be in effect from June 1, 1945, to April 30, 1946.

"Public Work" applies to work under contract between the Minister of Public Works and an employer and includes construction, remodelling, demolition or the repairing or painting of buildings in Manitoba and to a highway, road, bridge or drainage construction work where the work is done outside the Greater Winnipeg Water District.

"Private Work", as defined in the Act, applies to the building, construction, remodelling, demolition or the repairing of any building or construction work in the Greater Winnipeg Water District, irrespective of the number of contracts made, in any city or town with a population exceeding 2,000, or in any other part of the province to which the Act may be extended by the Lieutenant-Governor in Council provided that the total cost of such work exceeds \$100. Maintenance work done by a regular maintenance staff on any property under the immediate control of the owner, tenant or occupant is not included where the work is not undertaken with the intention of selling or renting the property.

In most cases the minimum hourly rate has been increased by five cents over last year's schedule. Where there was formerly a range of five cents, the new schedule usually fixes a rate five cents higher than the former maximum rate, except for labourers on public road and bridge works who have been raised from between 45 and 50 to 53 cents an hour, and for unskilled labourers and mop handlers in roofing who have been raised from between 50 and 55 to 58 cents an hour in the Greater Winnipeg Water District. Terrazzo workers engaged as machine rubbers (wet) and helpers, and boiler makers' helpers have been raised 7½ cents to 67½ cents an hour. The skilled labourer's rate has been increased 2½ cents to 62½ cents an hour, while the watchman's has been raised 90 cents to \$24 a week. The new rates were approved by the Regional War Labour Board.

The schedule follows:

FAIR WAGE SCHEDULE

The following schedule shall apply from and after June 1, 1945, on "Private Work" and on "Public Works," as described herein:

Occupation	A—Greater Winnipeg Water District Area for Private Work, and for Gov't. Work, Winnipeg and Radius of 30 Miles		B—Other than Area Described in "A" (applies to private work when population exceeds 2,000)	
	Basic Wage Rate Minimum per Hour	Hours Maximum per Week	Basic Wage Rate Minimum per Hour	Hours Maximum per Week
1. Asbestos Workers—	\$		\$	
(a) Journeymen.....	.90	44	.90	50
(b) Improvers.....	.75	44	.75	50
2. Asphalters.....	.68	44	.63	50
3. Boiler Makers on Construction or Erection Work.....	.95	44	.95	50
(a) Helpers.....	.67½	44	.62½	50
4. Bricklayers.....	1.25	44	1.10	50
(a) Helpers (continuously employed at mixing and tempering mortar).....	.67½	48	.62½	54
Subject to existing agreement between the Builders' Exchange and the Bricklayers' Union.				
5. Bridge and Structural Steel and Iron Workers.....	1.00	44	1.00	50
6. Carpenters and Millwrights.....	1.05	44	.90	50
Subject to existing agreement between the Builders' Exchange and Carpenters' Union, Local 343.				
7. Cement Finishers (in warehouses or large floor area jobs).....	.75	48	.70	54
8. Electrical Workers (inside wiremen, licensed journeymen).....	1.05	44	.90	50
9. Elevator Constructors (passenger and freight).....	1.10	44	1.10	50
(a) Helpers.....	.80	44	.80	50
10. Labourers—				
(a) Skilled—Comprising the following: Placing or assisting mechanics in the placing of Cut Stone, Architectural Terra Cotta, Marble (real or imitation), Roofing Slate and Shingles, Plaster Castings, Ornamental Bronze and Iron, Interior Joinery, Laying Drain Tiles, Attending Concrete Mixer, Bending and Placing Reinforcing Material, Movable Scaffolding and Runways.....	.62½	48	.57½	54
(b) Labourers.....	.58	48	.53	54
11. Lathers (Metal, Wood)—				
(a) Metal Lathers.....	.90	44	.85	50
(b) Wood Lathers.....	.80	44	.75	50
12. Linoleum Floor Layers.....	.70	48	.65	50
13. Marble Setters.....	1.20	44	1.05	50
(a) Helpers (all men assigned to help tradesmen).....	.67½	48	.62½	50
14. Mastic Floor Kettlemen.....	.55	48	.55	50
15. Mastic Floor Rubbers and Finishers.....	.65	48	.65	50
16. Mastic Floor Spreaders and Layers.....	.95	48	.95	50
17. Operating Engineers and Firemen on Construction—				
Class A: Engineers in charge of hoisting engines of three drums or more operating any type of machine, or operating clamshells or orange peels, regardless of capacity; or operating steam shovels or dragline of one yard capacity or over, or operating drop hammer pile drivers; in all cases irrespective of motive power.....	1.10	48	.90	50
Class B: Engineers in charge of hoisting engines having only two drums or of single drum, used in handling building material; or steam shovels and draglines not specified in "A" hereof; irrespective of motive power.....	1.05	48	.85	50
Class C: Engineers in charge of any steam operated machine not specified in "A" or "B" hereof; or in charge of a steam boiler if the operation of same necessitates a licensed engineer under the provisions of "The Steam Boiler Act"; or air compressor delivering air for the operation of rivetting guns on steel erection work, or pumps in caissons, or concrete mixers of over ½ yard capacity, trenching machines and bull dozers; irrespective of motive power.....	.95	48	.80	50
Class D: Men firing boilers of machines classified in "A", "B" or "C" hereof or assisting engineers in charge of same.....	.70	48	.60	50
Class E: Operators of gas or electric engines for machines not otherwise specified in "A" "B" or "C" hereof, of a type usually operated by skilled labourers.....	.65	48	.55	50

PUBLIC ROAD AND BRIDGE WORKS

The following schedule shall apply from and after June 1st, 1945, on "public works" outside of the Greater Winnipeg Water District Area in all parts of Manitoba for highway, road, bridge or drainage construction work where a contract has been entered into by the Honourable Minister of Public Works:

Occupation	Basic Wage Rates	Hours
	Minimum per Hour	Maximum per Week
	\$	
Aggregate Batch Man.....	.60	54
Asphaltic Oil Distributor driver.....	.65	54
Blade Grader (12 H.P. and over) operator.....	.70	54
Concrete Finisher.....	.65	54
Concrete Paver operator.....	.75	54
Dragline, shovel and crane operator.....	.85	54
Elevator Grader operator.....	.70	54
Engineer, stationary boiler.....	.75	54
Labourers.....	.53	54
Motor Patrol operator.....	.70	54
Roller operator, 6 ton and over, steel wheels.....	.70	54
Scraper and Bulldozer operator.....	.80	54
Spreader and Finishing Machine operator.....	.65	54
Teamsters.....	.50	54
Teamsters and two horse teams.....	.75	54
Teamsters and four horse teams.....	1.00	54
Timber men (timber work where use of hammers, saws, axes and augers only are required).....	.65	54
Tractor operator, 50 h.p. drawbar or over.....	.70	54
Tractor operator, under 50 h.p. drawbar.....	.55	54
Truck Drivers (regardless of basis for payment of truck).....	.60	54
Truck only—		
(a) Hourly rate—		
When truck is hauling not more than one cubic yard.....	.55	
For each additional 1/10 cubic yard load.....	.04½	
Watchman and Flagman.....	24.00	
	per week	

OVERTIME:

Time worked in excess of the maximum hours as stipulated in the schedule shall be paid at the rate of time and one-half. All hours worked on Sunday to be paid at the rate of double time, except in cases of emergency when time and one-half shall be paid.

NOTE.—The above schedule does not apply to permanent municipal employees.

Manitoba Teachers' Retirement Fund Act

A new by-law (No. 5), made February 23, 1945, gazetted May 26, provides that a teacher who served in the Armed Forces after August 31, 1939, is to receive benefits under the Act. He may, for his period of service, be considered to have been employed as a teacher, if he taught at any time within six months preceding his enlistment, and if, upon resumption of teaching within one year after discharge, he pays into the retirement fund arrears due for this period, at the salary he was receiving before entering the service. If a teacher dies while on military service, or within a year after discharge, as a result of war disability, he may be considered to have died while employed as a teacher. These provisions do not apply to any person called up for training under the National Resources Mobilization Act (L.G. 1940, p. 629) unless he was sent outside the North American continent and Newfoundland.

Ontario Apprenticeship Act

Two new sets of regulations relate to barbering and hairdressing. They rescind previous regulations. One set made November 22 and 29, 1944, gazetted June 2, 1945, lays down conditions under which a barbering or hairdressing school may be operated. The other set, made November 22 and 29, 1944, gazetted June 9, 1945, governs the employment and training of apprentices.

Licences for schools must be renewed annually on prescribed forms, applications for renewals being made at least one month before expiration of the licence. The fee for a licence or renewal is \$5. An applicant for licence may apply to the Apprenticeship Board for a reconsideration of his application within 30 days if it has been refused.

At least one instructor must be engaged for each 10 students. Instructors in barbering schools must be qualified and paid not less than \$20 per week. No instructor in either a

barbering or hairdressing school may perform services for any customer of the school except while demonstrating. Students may perform services for customers while the school is open between 9 a.m. and 6 p.m. at prices approved by the Board. One hour must be allowed for lunch. Barbering schools must be closed Wednesdays at noon. Hairdressing schools may be granted a special permit to operate during other hours of the day for the convenience of evening students.

Contracts between students and schools must be in a form approved by the Board. No assurance of future employment may be given to a student by a school. When a student has completed his training he must appear before a board of examiners appointed by a provincial advisory committee. The board may recommend to the committee the period to be allowed as a credit toward the apprenticeship term. In the case of hairdressing schools the examining board may recommend that a certificate of qualification be granted.

Advertising matter must be submitted and approved by the Director of Apprenticeship. Where a school and shop are operated on the same premises there must be a separate entrance for each and a partition separating the two.

Certain stipulations are made as to sanitary conditions of equipment and each student must present a medical certificate stating that he is not suffering from any communicable disease or transmissible condition. An instructor must furnish such a certificate once a year or as often as the Board may require.

The second set of regulations on the training and employment of apprentices stipulates that every person engaged in either trade must register with and forward a return with required information to the Apprenticeship Board. An employer who himself holds or who employs a person who holds, a certificate of qualification may employ one apprentice, and an additional apprentice for each five additional barbers or hairdressers.

The apprenticeship term, including the probationary period, is three years, but the term may be reduced by the director if an apprentice has received training at a school before his apprenticeship begins. Such a person may be required to take an examination for which the fee is between \$1 and \$5.

Examiners appointed by the Board may conduct examinations and recommend the issue of certificates to the advisory committee. Certificates expire May 31 in each year. The fee for the renewal of a certificate or a duplicate is \$1 but where application for renewal is not made before May 31 following expiration, the fee is \$2. Certificates must be conspicuously

posted in the shop in which the holder is employed.

The Director of Apprenticeship is responsible for the conduct of examinations. The holder of a certificate of qualification in either trade may be permitted by the provincial advisory committee to become a candidate for an examination to qualify for a certificate in the other trade without serving as an indentured apprentice. Certificates are issued on the recommendation of the provincial advisory committee. Persons having been employed for three years or more in their trade on June 17, 1936, whose qualifications are satisfactory to the committee, may be granted a certificate of qualification upon payment of the prescribed fee. Persons whose qualifications are not satisfactory must try the prescribed examination. Where a certificate of qualification is not renewed for three consecutive years, the holder must also try the prescribed examination.

A certificate may be cancelled when the Board believes such a certificate has been obtained by fraud, or that the holder has become incompetent or has failed to comply with the Act or regulations. Cancellation does not take effect until ten days after notification has been sent to the holder. Such a person may apply to the Board for a review of its decision by delivering a written request to the Director before the cancellation becomes effective. Certificates are valid until a contrary decision is given by the Board.

Contract wages for barbers must not be less than the following rates:

- First three months (probation) no wages.
- Second three months, 10c per hour.
- Second six months, 15c per hour.
- Third six months, 19c per hour.
- Fourth six months, 22c per hour.
- Third year, 50 per cent of the total receipts taken in by the apprentice barber, but not less than 25c per hour.

Contract wages for hairdressers are set out in the Regulations.

Persons having served in the Armed Forces who are taking a course in rehabilitation training may be exempt by the Director from any of these provisions.

Quebec Minimum Wage Act

A section concerning school corporations, has been added to Order 4 (L.G. 1942, p. 586), governing industries to which special Orders do not apply by an Order in Council made April 28, gazetted and effective June 16, 1945.

The new section stipulates that secretary-treasurers of school corporations also acting as attendance officers are entitled to the follow-

ing supplementary salary each year, payable monthly in addition to their salaries as secretary-treasurers: in places of over 10,000 population—\$150; from 6,000 to 10,000—\$125; from 3,000 to 6,000—\$100; from 1,500 to 3,000—\$70; from 500 to 1,500—\$35; and less than 500 population—\$25.

The following Orders have been renewed until January 1, 1947, by an Order in Council of May 20, gazetted June 16: Order 9 (L.G. 1938, p. 623) relating to teachers of the Verdun School Board; Order 14 (L.G. 1938, p. 1099) governing maintenance men in Montreal public buildings; Order 28 (L.G. 1939, p. 1003) for dyeworks and laundries in Quebec and Quebec-West; Order 29 (L.G. 1939, p. 1002) concerning taxicabs and automobiles for hire in Quebec and Levis; Order 30 (L.G. 1939, p. 1112) con-

cerning the manufacture of wooden boxes and other wooden objects; Order 37 (L.G. 1940, p. 927) for factories manufacturing glass containers; Order 40 (L.G. 1941, p. 653) governing Montreal Island cinemas and theatres.

Saskatchewan Trade Union Act

Regulations under the Act (L.G. 1945, p. 353) were amended by Order in Council of May 25, 1945, gazetted June 15, to stipulate that when the application is made by a trade union to bargain collectively, the application must be accompanied by a statement that a majority or less than a majority of employees have given the union written authority to represent them in collective bargaining.

Legal Decisions Affecting Labour

Manitoba Appeal Court Affirms Damages for Industrial Accident Against Negligent Workman of Another Employer

THE Manitoba Workmen's Compensation Act, as it stood before its amendment in 1945, permitted a workman or his legal representative, to bring action against a workman of another employer for negligence. This was the gist of a judgment of the Manitoba Court of Appeal on April 19 dismissing an appeal from a judgment of Mr. Justice Donovan. (L.G. Feb. 1945, p. 197).

Action was brought by the daughter of the deceased workman who had been a flagman employed by the Canadian National Railways. In the course of his duties he was killed by a bus driven by the defendant who was employed by the Winnipeg Electric Company. Mr. Justice Donovan awarded the plaintiff \$1,500 general damages, \$288 special damages and costs.

Defendant appealed on four grounds:

- (1) that the judgment was against the law and the evidence;
- (2) that the plaintiff's right of action was taken away by Section 5 of the Workmen's Compensation Act;
- (3) that the damages were excessive; and
- (4) that there was contributory negligence on the part of the deceased.

The Court of Appeal held that the cause of death was the defendant's negligence and that there was no contributory negligence on the deceased's part. As regards the amount of the damages, members of the Court considered that the damages were not excessive and the decision of the trial judge as to the

amount should not be altered. The one point for consideration then was the second ground of appeal, the effect of the Workmen's Compensation Act.

Sec. 5 (1) of the Act states that a workman or his dependants entitled to an action against some person other than his employer, may, if entitled to compensation under the Act, claim compensation or may bring such action. Sec. 5 (6) stipulates that, in any case within subsec. (1), neither the workman nor his dependants have any right of action against an employer in any industry within the scope of Part I of the Act. Counsel for defendant argued that the defendant and his employer were joint tortfeasors and if one of them was freed from liability by the statute the other was also. The Court rejected this contention, distinguishing the cases cited in support of it from the present case where any liability of the employer could be only through his relationship to the negligent workman.

Finally, it was pointed out that Sec. 5 (1) confirms the workman's right of action against any person other than his own employer. Subsec. (6) expressly prohibited him bringing an action against another employer within the Act. Without express prohibition of an action against a workman of another employer, it could not be held that the Legislature had intended to take away a right declared in subsec. (1).

On April 7, 1945, Sec. 5 of the Workmen's Compensation Act was amended to bar an action against a workman employed by any employer within the scope of Part I of the Act. *Lytwyn v. Vincent* (1945) 2 Western Weekly Reports 85.

Ontario Court Quashes Order of Selective Service Court of Referees

An Order of a court of referees dismissing an appeal from a ruling of a selective service officer was quashed by the Ontario High Court on April 5. The case arose under the National Selective Service Civilian Regulations which stipulate that where a selective service officer permits an employer to dismiss an employee, the latter may appeal to a court of referees. The court of referees consists of representatives of employers and employed with a chairman appointed by the Government.

The question for the Court to determine was as to whether the court of referees had carried out its duties in accordance with the stipulation in Sec. 214 (9) of the Regulations, as they stood before March 6, 1945: not to "decide an appeal until a reasonable opportunity has been given to the claimant to make representations which he desires the Court to consider in making its decision".

In this case Chief Justice Rose was of the opinion that since the court of referees had heard the parties separately, the claimant being heard first, the latter had not had "any reasonable opportunity of making the representations that he would have made if he had been informed of the points, both of law and of fact, made against him". The Chief Justice was "reluctant" to quash the decision,

partly at least because he could not see what benefit the applicant thought he could derive from the quashing of the decision of the court of referees . . . the quashing of the decision would not have the effect of reversing the ruling of the selective service officer, and it would not reinstate the applicant in his employment. *Re Allinson and the Court of Referees*, (1945) Ontario Weekly Notes 317.

Quebec Appeal Court Upholds Conviction of Union Organizers for Encouraging Strike

On June 5, the Quebec Court of Appeals dismissed the appeal of two labour organizers who had been sentenced on May 8, 1944, in the Magistrate's Court at Three Rivers, to six months in jail on a charge of violating Regulation 51b of the Defence of Canada Regulations. On January 15, 1945, Mr. Justice Girouard, sitting on the Crown side of the Court of King's Bench at Three Rivers, had confirmed the Magistrate's decision. Leave to appeal from his judgment was granted on January 24.

Regulation 51b of the Defence Regulations provides that any person engaged in the production of war material who does any act the natural consequence of which is to retard or interfere with production is liable on summary conviction to imprisonment for not more than

two years or, if prosecuted upon indictment on order of the Attorney General of Canada or of the province, to not more than five years imprisonment. It is stipulated, however, that a person is not guilty of a violation of the regulation merely because he takes part or peacefully persuades others to take part in a strike. A "strike" is defined in Section 2 (ii) as a lawful strike.

The offence occurred in October, 1943, in the course of a dispute between the Aluminum Company of Canada at Shawinigan Falls and some of its workmen over an increase in the number of Soderberg pots which a man was required to tend. The defendants were trying to organize the aluminum workers in a union affiliated with the American Federation of Labour but the company had an agreement with the National Syndicate of Aluminum Workers. When the company gave notice of the seasonal increase from seven to eight pots per man, the accused called a meeting of the employees to protest against the change. Those attending the meeting pledged themselves not to work and to prevent others working if the change was made. During the strike which followed a number of pot lines in one plant became "frozen" and there was considerable loss in production (L.G. 1943, p. 1520).

This strike was illegal under the Industrial Disputes Investigation Act as extended under the authority of the War Measures Act to war industries. The Industrial Disputes Investigation Act prohibits a strike until the dispute has been inquired into and reported on by a board of conciliation and investigation. By an Order in Council of September 16, 1941 (P.C. 7307), the period during which a strike was illegal was extended until the workers concerned notified the Minister of Labour of their desire to strike and, if he ordered a ballot to be taken on the question, until after the vote had been taken and a majority had voted in favour of a strike. This Order in Council, which was repealed on September 1, 1944, stipulated that any person who went on strike or who incited, encouraged or aided any employee to strike in violation of the Order was liable to a maximum fine of \$200 or to imprisonment for not more than 12 months or to both fine and imprisonment.

Before the Court of Appeal, defendants' counsel argued that it was the Order in Council (P.C. 7307) which they had violated and not Defence Regulation 51b. Mr. Justice Prévost, however, with whom the other judges agreed, held that the Order in Council applied only after a board of conciliation and investigation had inquired into a dispute and had reported. It merely prolonged the period during which a strike was illegal from the date

the report was received by the Minister until a vote had been taken by the employees on the question of a strike. In the case of the aluminum workers, the offence occurred before the Minister was informed of the dispute and before a conciliation board had been established. The penalty provision of this Order in Council (P.C. 7307) could not, therefore, apply to the case.

As regards Defence Regulation 51b, Mr. Justice Prévost held that it applied, that the industry was one producing war material, that the strike prevented and reduced production, that the Regulation had to do with "any act" the natural consequence of which was to interfere with production and the proviso that merely taking part in a legal strike was not an offence under the Regulation implied that it was an offence to take part or persuade others to take part in an illegal strike.

As to the objection that the offence under Regulation 51b is an act done with the intention of interfering with production, and there was no evidence of such intention, Mr. Justice Prévost stated that there was no reference in the regulation to motives but merely to an act the natural and probable consequence of which was to hinder production. *Jodoin and Cutler v. R.* Quebec Court of King's Bench (in appeal), June 5, 1945.

***Quebec Court Dismisses Claim for Damages
By Hospital Worker for Hernia***

On March 28, 1944, Mr. Justice Mackinnon in Montreal Superior Court dismissed an action against a hospital for damages resulting from hernia. Plaintiff whose principal duties were preparing vegetables was ordered on September 7, 1939 to sweep the store-room, and alleged that she suffered a hernia while lifting a heavy can. On September 10 she went to another hospital for treatment, and on September 15 was operated on for hernia.

From the evidence of the surgeon who operated it appeared that the plaintiff was predisposed to hernia, as the result of an operation some years before. The doctor was unable to state whether the rupture was a recent one; it could have occurred on September 7 or several months previously.

The Court found that the plaintiff did not mention any extraordinary pain on September 7 or 8, and left her employment very disgruntled after having been transferred to the cafeteria. There was no evidence of plaintiff having been asked to do work too heavy for a normal woman of her weight, and assistance would undoubtedly have been furnished if asked for. A predisposition to hernia could not have been anticipated by the hospital authorities.

The Court concluded that the plaintiff failed to prove that hernia occurred on September 7. Under articles 1053 and 1203 of the Civil Code, the plaintiff must prove negligence, and even if the hernia occurred under the conditions stated, she failed to establish any negligence on the part of the defendant. *O'Rourke v. St.-Luc Hospital*, Montreal Superior Court, March 28, 1944.

***Crown Recovers Cost of Repairs to Vehicle
From Negligent Employee Who Was
Compensated for Accident***

In an action by the Attorney General of Canada to recover \$48.99, the cost of repairs to a tractor, the property of the Crown, Acting Chief Justice Bond in the Superior Court on October 4, 1944, found the defendant guilty of negligence, and awarded judgment against him.

In the course of his employment with the Department of National Defence, the defendant was driving a tractor in the shed at an ordnance depot. In proceeding down an aisle formed by boxes built up on each side, he had to make a turn, and in doing so struck the boxes first on one side and then on the other, overturning the vehicle. As he sustained a partial permanent disability, he was awarded compensation by the Quebec Workmen's Compensation Commission in accordance with the Government Employees' Compensation Act.

The defendant advanced two arguments: (1) that the action should have been brought in the name of the Minister of National Defence rather than the Attorney General; and (2) that since the defendant had received compensation, the plaintiff, under the Workmen's Compensation Act, was precluded from advancing a claim against him. The Court held that there were several precedents which refuted the first argument. As to the second, there was nothing in the Workmen's Compensation Act to prevent an employer from proceeding, under the common law, to recover from the employee loss or damage occasioned by the latter's fault. From the evidence it appeared that the tractor was carelessly driven at an excessive speed under the circumstances. The Court held that this constituted fault on the part of the defendant. *Attorney General of Canada v. Trudel*, Montreal Superior Court, October 4, 1944.

***Order of Saskatchewan Labour Relations
Board in Policemen's Union
Case Quashed***

The Saskatchewan Trade Union Act, 1944, came before the Saskatchewan Court of Appeal in connection with an application for an order

for a writ of *certiorari* to bring before the Court an order made by the Labour Relations Board of Saskatchewan on March 5, 1945, and for an order that the Board's order be quashed.

The Labour Relations Board had directed the applicant in this case, who is chief of police of the City of Regina, to refrain from engaging in "the unfair labour practice", described in the Trade Union Act, of refusing to negotiate from time to time with the representatives of the Regina City Policemen's Association, Local 155, for the settlement of grievances of employees covered by a collective agreement of August 15, 1944, between the City of Regina, through the Board of Police Commissioners, and the Policemen's Association.

The Trade Union Act, Sec. 2 (6) defines "employer" as one who employs three or more persons and it includes His Majesty in right of Saskatchewan. It does not include any employer "whose relations with his employees are within the exclusive jurisdiction of the Parliament of Canada" or whose works or undertakings are defined as essential to the war by the Wartime Labour Relations Regulations of the Dominion Government. An "employer's agent" is defined as:

- (a) any person or association acting on behalf of an employer;
- (b) any officer, official, foreman or other representative or employee of an employer acting in any way on behalf of an employer in respect to hiring or discharging or any of the terms or conditions of employment of the employees of such employer;

Among the powers conferred by the Act on the Labour Relations Board is the authority to make an order requiring an employer to bargain collectively or an order requiring any persons to refrain from violation of this Act or from engaging in any unfair labour practice.

It is declared an unfair labour practice, *inter alia*

... to fail or refuse to bargain collectively with representatives elected or appointed (not necessarily being the employees of the employers) by a trade union representing the majority of the employees in an appropriate union; to refuse to permit any duly authorized representative of a trade union with which he has entered into a collective bargaining agreement to negotiate with him during working hours for the settlement of disputes and grievances of employees covered by the agreement . . .

A certified copy of any order of the Board may be filed in the office of the Registrar of the Court of King's Bench and thereupon becomes enforceable as a judgment or order of the Court.

It is stipulated in the Act that

there shall be no appeal from an order or decision of the Board under this Act, and the Board

shall have full power to determine any question of fact necessary to its jurisdiction, and its proceedings, orders and decisions shall not be reviewable by any court of law or by any *certiorari*, *mandamus*, prohibition, injunction or other proceedings whatsoever.

In August, 1944, the Corporation of the City of Regina, through the Board of Police Commissioners, made an agreement with the Policemen's Association, Local 155. Chief Justice Martin in setting out the facts, remarked that while the City was named as a party to the agreement, it was clear from the agreement that the Board of Police Commissioners was the party intended. The Commissioners agreed to recognize Local 155 as the sole bargaining agent of the employees of the police force. All present members of the Association are to remain in good standing and future employees are required to join the Association within 30 days after the end of a probation period of not more than six months. The agreement has provisions concerning salaries, hours of duty, overtime, annual and sick leave, seniority, promotions, etc. Arbitration of disputes is provided for.

Local 155 complained on January 30, and again on February 4, 1945, to the Labour Relations Board that the chief constable refused to bargain with the union's representatives or to negotiate with them during working hours or at any other time as required by section 8 of the Act. The chief constable was described in the complaints as the employer's agent as defined in Sec. 2 (7) of the Act in that he acts on behalf of the Board of Police Commissioners and has powers, under the City Act to dismiss employees from the police force.

The policemen had, at a general meeting on February 26, 1944, decided to form a union and affiliate with the Trades and Labour Congress of Canada. The applicant, the chief constable, refused to discuss the matter of an agreement when approached by members of the union when they were accompanied by the Saskatchewan representative of the Trades and Labour Congress. The Board of Police Commissioners took the same stand at first but on August 15 entered into the agreement.

On September 23, the applicant refused to discuss grievances and asked that they be submitted in writing. To a written statement he sent "a very sarcastic letter." On November 9, the chief constable instructed the union's representatives to withdraw when they insisted on his stating whether he intended to discuss matters with them. On January 25, 1945 on complaints of discrimination in the matter of a holiday schedule which was included in the agreement, the executive committee of the union tried to meet the applicant again but he refused to receive them on two occasions.

The union, thereupon, applied to the Board for an order restraining the applicant from unfair labour practices.

The application was heard on February 19. The public were excluded. A member of the Board was the representative of the Trades and Labour Congress whom the applicant had asked to leave his office when he accompanied the union men and the applicant's counsel objected to his sitting on this case. The Board, however, decided he should continue.

During the hearing it was admitted by the secretary of the union that the police commissioners had refused the union's request for an amendment to the agreement so as to permit the union's representatives dealing direct with the applicant.

The Labour Relations Board made an order directing the chief constable, as the employer's agent, to refrain from engaging in the unfair labour practice of refusing to negotiate with the union's representatives. A certified copy of the order was filed in the Court of King's Bench on March 10.

The ground on which the Board's order was objected to was that the Board was "without jurisdiction in a number of respects; (1) that the applicant was neither an employer nor employer's agent within the meaning of the Act; (2) that the Trade Union Act, in so far as it purports to make the Board's orders enforceable as orders of the Court are *ultra vires* of the Legislature, as being legislation setting up a superior court or tribunal analogous thereto; (3) that one of the members of the Board was disqualified by reason of bias or reasonable apprehension of bias and such disqualification extended to the Board; and (4) that the Board excluded the public from the hearing."

Chief Justice Martin dealt first with the provision of the Act that there should be no appeal from an order of the Board and its orders should not be reviewable by *certiorari*. There were many precedents to show that the courts, notwithstanding a statutory abolition of the right to *certiorari*, could still exercise the right where the order complained of had been made without jurisdiction. He stated:

In Canada it has been repeatedly held that an express statutory abolition of *certiorari* does not oust the power of the court to issue the writ or to quash a conviction if justices have acted without jurisdiction, for in such a case the inferior court has not brought itself within the terms of the statute taking away *certiorari*;

There is ample authority to the effect that the Court will issue the writ to a body exercising judicial functions though the body cannot be described as being in any ordinary sense a Court.

It is essential, however, that the tribunal should be one which exercises judicial functions and which has the power to impose legal duties

and obligations on the parties before it, similar to those which are usually decreed by Courts of justice. In my opinion the Labour Relations Board is a body which is empowered by the Trade Union Act to exercise certain judicial functions in that it has power to determine questions affecting the rights of parties before it; and there can be no doubt that in making the order in question the Board exercised a judicial function.

Having disposed of the Court's right to review the case, Chief Justice Martin took up the applicant's argument that he was neither an employer nor an employer's agent and so the Board's order was improperly made.

Under the City Act, the Board of Police Commissioners have the power of appointment of members of the force and have "sole charge and control" of the force and police department. Subject to the paramount authority of the Commissioners, the constables are under the control of the chief of police and are charged by the Act with the duty of preserving the peace, apprehending offenders, etc. The chief of police has power to suspend or dismiss members of the force but the latter have the right of appeal to the Commissioners. The chief of police, himself, has the right to appeal, if he is dismissed, to a Judge of the King's Bench. The Commissioners have authority to inquire into the conduct of any member of the force and for that purpose have the powers of a police magistrate to summon witnesses, etc.

In the opinion of Chief Justice Martin, based on authorities cited:

Under the provisions of The City Act police officers and constables are appointed by the Board of Police Commissioners but this does not make them the servants or agents of the City or of the police commissioners; they are appointed to perform a public service in which the City has no corporate interest; their duties are derived from the law and not from the City or the police commissioners, and in performing these duties they act not in the interests of the city but of the public at large.

Counsel for Local 155 called attention to the definition of "employer's agent" in The Trade Union Act and particularly to the words "any officer . . . acting on behalf of an employer in respect to hiring or discharging . . ." His contention was that in as much as the applicant under the provisions of the City Act has power to suspend or dismiss members of the police force he falls within the definition of "employer's agent" in the Trade Union Act. As to this, it is sufficient to say that the applicant in exercising his power to suspend or dismiss does not act on behalf of an employer but under the power conferred upon him by the statute.

The decision therefore must be that the applicant is neither an employer nor an employer's agent and the order of the Board of March 5, 1945, was therefore made without jurisdiction and must be quashed.

Having reached the conclusion that the order must be quashed, on the ground that the applicant is not an agent, it becomes unnecessary for me to consider the important constitutional

question raised as to the validity of sections 9 and 10 of the Trade Union Act. It is the policy of the courts not to express opinions on matters which are unnecessary for the decision of the case in hand, and the question of the constitutionality of the section referred to should therefore be reserved for consideration at an appropriate time.

Mr. Justice Macdonald, with whom Mr. Justice Mackenzie concurred, also considered that the Labour Relations Board was acting in a judicial capacity in making the order and that where a tribunal acts without or in excess of its jurisdiction, *certiorari* lies to remove or quash the proceedings.

As regards the question whether the applicant chief of police was an employer's agent within the meaning of the Trade Union Act, Mr. Justice Macdonald pointed out:

The relation of agency exists *and can only exist* by virtue of the express or implied assent of both principal and agent except in certain cases of necessity in which the relation is imposed by operation of law . . . In this case it was not argued and it could not be successfully argued that the applicant was an agent of necessity. Agency of necessity does not arise if the agent can communicate with his principal . . . Here it is not contended that there was any *contract* of agency between the Board of Police Commissioners and the applicant. What learned counsel for the Association argues is that the provisions of the Trade Union Act and of The City Act constitute the applicant an agent of the Commission . . . It is true that the Police Commission appoints the Chief of Police and all the other members of the police force but their duties and powers are those which, on appointment, are imposed upon and given to them by statute. What these are is indicated by the oath of office which they must take before entering upon their duties . . .

It has been repeatedly held that a police officer is not the servant or agent of either the Police Commission or the Municipal Corporation . . .

Learned counsel for the Association argues that the applicant is an agent of His Majesty the King in the right of the Province and is therefore an employer's agent as defined by The Trade Union Act. The foregoing considerations and authorities are to my mind conclusive that the argument is not sound. If the argument were sound it would mean that the order in question would disclose no unfair practice, for the one alleged is of failure to engage in the settlement of disputes and grievances covered by the collective bargaining agreement between the corporation of the City of Regina through

the Board of Police Commissioners on the one hand and the Association on the other and not between His Majesty and the Association.

The form and substance of the agreement at once raised in mind a serious question whether the agreement is valid at all. No objection to its validity was raised or argued and as its determination is not necessary to a disposition of the case I do not propose to deal with it. I merely wish to guard against any implication that I hold the agreement valid. The question remains open.

I am therefore of opinion that the Labour Relations Board erred in holding that the applicant was an employer's agent.

Mr. Justice Gordon dealt with two other objections which he considered sufficient to invalidate the Board's order: (1) that the representative of the Trades and Labour Congress, Mr. P. W. Haffner, who accompanied the union's representatives when they appeared before the applicant and acted as the union's agent, had sat on the Labour Relations Board when it was hearing the case, and (2) that the proceedings were improperly held *in camera*.

Mr. Justice Gordon stated:

It is clear from a number of cases that it is not necessary to show actual bias on the part of the person or persons exercising judicial functions but it is sufficient for disqualification if there is shown a reasonable ground for apprehension of bias . . . In my opinion Haffner has so identified himself with the cause of the Local, when he became its advocate before the applicant, as to render himself unqualified to act as one of the Board called upon to pass on the applicant's conduct. It hardly seems necessary to state that the disqualification of one member of the Board disqualified all, even if he took no part on the proceedings.

As regards the law in respect to the publicity of judicial proceedings, Mr. Justice Gordon quoted at length from Sir Frederick Pollock, Lord Halsbury and others on the importance of publicity in the administration of justice. He concluded:

In my view the Board as it was constituted, having as a member P. W. Haffner, was incompetent to hear the charge against the appellant, and the further fact that their proceedings were held in camera rendered their order as one made without jurisdiction. I would quash the order without the actual issue of the writ of *certiorari*. *Bruton and Regina City Policemen's Association, Local 155*, (1945) 2 Western Weekly Reports 273.

English Cases

British Employers Liable for Negligence of Their Workmen When Services Hired to Another

Two cases recently argued before the English Court of Appeal involved the question of liability of an employer for the negligence of his workman whose services, at the time of the accident, had been temporarily transferred

to another employer. The judgments were noted in the *Ministry of Labour Gazette* for April. The question before the Court was whether the regular employer or the temporary "employer" was liable for the workman's negligence.

In the first case, the plaintiff was injured through the negligence of a driver of a van

who had been temporarily hired by the plaintiff's regular employers. The trial judge held that at the time of the accident the negligent workman was "employed" by the temporary "employer" and that he and the plaintiff were therefore in common employment. Accordingly, he dismissed the action. The plaintiff appealed, contending that the negligent workman's regular employer was still his "employer" at the time of the accident.

In the second case, the question of common employment did not arise. The plaintiff, engaged in checking goods being loaded into a ship, was injured by a mobile crane driver employed by the Mersey Docks and Harbour Board but temporarily hired to a firm of stevedores. The trial court awarded damages against the Harbour Board as the plaintiff's employer. The Board appealed.

The Court of Appeal held in both cases that the regular employer of the negligent workman was liable for damages. In the first case, the appeal of the injured workman was allowed and in the second case, the appeal of the employer was dismissed.

Lord Justice Morton, speaking for the Court, said that it was clearly established that if the regular employers of a workman wished to contend that they were not his "employers" at the time when his negligence in performing his duties caused an accident, the burden was on them to prove this. The following test had been laid down in a case heard by the Court in 1943:

In the doing of the negligent act was the workman exercising the discretion given him by his general employer, or was he obeying (or discharging) a specific order of the party for whom, on his employer's direction, he was using the vehicle or other instrument.

Applying this test, the Court considered that there was no doubt that in each of these cases, the driver was exercising his own discretion as driver, a discretion which had been vested in him by his regular employer when he was sent out with the vehicle, and he made a mistake with which the hirers had nothing to do. *Dowd v. W. H. Boase & Co. Ltd.*; *McFarlane v. Coggins & Griffiths (Liverpool) Ltd.* Court of Appeal, Feb. 9, 1945.

American Cases

Recent judgments of the United States Supreme Court decided cases involving conflict between Federal and State legislation concerning trade unions and collective bargaining, trade union activity in relation to the Sherman Anti-trust Law of 1890, and the question of whether workpeople under the Fair Labour Standards Act, 1938, can waive their right to wages and liquidated damages in cases where the employers have violated the wage-and-hour provisions of the Act.

The Union Control Law of 1943 of the State of Florida and an Alabama statute of 1943 regulating trade unions (Bradford Act) both came before the Supreme Court on appeal by a labour organization or its representative against judgments of the Supreme Court of the State concerned. The question in the first case was the validity of certain provisions of the State law having regard to the provisions of the Federal National Labour Relations Act (Wagner Act), and in the Alabama case, the validity of certain sections under the constitutional guarantees of freedom of speech and assembly, due process of law, and equal protection under the law, and in view of some conflict with the National Labour Relations Act.

State Regulation of Unions and the National Labour Relations Act

Validity of Alabama Law not to be Decided in Suit for Declaratory Judgment

In the two Alabama cases brought by the Congress of Industrial Organizations and others, and the American Federation of Labour and others, respectively, the petitioners asked for a declaratory judgment that certain sections and the Alabama law as a whole were unconstitutional under Federal and State Constitutions. The cases were considered together.

One section in dispute requires every labour organization to file with the State Department of Labour (1) a copy of its own constitution and by-laws and those of any national or international organization to which it belongs as well as amendments when made, and (2) an annual statement, if union has 25 or more members, showing names and addresses of its officers, their salaries and other remuneration, number of paid-up members, and a complete financial statement giving all receipts and disbursements, names of recipients and purpose of payments, and full statement of money and property owned by the union. The annual statement is also to be furnished to every member of the union. If union is in default with respect to filing the statement, no officer of the union may

collect or accept payment of any dues, assessments or fees. Other sections of the Act make it unlawful to collect or accept any fee, assessment or any sum as a work-permit or as a condition for the privilege of work, excluding initiation fees, or to accept as members executive or supervisory staff if it accepts other classes.

The State Supreme Court held the three sections valid. The United States Supreme Court, on the other hand, decided that their validity could not be adjudicated in a suit for a declaratory judgment since there was no set of facts showing how the statute was being applied. As regards the contention of the respondents, charged with enforcing the Act, that the statute is constitutionally invalid because it denies equal protection of law in not extending its provisions to organizations other than trade unions, the Court held it was without substance, since the Federal Constitution does not require a State to reform or regulate all types of organizations.

Alabama State Federation of Labour, et al v. McAdory, et al, No. 588, June 11, 1945.

*Florida Union Control Act Invalid Where
Conflicts with Wagner Act*

The Florida Union Control Law requires *inter alia* a "business agent" of a union to pay a fee of \$1 and to prove before he can obtain the necessary annual licence, to the satisfaction of the State Board appointed for the purpose, that he has been a United States citizen for more than 10 years, that he has not been convicted of a felony and that he is a person of good moral character. After 30 days during which objections may be heard the licence may be issued. A "business agent" is defined as any person who for financial or pecuniary consideration acts or tries to act for a Union "in soliciting or receiving from any employer any right or privilege for employees" . . . or "in the issuance of membership or authorization cards, work permits or any other evidence of rights granted or claimed in, or by, a labour organization."

A union before "operating" in the State is required to file a written report with the Secretary of State, showing its name, location of offices, and names and addresses of officers.

The Attorney General of Florida applied for an injunction against the union and its business agent, Hill, restraining them from functioning as such until they had complied with the requirements of the statute. It was claimed that Hill had not a licence to act as business agent and the union had not fulfilled the statutory requirements so it could legally

operate in the State. Hill was enjoined from continuing to act as business agent until he obtained a licence and the union was enjoined from functioning until it made the report and paid the fee to the Secretary of State. The Supreme Court of Florida affirmed this decision.

When the case came before the Supreme Court of the United States Mr. Justice Black, delivering the majority opinion, stated that

the only question we find it necessary to decide in this case is whether a Florida statute regulating labour union activities has been applied to these petitioners in a manner which brings it into irreconcilable conflict with the collective bargaining regulation of the National Labour Relations Act. . . . That federal Act we decided in *Allen-Bradley Local v. Labor Board* . . . did not wholly foreclose State power to regulate labor union activities. Certain conduct, such as mass picketing, threats, violence and related actions, we held were not governed by the Wagner Act, and hence, Wisconsin was free to regulate them. We carefully pointed out, however, that had the State order under consideration, "affected the status of the employees, or . . . caused any forfeiture of collective bargaining rights, a distinctly different question would arise." That question which was so distinctly reserved in the Wisconsin case has now arisen in this case.

It was pointed out that the Florida statute had already interfered with the collective bargaining process. An employer before the National Labour Relations Board defended his refusal to bargain with the duly selected representative of the workers on the ground that the representative had not a Florida licence.

The Board properly rejected the employer's contention holding that Congress did not intend to subject the "full freedom" of employees to the eroding process of "varied and perhaps conflicting provisions of State enactments."

* * *

The declared purpose of the Wagner Act as shown in its first section, is to encourage collective bargaining, and to protect the "full freedom" of workers in the selection of bargaining representatives of their own choice. To this end Congress made it illegal for an employer to interfere with, restrain or coerce employees in selecting their representatives. Congress attached no conditions whatsoever to their freedom of choice in this respect. Their own best judgment, not that of someone else, was to be their guide. "Full freedom" to choose an agent means freedom to pass upon that agent's qualifications.

In this case the business agent had been enjoined, and if the Florida law were valid, he could be found guilty of a contempt and also be convicted of a misdemeanor for doing

what the United States Congress permits him to do.

The collective bargaining which Congress has authorized contemplates two parties free to bargain, and cannot thus be frustrated by State legislation. We hold that Section 4 of the Florida Act is repugnant to the National Labor Relations Act.

Similarly, as regards the union,—

The requirement as to the filing of information and the payment of a \$1 annual fee does not, in and of itself, conflict with the Federal Act. But for failure to comply, this union has been enjoined from functioning as a labor union. It could not without violating the injunction and also subjecting itself to the possibility of criminal punishment even attempt to bargain to settle a controversy or a strike. It is the sanction here imposed, and not the duty to report, which brings about a situation inconsistent with the federally protected process of collective bargaining.

* * *

Our holding is that the National Labor Relations Act and Sections 4 and 6 of the Florida Act as here applied cannot move freely within the orbit of their respective purposes without infringing upon one another.

Chief Justice Stone, concurring in part, emphasized that:

the National Labor Relations Act does not preclude a State from requiring a labor union, or its officers and agents, as such, to procure licences or make reports or perform other duties which do not materially obstruct the exercise of rights conferred by the National Labor Relations Act or other federal legislation. . . . But it is quite another matter to say that a State may fix standards or qualifications for labor unions and their officers and agents which would preclude any of them from being chosen and from functioning as bargaining agents under Section 7 of the National Labor Relations Act. The right conferred on employees to bargain collectively through a representative of their own choosing is the foundation of the National Labor Relations Act. Without that right, or if it were restricted by State action, the Act as drawn would have little scope for operation.

The Chief Justice dissented from the majority opinion as regards Section 6 of the Florida Act. He could find no conflict between this section requiring, under penalty, labour organizations to furnish information and the National Labour Relations Act. He stated:

I can find no logical or persuasive legal ground or practical reason for saying that Congress by the enactment of the National Labour Relations Act intended to preclude the State from exercising to the utmost extent its sovereign power to enforce the lawful demands of Section 6 of the Florida Act. There is no more occasion for implying such a Congressional purpose where the union is prevented from functioning by punishment or injunction, for a violation of a valid State law, than for saying that Congress, by the National Labor Relations

Act, intended to forbid the States to arrest and imprison a labor leader for the violation of any other valid State law, because that would prevent his or the union's functioning under the National Labor Relations Act. The question is wholly one of State power. Here the State power is not restricted by the commerce clause standing alone, nor, as far as I can see, by any Congressional intention expressed in the provisions of the National Labor Relations Act.

Mr. Justice Frankfurter, dissenting, with whom Mr. Justice Roberts agreed, quoted a statement of policy formulated long ago in the Supreme Court in a case involving the problems of

judicial accommodation between respect for the supplanting authority of Congress and the reserved police power of the States: "We agree, that in the application of this principle of supremacy of an Act of Congress in a case where the State law is but the exercise of a reserved power, the repugnance or conflict should be direct and positive, so that the two Acts could not be reconciled or consistently stand together". *Sinnott v. Davenport*, 22 How. 227, 243.

As regards the Wagner Act, Mr. Justice Frankfurter pointed out that its aim was to equalize bargaining power between employers and their employees by putting federal law behind the employees' right of association to which employers objected.

The rights Congress created, the obligations it defined, the machinery it devised for enforcing these rights and securing obedience to these obligations, all were exclusively concerned with putting the strength of the Government against this conduct by employers. All other aspects of industrial relations were left untouched by the Wagner Act, and purposely so. All activities or aspects of labor organizations outside of their right to be free from employer coercion were left wholly unregulated by that Act. Neither expressly nor by indirection did the Wagner Act displace whatever police power the States may have to deal with those aspects of the life of a trade union as to which Congress, with eyes wide open, refused to legislate. When Congress purposely dealt only with the employer aspect of industrial relations and purposely abstained from making any rules touching union activities, the internal affairs of unions, or the responsibility of union officials to union members and to the public, Congress certainly did not sponge out the States' police power as to these matters. It wipes out State power and distorts Congressional intention to disregard the limited policy explicitly set forth by Congress. That policy—curbing of employer interferences with union rights—was scrupulously observed by Congress in the substantive provisions as well as in the enforcement structure of the Act. There is not a breath in the Act referring to any aspect of union activity unrelated to employer interference therewith. By refusing to legislate beyond that, Congress did not forbid the States from so legislating.

* * *

If the Wagner Act has left Florida free to deal with these matters, Florida may not only legislate but also provide for enforcement of its legislation. In other words, if Florida may call for reports and require business agents to apply for licences, of course Florida may provide appropriate sanctions for such regulations. If a union may properly be required to file a report and does not do so and therefore is prohibited from pursuing its industrial activities until it does file such a report, the State is not interfering with whatever rights the union may have under the Wagner Act. It will be time enough to consider such a claim of conflict, if anything that Florida may exact should, in a concrete situation, actively interfere with appropriate action by the National Labor Relations Board. *Hill v. Watson, State of Florida ex rel.*, No. 811, June 11, 1945.

Application of Anti-Trust Laws to Trade Unions

Combination of Union, Manufacturers and Contractors

With two judges dissenting, the U.S. Supreme Court reversed the decision of the lower court and declared illegal on June 18, as violating the Sherman Anti-trust Act, a combination between a trade union and manufacturers of electrical equipment and contractors whereby these three groups were able to exercise a complete monopoly in the New York district and prevent the installation and use of certain goods manufactured outside the area or by non-union firms. The action was brought by manufacturers operating outside New York City against a local of the International Brotherhood of Electrical Workers, for an injunction to restrain the union and its members from continuing to engage in a wide range of activities.

Mr. Justice Black, in giving the opinion of the Court, said:

The question presented is whether it is a violation of the Sherman Anti-trust Act for labour unions and their members, prompted by a desire to get and hold jobs for themselves at good wages and under high working standards, to combine with employers and with manufacturers of goods to restrain competition in, and to monopolize the marketing of, such goods . . .

Under these (closed shop) agreements, contractors were obligated to purchase equipment from none but local manufacturers who also had closed shop agreements with Local No. 3; manufacturers obligated themselves to confine their New York City sales to contractors employing the Local's members. In the course of time, this type of individual employer-employee agreement expanded into industry-wide understandings, looking not merely to terms and conditions of employment but also to price and market control . . . The combination among the three groups, union, contractors and manufacturers, became highly successful from the standpoint of all of them. The business of New York City manufacturers had a phenomenal growth, thereby multiplying the jobs available

for the Local's members. Wages went up, hours were shortened, and the New York electrical equipment prices soared, to the decided financial profit of local contractors and manufacturers. The success is illustrated by the fact that some New York manufacturers sold their goods in the protected city market at one price and sold identical goods outside of New York at a far lower price. All of this took place, as the Circuit Court of Appeals declared, "through the stifling of competition", and because the three groups, in combination as "co-partners", achieved "a complete monopoly which they used to boycott the equipment manufactured by the plaintiffs." Interstate sale of various types of electrical equipment has, by this powerful combination, been wholly suppressed.

The Court declared that it was obvious that this combination of business men violated the Sherman Act.

unless its conduct is immunized by the participation of the union . . . Our problem in this case is therefore a very narrow one—do labour unions violate the Sherman Act when, in order to further their own interests as wage earners, they aid and abet business men to do the precise things which that Act prohibits?

The Sherman Act of 1890 was directed against monopolistic practices. It made no exception of trade union activity but in 1914, after long controversy over the propriety of regulating trade relations and controversies and labour relations and disputes as if they created similar problems, Congress passed the Clayton Act to strengthen the Sherman law against restraints on business competition. This statute declared labour not a commodity or article of commerce and stipulated that the Sherman Act should not be construed to forbid the operation of labour or agricultural organizations for purposes of mutual help. The Act also limited the power of Courts to issue injunctions in cases arising out of a dispute over conditions of employment or to prohibit certain specified acts.

The Clayton Act, however, was held not to protect trade unions which boycotted dealers by whom the union members were not employed, because those dealers insisted on selling goods produced by the employers with whom the unions had a dispute over conditions of employment. These judgments of the Supreme Court, that the Clayton Act protected trade union activities only when they were directed against the workers immediate employers, brought about the enactment in 1920 of the Norris-LaGuardia Act forbidding the issue of injunctions by federal Courts in the case of labour disputes as defined more broadly in that Act and

emphasized the public importance under modern economic conditions of protecting the rights of employees to organize into unions and to engage in "concerted activities for the purpose of collective bargaining or other mutual aid and protection" . . .

The result of all this is that we have two declared congressional policies which it is our responsibility to try to reconcile. The one seeks to preserve a competitive business economy; the other to preserve the rights of labour to organize to better its conditions through the agency of collective bargaining. We must determine here how far Congress intended activities under one of these policies to neutralize the results envisioned by the other.

Aside from the fact that the labour union here acted in combination with the contractors and manufacturers, the means it adopted to contribute to the combination's purpose fall squarely within the "specified acts" declared by Section 20 not to be violations of federal law. For the union's contribution to the trade boycott was accomplished through threats that unless their employers bought their goods from local manufacturers the union labourers would terminate the "relation of employment" with them and cease to perform "work or labour" for them; and through their "recommending, advising, or persuading others by peaceful and lawful means" not to "patronize" sellers of the boycotted electrical equipment . . .

We have been pointed to no language in any Act of Congress or in its reports or debates, nor have we found any, which indicates that it was ever suggested, considered, or legislatively determined that labour unions should be granted an immunity such as is sought in the present case. It has been argued that this immunity can be inferred from a union's right to make bargaining agreements with its employer. Since union members can without violating the Sherman Act strike to enforce a union boycott of goods, it is said they may settle the strike by getting their employers to agree to refuse to buy the goods. Employers and the union did here make bargaining agreements in which the employers agreed not to buy goods manufactured by companies which did not employ the members of Local No. 3. We may assume that such an agreement standing alone would not have violated the Sherman Act. But it did not stand alone. It was but one element in a far larger program in which contractors and manufacturers united with one another to monopolize all the business in New York City, to bar all other business men from that area, and to charge the public prices above a competitive level. It is true that victory of the union in its disputes, even had the union acted alone, might have added to the cost of goods, or might have resulted in individual refusals of all of their employers to buy electrical equipment not made by Local No. 3. So far as the union might have achieved this result acting alone, it would have been the natural consequence of labour union activities exempted by the Clayton Act from the coverage of the Sherman Act . . . But when the unions participated with a combination of business men who had complete power to eliminate all competition among themselves and to prevent all competition from others, a situation was created not included within the exemptions of the Clayton and Norris-LaGuardia Acts . . .

Our holding means that the same labour union activities may or may not be in violation of the Sherman Act, dependent upon whether the union acts alone or in combination with business groups. This, it is argued, brings about a wholly undesirable result—one which leaves labour unions free to engage in conduct which restrains trade. But the desirability of such an exemption of labour unions is a ques-

tion for the determination of Congress. It is true that many labour union activities do substantially interrupt the course of trade and that these activities lifted out of the prohibitions of the Sherman Act, include substantially all, if not all, the normal peaceful activities of labour unions. It is also true that the Sherman Act "draws no distinction between the restraints effected by violence and those achieved by peaceful means . . .", *Apex Hosiery Co. v. Leader*, and that a union's exemption from the Sherman Act is not to be determined by a judicial "judgment regarding the wisdom or unwisdom, the rightness or wrongness, the selfishness or unselfishness of the end of which the particular union activities are the means," *U.S. v. Hutcheson*. Thus, these congressionally permitted union activities may restrain trade in and of themselves. There is no denying the fact that many of them do so, both directly and indirectly. Congress evidently concluded, however, that the chief objective of Anti-trust legislation, preservation of business competition, could be accomplished by applying the legislation primarily only to those business groups which are directly interested in destroying competition. The difficulty of drawing legislation primarily aimed at trusts and monopolies so that it could also be applied to labour organizations without impairing the collective bargaining and related rights of those organizations has been emphasized both by congressional and judicial attempts to draw lines between permissible and prohibited union activities. There is, however, one line which we can draw with assurance that we follow the congressional purpose. We know that Congress feared the concentrated power of business organizations to dominate markets and prices. It intended to outlaw business monopolies. A business monopoly is no less such because a union participates, and such participation is a violation of the Act.

As regards the injunction granted by the District Court, the Supreme Court found that

When we turn to the sweeping commands of the injunction, we find that its terms, directed against the union and its agents alone, restrained the union, even though not acting in concert with the manufacturers, from doing the very things that the Clayton Act specifically permits unions to do.

The district Court was in error in refusing to limit the injunction so as to enjoin only those activities prohibited by the Clayton Act in which the union engaged in combination with any person, firm, or corporation which is a non-labour group. The restraining order was directed to be modified in accordance with the opinion of the Supreme Court. *Allen Bradley Co. v. Local Union No. 3, International Brotherhood of Electrical Workers et al*, No. 702, June 18, 1945.

Anti-Trust Laws, Leave Union Members Free to Refuse Employment and to Deny Membership to Others

Another opinion on the application of the Sherman Act to labour unions and their members in quite different circumstances was also given on June 18. By a five-to-four decision

the Court rejected the contention that respondent union had violated the Act and refused the injunction and treble damages asked for.

The case arose out of a dispute between a union of drivers and haulers and the petitioner, an employing firm engaged in motor trucking, most of it across State lines and a large part of its business being with the Great Atlantic and Pacific Tea Company. A strike in 1937 of truckers and haulers of A. & P. resulted in a closed shop agreement. The petitioner had refused to unionize his business and had tried to operate during the strike in which much violence occurred and a union man was killed. After the agreement was made, all contract haulers working for A. & P., including the petitioner, were notified that their employees must become members of the union. All of the other contract haulers except the petitioner either joined the union or made closed shop agreements with it.

The union, on its part, refused to negotiate with the petitioner or to admit any of its employees to membership. A. & P., at the union's instigation, cancelled its contract with petitioner which, later, lost a contract with another company and was unable to obtain any further hauling contracts in Philadelphia. The petitioner then brought suit for an injunction and treble damages. The district Court and Circuit Court of Appeals found no cause of action under the Sherman and Clayton Anti-trust Acts. The Supreme Court granted certiorari "because of the questions involved concerning the responsibility of labour unions under the Anti-trust laws."

In the words of Mr. Justice Black,

The "destruction" of petitioner's business resulted from the fact that the union members, acting in concert, refused to accept employment with the petitioner, and refused to admit to their association anyone who worked for petitioner. The petitioner's loss of business is therefore analogous to the case of a manufacturer selling goods in interstate commerce who fails in business because union members refuse to work for him. Had a group of petitioner's business competitors conspired and combined to suppress petitioner's business by refusing to sell goods and services to it, such a combination would have violated the Sherman Act . . . A labour union which aided and abetted such a group would have been equally guilty. *Allen Bradley Co. et al. v. Local Union No. 3, I.B.E.W.*, this day decided. The only combination here, however, was one of workers alone and what they refused to sell petitioner was their labour.

It is not a violation of the Sherman Act for labourers in combination to refuse to work. They can sell or not sell their labour as they please, and upon such terms and conditions as they choose, without infringing the Anti-trust laws . . . A worker is privileged under congressional enactments, acting either alone or in concert with his fellow workers, to associate or decline to associate with other workers, to

accept, refuse to accept, or to terminate a relationship of employment, and his labour is not to be treated as "a commodity or article of commerce" . . . It was the exercise of these rights that created the situation which caused the petitioner to lose its hauling contracts and its business.

As regards the argument that since the union members' refusal to accept employment was due to personal antagonism against the petitioner arising out of the killing of a union man, Mr. Justice Black pointed out that Congress showed no purpose to make *any* kind of refusal to accept employment a violation of the Anti-trust laws. From an earlier judgment (*U.S. v. Hutcheson*), Mr. Justice Black quoted:

So long as a union acts in its self-interest and does not combine with non-labour groups, the licit and the illicit under Sec. 20 are not to be distinguished by any judgment regarding the wisdom or unwisdom, the rightness or wrongness, the selfishness or unselfishness of the end of which the particular union activities are the means.

He stated further:

The controversy in the instant case, between a union and an employer, involves nothing more than a dispute over employment, and the withholding of labour services. It cannot therefore be said to violate the Sherman Act, as amended. That Act does not purport to afford remedies for all torts committed by or against persons engaged in interstate commerce . . . Whether the respondents' conduct amounts to an actionable wrong subjecting them to liability for damages under Pennsylvania law is not our concern.

Mr. Justice Roberts, dissenting, held that the judgment should be reversed; that there was no precedent in the Supreme Court's decisions applying to the case. He said.

There was a labour dispute as to unionization between motor carriers and the union representing employees. The record demonstrates that the dispute involved in this case was no part of that labour dispute but an off-shoot of it; not involving wages, unionization, closed shop, hours or other conditions of work . . .

The petitioners had been, and were at the time, in competition with other similar interstate carriers. The sole purpose of the respondents was to drive petitioners out of business in that field. This they accomplished. Thus they reduced competition between interstate carriers by eliminating one competitor from the field. The conspiracy, therefore, was clearly within the denunciation of the Sherman Act, as one intended, and effective, to lessen competition in commerce and not within any immunity conferred by the Clayton Act.

Mr. Justice Jackson, also dissenting, with whom the Chief Justice and Mr. Justice Frankfurter agreed, stated:

It is hard to see how this union is excused from the terms of the Act when in the *Allen Bradley* case we hold that labour unions even though furthering their members' interests as wage earners violate the Act when they combine with business to do the things prohibited by the Act. There, too, labour performed its part of the conspiracy by denying or threatening to

deny labour to employers. But in that case we hold that no absolute immunity is granted by the statute, and that because of its purpose and its association, the labour union violated the Act. Here too the purpose of the respondent union is such as to remove the union's activities from the protection of the Clayton and Norris-La Guardia Acts . . .

Those statutes which restricted the application of the Sherman Act against unions were intended only to shield the legitimate objectives of such organizations, not to give them a sword to use with unlimited immunity. The social interest in allowing workers to better their condition by their combined bargaining power was thought to outweigh the otherwise undesirable restriction on competition which all successful union activity necessarily entails. But there is no social interest served by union activities which are directed not to the advantage of union members but merely to capricious and retaliatory misuse of the power which unions have simply to impose their will on an employer . . .

Strikes aimed at compelling the employer to yield to union demands are not within the Sherman Act. Here the employer has yielded, and the union has achieved the end to which all legitimate union pressure is directed and limited. The union cannot consistently with the Sherman Act refuse to enjoy the fruits of its victory and deny peace terms to an employer who has unconditionally surrendered. *Hunt et al. v. Crumboch et al.*, No. 570, June 18, 1945.

Waiver of Right to Liquidated Damages Under Fair Labour Standards Act No Bar to Action to Recover Such Damages

On April 9, 1945, the Supreme Court of the United States held that, where there is no bona fide dispute between the employer and workmen as to liability, the fact that an employee has given his employer a written waiver of his right to the remuneration required under the Fair Labor Standards Act and to liquidated damages as provided in the Act, does not bar a subsequent action by the employee to recover the remuneration and damages. The employee, however, may not recover interest on his claim.

Three cases were dealt with in one opinion by the Court. In the first case, a watchman employed for two years by the Brooklyn Savings Bank, the petitioner was offered and accepted over two years after he left the Bank's service, the overtime compensation, \$423.16, required under the federal Fair Labor Standards Act in return for a release of all his rights under the Act. The sum did not include any payment for liquidated damages which the Act stipulates shall be paid, in addition to wages, and to an amount equal to the unpaid wages, by any employer who violates the wage provisions of the Act. The payment was made after the Act had been declared to apply to building operators like the petitioner. The watchman later brought an action to recover the damages.

The New York Municipal Court dismissed the action but the New York Appellate Division and the New York Court of Appeals held that the respondent was entitled to damages. Since the question had not come before the U.S. Supreme Court, the latter agreed to review the case.

In a second case, the operator of a box factory failed, during a period of four years, to pay the respondent for overtime work at the rate of time and a half as required by the Act. When the Administrator of the Act procured an order restraining him from violating the Act, the petitioner offered the employee \$500, a sum both parties knew was less than the remuneration due, in return for a release of all claims against the petitioner. Suit was later brought by the respondent to recover the balance of wages, \$276, and \$776, liquidated damages. All the lower Courts gave judgment for the respondent but for the same reason as in the Brooklyn Bank case, the Supreme Court granted certiorari.

The third case presented the issue of whether, in a suit to recover unpaid wages and liquidated damages, the employee is entitled to interest on the sums recovered.

A preliminary point in the Bank case was the question whether the respondent's release was given in settlement of a dispute between the parties as to coverage or the amount due under the Act or whether it constituted a mere waiver of his right. The evidence showed there was no dispute and the employee merely accepted the sum offered and waived his right to further payments. The Court, therefore, had to consider how the law applied in the absence of such a dispute.

Mr. Justice Reed, for the Court, pointed out that:

It has been held in this and other courts that a statutory right conferred on a private party, but affecting the public interest, may not be waived or released if such waiver or release contravenes the statutory policy . . . Where a private right is granted in the public interest to effectuate a legislative policy, waiver of a right so charged or coloured with the public interest will not be allowed where it would thwart the legislative policy which it was designed to effectuate. With respect to private rights created by a federal statute, such as Section 16 (b), the question of whether the statutory right may be waived depends upon the intention of Congress as manifested in the particular statute . . .

Neither the statutory language, the legislative reports nor the debates indicates that the question at issue was specifically considered and resolved by Congress. In the absence of evidence of specific Congressional intent, it becomes necessary to resort to a broader consideration of the legislative policy behind this provision as evidenced by its legislative history and the provisions in and structure of the Act . . .

The legislative history of the Fair Labor Standards Act shows an intent on the part of

Congress to protect certain groups of the population from sub-standard wages and excessive hours which endangered the national health and well-being and the free flow of goods in interstate commerce. The statute was a recognition of the fact that due to the unequal bargaining power as between employer and employee, certain segments of the population required federal compulsory legislation to prevent private contracts on their part which endangered national health and efficiency and as a result the free movement of goods in interstate commerce. To accomplish this purpose standards of minimum wages and maximum hours were provided. Neither petitioner nor respondent suggests that the right to the basic statutory minimum wage could be waived by any employee subject to the Act. No one can doubt but that to allow waiver of statutory wages by agreement would nullify the purposes of the Act. We are of the opinion that the same policy considerations which forbid waiver of basic minimum and overtime wages under the Act also prohibit waiver of the employee's right to liquidated damages.

Liquidated Damages

We have previously held that the liquidated damage provision is not penal in its nature but constitutes compensation for the retention of a workman's pay which might result in damages too obscure and difficult of proof for estimate other than by liquidated damages . . . It constitutes a Congressional recognition that failure to pay the statutory minimum on time may be so detrimental to maintenance of the minimum standard of living "necessary for health, efficiency and general well-being of workers" and to the free flow of commerce, that double payment must be made in the event of delay in order to insure restoration of the worker to that minimum standard of well-being. Employees receiving less than the statutory minimum are not likely to have sufficient resources to maintain their well-being and efficiency until such sums are paid at a future date. The same policy which forbids waiver of the statutory minimum as necessary to the free flow of commerce requires that reparations to restore damages done by such failure to pay on time must be made to accomplish Congressional purposes . . .

The private-public character of this right is further borne out by an examination of the enforcement provisions of the Act . . . the Administrator was given limited enforcement powers . . . Sole right to bring such suit was vested in the employee under Section 16 (b). Although this right to sue is compensatory, it is nevertheless an enforcement provision. And not the least effective aspect of this remedy is the possibility that an employer who gambles on evading the Act will be liable for payment not only of the basic minimum originally due but also damages equal to the sum left unpaid. To permit an employer to secure a release from the worker who needs his wages promptly will tend to nullify the deterrent effect which Congress plainly intended that Section 16 (b) should have. Knowledge on the part of the employer that he cannot escape liability for liquidated damages by taking advantage of the needs of his employees tends to insure compliance in the first place . . .

As the provisions of the Act are mandatory in form, they reflect the policy discussed above,

the Court found, in spite of the absence from the Act of any specific provision prohibiting waiver of rights under the Act. It was therefore held that the legislative history and provisions of the Act support a view prohibiting such waiver.

Chief Justice Stone dissented and Mr. Justice Roberts and Mr. Justice Frankfurter agreed with him that there was—

nothing in the Fair Labor Standards Act to prevent the effective operation of such a release upon the cause of action for liquidated damages more than any other . . .

These provisions and these alone afford some basis for inferring a Congressional policy against the release of minimum and overtime wages. But the Act places the right to recover liquidated damages authorized by Section 16 (b) on a very different footing. That Section expresses no command. It merely imposes a civil liability on the employer and gives an action to the employee to enforce the liability.

The studious avoidance of any provision making the non-payment of the liquidated damages a public wrong, by the omissions of sanctions which the statute does impose for the failure to pay minimum and overtime wages, is the most persuasive kind of evidence that it was the Congressional purpose to leave undisturbed the general policy of the law that a mere private claim for damages may be released at the will of the claimant . . .

The provisions of the Act show, and the legislative history emphasizes, that Congress intended to treat the liquidated damage obligation differently from its command to pay minimum and overtime wages. Because of this difference we cannot say that it intended to place the employee so far in tutelage as not to be free to give, and the employer to obtain, a release of what is by the terms of the statute nothing more than a cause of action for damages which in fact he may or may not have suffered.

The decision in the *Brooklyn Bank* case governed the second case before the Court.

As regards the question of the right to interest, as it was raised in the third case, Mr. Justice Reed stated:—

We are of the opinion that the question of the right to interest on sums recoverable under the provisions of Section 16 (b) of the Act constitutes a question of federal, not local, law . . . Section 16 (b) authorizes the recovery of liquidated damages as compensation for delay in payment of sums due under the Act. Since Congress has seen fit to fix the sums recoverable for delay, it is inconsistent with Congressional intent to grant recovery of interest on such sums in view of the fact that interest is customarily allowed as compensation for delay in payment. To allow an employee to recover the basic statutory wage and liquidated damages with interest would have the effect of giving an employee double compensation for damages arising from delay in the payment of the basic minimum wages . . . Allowance of interest on minimum wages and liquidated damages recoverable under Section 16 (b) tends to produce the undesirable result of allowing interest on interest. *Brooklyn Savings Bank v. O'Neil; Dize v. Maddux; Arsenal Building Corp. v. Greenberg* Nos. 445, 554, 421, April 9, 1945.

Training

Post-War Training Programs in Canada

THE Hon. Humphrey Mitchell, Minister of Labour, recently issued the following statement on post-war training programs:

A survey of post-war employment problems has indicated the necessity for improving and increasing Canada's vocational training facilities as a permanent measure. In this connection the Government has had the benefit of recommendations from the Vocational Training Advisory Council, a body made up of representatives of labour and employers, and representatives of the Provinces who are technical officers engaged in educational endeavours.

It is obvious that increased vocational training facilities must be available in the post-war transition period to meet the following main objectives:

- (a) Training or re-training of ex-members of the Armed Services;
- (b) Re-training of war workers; and
- (c) Training of young persons, including those of high school age.

Announcement was made some time ago of special Dominion-Provincial agreements, covering Rehabilitation Training of members of the Armed Services, to be carried out jointly by the Departments of Labour and Veterans Affairs, and the Provinces.

Also, announcement was made some time ago of a plan under which the Dominion and Provinces would co-operate in regard to apprenticeship—whether affecting ex-service people or young civilians—and this plan is in effect.

Two Orders in Council of March this year relate to the permanent provision through the Provinces of the additional facilities Canada will require in the post-war period; they will result in the provision of more training in industry; they look to a broadening of the types of courses to be available; and they will be slanted for the first few years in the direction of very definitely assisting in the transition from war to peace.

In all Dominion plans, full recognition is given to the fact that vocational training is within provincial jurisdiction. The method utilized by the Department of Labour is to

assist the Provinces in carrying through their obligations.

P.C. 1648, of March 8, 1945, provides for agreements with the Governments of the Provinces, under which a total sum of up to \$2,000,000 may be paid to the Provinces each year for 10 years, to assist in operating plans of vocational training at secondary or high school level; and also, an additional sum of up to \$10,000,000 during the next three years, to assist the Provinces in capital expenditures to provide and equip vocational school facilities, needed to carry on the training, and additional to facilities already possessed by the Provinces.

The second Order, P.C. 1388, also of March 8, 1945, authorizes agreements with the Provinces, to provide vocational training to persons referred by the Employment Service of the Unemployment Insurance Commission. This refers to any man or woman over 16 years of age, to take either full-time or part time courses, so that this will be available to war workers whose employment prospects may depend upon re-training. The Vocational Training Co-ordination Act, 1942, makes general provision for agreements with the Provinces covering training of the types dealt with in these Orders in Council. Nothing carried through under the new Orders will interfere with this Rehabilitation Training Plan now in operation. If facilities should be short, the ex-service people will have priority on available facilities. But the two new Orders, by increasing total Provincial vocational training facilities, will actually increase facilities for training veterans.

Training may be in schools or training centres, or directly in industry. Training is to be given for those occupations offering the best chance of jobs, and the best prospect of permanent employment.

Agreements with the Provinces under P.C. 1648 will be for as long as 10 years. Under P.C. 1388—the Order designed to assist in re-training adults over 16 years of age—agreements are not to exceed 3 years from April 1, 1945.

The Fourth Statutory Condition in the Unemployment Insurance Act governing receipt

of benefit, empowers the Commission to withhold benefit, if an applicant refuses to undergo a course of training to which he or she is directed by the Commission. Hence, one necessity to provide vocational courses for adult workers, though the training schemes as now drafted will be available for a number of wage earners who may not be drawing insurance benefit.

It is suggested that present plans will be of material assistance in easing the transition from a wartime to a peace time economy, in properly equipping both Canada's youth and adult industrial population to meet the many varied demands for trained, technical personnel, and at the same time, assist the Provinces in modernizing, so to speak, their vocational training facilities.

To provide further facilities for young persons, even after they have ended regular school attendance, provision is made now to renew the agreements with the Provinces, to again conduct the trade training as given to young persons under the Youth Training Scheme, immediately before the war.

Making use of previously existing provincial and local vocational training facilities,

over 250,000 civilians and 120,000 men for the Armed Services received vocational training during the war under the War Emergency Training Program, toward which the Dominion contributed about \$25,000,000 through the Department of Labour.

The post-war training program in its various phases will again build on existing facilities, which were of such great value for wartime training. In fact the post-war training will benefit materially from the corps of competent instructors now available to the provinces and local authorities.

Very shortly, as the number of discharges from the Armed Forces mounts, the numbers of ex-service people receiving training is bound to rise rapidly. The Department of Labour—in co-operation with the Provinces and the Department of Veterans Affairs, makes arrangements for pre-matriculation academic courses, as well as for trade or vocational training of ex-service people. Even at this early date a total of over 11,000 men and women discharged from the Forces have been enrolled for rehabilitation training in a variety of occupations under the plans handled through Labour Department.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the up-grading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Navy, Army and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Veterans Affairs;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

technical schools to the Program free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to May 31, 1945, the gross enrolment under Canadian Vocational Training has been as follows:—

Training for Industry.....	268,253
Army Tradesmen	48,741
Navy Tradesmen	9,051
R.C.A.F. Tradesmen	65,211
Rehabilitation (discharged persons from the Forces).....	11,228
Students	7,649
Total	410,133

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the

As the number being trained for industry and for the Armed Forces has decreased to such an extent, from now on tables showing this type of enrolment will not be printed in the LABOUR GAZETTE. The only detailed figures published will be those dealing with the training of ex-service personnel, and in future issues of the GAZETTE, it is contemp-

(1) Includes graduates from previous month's classes who were not reported placed until after May 1, 1945.

plated that several tables will be published on rehabilitation training, giving further information as to the general types of training being given to former members of the Forces.

On May 31, 75 men and 112 women were enrolled in pre-employment classes for industry in all provinces. On the same date, the enrolment in plant schools was 74 men and 163 women, of whom 212 were in the Province of Quebec. It is anticipated that this type of training will entirely disappear in the next few months, as no new plant schools are being opened. The main emphasis on training in industry is being placed on the streamlined classes for supervisors and foremen. Enrolment in part-time classes on May 31 was 226 men and 26 women, with the major enrol-

ment being in the Provinces of Ontario, Alberta and British Columbia.

The enrolment of Army tradesmen at the end of May was 1,211, being a decrease during the month of 137. Corresponding enrolment of Naval tradesmen was 105, being a decrease of 184.

In the month of June several special classes were opened in connection with the regular Schools of Social Work, to give a three month intensive course to Social Welfare Aides, whose services, on graduation, would be used for social case work required by the Department of National Defence or other War Departments of the Dominion Government. These classes are being held at Montreal, Toronto and Winnipeg.

Vocational Training at Ontario Training and Re-establishment Institute

THE Dominion and Provincial Governments have established a vocational training centre in the old Toronto Normal and Model schools founded by Egerton Ryerson a century ago.

These old buildings now constitute the backbone of the Ontario Training and Re-establishment Institute. Other buildings comprising this Dominion-Provincial vocational training project—which occupies the 5-acre city block bounded by Victoria, Gerrard, Church and Gould Streets—are the nine temporary buildings on the site used until recently by the Royal Canadian Air Force.

All these buildings have been reconstructed to their new uses at a present cost to the Dominion Government of \$225,000. A further \$50,000 will be required to complete the work.

The cost of the school's equipment is shared equally by the Dominion and Provincial governments, while the expenses of operation and instruction are met largely by Dominion grants.

The Ontario Training and Re-establishment Institute has three major divisions—Matriculation, Commercial, and Technical. In the Matriculation division there are at present some 650 students, all ex-service personnel. This number makes it necessary temporarily to run the classes in two shifts.

The Technical division operates a number of schools. These include the Machine Shop and schools for tool making, motor mechanics, and stationary engineering. There is also a school for welding and ironworking. A school for the building trades runs courses in carpentry, painting and decorating, plumbing, steamfitting, plastering, bricklaying, electric

construction and tinsmithing. There is a Horological school which teaches watchmaking and jewellery work. The school for Radio and Electronics is coupled with a complete small-scale broadcasting station.

Other schools are for the graphic arts (printing trades); barbering; hairdressing; hotel, restaurant and bakery trades; cabinet making; mechanical draughting, and architectural draughting. In addition, schools are now being planned for the needle trades, for refrigeration and air-conditioning; also for electrical maintenance and repairing when sufficient electrical equipment becomes available.

The training of returned service personnel is not limited to that given directly in the vocational school itself. Training is also given on the job, by special arrangement with employers. As much of such training necessarily comes within the purview of plant foremen, the school gives special preparatory courses in foremanship training. Other training is given by special arrangement with private trade schools and colleges, and with municipal technical schools.

Over 950 ex-service men are now taking the various courses in the Toronto school; and much of the work of converting the buildings to their present use has been done, and is still being done, by students as a part of their practical training.

In addition to rehabilitation students, there are some sixty C.W.A.C. personnel taking the course for army clerks, or "writers", to use the naval terminology. There is also a class of ex-war workers receiving training for secretarial jobs in the civil service.

*Electrical Workers Promote Instruction in Electronics**

A NOTEWORTHY example of the interest being taken in technical education by labour union leadership is afforded in the project initiated by the International Brotherhood of Electrical Workers, late in 1944. Officials of the Brotherhood at Washington had become keenly aware of the rapid war-time development of the science of electronics and its probable applications in many phases of peace-time industry. It had attained "a four billion dollar development", involving the manufacture of machines controlled by electrical "robots", through the use of photo-electric cells and vacuum tubes and the operation and maintenance of such equipment.

Electrical workers were determined to progress with this development of the industry and to do so, it was recognized that special training for persons employed in the industry was a first essential. To meet this need, the International Brotherhood established and endowed a national school of electronics at the Engineering College of Marquette University, Milwaukee, Wisconsin. The college agreed to provide eight intensive six-week courses to be given to classes of 80 to 85 worker-students per class. Each student was nominated and his expenses paid by a local union affiliated with the International Brotherhood. In this way it was proposed to give special training to some 700 men a year in the operation and maintenance of electronic equipment. In turn, these men were required to return to their local unions and to act as instructors in night classes, so that instruction might be given to as many as 25,000 members within a year.

Electrical Companies Co-operate

Full co-operation was given by the General Electric Company, the Westinghouse Company and Allis-Chalmers Co. Engineers from these companies acted both in a consultative capacity in arranging the courses and later in supplementing the teaching staff of the College. Laboratory equipment was provided by the Brotherhood at a cost of approximately \$30,000 and included modern electronic apparatus such as was being used in leading American wartime industrial plants. Provision was made for furnishing each member of the several classes with recorded copies of

all lectures, together with technical bulletins containing a complete description of the installation, maintenance and operation of electronic equipment, for use by the night classes set up by local unions. Arrangements were also made with certain large industrial plants in the vicinity of Milwaukee to enable the men to see certain industrial applications of photo-electric equipment.

The first course at Marquette was commenced on November 13, 1944, with a full complement of staff and students and set the pace for those to follow in 1945. The students spent seven hours a day hearing lectures and working in the college laboratories. So keen was the interest that, at the request of the men, the daily program was soon increased to eight hours, with portions of the afternoons spent in industrial plants. Motion pictures and phonographic records supplemented the lectures given by instructors. The eighth and final course of the series will commence on September 17, and end on October 26, 1945.

Other schools, following closely the Marquette technique, have been organized in a number of leading American cities. In some instances buildings are being erected and endowed by the unions to provide permanent accommodation for this class of instruction. By these means the International Brotherhood of Electrical Workers and its affiliated unions seek to prepare their members to take full advantage in the post-war era, of the great strides made in many branches of the science of electricity during the war.

Canadian Interest in Course

Chiefly because of regulations concerning international travel and exchange, Canadian locals found it impracticable to send representatives to the classes at Marquette. One Ontario local union is reported to have solved the problem by obtaining the services of a qualified electrical engineer and lecturer from the University of Toronto who conducted classes during the past winter, using material obtained from the Marquette course.

Activities of Unemployment Insurance Commission

Statistical Analysis of Operations During May—Unemployment Insurance Registrations—The Fund—Decisions of Umpire

CLAIMS for Unemployment Insurance benefit in local offices of the Unemployment Insurance Commission totalled 8,825 during May compared with 8,430 in April and 4,654 during May, 1944.*

Persons signing the live unemployment register during the last six working days of May numbered 16,645 (10,044 males and 6,601 females). During the comparable period in April 19,197 persons (12,886 males and 6,311 females) signed while 7,329 persons (5,490 males and 1,839 females) signed during the last six working days in May, 1944. It is expected that the number of claims filed and of persons signing the live unemployment register will fall off because of the normal seasonal upswing of the employment index in the spring and summer months. The decrease in recorded unemployment among those covered by the Unemployment Insurance Act has been relatively less this spring than during the same months last year (claims decreased from 6,463 in April to 4,654 in May, 1944, and persons signing the live unemployment register from 12,053 during the last week in April to 7,329 in the last six working days of May, 1944). At the same time it is significant that up to the end of May, layoffs from war plants did not sufficiently affect the general manpower picture to offset the normal seasonal tendency.

Of the 8,013 claims adjudicated at insurance offices during May, 6,148 were considered "entitled to benefit" and 1,865 "not entitled to benefit". The chief reasons for non-entitlement were: "insufficient contributions while in insurable employment" 731 cases; "voluntarily left employment without just cause" 700 cases and "discharged for misconduct" 190 cases.

During May 21,294 persons received benefit payments totalling \$672,869 for 349,996 compensated unemployed days compared with 22,995 persons who were paid \$591,265 for 304,102 days in April and 14,095 persons paid \$473,709 for 240,232 days in May, 1944.

* Material in this section is supplied by Unemployment Insurance Commission and Dominion Bureau of Statistics.

The average duration of the unemployment compensated was, then, 16.4 days in May, 13.2 days in April and 17.0 days in May, 1944. The average amount of benefit paid per beneficiary was \$31.60 in May, \$25.71 in April and \$33.61 in May, 1944. The average amount of benefit paid per compensated day of unemployment was \$1.92 in May, \$1.94 in April and \$1.97 in May, 1944.

Unemployment Insurance Fund

Total employer-employee contributions during May amounted to \$5,283,813.80 as compared with \$5,126,883.62 in the same month last year.

Benefit payments in May this year amounted to \$671,326.41. This represents an increase of 42.3 per cent over the figure for May last year when benefit payments amounted to \$471,757.74.

Total revenue for May amounted to \$9,014,384.06. Benefit payments during the month took only 7.4 per cent of this figure so that 92.6 per cent of the month's revenue remained in the Fund, increasing the balance in the Fund by \$8,343,057.65.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at May 31, 1945, 2,237,277 employees were issued with Insurance books and had made contributions to the Fund at one time or another, since April 1, 1945, and 141,296 employers were registered as having insurable employees.

Registration as at May 31, 1945, by regions follows:

Digest of Selected Decisions of Canadian Umpire Under Unemployment Insurance Act

THE Unemployment Insurance Commission submits the following digest of selected decisions of appeals heard by the Canadian Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. Other decisions were published in the April issue of the LABOUR GAZETTE page 534; May issue, page 733; and June issue, page 883. The selected decisions are classified under two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU—B.32 (April 24, 1945)

The claimant asked that his claim for benefit be antedated, giving as his only reason for the delay in filing his application, his ignorance of the provisions of the Act; HELD: Ignorance of the Act does not constitute good cause for delay in making application for benefit.

The material facts of the case are as follows:

The claimant, a married man aged 52, was employed as a civilian watchman by the Air Force. His employment terminated on October 31, 1944, but he did not apply for benefit until November 10 and at that time requested that his claim be antedated to the date of separation from employment.

The Insurance Officer refused the request for antedating on the grounds that the claimant did not show good cause for the delay in making application for benefit.

The claimant appealed from this decision to the Court of Referees and in a majority decision the Court upheld the decision of the Insurance Officer.

From this decision the claimant appealed to the Umpire. The appeal was considered without an oral hearing.

DECISION

The Umpire's decision was that the request for antedating should not be granted and gave as his reasons:

The sole reason given for failure to claim benefit at the time of separation from employment is ignorance of the law.

The Unemployment Insurance Act has been in operation for approximately three and one-half years and it is reasonable to assume that by this time its more important provisions are known to those who are intended to benefit by the provisions of the Act. There was a time when the lack of knowledge of the requirements in connection with the making of an application for benefit was quite under-

standable but that can no longer be accepted as a valid reason for failure to apply for benefit after the employment has been terminated.

CU—B.33 (April 24, 1945)

The claimant became unemployed on July 15 and on her doctor's orders took a rest until September 15 when she filed a claim for benefit. On October 26 she refused to apply for a position at a salary considerably lower than that which she had previously received, claiming that the employment was not suitable on that account. The Insurance Officer disqualified her for receipt of benefit on the ground that a reasonable period of time had elapsed since she became unemployed on July 15 and, for that reason, the employment offered could be considered suitable employment within the meaning of the proviso to Section 31 of the Act; HELD: For the purposes of the Act the claimant's period of unemployment did not commence on July 15 but rather on September 15, and as she had been unemployed only for a little more than a month, the employment offered could not be considered as suitable within the meaning of the proviso to Section 31 of the Act.

The material facts of the case are as follows:

The claimant, a married woman aged 44 years, was employed as a comptometer operator by an industrial corporation from December 22, 1942 until July 15, 1944 and during that period received a salary of \$100.64 per month. The claimant's doctor advised her to take two months' rest from her work. She followed his advice and on September 15 applied at the Local Office for employment. At the time of making her application for employment there was no suitable employment available. On September 21, she submitted her application for insurance benefit.

On October 26, the claimant was offered employment in the same line of work but at a salary of \$19.00 per week. She refused this employment on the ground that it was unsuitable by reason of low wages and by reason of the fact that the employment was temporary in nature. The Insurance Officer then disqualified her for receipt of further benefit as from October 26, on the ground that she had refused an offer of suitable employment. During the period of her unemployment she had been referred to a position as comptometer operator, paying a salary of \$25.00 per week but, although she applied immediately, she learned that the position had already been

filled. Subsequently, some eighteen days after she had been disqualified, she was offered and accepted employment as a comptometer operator at a salary of \$21.00 a week.

The claimant appealed from this decision to the Court of Referees which, by a majority decision, upheld the Insurance Officer. The decision of the Court of Referees was based on sub-paragraph (iii) of Section 31 (b) of the Act, the Court apparently being of the view that a reasonable time had elapsed during which it was not possible for her to get employment at her former salary and, further, that the salary offered was not lower than that recognized by good employers.

The claimant appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be allowed and gave as his reasons that:

The decision of the Court of Referees appears to be based on the premise that the period of unemployment commenced on July 15 and that, when she applied for benefit late in September, she had already been unemployed for more than two months. This is hardly a proper assessment of the facts. During the period from July 15 to September 15, the claimant was taking a rest on her doctor's instructions and quite properly had not applied for employment and certainly in that sense could not be regarded as being unemployed. As a matter of fact, the claimant was simply not available for employment during that period. Accordingly, when, on October 26, the Insurance Officer disqualified her for receipt of further benefit, she had for the purposes of the Act been unemployed for only a little more than a month. In these circumstances it cannot be said that a reasonable time had elapsed and it is considered that she was within her rights in refusing employment at a lower rate of remuneration than she had been accustomed to receive. It is significant, too, that during the period of unemployment she had been offered employment as a comptometer operator at a higher rate of remuneration than what would be paid in the temporary position which she refused and which was the basis of disqualification by the Insurance Officer. Furthermore, it was only eighteen days after the disqualification that she was again offered employment as a comptometer operator at a higher rate of remuneration than that which she had refused. All of these circumstances point to the fact that she was quite justified in refusing temporary employment at a rate which was apparently low, not only in comparison with what she had formerly been paid,

but in comparison with what was being paid by other employers in the same area for the same type of work.

CU—B.34 (April 26, 1945)

The claimant was notified of an offer of employment by means of a telephone call by an Officer of the Local Office of the Commission. The Court of Referees was of the opinion that a telephone call was not a proper means of notifying a claimant of vacant employment; HELD: the telephone is a proper means of communication as between a Local Office of the Commission and a claimant, in order to notify a claimant of an offer of employment.

The material facts of the case are as follows:

The claimant, a single girl aged 19 years, was employed as a salesgirl in a departmental store and by reason of poor health found it necessary to leave her employment on July 1, 1944 to take a rest. On September 8, she filed a claim for benefit and her claim was allowed. On September 21, the Local Office of the Commission telephoned her, advising her of a possible vacancy which would be suitable for her and requesting that she call at the office immediately.

The claimant says that she thought that she recognized the voice on the telephone as that of one of her friends whom she suspected of playing a hoax. Accordingly, she did not call at the Local Office until the following morning. However by that time the vacancy had been filled. Because of the delay in reporting at the Local Office, the Insurance Officer disqualified her.

The claimant appealed from this decision to the Court of Referees and the Court unanimously allowed her claim.

From this decision the Insurance Officer appealed to the Umpire on the ground that the claimant was negligent in not complying with the telephone request to report at the Local Office and against the finding of the Court of Referees that a telephone call is not a proper means of communication with an insured person.

DECISION

The Umpire's decision was that the claim should be allowed and gave as his reasons:

Dealing with the second point, as it is the point involving a real question of principle, the conclusion arrived at is that the telephone is a proper means of communication as between a Local Office of the Unemployment Insurance Commission and a benefit claimant. The Unemployment Insurance Commission has the responsibility imposed upon it by a statute, of operating a national employment service

and it goes without saying, that the service must be the most efficient service that it is possible to attain. It is obvious that the Commission in its Local Offices must use all of the normal modern means of quick communication. The telephone is quite a normal method for the transaction of daily business. There is no doubt that the Local Offices of the Commission must use the means of communication which will give the greatest assistance in effecting prompt placement of unemployed persons.

The claimant says, however, that she did not believe that the call was from the Local Office and she should be given the benefit of the doubt in that regard.

The decision of the Court of Referees insofar as it relates to the proper means of communication between a Local Office and a benefit claimant is reversed but on the question of the negligence of the claimant in not reporting forthwith to the Local Office, the appeal of the Insurance Officer is disallowed for the reasons already stated.

Immigration to Canada During 1944-45

THERE was a substantial increase in the number of immigrants entering Canada for the fiscal year ending March 31, 1945, compared with that of the preceding fiscal year, according to figures released by the Immigration Branch of the Department of Mines and Resources.

During the period April, 1944, to March, 1945, a total of 15,306 immigrants came to Canada, representing a 69 per cent increase over the number of persons (9,040), entering the country during the corresponding period of 1943-44.

Immigration to Canada reached its lowest ebb during the calendar year 1942 when only 7,576 persons settled in the country (L.G., Feb. 1943, p. 214). This was the smallest figure since Confederation. The peak figure was reached in 1913 during which year there were over 400,000 immigrants to Canada.

In the period under review, the greatest number of immigrants, 9,943, were from the British Isles, an increase of 132.4 per cent over the 4,278 persons entering Canada from this source during the comparable period in 1943-44. From the United States there were 4,624, an increase of 4.1 per cent over the 1943-44 figure of 4,441.

An increase occurred in the number of persons classified as belonging to Northern European races, of from 203 in the period 1943-44 to 444 in the year 1944-5. Of this

total 13 were Belgian, 12 Danish, 28 Dutch, 2 Finnish, 305 French, 55 German, 1 Icelandic, 13 Norwegian, 6 Swedish, and 9 Swiss.

There were 295 immigrants in the group classified as "Other Races". Of these 18 were Czech, 93 Hebrew, 26 Italian, 19 Magyar, 23 Negro, 43 Polish, 14 Ruthenian, and 12 Spanish. The remaining 47 were of 20 different races.

Of the total number of immigrants, 2,628 were adult males, 7,725 adult females, and 4,953 children under eighteen years of age.

Classified according to occupation, the number was divided as follows:

	Males	Females	Children
Farming	266	128	122
Labouring	647	157	122
Mechanics	625	149	151
Trading	401	438	170
Mining	84	4	1
Female Domestic			
Servants	—	367	74
Other Classes....	605	6,482	4,313

Of the 15,306 persons entering this country the destination of the largest number, 6,310, was Ontario, while the remainder were divided as follows: Nova Scotia, 2,256; New Brunswick, 713; Prince Edward Island, 78; Quebec, 2,389; Manitoba, 672; Saskatchewan, 630; Alberta, 792; British Columbia, 1,459; Yukon Territory, 5; Northwest Territories, 2.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of May, 1945, as reported by employers:—For the fifth successive month there was a general downward trend in industrial activity according to the Dominion Bureau of Statistics.

The index number of employment at May 1, 1945, was 175.5, as compared with 176.9 a month earlier and 178.2 at May 1, 1944 and also at May 1, 1943.

The Bureau's report was tabulated from data received from 15,232 establishments, in which the employees numbered 1,789,970. This was less by 14,234, or 0.8 per cent than the personnel reported at the beginning of April. In the Dominion as a whole, there was a substantial recession in manufacturing, from which 12,233 men and women were laid off by the co-operating establishments. Among the non-manufacturing industries there was a marked reduction in logging, the number released by the camps reporting being 18,718 persons. Although the reduction was on a smaller scale than at May 1, 1944, it exceeded the average of the years since 1920. Employment increased in services, communications, transportation, construction and maintenance.

The average earnings per employee advanced from \$32.00 at April 1, to \$32.55 at the beginning of May, as compared with \$32.26 at May 1, 1944 and \$30.59 at May 1, 1943.

Unemployment as reported by the Unemployment Insurance Commission:—Claims for unemployment insurance benefit increased during May, the number being 8,825 as compared with 8,430 in April and 4,654 in May, 1944.

Report on employment conditions, June, 1945:—Labour demand in Canadian industries excluding agriculture dropped sharply during the month as more workers were made available due to lay-offs resulting from cut-backs in war production and to the return to industry of Armed Service personnel. Employment and Selective Service Officers reported that manpower requirements at June 21

totalled 135,973; this was 10,814 less than the number of workers required four weeks earlier. However, the supply of available workers, as indicated by the number of applicants registered at employment offices but not yet referred to specific jobs, rose steadily during this period, and at June 22 totalled 45,181, an increase of 5,265 during the month.

Applications for Employment, Vacancies and Placements, May, 1945.—Reports received from the Employment and Selective Service Offices of the Unemployment Insurance Commission during the four-week period May 4 to May 31, 1945, showed a moderate decrease in the average daily placements as compared with those of the four-week period ending May 3, and a more noteworthy loss in comparison with the five weeks April 28 to June 1, 1944. The most outstanding changes under the first comparison were declines in manufacturing, services and trade. Under the second comparison, apart from slight increases in finance and insurance and fishing, hunting and trapping, all industrial groups recorded losses; the most noteworthy being in manufacturing, forestry and logging, and services. Vacancies during the four weeks numbered 182,908. There were 167,010 applications for employment and 118,483 placements were effected in regular and casual employment.

Unemployment in trade unions.—The percentage of unemployment among trade union members increased fractionally during the quarter ending March 31, though remaining less than one per cent. At the beginning of January the figure was 0.6 per cent while at March 31, 1945, it was 0.7 per cent.

The March, 1945, figure was based on returns from 2,337 local labour organizations, having a total membership of 421,779 persons.

Total employment in Canada.—A preliminary estimate of Canada's total manpower distribution made by the Research and Statistics Branch of the Department of Labour indicates that at April 1, 1945, 4,296,000 persons 14 years of age and over were gainfully occupied, of whom 3,246,000 were in non-agricultural industry, including 901,000 in war industry. In addition there were 762,000 persons in the Armed Forces.

The Employment Situation at the Beginning of May, 1945, as Reported by Employers

THE monthly survey of the employment situation as at May 1, 1945 (depicting the situation existing just before V-E Day), shows that for the fifth successive month, there was a generally downward trend in industrial activity. The Dominion Bureau of Statistics tabulated data from 15,232 establishments in which the employees numbered 1,789,970; this was less by 14,234, or 0.8 per cent, than the personnel reported at the beginning of April. Although the loss is contra-seasonal according to the experience of pre-war years, it repeats the movement indicated at May 1 in 1944 and 1943, in each of which, indeed, the general contraction was on a larger scale. The shrinkage in employment at the date under review was accompanied by a moderate increase in the payrolls disbursed as compared with April 1, when the observance of the Easter holidays had resulted in lowered earnings.

Based on the 1926 average as 100, the index number of employment at May 1, 1945, was 175.5, as compared with 176.9 in the preceding month, and 178.2 at May 1 in 1944 and also in 1943. With the exception of those two years, employment at the date under review was at a higher level than in any other May

in the record. Since the latest decline was contrary to the usual trend at the time of year, there was a falling-off in the seasonally-corrected index, which fell from 187.4 at the first of April to 182.2 at the beginning of May.

A brief review of the situation at May 1 as compared with April 1 shows curtailment in all provinces except Nova Scotia and New Brunswick. The declines in Ontario were most noteworthy, over 12,000 persons having been released by the firms furnishing information in this province. The reductions in Quebec and the Western Provinces were generally moderate.

In the Dominion as a whole, there was a substantial recession in manufacturing, from which 12,233 men and women were laid off by the co-operating establishments. The tendency in the production of durable and of non-durable manufactured goods was unfavourable, some 7,400 persons being released from the former and over 5,100 from the latter; central electric stations, however, showed heightened activity. Employment in iron and steel plants was particularly affected by the curtailment in operations, over 6,700 employees having been released therefrom. In this group, which for

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting in comparison with the average number of employees they reported during the calendar year 1926 as 100.

over five years has been almost exclusively engaged on war production, the index, at 291.6, was 12.7 per cent lower than a year ago, being also the lowest indicated since the early summer of 1942. However, employment in these industries at the date under review was still some three times as great as at September 1, 1939.

Within the non-durable goods industries, the largest reduction at the first of May as compared with April 1 took place in the chemical industries, from which nearly 2,300 persons were released. Textiles also showed a considerable decline of a seasonal character.

Among the non-manufacturing industries, there was a marked reduction in logging, the co-operating camps releasing 18,718 persons in a seasonal movement which considerably exceeded the average in the experience of the years since 1920, although it was on a smaller

scale than at May 1, 1944. Mining was slacker, the largest loss taking place in the production of metallic ores; a falling-off was also indicated in retail trade. On the other hand, employment increased in services, communications, transportation and construction and maintenance. The expansion in the last-named was substantial, nearly 15,200 persons being added to the staffs of the contractors making returns. Most of the gain was in work on the roads.

Payrolls

The reduction of 0.8 per cent in the number in recorded employment at May 1 as compared with April 1 was accompanied by an increase of 0.9 per cent in the disbursements in salaries and wages. These rose from \$57,739,543 in the last return, to \$58,262,067 at the beginning of May. The higher payrolls

accompanying lowered employment were largely due to the resumption of operations on a more usual scale following the loss of time during Easter week, which had fallen within the preceding period of observation. The average earnings per employee advanced from \$32 at April 1 to \$32.55 at the beginning of May, as compared with \$32.26 at May 1, 1944, and \$30.59 at May 1, 1943. The latest figure is

below that indicated at March 1, 1945, but is otherwise the highest in the record of some four years. In the last 12 months, the index of payrolls has fallen by 0.5 per cent while the decline in the index number of employment in the eight leading industries has amounted to 1.5 per cent.

Including the statistics for financial institutions, the latest survey shows a total of

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber musical instruments and clay, glass and stone products.

1,856,621 persons in recorded employment, whose earnings at May 1 amounted to \$60,504,248; the same establishments had reported a personnel of 1,870,879 at the beginning of April, when their disbursements in weekly salaries and wages had totalled \$59,978,184. The per capita figure in the nine major industrial groups, including finance, stood at \$32.59 at the beginning of May, as compared with \$32.06 a month earlier, and \$32.27 a year ago. In the latter comparison, there has been a reduction of 1.4 per cent in recorded employment in the nine leading industries, accompanied by that of 0.3 per cent in the weekly payrolls.

Table II summarizes the latest statistics of employment and payrolls for the major industrial divisions, the provinces and economic areas and the leading industrial cities, with comparisons as at April 1, 1945, and May 1, 1944. Table I contains a monthly record for the eight leading industries as a whole and for manufacturing, showing the movements of employment and payrolls since 1941.

The disbursements of the co-operating firms at June 1, 1941, are used as the base in calculating the index numbers of payrolls. To provide a comparison of the trends of employment and payrolls, the index numbers of employment have been converted from their original base 1926=100, to June 1, 1941, as 100. Table

I shows that in the period for which information on payrolls is available, the number of persons on the staffs of establishments in the eight leading industrial groups has increased by 14.9 per cent, and the aggregate weekly earnings by 45.4 per cent. Including finance, the increase in employment from June 1, 1941, to May 1, 1945, amounted to 14.8 per cent, while the gain in the salaries and wages was 44.8 per cent. As explained in previous reports, the following factors have been cited as mainly responsible for the much greater rise in the indicated salaries and wages than in employment: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work; (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage rates as from February 15, 1944; (3) the progressive up-grading of employees as they gain experience in their work; and (4) the payment of higher wage-rates in a great many cases.

The above-named factors as a result of wartime conditions have reacted particularly favourably upon the situation in the manufacturing industries, in which the rise in em-

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience.

The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variation in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course a factor of paramount importance.

Semi-Annual Inquiry Into Sex Distribution in Industry

AT the beginning of April, 1945, the Dominion Bureau of Statistics made its fourth semi-annual inquiry into the sex distribution of persons in recorded industry. The earlier surveys, commencing in October, 1942, had shown successive increases in the proportions of women per thousand workers of both sexes, although their number, like that of men, reached its maximum at October 1, 1943. However, the latest survey indicates a general decline in the number and the ratio of women workers.

Nevertheless, the employment of women continued to be a factor of greater importance than it was in the autumn of 1942, or probably than in any earlier period. The point of interest in the latest survey is enhanced by the fact that it depicts conditions which existed a relatively short time before the cessation of hostilities in Europe.

Reports were received covering 16,091 establishments as at April 1, 1945. These showed staffs totalling 1,370,833 men and 488,857 women, the latter constituting 267 per thousand of the total personnel of 1,869,690. The proportions of female workers at October 1, 1944 was 271; at April 1, 1944, 270; at October 1, 1943, 262; and at October 1, 1942, 235.

After making allowances for the changes that have taken place in the establishments of the employers furnishing data, it was estimated that the total number of men in recorded employment had decreased by 40,000, or nearly three per cent, in the six months ending April 1, 1945. During the same period, the number of women employees had fallen by some 25,500, or almost five per cent. The declines from October 1, 1944 were partly seasonal in character, a factor which also entered into the comparison with the figures for October 1, 1943, when employment was at an unusually high level. On the other hand, there was an increase of over 49,000, or roughly 11 per cent, in the number of females reported at April 1, 1945, as compared with October 1, 1942.

Women Workers in Industry

The proportion of women in recorded employment in manufacturing increased up to

October 1, 1944, but according to the survey of April 1, 1945, both the number and proportion of female labour were lower than for any previous survey since October 1, 1942.

Among the non-manufacturing classes as a whole, on the other hand, the numbers and ratios of women in recorded employment continued to increase, reaching their highest point at April 1, 1945. It is probable, the report states, that many of those added to the pay-rolls more recently were part-time workers.

Manufacturing.—The manufacturers furnishing data for the survey of April 1, 1945, reported the employment of 812,827 men and 304,106 women; the latter constituted 272 per thousand, a ratio which was exceeded at October 1, 1944 with 283 per thousand; at April 1, 1944, with 280 per thousand and at October 1, 1943, with 279 per thousand. However, it was a considerable increase as compared with 257 per thousand at October 1, 1942. Between October 1, 1944 and April 1, 1945, there was a decline of slightly more than three per cent in the number of men and of between eight and nine per cent in the number of women in recorded employment in manufacturing. The greatest declines in the number of women in recorded employment in manufacturing between October 1, 1944, and April 1, 1945, occurred in iron and steel, electrical apparatus and chemical plants and in food-processing—the last named being seasonal. The textile industries provided work for the largest number of female employees—84,042, or nearly 28 per cent. Their ratio per one thousand employees was 600, compared with 601 at October 1, 1944 and 598 at April 1, 1944.

Non-Manufacturing.—The number of women reported in non-manufacturing industries at April 1, 1945 was higher by 2.6 per cent than it was six months earlier. The ratio per thousand workers also increased from 251 to 259. At April 1, 1944, it had been 234.

Returns furnished by 2,737 trading establishments showed a total of 92,012 women in a staff of 188,540 at the beginning of April, 1945, an increase of between three and four per cent in the six months. However, there was a

falling off in the proportion of women from 493 at October 1, 1944, to 488 per thousand.

Financial institutions employed 36,023 women, who constituted 540 per thousand as compared with 539 at October 1, 1944 and 519 at April 1, 1944.

Service establishments reported the employment of 29,435 women and their ratio increased from 582 six months earlier to 593 at April 1, 1945. The number of women reported as employed in the communications division was 17,056, a slight gain during the six months

period. Although there was a moderate rise in the number of women employees in logging there was a falling off in the ratio which they constituted of the total employees. In mining and transportation, the number and the proportions were both lower than at October 1, 1944.

The following table shows the sex distribution of persons in recorded employment in the provinces, the eight leading industrial cities and the main industrial groups as at April 1, 1945, October 1 and April 1, 1944 and October 1, 1943 and 1942.

SEX DISTRIBUTION OF THE WORKERS IN RECORDED EMPLOYMENT IN PROVINCES, LEADING INDUSTRIAL CITIES AND MAIN INDUSTRIAL GROUPS, AS AT APRIL 1, 1945, OCTOBER 1 AND APRIL 1, 1944, AND OCTOBER 1, 1943 AND 1942.

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products. The non-durable group includes the remaining manufacturing industries with the exception of electric light and power.

Report on Employment Conditions, June, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian Labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

THE sharp downward trend in the manpower requirements of Canadian industry which became apparent immediately following V-E Day, May 8, has continued throughout the month of June. Net labour Demand¹ at June 21, totalling 135,973 (94,940 male and 41,033 female) was 10,814 less than the 146,787 workers required at May 24, four weeks earlier. In comparison with the high labour demand coincident with the invasion of Europe in June, 1944, requirements were 34,606 less than the 170,579 workers needed at June 22, the corresponding reporting date last year. Significantly, 74 per cent of the decline in the labour needs during the four-week period prior to June 21, 1945, was due to a drop of 7,987 in male labour requirements. The release of Armed Service personnel and lay-offs in war plants resulting from cancellations and cut-backs in war contracts are largely responsible for this drop in labour demand, as many of these workers have been absorbed by other hard-pressed industries. Forty-eight per cent

of the decline in the demand for both male and female workers was in the Quebec Region with requirements dropping from 50,101 to 44,934 during the four-week period. Contrary to the general trend in manpower requirements during the month, increased seasonal activities in the construction industry caused a substantial increase in demand for both skilled and unskilled workers. Table I shows Net Labour Demand by main industry group and by sex, as at June 21, with absolute and percentage change in total demand during the past four weeks.

The number of Unreferred Applicants² has shown a steady rise since the low point at May 25, totalling 45,181 at June 22. This increase of 5,265 in the overall labour supply was due mainly to a sharp increase in the number of male applicants. However, in every region the supply fell far short of the demand, and this apparent increase in the supply of labour is probably due in large part to unsettled conditions resulting from cut-backs in war plants. Placement of applicants is complicated by the fact that many of them are located far from the centres where demand is concentrated; physical disability and lack of sufficient skill are also deterrent factors. It is expected that the number of unreferred applicants will continue to increase for some time as returning service personnel seek positions which will provide a degree of permanency together with the remuneration they desire.

Net Labour Demand in A & B Priority Industries

The decrease in labour demand during the past month was accelerated by the sharp decline in the requirements of high priority industries. Sixty-one per cent of the total labour shortage at June 21 was a need for 82,845 workers for war and essential civilian industries. The manufacturing group accounted for almost half the demand.

Logging

With river-driving practically completed, demand in the logging industry, totalling 6,691

at June 21, was about 1,800 less than at May 24. However, with the summer program just getting under way, there is a steady demand for experienced bushmen, especially riggers. High school and university students are giving some assistance, and some farmers have helped out in woods operations, on limited permits, in the off-season between seeding and haying.

Mining and Primary Smelting

From all regions come reports of the shortage of experienced miners, in some places so acute that the loss of even a few men would curtail the operating time of the mines. Most companies require only that applicants be physically fit and willing to work, as they are prepared to train them. The increased activity in prospecting and drilling operations indicates that labour demand in this industry will remain high for some time. At June 21, labour requirements in the mining and primary

¹ *Net Labour Demand* is calculated by deducting unconfirmed referrals from unfilled vacancies. *Unfilled Vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated. *Unconfirmed Referrals* are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

² Applicants who have not been referred to specific jobs as at the date indicated.

smelting industries totalled 6,312, as compared with 6,729 a month earlier. A marked decrease in demand for workers in the iron and steel and other base metal mining and smelting industries was partially offset by an increase in the demand for nickel miners, and a slight rise in the requirements of the hard-pressed coal industry. As may be seen in Table I, the need for nickel miners at June 21, totalled 1,856, representing an increase of 412 in four weeks; the influx of student labour for the summer months is scarcely enough to compensate for the loss of those workers on leave of absence to assist in farm operations. In the coal mines in the Maritimes, the chief need is for experienced workers at the mine-face, and so far not much relief has been afforded by the release of miners from the armed services. The lack of heavy labourers also constitutes a great handicap, often just as serious as the shortage of skilled workers.

Manufacturing

Cutbacks in war production since the end of the European war are reflected in a marked decline in the manpower requirements of the high priority manufacturing industries. During the four-week period from May 24 to June 21, labour demand in these industries dropped from 39,472 to 35,308; the decline in male labour requirements accounted for three-quarters of this decrease. All manufacturing groups with the exception of the rubber and leather industry reported decreased manpower needs during the month; four industries engaged exclusively in the manufacture of war supplies (Aircraft and Parts, Shipbuilding and Repairs, Guns and Ammunition, and Mechanical Transport and Armoured Fighting Vehicles) accounted for 48 per cent of the decline. Nevertheless, in keeping with the important role Canada is playing in the Pacific war, the labour needs of these four major war industries remain substantially high. Many workers who have been released from war plants due to cancellations and cut-backs in contracts, have been transferred to other essential industries, thus relieving the overall manpower shortage.

Textiles and Products—The labour situation in the textile industries has not improved to any extent as a result of cancellations and cut-backs in military orders as the needs of the domestic market and Canada's commitments to the United Nations and to UNRRA are keeping production requirements at a high level. The manpower requirements of this industry appeared slightly easier at June 21 when 6,901 workers were needed as compared

with 7,246 workers four weeks earlier. Local Employment and Selective Service offices in recruiting labour, especially workers released from war plants, have been emphasizing the permanency of employment in this industry as well as the opportunity afforded to acquire a new trade. This, in addition to the higher priority rating accorded many establishments, and the relaxation of controls on women, is bringing some relief to this hard-pressed industry.

Secondary Metals—In the Secondary Metal Industries including Machinery and Equipment the need for workers, especially for heavy labourers for foundries, remained high. The extensive construction program being carried on this season has increased the demand for heating and plumbing equipment and firms engaged in the manufacture of these supplies have increased their manpower requirements, causing total demand in this industry to rise from 532 at May 24 to 649 at June 21. The labour situation in the communication equipment industry, including radios and radio parts, showed some improvement during the month with 253 workers required at June 21 as compared with 526 at May 24.

Food Processing—The food processing industries, especially the meat packing houses, have been afforded some relief through the temporary employment of agricultural workers between seeding and haying operations and by students working in this industry during the summer months. As the canning and preserving season is just beginning, labour requirements in this industry can be expected to increase sharply within the next few weeks.

Construction

With the building season well under way, there is a persistent demand for all types of workers in the construction industry. While requirements for high priority construction projects totalled only 4,921 at June 21 as compared with 5,418 at May 24, there was a rise of 951 in low priority construction during the same period. High priority government contracts are limited mainly to veterans' hospitals and Wartime Housing, as the labour now required for defence projects is chiefly for maintenance work. All available resources of manpower and materials are being devoted to an intensive housing program which aims at the construction of at least 50,000 housing units in the next year, including Wartime Housing, low-rental apartments and private homes. Although the industry has been assured that building materials will be made available in sufficient quantity, the achievement of this

housing program still hinges on the availability of the various types of both skilled and unskilled construction workers in adequate numbers. At the present time the labour situation is tight, most competent tradesmen having already been absorbed; in many areas there is a marked shortage of such specialized workers as carpenters, bricklayers, plasterers and painters. However, gradual improvement may be expected with the release of workers from war plants, and the return of Armed Forces personnel to civil life.

Transportation

Labour demand in the transportation industry dropped from 10,424 at May 24 to 9,154 at June 21. However, there is still an urgent demand for extra gang and track maintenance men, with few suitable applicants available. The task of transporting homecoming troops has placed especially heavy demands on this industry, and no material improvement in the situation can be expected for some months.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended June 22, 1945.

Maritime Region

Agriculture—As a result of the backward season, the call for farm workers has been slight. However, inquiries are now being made as to prospects for helpers for the haying and strawberry picking; a heavy demand is anticipated for the harvesting of these crops.

Logging—Although long lumber operations are practically completed, there is considerable activity in the pulpwood camps. Approximately 200 men are needed to peel hemlock logs in the Liverpool area. The Edmundston office reports daily referrals to meet the insistent demand of the neighbouring camps, and in the vicinity of Campbellton, while employers are fairly well satisfied with the supply of bushmen available, more could be absorbed.

Mining—Most collieries are operating full time; in spite of the continued shortage of skilled miners at the working face, which has resulted in lessened production. Three coal mines in the Amherst area which were shut down for seven days owing to a dispute between management and railway over a supply of cars have now resumed operations.

Manufacturing—As a result of cutbacks in steel manufacturing contracts, several hundreds

Trade, Finance and Service

An urgent demand for service workers continues. Hospitals, pitifully understaffed, are experiencing great difficulty in obtaining the help they require, particularly kitchen workers and ward assistants. Hotels and restaurants are seriously handicapped by the shortage of skilled cooks and kitchen help, while dry-cleaning plants and laundries are finding it difficult to get workers and harder to keep them.

The labour situation in the trade, finance and service group has not been relieved to any extent by the release of armed service personnel and lay-offs from war industries, as workers are still unwilling to accept lower wages than those to which they have been accustomed. Although high school and university students are affording temporary relief during the summer, there is still an acute shortage of workers in this group, 18,591 being required at June 21.

of men are unemployed in the vicinity of Amherst and New Glasgow. When the lay-off now in progress at the Canadian Car and Foundry's aircraft plant at Amherst comes to an end practically all personnel will have been released; however, the rolling mill is beginning a new operation and it is also expected that the wheel foundry will soon be functioning again.

There is a continuing scarcity of skilled tradesmen at the Halifax shipyards. One company has placed orders for 20 electric welders in clearance throughout the Maritimes, Quebec and Ontario, and another has taken on students for light labour and to work around the naval magazine. As the Halifax waterfront has been quiet recently, the Reserve Labour Pool has been able to refer workers to local industries urgently in need of unskilled labour.

No improvement is noted in the manpower situation of the textile mills, which continue to be shortstaffed. The Truro office reports that local handweaving plants have taken on schoolgirls on vacation, who are anxious to learn this trade.

Construction—Building activity has resulted in an increasing demand for carpenters, as well as stonemasons and bricklayers for a number of high priority projects. As soon as suitable living quarters can be arranged, orders will be placed in clearance for artisans to work on the new Halifax hospitals. The Department of Veterans Affairs has also advised the

regional office that tenders are to be called for 165 housing units throughout the Maritime provinces.

Transportation—The return of troops from overseas has raised passenger traffic on the railways to a record high. There are far from enough labourers on hand to fill the demand for track maintenance gangs. Freight movements to Halifax have dropped off, but the waterfront at Saint John is engaging the services of many workers.

Quebec Region

Agriculture—Except in one section of the Montmagny district, seeding has been completed and in some areas, haying has been started. Although a few farmers are short-handed in the vicinity of Hull, Granby, Lachute and Richmond, the labour situation elsewhere is normal. In the Lake St. John district preparations are being made for the blueberry picking, which will engage the time of all juniors and other suitable workers in the neighbourhood.

Logging—Although the river drive is practically concluded, cutting and stream improvement work will keep 400 to 500 bushmen busy in the Chicoutimi area during the summer months. Two contractors in the Dolbeau district will require a similar number of loggers within the next few weeks. A number of companies which have resumed cutting in the vicinity of Matane are hiring all available labour, as is another larger operator at Baie Comeau, who anticipates the greatest season in the company's history. Approximately 1,600 men are engaged in woods operations in the Rimouski area.

Mining—There has been no improvement in the manpower situation. Base metal and gold workings alike are handicapped by the lack of suitable workers. In the vicinity of Rouyn, an additional 500 miners are required to meet the demands of five companies, which propose to sink new shafts as soon as possible. In the Val d'Or neighbourhood no lessening of the labour shortage is foreseen as long as it is necessary to rely on local applicants.

Manufacturing—While mass lay-offs are on the wane, they are still in progress in a number of establishments. The temporary suspension of releases from the Quebec arsenals has halted the rise in unemployment in that city and an order for 125 cleaning women for the Cunard Line should even improve the situation somewhat. Cancellation of war contracts has resulted in the lay-off of 150 employees of one Hull steel plant, and in Montreal shell-filling plants are moving swiftly towards a complete

shutdown in the Fall. Staff reductions are also in progress in war plants in the Valleyfield, Sherbrooke and Three Rivers areas. Since May 15, 200 men have been laid off at the Arvida factory of the Aluminum Company of Canada, and another 600 transferred to other departments.

The greatest over-all labour demand still comes from the textile mills, clothing factories and rubber plants of the province. The manager of the Drummondville office is faced with the necessity of recruiting in other centres some 700 youths required by local textile plants. The Montreal area has the largest number of vacancies, with such offices as Valleyfield, Richmond and Granby also reporting many unfilled orders. Much interest is being shown in the recent announcement of the Provincial Secretary that the St. Hyacinthe Technical School will this year be turned into an Industrial Textile School under the direction of the Quebec government.

Construction—Shortages of material and skilled tradesmen are hampering building operations at several points. In the Rimouski district it is estimated that 900 men are actually employed on construction jobs, while at Verdun 175 tradesmen of various types will be needed to lay foundations and reassemble for veterans' families, 50 houses which are being dismantled at Brownsburg.

Transportation—The movement of troops is more than offsetting the slacking off in transfer of war equipment on the railways; several train crews released shortly after V-E Day have been taken on again. Longshoremen and freight handlers are easily obtained to cope with increased activity on St. Lawrence River wharves. On the Montreal waterfront, too, the labour situation is well in hand.

Ontario Region

Agriculture—On some farms delayed planting, first cultivation of hoed crops, and hay-making are all awaiting attention, with a resultant accentuated shortage of manpower. Distribution of Western volunteers, who may be somewhat more numerous than last Summer, is being made with a view to relieving the most pressing needs; efforts are also being made to obtain more helpers from the ranks of the Armed Forces. The demand for beet workers continues to be strong, owing to the shortened season; however, applicants are few.

Logging—River driving is almost at an end, but woods operations in some sections will continue throughout the Summer. Camps in the vicinity of Sault Ste. Marie and Timmins could use a large number of cutters. The

Kapuskasing office reports, however, that although open orders are on file for almost 1,000 bushmen, the pulpwood and logging companies seem to be reasonably well supplied with labour.

Mining—No improvement is noted in the manpower situation. The influx of students at Sudbury has not fully offset the departure of men on farm leave. At Timmins, where the gold mines are still seriously handicapped by lack of experienced men, a limited number of students have been placed at surface work.

Manufacturing—In spite of many recent lay-offs from war plants, the demand for workers remains firm; the iron foundries and similar establishments are most insistent in their call for moulders and heavy labour. Few applicants are available, and such industrial centres as Belleville, Brantford, Fergus, Goderich, Hamilton, Oshawa, Wallaceburg and Windsor are exigent in their call for suitable workers. Four large Kingston establishments could use approximately 350 workmen of the heavier type, as well as a number of skilled tradesmen. About 100 schoolboys have recently been hired for lighter jobs at the aluminum plant.

The withdrawal of agricultural workers is making it increasingly difficult for the packing plants to maintain their production schedules; several hundred sturdy men are needed immediately for this work. Kitchener rubber plants are asking for 218 male workers, and the furniture factories for 240 skilled workers and factory labourers. In London and New Toronto, also, the undermanned industries are calling for many general and semi-skilled workers.

The sawmills, at the height of their season, are fairly well supplied with labour, although larger mills in the North Bay area, desirous of extending their operations, are still short of men. At Arnprior, too, another 100 men are needed; to meet the emergency the company has had to use yard men for sawing and clearing lumber, afterwards returning them to the yard for piling and shipping work.

Construction—An unprecedented boom has led to an enormously increased demand for all types of building tradesmen, carpenters, bricklayers and labourers in particular. In Hamilton, where hundreds of labourers are needed, as well as all types of journeymen, men are placed as soon as they apply for jobs. Another 100 carpenters and labourers could also be utilized on projects in the vicinity of St. Thomas, and approximately 150 general workers at Kingston. While there has been some alleviation of the labour shortage for

the London military hospital program, 100 carpenters and 40 labourers will soon be needed on the construction of new houses under the Veterans' Land Act.

Transportation—Orders for railway track and maintenance men are numerous and urgent; an additional 400 husky labourers are needed in the St. Thomas area for this work. The Algoma Central and Hudson Bay Railway has placed its pressing orders for heavy labourers in clearance. Although some help is being afforded the undermanned Great Lakes transportation service by the employment of students, replacements to meet the considerable labour turnover on the boats are difficult to procure.

Prairie Region

Agriculture.—With seeding almost completed, there is little demand for farm labour, except at Winnipeg, Moose Jaw and Calgary, where there are outstanding orders for general agricultural workers. Experienced tractor operators are also needed in the Winnipeg and Lethbridge districts, as well as experienced irrigators at the latter point.

Intensive efforts have been made to recruit labour for work on Ontario farms; to date between 200 and 300 men have been sent East for the harvest. A similar drive for female farm workers to assist with the British Columbia fruit and berry harvests is proving most successful.

Logging.—Approximately 1,200 pulpwood cutters are needed in the Lakehead district. The scarcity of Government licensed scalers has enabled young men to learn this trade under qualified men; many applicants for woodwork are also obtaining training as camp clerks.

Coal Mining.—Collieries in the Edmonton area are closing for holidays with pay, on conclusion of which full production will be resumed. In other coal fields full capacity output is being maintained, in spite of a shortage of certificated miners.

Base Metal Mining.—Development and exploration work are creating a steadily mounting demand for capable miners. A further 300 underground muckers and miners are needed in the Port Arthur area, Kenora reports a heavy call, and many skilled and semi-skilled of all kinds are required at the Steep Rock iron mines.

Manufacturing.—Lay-offs are in progress in some war plants. The Northern Engineering and Supply Company has advised the Fort William office that 650 employees, including 200 women, will be released upon the expiry

of its shell contract on June 30. At Calgary 550 men, machine specialists and helpers for the most part, have been released by Canadian Pacific Munitions Limited; the greater number of those affected are taking holidays before accepting other employment.

The call for 200 men and an equal number of women for the Lethbridge canning factory will be met, as formerly, by recruiting women and Japanese beet workers from the surrounding country. The needle trades are becoming more and more pressing in their demands upon the Winnipeg office, which reports that while former employees are gradually returning from jobs in war plants, the majority are hesitant about filling the many vacancies.

Construction.—With all available qualified building tradesmen and labourers employed, orders are gradually mounting far above the supply. The erection of houses under the Dominion Government's rehabilitation program, soon to begin, will strain the resources of the labour force to the utmost. In Calgary, a large number of high school students have volunteered to relieve the shortage of labourers on municipal gas, water and sewer projects.

Transportation.—Extra gang and maintenance men are still required for the railways, as well as firemen and brakemen, machinists and fitters. Bridge labour, too, is urgently needed in the vicinity of Prince Albert and Edmonton.

Pacific Region

Agriculture.—As the haying season opens, the slightly increased demands for general farm labour are being met chiefly through the Dominion-Provincial Emergency Farm Labour Service. The call for experienced dairy farm labour is the most exigent, and the least likely of fulfilment. The campaign for berry pickers has proved quite successful; already there is a movement of men and women from Vancouver to the Okanagan, as well as female workers from the Prairies. Additional orders for such helpers are in clearance through Saskatchewan and an influx of pickers is expected shortly.

Fishing.—Many fishermen engaged in other industries during the Winter are now busy hanging their nets in preparation for the sock-eye salmon season, opening in the Fraser River on July 1. A great number left their temporary employment two weeks ago to proceed to Rivers Inlet, where a big run is expected.

Logging.—Many jobs are available for experienced woodsmen of all kinds, as well as

for loggers in the non-skilled categories. Inquiries have been received as to the possibility of securing men from the eastern provinces to help in the filling of extensive orders for pitprops for Great Britain, which have been placed with contractors in the Cranbrook and Kamloop areas. In the vicinity of Prince George, where there are over 300 vacancies for camp and sawmill labour, clearance orders to Edmonton have met with encouraging response.

Sawmills.—The mills are continually hampered by lack of manpower, especially in the vicinity of New Westminster. Many Vancouver operations are working a 48-hour week, and in the neighbourhood of Victoria, too, the mills are all running on full-time schedule, with skilled workmen hard to secure but general labour provided by students.

Mining.—The collieries, especially those in isolated sections, are continually short of certificated miners and underground workers. Nor is there any noticeable improvement in the manpower situation of the base metal mines. Farther north, the shortage of labour for the gold mines persists in the Prince Rupert area, and approximately 400 miners are needed in Dawson City.

Manufacturing.—While the region's shipyards continue to make the most insistent call for labour, general engineering establishments are still short of machinists, tool and die makers, fitters and machine operators. Many semi-skilled and unskilled vacancies in the Victoria shipyards have been filled by students, who prefer this type of work on account of the high wage scale. Although students are also employed in the smelter at Trail, which is operating 100 men under strength, they are physically incapable of replacing husky labourers in many departments.

Construction.—The heaviest call for building labour is concerned with the Veterans' Housing Scheme, where large numbers of building tradesmen of all kinds, but especially carpenters, are in demand. The provincial military hospital program is progressing favourably, with no critical lack of manpower.

Transportation.—There are few applicants to meet the railways' need for extra gang and section labourers. Officers, engineers, seamen and deck hands are needed for the coastal sailings; while high school boys are relieving the situation somewhat, men with experience are hard to find. The supply of labour for deep sea vessels in the Manning Pool is more satisfactory.

Applications for Employment; Vacancies and Placements; May, 1945

R E P O R T S of the Employment and Selective Service Offices for the five-week period May 4 to May 31, 1945, inclusive, showed a decrease of 7.7 per cent in the average daily placements when compared with those of the preceding four weeks March 30 to May 3, and a loss of 15.3 per cent in comparison with the five weeks April 28 to June 1, 1944. Under the first comparison, apart from slight increases in forestry and logging, mining, finance and insurance and fishing, hunting and trapping, all industrial divisions showed declines, the largest being in manufacturing and services. When compared with the five-week period ending June 1, last year, all industrial groups except finance and insurance and fishing, hunting and trapping recorded losses, the greatest being in manufacturing, forestry and logging and services.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment and Selective Service Offices throughout Canada. It will be seen from the graph that the curves

of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each 100 applications was 109.5 during the four weeks ending May 31, in contrast with 127.9 during the previous five weeks and 126.7 during the five weeks ending June 1, last year. The ratio of placements to each 100 applications during the period under review was 70.9 compared with 71.0 for the period March 30 to May 3, 1945, and 74.1 during the five weeks April 28 to June 1, 1944.

The average number of vacancies reported daily by employers to the Employment and Selective Service Offices throughout Canada during the four weeks May 4 to May 31, 1945, was 7,953 as compared with 10,059 during the preceding five weeks and with 10,407 during the five weeks April 28 to June 1, 1944. The average number of applications for employment received daily by the offices for the period under review was 7,261 in comparison with 7,863 during the previous period and 8,210 in the five-week period a year ago. The average number of placements made daily by the offices during the four weeks ending May 31, 1945, was 5,151, of which 4,979 were in

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications ————— Vacancies - - - - - Placements =====

regular employment and 172 in work of one week's duration or less, as compared with a total daily average of 5,586 during the preceding five weeks. Placements during the period April 28 to June 1, 1944, averaged 6,086 daily, consisting of 5,935 placements in regular and 151 in casual employment.

During the period May 4 to May 31, 1945, the offices referred 157,338 persons to vacancies and effected a total of 118,483 placements. Of these, the placements in regular employment were 114,522, comprised of 80,249 males and 34,273 females, while placements in casual work totalled 3,961. The number of vacancies reported by employers was 127,367 for males and 55,541 for females, a total of 182,908, while applications for work numbered 167,010, of which 117,438 were from males and 49,572 from females. Reports for the previous four weeks, March 30 to May 3, 1945, showed 291,722 positions available, 228,035 applications made and 161,993 placements effected, while from April 28 to June 1, 1944, there were recorded 312,200 vacancies, 246,306 applications for work and 182,572 placements in regular and casual employment.

The following table gives the placements effected by the offices, each year from January 1935, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,326	389,536
1938.....	258,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945 (22 weeks).....	648,547	19,458	668,005

Prince Edward Island and Nova Scotia

Positions offered through Employment and Selective Service Offices in Nova Scotia and Prince Edward Island during the period ending May 31, 1945, averaged 266 daily compared with 340 in the preceding five weeks and 349 during the period ending June 1 last year. The average number of placements effected daily was 200 during the four weeks under review, in contrast with 218 in the previous period and 249 during the five weeks terminating June 1, 1944. The reduction in the daily average of placements from the period ending June 1 a year ago, was greatest in manufacturing with losses of more moderate proportions in trade, construction and public utilities operation. Placements by industrial

divisions included: manufacturing 1,541; services 1,078; public utilities operation 823; trade 649; construction 406 and mining 130. Placements in regular employment numbered 3,335 of men and 1,324 of women.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the four weeks terminating May 31, called for a daily average of 185 workers compared with 312 in the previous period and 324 during the five weeks ending June 1, 1944. Placements registered a daily average of 153 during the period under review, in contrast with 161 in the preceding five weeks and 174 during the period April 28 to June 1 last year. When comparing placements by industrial groups with the five weeks ending June 1 a year ago, the most significant changes were decreases in forestry and logging, and trade and a gain in public utilities operation. Placements by industries included: manufacturing 1,175; public utilities operation 752; services 713; trade 466 and construction 373. There were 2,657 men and 944 women placed in regular employment.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the province of Quebec during the period ending May 31, 1945, there being 2,383 in comparison with 3,389 in the preceding five weeks and 3,585 during the period ending June 1 last year. Placements, likewise, decreased under both comparisons, the daily average being 1,499 during the four weeks under review, as compared with 1,670 in the previous period and 2,020 during the five weeks terminating June 1 a year ago. The marked reduction in placements from the period ending June 1, 1944, was chiefly attributable to a substantial decline in manufacturing although services, agriculture, forestry and logging, construction and public utilities operation were considerably fewer. In addition, a more moderate loss was reported in trade. Industries in which employment was found for more than 500 workers included: manufacturing 13,929; forestry and logging 7,361; services 4,309; construction 3,535; public utilities operation 2,994; trade 2,555 and mining 817. Regular placements numbered 27,528 of men and 8,344 of women.

Ontario

Employment opportunities as indicated by orders received at Offices in Ontario during the four weeks under review, showed a daily average of 2,913 workers in contrast with 3,845 in

the previous period and 4,114 during the five weeks April 28 to June 1, last year. Placements were fewer under both comparisons, the daily average being 1,838 as compared with 2,176 in the preceding five weeks and 2,255 during the period ending June 1, 1944. Except for a moderate gain in finance and insurance, all industrial groups reported declines, the most pronounced being in manufacturing followed by fairly large losses in services, forestry and logging, and public utilities operation. Industrial divisions in which the majority of placements were effected were: manufacturing 18,557; services 9,207; trade 5,119; public utilities operation 4,219; construction, 3,558; forestry and logging 1,237; finance and insurance 1,064, and mining 859. Placements in regular employment numbered 28,411 of men and 14,942 of women.

Manitoba

The demand for workers on a daily average as indicated by orders listed at Employment Offices in Manitoba during the period terminating May 31, was 405, as compared with 448 during the preceding five weeks and 433 in the period ending June 1 last year. Placements recorded a daily average of 270 during both the four weeks under review and the previous period, but 289 during the five weeks ending June 1 a year ago. Manufacturing, with a fairly large reduction in placements from the period ending June 1, 1944, was responsible for the loss reported. Except for a moderate gain in construction, changes in all other groups were unimportant. Placements by industrial divisions numbered: services 1,842; manufacturing 1,582; trade 1,191; public utilities operation 891; construction 528; agriculture 140; finance and insurance 131, and mining 129. There were 3,355 men and 2,026 women placed in regular employment.

Saskatchewan

Orders received at Employment Offices in Saskatchewan during the four weeks May 4 to May 31, called for an average of 175 workers daily compared with 270 in the preceding period and 217 during the five weeks ending June 1, 1944. There was a daily average of 132 placements in contrast with 159 during both the previous period and the five weeks April 28 to June 1 last year. Moderate losses in manufacturing and services were the only changes of importance in the daily average of

placements from the period ending June 1 a year ago. Placements by industries included: services 1,048; trade 599; manufacturing 506; public utilities operation 435; construction 286 and agriculture 227. Regular placements numbered 1,866 of men and 983 of women.

Alberta

Opportunities for employment at Employment Offices in Alberta during the period terminating May 31, numbered 368 daily in comparison with 444 in the previous five weeks and 452 during the period ending June 1 a year ago. The average number of placements effected daily was 246 during the four weeks under review, in contrast with 284 in the preceding period and 293 during the five weeks ending June 1, 1944. With the exception of a small gain in agriculture and a nominal increase in fishing and hunting, all industrial groups reported decreases in placements from the five weeks ending June 1 last year; the greatest reductions being in construction, manufacturing, trade, mining and public utilities operation. Industrial divisions in which most of the placements were effected were: services 1,871; manufacturing 1,023; trade 902; public utilities operation 711; construction 699; mining 319 and agriculture 288. Placements in regular employment numbered 3,444 of men and 1,889 of women.

British Columbia

During the four weeks ending May 31, 1945, the daily average of positions offered through Employment Offices in the province of British Columbia was 927 in comparison with 1,012 in the period ending May 3, 1945, and 933 during the five weeks terminating June 1, 1944. Placements showed a lower average during the period under review, being 600 daily in contrast with 646 during both the previous five weeks and the period April 28 to June 1 last year. Reduced placements in manufacturing, construction and trade accounted for the decrease from the five weeks ending June 1 a year ago. A moderate improvement in public utilities operation and small gains in forestry and logging, and fishing and hunting were the only advances registered. Placements by industrial groups included: manufacturing 4,022; services 3,318; forestry and logging 1,841; public utilities operation 1,815; trade 1,589 and construction 1,240. There were 9,653 men and 3,821 women placed in regular employment.

STRIKE activity in Canada during the month of June continued at the same low level as in May. There were 12 strikes recorded during the month, as compared with nine in May and 23 in June, 1944. The number of workers involved and the time loss in man-days showed a decrease, both as compared with the previous month and with June, 1944. Preliminary figures show 12 strikes in existence during June, involving 2,773 workers and causing a time loss of 4,688 days, as compared with nine strikes in May, with 3,035

workers involved and a time loss of 6,340 days. In June, 1944, there were 23 strikes, involving 5,980 workers, with a time loss of 9,528 days.

Preliminary figures for the first six months of this year show 82 strikes, involving 25,208 workers, with a time loss of 83,723 days, as compared with 113 strikes, with 48,194 workers involved and a time loss of 318,288 days, for the same period last year.

Of the 12 strikes recorded for June, 1945, one resulted in favour of the workers, four in favour of the employers, two were com-

* Preliminary.

† Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

STRIKES AND LOCKOUTS IN CANADA DURING JUNE, 1945*

Industry, occupation and locality	Number involved		Time loss in man- working days	Particulars†
	Establish- ments	Workers		
Strikes and Lockouts Commencing During June, 1945				
MINING— Coal miners, Coleman, Alta.	1	465	465	Commenced June 26; protesting placing hoisting engineer at other work at reduced wages when not required at regular job; terminated June 26; return of workers pending settlement; indefinite.
MANUFACTURING— <i>Metal Products—</i> Moulders, Moncton, N.B.	1	(a) 21	42	Commenced June 1; against suspension of apprentice moulder for alleged insubordination; terminated June 2; conciliation, federal; in favour of workers.
Aircraft parts factory workers, Windsor, Ont.	1	231	50	Commenced June 4; seniority in promotion of a worker to job of foreman; terminated June 5; negotiations; in favour of employer.
Brass factory workers, Sarnia, Ont.	1	(b) 175	285	Commenced June 9; refusal of a female worker to join union; terminated June 11; return of workers; in favour of employer.
Brass factory workers, Niagara Falls, Ont.	1	67	67	Commenced June 13; alleged discrimination in dismissal of two workers; terminated June 13; return of workers; in favour of employer.
Foundry workers, Toronto, Ont.	1	(c) 30	90	Commenced June 14; <i>re</i> application of wage rates in Finding and Direction of RWLB‡; terminated June 16; return of workers; in favour of employer.
Metal factory workers, Brantford, Ont.	1	136	204	Commenced June 22; for hourly instead of piece-work rates of pay; terminated June 23; negotiations; compromise, temporary schedule until job evaluation completed.
Foundry workers, Guelph, Ont.	1	(d) 227	1,050	Commenced June 26; protest against Finding and Direction of NWLB‡ disallowing most of wage increases approved by RWLB; un-terminated.
Shipbuilding— Shipyards workers, Quebec, P.Q.	1	1,183	1,850	Commenced June 5; for dismissal of personnel manager and mechanical superintendent and for union shop and check-off; terminated June 7; conciliation, federal, and return of workers pending settlement; indefinite.
Ship repair workers, Liverpool, N.S.	1	53	245	Commenced June 11; refusal of a worker to pay union dues; terminated June 15; conciliation, federal; compromise, worker dismissed for cause.
Riveters, Esquimalt, B.C.	1	175	300	Commenced June 13; against discontinuance of piece-work rates for riveting; terminated June 14; conciliation, federal, and further reference to NWLB; indefinite.
Non-Metallic Minerals, Chemicals, etc.— Oil refinery workers, Moose Jaw, Sask.	1	(f) 10	40	Commenced June 27; against dismissal of a worker allegedly for union activity; un-terminated.

* Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

† In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

‡ RWLB—Regional War Labour Board; NWLB—National War Labour Board.

(a) 33 indirectly affected; (b) 60 indirectly affected; (c) 13 indirectly affected;

(d) 159 indirectly affected; (f) 7 indirectly affected.

promise settlements and three were indefinite in result, work being resumed pending final settlement. At the end of the month, therefore, two strikes were reported as un-terminated, one of foundry workers at Guelph, Ont., and the other* of oil refinery workers at Moose Jaw, Sask.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *LABOUR GAZETTE* from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries." The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in April, 1945, was 198 and 13 were still in progress from the previous month, making a total of 211 during the month, in which 43,800 workers were involved and a time loss of 99,000 working days was caused.

Of the 198 work stoppages commencing in April, 37 arose out of demands for advances in wages, 48 on other wage questions, 13 on questions as to working hours, 32 on questions respecting the employment of particular classes or persons, 59 on other questions respecting working arrangements, eight on questions of trade union principle and one was in support of workers involved in another dispute.

British India

Preliminary figures for January, 1945, show 46 work stoppages, involving 33,332 workers with a time loss of 96,011 man-days.

United States

Preliminary figures for May, 1945, show 425 strikes and lockouts beginning in the month, in which 310,000 workers were involved. The time loss for all strikes in progress during the month was 2,025,000 days. Corresponding figures for April, 1945, are 450 strikes, involving 285,000 workers with a time loss of 1,330,000 working days.

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index advanced 0.6 points to 119.6 between May 1 and June 1, 1945, for a war-time increase of 18.7 per cent. Strength in foods was mainly responsible, an index for this series moving up 1.7 points to 133.4 due to substantial increases for fresh vegetables and smaller ones for fresh fruits, eggs and meats. Butter was slightly lower during the month. Clothing, the only other group to record a change, registered a gain of 0.1 to 122.1. June 1 index levels for other groups were as follows: rents 112.1; fuel and light 106.6; home furnishings and services 118.9 and miscellaneous items 109.4.

Cost-of-living index numbers for eight regional cities moved considerably higher between April 2 and June 1, 1945, with strength

in foods primarily responsible. The Toronto and Vancouver series for June at 118.1 and 119.1 both recorded increases of 1.3 points during the period under review, the former reflecting an advance of 4.1 points for foods and the latter a rise of 3.4 points. Toronto clothing and home furnishings and services were higher also, while Vancouver clothing prices recorded an increase. Winnipeg foods, up 3.3 points, were reflected in an increase of 1.0 to 117.2 in the composite index, while a Montreal food advance of 2.2 points moved the composite index 0.9 to 121.9. The Saint John index was 0.6 points higher at 119.4 due to foods and fuel and lighting costs, while the Edmonton series rose 0.5 to 116.7, Halifax 0.4 to 119.1 and Saskatoon 0.3 to 119.9.

† Commodities in the cost-of-living index excluding rents and services.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate table for chain store prices was not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census aver-

ages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food

1949	103.0		119.0	128.0		167.7	167.7	167.7					1577	
1950	119.6		119.6	128.0		204	204	204					1418	

(31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent); \$165.80; home furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home furnishings, etc., with their weights was published in the LABOUR GAZETTE for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the LABOUR GAZETTE under the title *Activities of the Wartime Prices and Trade Board*.

Wholesale Prices, May, 1945

A drop of 0.4 points to 103.0 (1926 = 100) occurred in the composite index of wholesale prices in May. In part, it reflected the effect of Order in Council P.C. 3408, which rescinded the 8 per cent sales tax and the 10 per cent

war exchange tax on a specified list of building materials, effective May 14, 1945. The wood, wood products and paper group fell 2.9 points to 117.6; iron and its products 1.9 points to 115.3; non-metallic minerals 0.5 to 102.6 and chemicals and allied products 1.4 points to 98.6. Two groups were higher. Vegetable products advanced 1.0 to 97.0 following increases in potatoes, onions, rye, oranges and lemons which outweighed weakness in hay and oats, while firmer quotations for livestock, fowl and furs overbalanced declines in butter, eggs and dry shore codfish to move the animal products group up 0.3 points to 107.2. Fibres, textiles and textile products at 91.7 and non-ferrous metals at 79.7 were unchanged.

Canadian farm product prices also moved lower in May, the composite index declining 0.7 to 104.6. The animal products sectional index dropped 3.1 points to 121.1, due principally to a seasonal reduction in the fluid milk subsidy from 55 cents to 35 cents per cwt. effective May 1, 1945. Among other changes, livestock and fowl prices were higher while eggs were lower. In the field products group strength in potatoes, onions and rye more than offset a decline in hay quotations to advance this index 0.8 points to 94.8.

The contrasting behaviour of farm product index numbers and those for vegetable and animal products in the component material classification reflects the different treatment of subsidies in the two series. Producer subsidies are included in the farm product price series which is designed to follow farm prices at the wholesale level. The component classification index measures changes in market prices.

Employer-Employee Relations Conference

Summary of Proceedings at Convention of Canadian Manufacturers' Association

FEATUREING the discussions at the Convention of the Canadian Manufacturers' Association in Toronto, June 5-7, was the Conference on Employer-Employee Relations.

The subjects covered a wide field in industrial relations—collective bargaining, hours of work, vacations with pay, minimum wages, control of wages, labour-management co-operation.

In opening the conference, W. C. Coulter, chairman of the Industrial Relations Committee, briefly emphasized the planning necessary in problems relating to employment on the return to normalcy.

P.C. 1003

Dealing with collective bargaining, E. R. Complin, member of the National Labour Relations Board, and manager of the Industrial Relations Department of Canadian Industries Limited, referred to P.C. 1003 as follows:

There is emerging from the activity of these Boards a principle of collective bargaining. The vehicle, which is P.C. 1003, is not by any means perfect. It contains ambiguities and obscurities even to the Boards. We all know of changes which should be made in it in the interests of clarity and, probably, in the interests of better industrial relations. We can see eye to eye with the labour organizations on some of the amendments which they have suggested. I know that several times, while sitting on the Board, we have wanted to make a decision which was in the interests of industrial relations, but we have been unable to do so because the regulations confined our authority to only a certain type of decision, or in some cases, have actually prohibited us from digressing from the clearly indicated duty.

The National Board, and I think this is true of all the Boards, has attempted consistency as it moved from case to case. The National Board has not always seen eye to eye with the provincial boards, but I do not think this is important, and it is not entirely avoidable under the circumstances . . .

Union Security

On the matter of union security, the speaker stated:

In the United States there has been regulatory interference in the matter of union security, but that has come about as a trade with labour for the no-strike pledge during wartime. It seems to me we will have sunk to a parlous state if, having gone through the war without having to have union security by edict, we should have to get into that situation now. I hope not most sincerely because I think you will agree that sound employee relations are going to depend upon the acceptance of mutually

agreed results of collective bargaining, and not on the decisions of boards, particularly in the field of union security.

I think it might be said that the introduction of union security by regulation or edict is definitely not in the public interest. Certainly not, unless proper and adequate safeguards are also introduced. I think we should deplore the lack of understanding on the part of the public and, indeed, on the part of our representatives in Parliament, of the issues with respect to union security. I think they are being confused by the terms, union shop, closed shop, maintenance of membership and so on. They are too ready to accept the plausible submissions of the exponents of those things . . .

Right of Employers

During the course of his observations Mr. Complin touched "on the right of employers to speak to their employees on unionism and union affiliation." Pointing out that the Ontario Labour Relations Board, and, on appeal, the National Board "had confirmed the right of the employer to talk to his employees about those things—naturally, of course, within reason"—the speaker developed this topic further as follows:

The wise firms today are prompt to issue factual statements for public and employee consumption any time there is a misleading or provocative statement emanating with intent from local union sources. It is being learned that this prompt refutation is, to some extent, discouraging such local sources from continuing that sort of campaign.

There are other firms which go even further than that—they say it is not good enough to attempt to refute after the fact, but that what is needed is a method of continuously placing the facts of the business, of the work, and the job before the employees and before their supervisors. That reference to supervisors was intentional and it could take us into a very interesting topic, the unionization of foremen or, if you want to put it another way, the unionization of the lower level of management—as though management could organize against itself.

Unionization of Foremen

Stemming from the above paragraph, relative to unionization of foremen, Mr. Complin observed:

If that idea persists, it will, of course, force management to alter the traditional patterns of authority and responsibility. The remedy lies, fortunately, with management, and that remedy appears to be an examination of those practices and conditions which differentiate the foremen from other persons who are deemed to be part of the management structure. So, when we

shall speak of the foreman of the "keyman" or as "management's representative," we shall be doing a great deal more than giving lip service to a principle of management. Those of us who have constant access to industrial relation thinking in the United States are fully aware of the intense study that is going on with respect to this very thing, and the results which are being obtained in strengthening the foreman's position as a part of management.

Review of Operations of Ontario Labour Relations Board

Discussing the work of the Ontario Labour Relations Board, Mr. J. Finkelman, chairman of the Board, said that from the commencement of its work on April 17, 1944 to June 1, 1945 about 150 sessions had been held. About 550 petitions and applications had been filed during that period, of which over 500 had been heard. He said that although the volume of cases had not begun to decrease he anticipated no difficulty in coping with the case load.

"During the year that we have been in office, the basic principles of interpretation and administration have been laid down and, while novel points continue to arise, we are now fairly well equipped to deal with them with reasonable dispatch."

He declared that the Board's policy in regard to certification of bargaining representatives had been to act according to the belief that relations between employers and employees would be most productive of beneficial results if the parties arrived at a way of living together through their own efforts.

"In pursuing this policy," he continued, "we have taken the position that we should not certify bargaining representatives in those cases in which there is a collective agreement between the parties, because we can add nothing of substance to what the parties have already done for themselves. In addition, we encourage employers in every way possible to enter into collective relations with our intervention . . .

It is our considered opinion—and the matter has been given a good deal of thought—that an employer who has entered into a collective agreement is entitled to receive, and will receive, the same degree of protection whether the bargaining representatives have been certified or not, provided the employer has acted in good faith.

In measuring the success of the Board he felt that consideration should be given not only to the 500 cases heard, "but more particularly by the many cases 'settled out of court' whose solution we have in part facilitated by our very existence."

Looking to the future he said that with the end of the war in Europe the willingness of some employers and employees to accept war-time regulations as a necessary evil was waning. "In fact there is a hardening of attitudes on both sides." He asserted that in Ontario

labour relations legislation was "not a war-time measure; it is here to stay." He felt that the vast majority of employers had accepted the legislation in good faith, but added:

To those employers who have not yet made up their minds to accept collective bargaining wholeheartedly, I would suggest that they stop brooding upon their grievances and their troubles and their lost prerogatives and their diminishing immunities. I would say to them, learn to accept the heavy burdens of leadership in a democracy, lest you forfeit your claim to leadership.

Replying to a question from a member as to management's rights in speaking to its employees with regard to unionization, Mr. Finkelman said, "We believe the employer has the same right to express his views as the union has to express its views. Just how far an employer can go will depend on the circumstances of a particular case. Let us suppose that an employer makes a speech just before an election. The words, themselves, may be innocuous, but the circumstances under which those statements were made may change the import of the words. If an employer wants to make a speech to his employees, then I believe he should make it not just on the eve of a vote, but when the unionization begins to show itself." He said that if employers used common sense and discretion as to the words used, the occasion and the circumstances, they would find themselves in no difficulty with the Board. On the other hand use of illegal tactics would cause an employer to find himself in trouble.

In the discussion, following the introductory addresses of Messrs. Complin and Finkelman several matters were prominent. Mr. E. E. Sparrow emphasized the importance of negotiation of the joint union agreement.

Others participating in this discussion were: Messrs. N. P. Peterson and W. C. Kuebler.

Mr. W. A. Osbourne, General Manager, Babcock-Wilcox and Goldie McCulloch, Limited, dealt particularly with the "employers right of free speech" with his employees. Referring to his remarks on the subject at last year's convention (L.G. p. 929-30), he said:

I did so because I had experience in discussing the matter with other employers and saw that in a number of cases they could not make up their minds as to whether they had a right to say anything to their employees on the subject of union organization. They saw experienced labour organizers come into their plants to discuss union organization with their employees frankly and openly, and, in some instance, not so frankly and not so openly, and they felt themselves uncertain and doubtful as to their own right of free speech on the subject . . .

I was very glad to hear Mr. Finkelman say that, in Ontario, the right of free speech for employers under the Labour Code has been established. There is no more important fundamental right than that. It has also been established in the United States on the basis of several cases which have come before the National War Labour Board and employers have now the right to express themselves on questions of unionization within their plant.

Mr. Osbourne also discussed such topics as "employers' associations", majority of employees and "union security."

Vacations with Pay and 48-Hour Week in Ontario

The Ontario Hours of Work and Vacations with Pay Act (L.G., 1944, pp. 906, 1180) was reviewed from an administrative point of view by E. Billington, chairman of the provincial Industry and Labour Board.

Mr. Billington said that the purpose of the Act, in the instance of the 48-hour week, was first to ensure maximum efficiency by eliminating the fatigue and accident proneness that go with excessively long hours; and second to spread available employment by preventing one man from undertaking the working hours of two.

He said that statistics obtained in the fiscal year 1943-44 showed that of 1,314 industries and business establishments surveyed, employing male and female persons, 743 were working a standard week of from 44 to 48 hours but 571 were working a standard week of anywhere between 49 to 60 hours. These figures, he said, indicated that a certain levelling of working hours was possible.

"No one will argue," he added, "that health and working hours do not form an important connection in our daily lives; employment for the masses is equally the responsibility of the government and industry to see that each and every Canadian is entitled to whatever just rights this country of ours can provide as a democratic nation."

Referring to vacations with pay Mr. Billington said that the survey of 1,314 firms showed 754 firms already giving their employees at least one week's vacation with pay. He pointed to the benefits to health and morale of workers that result from holidays.

A special plan had been adopted for the construction industry where employment is intermittent and a worker may have several employers during a year. In order to make sure that workers in this industry derive proper benefit from the legislation, each employee now obtains a vacation pay stamp book, and his employer is required at each pay period to affix vacation credit stamps equivalent to 2 per cent of the employee's total earnings. The

worker is entitled to cash his stamps following June 30 of each year.

"Under this system," Mr. Billington said, "the employee will build up a vacation pay credit in proportion to his earnings and irrespective of the number of different construction employers for whom he may work during each year.

"Careful consideration is being given to the inclusion of other industries to this system of providing vacation pay credits, in view of the successful results which so far have been obtained in its application to the construction industry."

Explaining the postponement in the application of the Act in the matter of working hours of employees, Mr. Billington said that when the Industry and Labour Board was appointed in 1944 the labour situation and demands of war were found to be much more serious than at the time the Act was assented to in April, 1944. A representative of the Department of Munitions and Supply, Ottawa, requested that the application of this part of the Act be postponed, in view of the necessity for all-out production of war supplies.

"This acute war demand entailed a further absorption of labour from other essential industry, who in turn were further handicapped; consequently after consultation with the Minister of Labour, the Industry and Labour Board provided this postponement for the period of the crisis."

Continuing, Mr. Billington said:

Commencing early this year, the Industry and Labour Board, acting in accordance with Section 14 of the Act and at the same time giving due consideration to existing essential production requirement, provided an amendment to all original postponements in so far as working hours were concerned, and acting in accordance with Sub-section 1 of Section 2 of the Act, required that the regular working hours of an employee in any business, industry, or occupation, should not exceed 48 in the week. However, those employers who were still engaged on war contracts or were under a directive of the Wartime Prices and Trade Board, or under United Nations Rehabilitation Relief Administration Contracts, or those engaged in construction, transportation, or in the production of essential materials and supplies, are permitted such overtime hours of work as may be necessary in excess of a regular work week of 48 hours or less in order to maintain necessary production.

Employers whose production cannot be considered to come within these categories may, under written Permit from the Industry and Labour Board, undertake overtime in an amount not in excess of 120 hours during the calendar year as provided under Section 4 of the Regulations pursuant to the Act.

Mr. Billington emphasized that the Order "does not in any way restrict essential war production since it provides for overtime work

in sufficient quantity to meet the requirements of those industries still engaged in producing war supplies. Further to this in order that no misunderstanding may exist, the Industry and Labour Board does not administer matters pertaining to changes in wages or premium rates for overtime hours of work. This is subject to management and employee agreement, together with the approval of the Regional War Labour Board for Ontario.

"No provision has or will be made for a postponement providing for extended overtime working hours beyond those allowed under the Regulations pursuant to the Act for a period continuing for the duration of the war, inasmuch it is contended that before the complete defeat of Japan, war production requirement in many industries will be greatly reduced, providing a corresponding amount of additional labour which will be available for peace time activities, and which will not require increased working hours."

Mr. J. F. Marsh, Vice-Chairman of the Ontario Regional War Labour Board, said that there appeared to be no inclination on the part of employers or employees to bring to an end the applications for wage adjustments.

During March and April, 1945, 1,750 cases had been heard, as compared with 1,483 during the same two months in 1944. Employers were submitting 50 per cent of the applications for wage increases.

Rehabilitation of War Veterans

As a convenient means of describing the arrangements for the rehabilitation of veterans, Mr. S. N. F. Chant, Director-General of Rehabilitation, discussed the problem under three phases: (1) the pre-discharge phase; (2) the post-discharge phase; and (3) the community phase.

He pointed out that the men and women in the services are seriously concerned about their future and that pre-discharge counselling helps them to clarify their thinking and correct their misconceptions. By assisting them in the appraisal of their service training and experience as related to civilian vocations, the pre-discharge counsellors aid in forming tentative plans for the immediate post-discharge period. A further step is taken by directing such men and women toward educational courses to be taken in their free time. In this way they are in some measure prepared for the changeover to civilian life.

The post-discharge phase covers the period of transition from service to civilian life. Mr. Chant said: "Here the Government of Canada has provided a wide program covering vocational and educational training, assistance while awaiting returns from business, or farm,

or while unemployed or incapacitated; assistance to acquire a business, a farm, or a home, etc." Responsibility for this period of rehabilitation is shared by two Government Departments, namely, Veterans Affairs and Labour. Mr. Chant stated that the Department of Veterans Affairs had set up a number of Rehabilitation centres in the key cities of Canada. At these centres, trained counsellors are available to provide vocational guidance and advice on all matters relating to rehabilitation. Here, too, rehabilitation grants and benefits are arranged. For districts more remote from the key cities a like service is performed at the Employment Office of the Department of Labour.

For the third phase of rehabilitation, Citizens' Rehabilitation Committees, which are entirely free of Government control, have been organized across Canada. Their responsibility begins where the Government leaves off. They welcome returning veterans, encourage the giving of preference in employment to veterans and assist them to find living accommodation, etc.

Current reports, Mr. Chant stated, indicate that rehabilitated veterans are doing uniformly well as employees in industry and as students at the universities. Anticipated difficulties are dissolving and veterans "are showing themselves to be the same resourceful, keen and disciplined Canadians in civies as they were in uniform."

Address of Brigadier Mess

In a brief address on the rehabilitation of ex-service personnel, Brigadier James Mess, formerly Deputy Adjutant-General, Department of National Defence, proposed that persons discharged from the armed services be encouraged to return to their pre-war occupations as far as possible. With respect to those who did not have jobs before the war, he suggested that employers should consider such persons as opportunities with experience that could be capitalized, rather than as responsibilities to be shouldered. He pointed out that such persons had acquired certain new skills while in the armed forces, which may seem intangible at times. If, however, such persons and their problems are handled with sympathetic understanding they should be potential assets. Brigadier Mess asserted that "the returned soldier wants security—a job with a living wage." He should be treated as "an intelligent individual" and be given a full understanding of the problems confronting him when he returns to civil life, not promises which it will not be possible to keep. It was in such an atmosphere that what the speaker called "a charter of Rehabilitation" should be drafted, he concluded.

Labour-Management Co-operation

In his address on "Labour-Management Co-operation," Mr. H. Ross Rutherford, Executive Secretary of the Industrial Production Co-operation Board, outlined the "essential characteristics" of a Labour-Management Production Committee. Such a committee is "composed of representatives of management and labour to increase production and improve efficiency and generally to promote mutual confidence and trust between both groups." Continuing, he said: "It is a joint enterprise, a two-way channel of communication for the exchange of ideas and information on production problems. It is an agency making possible effective plant action on production, conservation, recreation, welfare, morale, safety, absenteeism, and many other important problems." He pointed out that such committees are not cure-alls for labour problems. Some of them fail to achieve their purpose and it was well to appraise the failures as well as the successes. He asserted that "where management and labour leadership have not been animated by sincerity in their joint endeavour or where honest, sustained effort by management and labour leadership is not forthcoming, committees have failed." Selfishness or suspicion of motives on the part of either management or labour must be replaced by mutual confidence and a genuine co-operative spirit if the desired objectives are to be attained.

Refuting the argument expressed by some management groups that labour might attempt to assume some of the authority of management, Mr. Rutherford quoted the results of a survey conducted by *Factory Magazine* of 181

United States plants, employing over 400,000 workers. Of these companies, 93 per cent "found no evidence that labour was attempting to usurp the prerogatives of management." He drew attention also to a similar survey conducted by Professor Dymond of the University of Toronto, in 28 Canadian plants. In this case, 92 per cent admitted that labour did not attempt to encroach on the functions of management and the remaining eight per cent did not know whether or not labour used the committees for its own ends.

Before proposing to set up a committee, Mr. Rutherford pointed out that "management must be thoroughly sold on it and be prepared to give it the necessary attention and guidance." The functions are scope of the committees "must be clearly defined and understood by all—particularly the foremen. Without the co-operation of the supervisory force no committee can achieve its maximum usefulness. Nothing is so uncertain to deaden interest as delay and indecision," he asserted. In cases where the committee recommendations or individual employee suggestions cannot be implemented, "prompt explanation of the reasons should be given." In plants with collective bargaining agreements, one or more members of the bargaining agency should be on the committee, in order that questions of wages, hours, working conditions, etc., may be attended to promptly. Further, it is essential that "workers should be kept fully informed of the committee's activities. But most important of all, both management and labour must come to committee meetings in a spirit of good will for the purpose of working together toward the solution of their mutual problems."

Employment of Ex-Service Personnel

One of the sessions of the June Conference of the Canadian Manufacturers Association was devoted to the subject of the employment of men released from the armed services. Leader-off on this topic, Mr. T. R. Walsh, Chief Enforcement Officer of National Selective Service, gave an outline of the legislation on the subject. Mr. Walsh prepared his remarks by a brief review of a related subject—the new industrial selection and release plan—which has to do with the release from the Armed Forces ahead of their turn of certain men who can render particularly valuable services in connection with reconversion.

The pertinent paragraphs of Mr. Walsh's outline of this plan are as follows:

The policy of the government in respect of the demobilization of personnel in the Armed Services is that the release is to be, in so far as possible, on the basis of first in first out, with due regard to the nature of the services, that is,

it is not a pure question of time, but it is also a question of the nature of the services of the man in the Forces. In order to aid in the rapid conversion of industry to peacetime production, it is recognized there are certain key men in the services who could speed reconversion and who could aid in creating work for their fellow members in the Forces.

In order to facilitate the orderly process in the release or discharge of these men from the Forces a new Board has been set up in Ottawa known as the Industrial Selection and Release Board. Correspondingly, in each of the districts corresponding to the military district, an industrial selection and release committee has been established. The Ottawa Board includes a representative of the Department of Labour, as chairman, a representative of the Department of Reconstruction and Munitions and Supply, each of the three departments of National Defence, a representative of the employer and the Selective Service Branch of the Department. The constitution of the committees at each of the different points at which they are to be established is roughly parallel. The committee

chairman is a representative of the Department of Labour and there is also a representative of the Department of National Defence, a representative of Reconstruction and Munitions and Supply and a representative of the Employment Service along with the Registrar of the Mobilization Board.

All applications for release of men in the services in advance of their priority will be channelled through these eleven committees. The committee, through its investigators, will get the facts of the case and will report to the Board at Ottawa. If the Board at Ottawa approves of the recommendation, then it will go to the proper branch of the Armed Services.

I might mention, briefly, some of the principal factors which will be taken into account in dealing with these applications. The committees will consider the labour priority of the establishment, the essentiality of its product in relation to the war and civilian requirements. They will also consider the essentiality of the individual's service to the business or plant, with due regard to the skill and length of service to the company. The local labour demand and supply will also be taken into account, although the factor which will be of prime importance will be what the services of this particular man can contribute to the creation of employment for those who have yet to be demobilized, the development of high employment and the increased production or manufacture of those products which are basic or essential to the immediate demands and generally to facilitate reconversion of the plant and further expansion.

These committees are being set up at Vancouver, Edmonton, Regina, Winnipeg, Kingston, London, Toronto, Montreal, Quebec, Halifax, Saint John.

Applications will be made on a standard form N.S.S. (M) 133. These applications will be forwarded to the proper committee for investigation and for submission to the Board at Ottawa if approved.

Dealing specifically with the Reinstatement in Civil Employment Act and Regulations, Mr. Walsh stated:

I shall not go into the historical background of the Act other than to say it was preceded by an order made under authority of the War Measures Act in 1941. The principles contained in that order were carried forward into the Reinstatement in Civil Employment Act, 1942. The Act is a very brief one containing only some eleven sections. We often hear criticisms on that score. It is suggested there are some possible contingencies not covered by the Act. Of course, there are some not covered. The draughtsman who could, in advance, provide the answer to each and every problem of reinstatement which may arise has, so far as I am aware, not been born yet. In fact, I frequently wonder whether the Act containing only eleven sections is not too long. Would it not be sufficient to state the objective? In any event, that is now idle speculation, as we are moving in the opposite direction.

In the reinstatement regulations made and published in January of this year, we have tried to clarify, to some extent, some of the provisions of the Act which, apparently, were not too clear. It is quite possible that, as experience grows, further regulations will follow.

Turning for a few moments to a quick review of the Act, perhaps the first question is—to

whom does the Act apply? Broadly, it applies to those men and women who served in the Armed Forces, including those who served in the Corps of Firefighters and the Merchant Marine. As a general rule the person claiming reinstatement must be able to show that he was employed by the employer for at least three months before joining the Forces. It also applies regardless of the manner in which the person joined the Force; that is, it applies equally to those who were called and those who volunteered. It also applies regardless of the kind of discharge, that is whether the discharge is honourable or otherwise.

Section 3 of the Act sets out the duty of the employer and the correlated rights of the employee. This one section of the Act contains the very pith and substance of the legislation. I shall not attempt, at this stage, to paraphrase that section. It is of sufficient importance that I read it in full:

It shall be the duty of any employer by whom a person accepted for service in His Majesty's Forces was employed when accepted for such service, to reinstate him in employment at the termination of his service in such occupation and position as would be consistent with the true intent and purposes of this Act and under conditions not less favourable to him than those which would have been applicable to him had he remained in the employment of that employer: Provided that the right to reinstatement shall be subject to established rules of seniority in the employer's establishment, with retention of seniority rights during the employee's period of service with His Majesty's Forces, or, in an absence of such rules to preference according to dates of first employment in the employer's service with due consideration to continuity of employment in that service: and provided further that for determining the employee's rights to pension or other benefits, service in His Majesty's Forces shall be deemed to have been service with the employer.

That one section, as you quite well realize, contains a multitude of problems both for us and for you.

After indicating its coverage and the obligation on the employer, the Act proceeds to provide certain defences which may be open to employers in certain cases. Briefly, the first of these is that the claimant did not apply for reinstatement within three months after discharge in Canada or within four months after discharge Overseas. The second is that, having been offered reinstatement, the claimant failed, without reasonable excuse, to present himself for employment. I should mention that there is no obligation on the discharged man to claim reinstatement immediately upon discharge. He is entitled to use that three months' period as he wishes. If he feels a little unsettled and he wants a little time to become familiar with civilian life, he is quite entitled to use that three months' period before returning to employment, provided always he does claim reinstatement before the end of that time.

A third possible defence open to the employer is that, by reason of a change of circumstances, it is not reasonably practicable to reinstate the claimant. I have stated that very briefly. The section is somewhat longer and a little later I might mention one or two practical illustrations of that particular defence.

The fourth is that the claimant is physically or mentally incapable of performing any work available in the employer's service. Now, it is not sufficient for the employer to say, this man is not capable of doing his old job. He has to go a little further and look around his establishment to determine whether there is not some other work which this discharged man is able to do notwithstanding his disability.

A fifth possible defence is that the claimant was a replacement for another man who had joined the service and who had been reinstated in employment. This particular defence can present some interesting problems. As the war has extended in length there are cases—I think they are not unusual—where there have been a series of three or four or half a dozen men who have passed through the same job. There was one man in the job back in the fall of 1939; he enlisted and was replaced by "B". In 1940, "B" enlisted and was replaced by "C" and so on down the line. We are frequently asked if all these men have a valid claim for reinstatement and the answer is No. Only one person is entitled to reinstatement in that job. If, unfortunately, "A" does not return, then "B" steps in and "B" has a valid claim for reinstatement. It might even work out that "A" is delayed in returning to the employer and "B" returns. "B", temporarily, has a claim to reinstatement, even though he will be replaced when "A" returns at a later date.

That is a very brief statement of the contents of the Act, but perhaps sufficient for present purposes. Section 3 of the Act, which I read a few moments ago, speaks of the "true intent and purpose of this Act." The intent is not stated in so many words, but it is, I believe, apparent on reading the Act as a whole and, perhaps, even from the fact Parliament has passed such legislation. No doubt there are many ways of putting into words "the true intent and purpose." I wonder if it could be described adequately as an assurance to our young people who left their employment to join the Forces that, in so far as is possible, on their return to civilian life they will find that they have not been prejudiced in their civilian careers by reason of the time spent in His Majesty's Forces.

Can we accomplish that purpose simply by a literal adherence to the provisions of the Act or is there not something more required?—something which cannot be stated in the exact words of an Act of Parliament or Regulation. Can we make good the promises to those serving in the Forces, without a proper approach to the problem of reinstatement or without a serious attempt to find the solution to the problem in the real spirit of reinstatement? On several occasions I have heard what was intended to be a criticism of the Act, something along these lines: "The Act is only a statement of intentions; it does not have the necessary teeth." Well, first of all, there are some teeth, but even if that were not so, would it be so wrong for the nation as a whole to say to its employers, "We expect you to treat your former employees on their discharge from the Forces, as if the time spent in the Forces had been spent with you." With or without the teeth, that can be accomplished, but only if approached in the proper spirit. If we, in the administration, were to depend solely or principally on the enforcement provisions of the Act, then I believe the overall results could be summed up in one word—failure.

In at least one group of cases enforced reinstatement is really quite valueless and that is true frequently of the managerial or executive positions. The same is not equally true of the lower-wage groups.

As just one illustration I would cite the case, and it is not an unusual case, of the young man or boy who left his employment as an office boy or messenger, and returned as a squadron leader, perhaps with decorations. It is hardly sufficient, in that type of case to read the Act literally and say, "Yes, he is entitled to his old job." I shall not say that we have a formula which will provide the answer to each and every case of that type. I do not think the answer can be found in a formula. I do not think it can be found in regulations. It depends on the nature of the employer's operations, the type of work and depends, more particularly, on the employer's approach to that problem.

Many employers have worked out and are working out their plans in connection with reinstatement; each has his own approach and most of them, I think, are quite sound. For example, some are already surveying their entire establishment, all of their branches, and they are looking at the files and saying, "Well now, this boy left us and here is what he was doing; he was eighteen or nineteen and he is now four or five years older. He is married and has children, responsibilities. Where, in our organization, could we fit this boy in?" They are assessing the whole setup in advance to find a spot where this man could be fitted in the light of changed circumstances; that is something which I do not think could be spelled out in regulations. The solution can be found, in most cases, if a real attempt is made to find the solution in the spirit of reinstatement.

It is quite true there will be many quite content to return to the old job, but certainly that is not true of all. There is another group wishing to return to the old establishment or the old firm, but they do expect a better-paid job. Perhaps this might be the largest group and the one causing the greatest difficulty. There is a further group and I hope this one will not be too large. I referred earlier to one of the defences open to the employer and that is, that by reason of changed circumstances it is not reasonably practicable to reinstate the applicant.

Here is one illustration of a situation where that might exist. Back in summer of 1939 the employer's peacetime establishment numbered about 500. Later in 1939 and 1940 he obtained a war contract which required plant and personnel expansion. The personnel jumped from 500 to 750 or 1,000. There are such cases. During that expansion new men were engaged, many of whom during this time of expansion left to join the Armed Forces. However, before some of these men return, say in the fall of 1945, the war contract has been finished and the plant has had to revert to its normal size of 500. Then, the question is, are all of those men who joined the company during the wartime expansion and who then joined the Forces, are they all entitled to reinstatement on discharge? The answer is, that the employer has a valid defence, that of changed circumstances within the meaning of the Act. We confidently hope that, in most cases, the employer will try to fit in as many of these men who joined him during that wartime expansion, and that he will attempt to find a spot for them even in the contracted firm.

Some employers, perhaps not the majority, but some are in the fortunate position of being able to guarantee every man who was with them before the outbreak of war and every man who joined them during the war that his position will be there and, in addition, they will be in the position to engage more discharged men.

Now, all are not in that same position, but a spot could be found for many of those men who joined the establishment during wartime expansion. It is not possible, without taking more time than is available, to deal with all the various problems in connection with reinstatement. For example, a question arises with regard to the various problems relating to collective labour agreements, seniority, vacations with pay, rates of remuneration, promotion and many others. I will attempt, however, to deal with just a few of these, particularly with those which seem to have created the most enquiries.

The one, I think, which causes more enquiries to come to us than any other is the question of a man's entitlement or right to vacation with pay after reinstatement. We had thought the Act fairly clear on that point, but apparently it was not. In order to remove any possibility of doubt, we included in the reinstatement regulations last January detailed provisions regarding the right to vacation with pay. Very briefly, it amounts to this, that the time spent in the Forces does count for determining a man's entitlement to vacations with pay.

For example, if the practice is that a man is entitled to one week's vacation after a year's service with the employer. Then, supposing a boy has been with the Armed Forces two years before returning to the employer in the spring of 1945. He is entitled to say, "My last year's service in the Forces is equivalent to service with you and I am entitled to vacation in the year 1945"; that is his privilege, that is his right under the regulations. Neither the Act nor the regulations attempt to give or purport to give retroactive vacations; that is, a man cannot say, "I was in the Forces in 1942, 1943 and 1944, so I am entitled to a paid vacation for that period." He is only entitled to vacation in the year of reinstatement and subsequent years.

There have been a few troublesome cases where men were reinstated on Wednesday or Thursday and wanted vacation to start immediately. We thought that rather unreasonable and have provided in the regulations that a man is not entitled to demand the commencement of his vacation period until he has been in employment for at least 90 days after reinstatement.

Another point which we attempted to cover in the regulations and which is a point of real difficulty is the matter of remuneration on reinstatement. The regulations on that point do not attempt to provide a complete answer for all possible contingencies which might arise. We have attempted to state certain principles which will provide a lead or a guide to both employers and employees in attempting to work out a proper solution of the matter on the rate of remuneration. Basically, it is this: if increases in remuneration are given principally by reason

of the passage of time, then the man is entitled to the increased rate of remuneration on reinstatement. If, on the contrary, increases are given by reason of other circumstances, personal stability, skill, capacity for leadership, factors of that type, then the man is not entitled to the increase immediately on reinstatement, but the regulations do require the employer, after the man has been reinstated, to attempt to evaluate the skills and experience the man has obtained in the Armed Forces and then to give him any increase to which he is entitled.

Similar principles apply in the matter of promotion. Again, that is a problem which won't be free of difficulty, either for you or for us.

There is one other section in the regulations to which I believe I should call your attention and that is that we have extended, by six months, the period during which a man who has suffered disability, may claim reinstatement. If a man is temporarily incapable of resuming his employment, he can keep his claim alive for a further period of six months by informing his employer of his condition and indicating his desire to claim reinstatement at a later date. It is to the credit of all concerned that since that regulation has been made there were, certainly, no objections on the part of any employer to giving a disabled man a further period of six months in which to exercise his right of reinstatement.

I have mentioned frequently during these remarks the proper approach to reinstatement problems and the spirit of reinstatement. Perhaps it would not be amiss to say something in regard to our experience up to this time. I can tell you that, with very rare exceptions, employers are approaching the problems of reinstatement in what I would regard as the spirit of reinstatement. There has been no instance, as yet, where we have had to consider legal action against an employer for failure to reinstate. I sincerely hope that the time when we have to take the first action is still far in the future. However, it would not be wise, as a matter of fact it would be folly, to anticipate future success in the administration of the Act solely on the success experienced to date. We have been operating during a period of acute manpower shortage. Obviously the problems of reinstatement are easier of solution at such a time. We must be realistic in recognizing that there may not continue to be, indefinitely, as acute a shortage of manpower as we have seen in the past few years, and that the difficulty in working out questions of reinstatement may depend on the demand or lack of demand for manpower.

Very few employers are taking the stand that "this is what the Act requires and that is all I will do." Rather, most of them say, "this is the minimum required by the Act; how much more can I do?" As long as that attitude prevails we can look forward with some degree of optimism towards realizing the true intent and purposes of the Act. We believe that those who have served in the Forces are entitled to no less.

Membership of Industrial Selection and Release Committees

REFERENCE was made in the June issue of the *LABOUR GAZETTE* to the establishment of an Industrial Selection and Release Board at Ottawa, together with district committees.

The purpose of the Board and committees is to receive applications by employers interested in securing the speedy release of key personnel from the Armed Forces for the purpose of increasing production and hence making possible the prompt employment of other men as discharged.

The Deputy Minister of Labour, Mr. A. MacNamara, on June 14 made public the names of the members of the Industrial Selection and Release Board at Ottawa, and the names of the chairmen and members of the corresponding committees in the military districts.

Members of the Dominion Board are:

Chairman, Raymond Ranger, Associate Director of National Selective Service, Department of Labour;

Deputy Chairman, W. K. Rutherford, Acting Chief Employment Officer, Employment Service and Unemployment Insurance Commission;

Representatives of the Department of National Defence, for Navy, Commander T. M. C. Taylor, Director of Personnel Selection; for Army, Brig. G. A. Ferguson, Deputy Adjutant-General (B); for Air, P. S. Conroy, Chief Executive Assistant to the Deputy Minister for Air;

Department of Reconstruction, Lieut. Col. T. F. Flahiff, Executive Assistant to the Director-General, Industrial Reconversion;

Department of Munitions and Supply, Mr. A. E. McMaster, Assistant Co-ordinator of Controls;

Wartime Prices and Trade Board, Mr. D. G. Mackenzie, Chief, Industrial Division;

Alan George, Assistant Associate Director of N.S.S., was appointed to act as secretary.

Members of the London Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice W. T. Henderson; Deputy Chairman, W. A. Martin; Department of National Defence, Major A. C. Carter; Departments of Reconstruction and Munitions and Supply, Lt. Col. Wm. Mayall; Employment Service and U.I.C., W. S. McTeer; Mobilization Registrar, A. B. Harris.

This Committee is located in Room 801, Huron 1, Erie Building, London, Ontario.

Members of the Toronto Military District Industrial Selection and Release Committee include: Chairman, His Honour Judge A. Cochrane; Deputy Chairman, I. Ilsley; Department of National Defence, Major A. E. Cambridge; Departments of Reconstruction and Munitions and Supply, J. F. W. Renwick; Employment Service and U.I.C., G. J. Lockerby; Mobilization Registrar, Capt. A. C. Lyons. This Committee is located at 200 Bay Street, Toronto, Ont.

Members of the Kingston Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice A. W. Greene; Deputy Chairman, W. J. Hyssop; Department of National Defence, Major R. E. McLaren; Employment Service and U.I.C., J. H. Black; Mobilization Registrar, Lorne McDonell; Departments of Reconstruction and Munitions and Supply, A. V. Woodruff. This Committee is located at 82 Princess Street, Kingston, Ontario.

Members of the Montreal Military District Industrial Selection and Release Committee include: Chairman, His Honour Judge Leon Lajoie; Deputy Chairman, H. E. MacDonald; Department of National Defence, Major J. D. Clegghorn; Departments of Reconstruction and Munitions and Supply, R. McLeay; Employment Service and U.I.C., R. Guevremont; Mobilization Registrar, A. de Gaspé Taché. This committee is located at 505 Transportation Building, Montreal, P.Q.

Members of the Quebec Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice H. A. Fortier; Deputy Chairman, J. L. S. Roberge; Department of National Defence, Capt. W. Stein; Employment Service and U.I.C., H. St. Onge; Mobilization Registrar, L. P. Mailly; Departments of Reconstruction and Munitions and Supply, C. Slater. This Committee is located at 178 Charest Blvd., Quebec, P.Q.

Members of the Halifax Military District Industrial Selection and Release Committee include: Chairman, His Honour Judge K. L. Crowell; Deputy Chairman, A. E. Frame; Department of National Defence, Major W. Mitchell; Departments of Reconstruction and Munitions and Supply, T. M. Pye; Mobilization Registrar, Col. Edgar W. Mingo; Employment Service and U.I.C., L. C. Jones.

The address of this Committee is P.O. Box 574, Bank of Nova Scotia Building, Halifax, N.S.

Members of the Saint John Military District Industrial Selection and Release Committee include: Chairman, Hon. Chief Justice J. B. Baxter; Deputy Chairman, T. C. Crosbie; Department of National Defence, Capt. C. E. Harrington; Employment Service and U.I.C., J. C. Peck; Mobilization Registrar, Col. E. J. Mooney; Departments of Reconstruction and Munitions and Supply, B. W. Kelly. This Committee is located in the Bank of Commerce Building, Saint John, N.B.

Members of the Winnipeg Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice J. E. Adamson; Deputy Chairman, C. A. Clendenning; Department of National Defence, Col. N. R. Nagle; Departments of Reconstruction and Munitions and Supply, R. A. Pine; Employment Service and U.I.C., C. R. Hudson; Mobilization Registrar, Lt. Col. C. D. McPherson. This Committee is located at Law Courts, Winnipeg, Manitoba.

Members of the Regina Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice P. M. Anderson; Deputy Chairman, J. S. Palmer; Department of National Defence, Lt. H. R. Sanderson; Employment Service and U.I.C.,

S. H. Foster; Mobilization Registrar, F. C. Wilson; Departments of Reconstruction and Munitions and Supply, A. P. Hessey. This Committee is located in Hamilton Building, Regina, Sask.

Members of the Edmonton Military District Industrial Selection and Release Committee include: Chairman, Hon. Chief Justice Horace Harvey; Deputy Chairman, R. G. Reid; Department of National Defence, Major L. G. McCarthy; Departments of Reconstruction and Munitions and Supply, A. E. Jones; Mobilization Registrar, R. English; Employment Service and U.I.C., D. M. Barton. This Committee is located in the Massey-Harris Building, Edmonton, Alta.

Members of the Pacific Command Military District Industrial Selection and Release Committee include: Chairman, Hon. Mr. Justice A. M. Manson; Deputy Chairman, H. Mills; Department of National Defence, Capt. W. C. MacDonald; Departments of Reconstruction and Munitions and Supply, F. J. Dolan; Employment Service and U.I.C., A. Dagleish; Mobilization Registrar, C. G. Pennock. This Committee is located in the Yorkshire Building, Vancouver, B.C.

The Industrial Selection and Release Board is located in the Motor Building, 238 Sparks Street, Ottawa, Ontario.

Notes of Current Interest

Absenteeism in Canadian war industry

With a view to ascertaining the extent of absenteeism in Canadian war industry, the Department of Munitions and Supply, in 1942, commenced taking occasional sample polls of industries across Canada. (L.G., 1943, pp. 10, 160, and 421).

The Department's latest and final poll was taken in June, 1945. Figures were supplied by 45 concerns representative of industries in every province, except Prince Edward Island. The total number of persons employed by the industries reporting in June, was 66,287. The number of persons absent daily during the month averaged 4,028, or a percentage of 6.07. The percentage of absenteeism shown by individual firms ranged from 1.3 to 13.7 per cent.

Steelworkers confer with Department of Reconstruction on post-war program

The first in a series of meetings between the Minister of Reconstruction and representatives of organized labour, in accordance with the policy of the Department of Reconstruction, took place on Wednesday, July 18. The United Steelworkers of America, represented by Messrs. C. H. Millard, National Director, John Mitchell and W. F. C. Kidd, met with the Honourable C. D. Howe, Minister of Reconstruction, Mr. H. Carl Goldenberg, Labour Adviser, Department of Reconstruc-

tion, Mr. H. J. Carmichael, Director-General of Industrial Reconversion in the Department of Reconstruction, and the Reconstruction Labour Committee.

Mr. Millard on behalf of the Steelworkers presented a submission embodying the post-war program of the organization. This program, among other things, recommends the establishment of a tripartite Joint Industry Council in the steel industry, representing labour, management, and the public; establishment of full collective bargaining and union security; establishment of union-management production committees in every plant in the industry; a guaranteed minimum annual wage of \$1,750 for wage earners in the industry; the replacement of National Selective Service by an efficient National Employment Service, requiring unemployed to register and employers in turn to register for certain types of production and to provide job training; and the co-operation of the Federal government in encouraging the provinces to legislate for an 8-hour day and 40-hour week in all industrial undertakings.

The Honourable Mr. Howe expressed interest in the recommendations of the United Steelworkers and undertook to consider them and to discuss them with the management of the various steel plants. He urged the necessity of co-operation between labour and management in meeting the problems which will present themselves in the period of transition from war to peace.

**Mrs. Rex Eaton
appointed as
chairman of
Training
Committee**

Appointment of Mrs. Rex Eaton, Associate Director of National Selective Service, as chairman of the Coordinating Committee on Training which has been functioning in the Labour

Department for some time, was announced on July 17, by Hon. Humphrey Mitchell, Minister of Labour.

Appointment of A. H. Brown, Departmental Solicitor and Assistant to the Deputy Minister of Labour, as Vice-Chairman, was also announced.

The Committee is for the purpose of bringing together the various functions of the Dominion Labour Department which relate to training, and covers both the field of rehabilitation training in connection with ex-members of the Armed Service, and training schemes for civilian industrial workers during the transition period. (L.G., March, 1945, p. 265. See also page 1120 of this issue.)

**Further rise in
cost-of-living
index**

The Dominion Bureau of Statistics cost-of-living index continued upward from 119.6 on June 1, to 120.3 on July 3, 1945.

Further advances in fresh vegetables accounted for most of this increase, with the food index mounting from 133.4 to 135.6. Eggs and a few meats also showed gains, although oranges and raisins averaged somewhat lower. The clothing index moved fractionally from 122.1 to 122.2 and homefurnishings and services increased from 118.9 to 119.2. The fuel and light index recorded the only group decline from 106.6 to 106.5. Rentals remained at 112.1 and miscellaneous items at 109.4. The wartime increase in the index has been 19.3 per cent.

**Employment and
Industrial
Statistics**

The latest statistics available reflecting industrial conditions in Canada are shown in the table on page 1081.

A decline in industrial employment at June 1, was recorded by the index of employment calculated and published by the Dominion Bureau of Statistics. Although the decline was slight, 0.1 per cent, it is of interest because it is the only time a decline was recorded at that date in the twenty-five years of the record. Also it is the sixth successive month in which a decline was recorded.

Comparative figures for the index at certain dates are 175.3 for June 1; 175.5 for May 1; 180.5 for June 1, 1944; 181.2 for June 1, 1943; and 113.1 for June 1, 1939. The latest figure

is higher than at any June in the record except as noted above for 1943 and 1944. It is 55 per cent higher than at June, 1939. After adjustment for seasonal variation the index at June 1, was 175.3, the same as the unadjusted, as compared with 182.2 at May 1.

The 15,328 firms co-operating with the Bureau showed a combined working force of 1,790,072 at the date under review. The total pay roll was \$57,461,926. The average earnings were \$32.10 per week as compared with \$32.55 at May 1, \$31.80 at June 1, 1944, \$30.93 at the same date in 1943 and \$25.25 at June 1, 1941, when this record was commenced.

Employment in manufacturing, by far the largest group included in the statistics, was slightly lower reflecting the contraction in activity in non-ferrous metals, chemical and iron and steel plants. Noteworthy increases in the manufacture of animal foods, lumber, pulp and paper were recorded. A decline in this group at June 1, is contrary to the usual movement at that date although a minor reduction was recorded in June, 1944. Among non-manufacturing industries, logging showed a contra-seasonal decline. Mining also was lower. Increased employment was recorded in communication, transportation and construction while the services group was unchanged from the previous month.

Productive operations as indicated by the index of the physical volume of business also calculated by the Bureau were slightly higher in June than in the previous month but were at a considerably lower level than in June, 1944. This index reflecting the trend in mineral production, manufacturing, construction, electric power output and in the distribution of goods was 219.5 for June, 218.6 for May and 238.8 for June 1944. Three groups, namely, mineral production, manufacturing, and the production of electric power were lower than in May while increased volume was indicated in the construction industry, and in the distribution of goods.

Information available for the first five months of 1945, as compared with the similar period in 1944, shows the business index to be 7.9 per cent lower, industrial production 11.3 per cent, mineral production 16.4 per cent, manufacturing 10.3 per cent, and the value of imports 8.4 per cent lower. Slaughtering of cattle were 29.2 per cent higher, and hogs 31.7 per cent lower. Production of creamery butter was 0.7 per cent lower than in the five month period of 1944 while the production of cheese increased 9.2 per cent. The value of construction contracts awarded increased 1.3 per cent, and the consumption of "firm power" 8.2 per cent.

Supplementary university grants to ex-service personnel

The Honourable Brooke Claxton, who was acting as Minister of the Department of Veterans Affairs in the absence of the Honourable Ian Mackenzie, announced on July 19 that the Department of Veterans Affairs is authorized to pay a supplementary grant to any university in Canada in an amount not exceeding \$150 for each person on whose behalf tuition fees are paid under the provisions of the Post-Discharge Re-Establishment Order. The supplementary grant is in addition to the regular university fees, provided that the total payment of fees and supplementary grant shall not exceed \$500 for any one student during an academic year.

This supplementary grant is authorized for the period July 1, 1945, to June 30, 1946, and is designed to assist in offsetting the amount by which student fees do not cover university costs, as well as to provide facilities and to secure suitable staff to deal with the large numbers of discharged persons who intend to take advantage of the opportunity for university training provided by the Post-Discharge Re-Establishment Order.

Labour conventions cancelled for 1945

Following the ban placed on conventions by the War-time Prices and Trade Board as from July 20, the Annual Meetings of the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Canadian and Catholic Federation of Labour, have been cancelled for 1945.

The Order (No. 535) was rendered necessary by the heavy movement of troops from overseas resulting in undue strain on transportation systems and hotel accommodation in "congested hotel areas". It stipulates, among other things, that "a convention or other meeting may not be held if more than fifty persons attending it use railway, bus or air transportation (other than urban transportation) for any part of their journey to it".

A "congested hotel area" is defined as "an urban area designated from time to time by the Board by notice published in Canadian War Orders and Regulations", and includes a ship on board which a convention or other meeting may be held. A "convention or other meeting", for the purposes of the Order, means "any organized gathering of persons, regardless of the purpose for which it is organized, other than sessions of federal or provincial legislatures and inter-governmental gatherings of government officials and representatives."

Employment of young persons in coal mining

A recent Order in Council has withdrawn the authority given in 1943 for the employment of male persons not under 16 years of age, as coal mine workers, and of female workers not under 18 years of age as workers on the surface around coal mines.

The effect of the Order (P.C. 4845, July 10, 1945) is to restore provincial restrictions on the minimum age for employment in coal mines. In 1943 these provincial restrictions had been temporarily set aside, following the declaration of a state of national emergency in regard to coal production in Canada, as one of a number of measures taken to assist the coal mining industry in overcoming labour shortages (L.G., 1943, p. 739). The previous minimum age for employment of boys had been reduced to 16, and the employment of women for some of the lighter surface occupations in the coal mining industry had been allowed.

According to the new Order, boys or women already working for coal mines under the previous Dominion authority will not be disturbed at this time. The effect of the Order is to prevent the engaging of any further persons except in accordance with provincial regulations.

Transfer of farm workers

Approximately 2,000 farm workers were transferred to Ontario from the Prairie Provinces to help with harvesting during the summer of 1945. This is the largest number of farm workers yet recorded in a west to east movement in four years' operation of the policy of long distance transfers of farm labour under the Dominion-Provincial Farm Labour Program.

The men from Western Canada were a major factor in easing farm labour shortages in southwestern Ontario. Commenting upon the movement the Minister of Labour, Hon. Humphrey Mitchell stated: "Ontario farmers have expressed complete satisfaction with the help received from Western Canada. This is further assurance of the success of the Farm Labour Program and assurance that all crops will be harvested, with maximum food production in Ontario this season."

Farm workers on the Prairies were recruited by Dominion and Provincial farm labour officials, who were assisted by rural municipal secretaries.

The efforts of the Prairie officials were supplemented by newspaper and radio announcements, while the Dominion Government, through the co-operation of a low rate granted by the railway companies, took care of the cost of transportation, except for \$5 which each man was required to pay toward his

return fare. Care was taken that only those men who could be spared from their farms during the slack period between spring seeding and the Western harvest were allowed to volunteer. Agricultural production in the worker's own locality was not allowed to become affected.

In regard to the return movement of workers from east to west, it is anticipated that approximately 5,000 extra workers from Eastern Canada will be required to harvest this year's crops in the Prairie Provinces.

Labour exit permits for student nurses

Hon. Humphrey Mitchell, Minister of Labour, announced in July that instructions had been sent to Local Offices of the National Employment Service, concerning the issuance of labour exit permits to young ladies desiring to leave Canada to go to the United States in order to take a nurses' training course.

The instructions point out that owing to shortages of graduate nurses in Canada, it is necessary to maintain a satisfactory enrolment in Canadian schools of nursing, so that officers in Women's Divisions of Local Employment Offices are, by frequent consultation with the Registered Nurses' Association, to watch Canadian enrolments closely. The issuance of labour exit permits authorizing departure from Canada of girls who are qualified to enter as nurses-in-training, will be restricted where it would threaten to adversely affect enrolment in Canada.

Furthermore, the instructions explain that prospective nurses, who lack adequate educational qualifications for admission to Canadian schools of nursing, and who consequently enter American schools which have lower educational requirements, are not, after graduation, eligible for registration as nurses in Canada. To avoid disappointment to any young women unaware of this fact, Local Employment Offices are to refer applicants to the Registered Nurses' Association to have their future position explained, before issuing labour exit permits. If an applicant still desires to enter the United States for her course after knowing her status, the labour exit permit will be issued whenever the reason for non-admission to a Canadian school is education, health, or age.

Change in title of advisory boards

A change has been made in the designation of Regional Selective Service Advisory Boards, which will now be

known as "Advisory Boards, Labour Department."

The Boards were set up under authority of an Order of August 10, 1943 to advise on matters relating to the administration of

National Selective Service Regulations and policies with particular reference to regional problems (L.G., 1943. p. 1214).

Their changed title reflects the change in emphasis of their work to matters pertaining to reconstruction and the re-assignment of war workers and men from the armed services.

Labour Department booklet on rehabilitation

A booklet entitled, "Dismiss—But What of a Job?," was issued recently by the Dominion Department of Labour. Its purpose is to explain the facilities

afforded by the Department in connection with rehabilitation of ex-service men and ex-service women. In addition, the booklet contains a brief outline of the main legislative changes in wartime from the Dominion viewpoint, as they affect the conditions of employment in industry.

The booklet has been made available to vocational and educational advisers in the Armed Services, officers of the Departments of Veterans Affairs and Labour, (including the National Employment Service), members of committees interested in rehabilitation, employers in larger industries, trade unions, and others.

Publications on provincial labour standards

The June, 1945, edition of the publication, *Provincial Labour Standards Concerning Child Labour, Hours of Work, Minimum Wages and*

Workmen's Compensation, was published recently by the Department of Labour. First issued in June, 1944, the revised edition shows the new workmen's compensation rates established in several provinces, the changes since June, 1944, in maximum hours in Alberta and Ontario, the minimum age for the employment of children in Prince Edward Island, as well as revised minimum wage-rates in some provinces. Copies of the publication may be obtained by applying to the Legislation Branch, Department of Labour, Ottawa. Also obtainable from the same source is a second pamphlet, *Legislation Concerning Employment of Women—Provincial Laws, July, 1945*, which gives, in brief form, the provisions of provincial statutes and regulations concerning the employment of women, with respect to hours and conditions of work, prohibited employments, home-work, and employment before and after child-birth.

Laval University holds course in industrial relations

In order to study problems related to the rapid growth of industries and the development of trade unions, Laval University organized last year a Department of

Industrial Relations which aims at training technicians who, as directors of personnel,

local and union officials, inspectors of joint committees or civil servants, will have to do with labour and social security legislation. Through its Industrial Research Board, the School of Social Sciences has established permanent contacts with employers' associations and trade unions.

As a further development in its industrial relations program, Laval recently organized an intensified session on industrial relations. From May 21 to June 2, over 75 persons attended the industrial relations classes and took part in the forums. Among those present were 18 local and union officials, 31 secretaries and inspectors of joint committees, 2 representatives of employers' associations, 13 representatives of employers, and 14 civil servants from the Department of Labour.

Professors of the Department gave a course of lectures on the following subjects: 1—social ethics; 2—history of employers' associations and trade unions; 3—historical evolution of industrial relations; 4—security at work; 5—industrial hygiene; 6—the worker in his cultural, family and economic life; 7—industrial life and industrial relations; 8—social security.

Comments of those in attendance indicated that the course met needs felt by both employers and trade unions. One trade union leader declared: "The University is in a position to bring together persons belonging to the most varied associations . . . This permits the mutual understanding of the whole working class, no matter to what group it belongs." Others felt that this meeting of employers and employees, with a view of studying thoroughly industrial problems, provided an exceptional opportunity of considering solutions in a spirit of co-operation and justice. Encouraged by the success of this first experience, the School of Social Sciences plans to further extend the scope of its activities.

**Training of
foremen
advocated by
cost accountant**

With a view to "keeping labour working" and "getting the highest production per man hour" in the immediate post-war period, a brief article by L. W. Bennett, R.I.A., in *Cost and Management* for June, advocates the systematic and intensive training of supervisors and foremen. It is asserted that an efficient foreman must be able to instruct and train his subordinates but to do this satisfactorily the employer must provide him "with the necessary tools."

These tools consist of books, bulletins, courses, technical data, information respecting "company policy" and company plans, etc. To make efficient use of these tools, it is added, an energetic plant committee, headed by a qualified training director, or personnel

manager is essential, to organize and assist supervisors and foremen with their studies, plan meetings with them and find answers to their problems. As labour legislation and labour agreements are of growing importance they should be included in such courses of instruction.

It is important too, to include instruction in the art of teaching, so that foremen may convey effectively to their helpers the instructions they themselves receive.

These suggestions are in line with the work carried on in recent years by the Vocational Training Branch of the Department of Labour (L.G., May, 1945, p. 726).

**Minimum wage
of 75 cents
an hour
proposed in
U.S. Congress**

Proposals have been introduced in both houses of the United States Congress to increase minimum wage rates and to shorten the standard work week.

The present minimum wage rate, established by the Fair Labour Standards Act of 1938, is 40 cents an hour. It is proposed that this rate be replaced by a rate of 65 cents an hour, to take effect within 120 days after the law goes into effect, and that the new rate in turn be increased to 70 cents within one year and 75 cents within two years. Each of these successive minimums would apply only to unskilled jobs, and higher minimums would be set for other job classifications. The length of the regular work week would change at the same time as the rate. Thus, time and one-half pay would begin after forty-four hours when the 65 cents rate became effective, after forty-two hours in the second year, and after forty hours upon the rise of the minimum to 75 cents.

Industry committees would continue to determine minimum rates, subject to the approval of the administrator. They would also be empowered to recommend application of the 75 cent minimum for unskilled jobs immediately after the passage of the measure.

The protection of the act would be extended to certain workers not previously covered, including seamen, persons employed in the canning and processing of fish, and those handling, packing and storing agricultural and dairy products for market if they work within the "area of production."

In introducing the Senate bill, Senator Claude Pepper explained that its purpose was to "maintain a high level of purchasing power among the mass of the people." By "putting a floor under wage rates," he contended, it will be possible to "keep the (national) economy flourishing at a high level" and thus prevent unemployment.

A further recent development in wage policy in the United States was the signing by seventy

members of the House of Representatives of a petition asking President Truman to revise the "Little Steel" formula (which has limited wage increases to 15 per cent above the level prevailing in January, 1941) so as to permit further wage increases.

**Woodworkers
Union obtains
extended
vacation**

The National War Labour Board of the United States has awarded the International Woodworkers two weeks annual vacation after five years of service, an allowance double that granted after one year's service. About 43,000 members of the union employed by 326 companies engaged in logging, sawing and plywood operations in the Pacific northwest of the United States have been affected. The contracts between the companies and the union now provide that workers with one year or more of service may have three days of vacation pay after 840 hours of work; four days of pay after 1,120 hours and six days after 1,400 hours.

**International
Labour
Conference
to be held
in Paris**

The 27th session of the International Labour Conference will open in Paris on October 15. It will be attended by delegations from the member states, and invitations have been extended also to those of the United Nations which are not members of the I.L.O. to send observers. These countries include the Soviet Union, the Ukrainian S.S.R., the Byelorussian S.S.R., Paraguay, Nicaragua, Guatemala, El Salvador, Honduras, Saudi Arabia, Syria, Lebanon, and the Philippine Commonwealth.

At the last session of the Conference, held in Philadelphia April 20-May 13, 1944, forty-one member states were in attendance. Each of the states is entitled to send four delegates, two representing government, one the workers and one the employers. Each delegate may be accompanied by eight advisers.

The agenda of the Paris Conference will comprise six items. These are:

1. Director's Report on the social problems of the immediate post-war period with special reference to Europe and to the future policy and program of the I.L.O.
2. The maintenance of high levels of employment during the period of industrial rehabilitation and reconversion.
3. The welfare of children and young workers.
4. Matters arising out of the work of the Constitutional Committee of the Governing Body.
5. Minimum standards of social policy in dependent territories.
6. Reports on the application of the International Labour Conventions.

The Conference will be preceded by a meeting of the Governing Body on October 10, and will be followed by a Preparatory Technical Maritime Meeting on November 15 in London, the purpose of which will be to prepare for a special maritime session of the International Labour Conference, scheduled for early in 1946.

**International
Youth Charter
drafted by
I. L. O.**

One of the items on the agenda of the 27th session of the International Labour Conference, to be held in Paris beginning October 15, is the welfare of children and young workers.

Qualified experts from ten countries gave preliminary consideration to this matter at a meeting held in Montreal from May 23 to 30.

Study was made of a draft of an International Youth Charter which will be proposed for adoption by the Conference. Coming from North and South America, from Europe and from Asia, the experts were able to give the International Labour Office the benefit of their varied experience, and to provide technical knowledge of various aspects of the problem, towards the framing of the Charter.

The purpose of the Charter is to lay down the general principles of a "systematic social policy" governing the protection of children and young workers.

Canada was represented at the meeting by Dr. C. F. Davidson, Deputy Minister, Department of National Health and Welfare; and Miss Margaret Mackintosh, Chief, Labour Legislation Branch, Department of Labour. Dr. Davidson was appointed chairman of the meeting.

Other experts in attendance included Miss Katherine Lenroot, Chief of the Children's Bureau, United States Department of Labour; Mr. Maurice Denis, Government Commissioner for Youth Employment, Belgium; Dr. Guillermo Morales Beltrami, Director General of the Child and Youth Welfare Department, Ministry of Health and Social Welfare, Chile; Mr. Cheng Rao-Ku, former Acting Director, Social Welfare Department, Ministry of Social Affairs, China; Mlle. Rousset, Labour Inspector, France; Miss F. I. Taylor, Senior Deputy Chief Inspector of Factories, United Kingdom; Dr. Paula Alegria, Chief of the Women and Children's Bureau of the Ministry of Labour and Social Welfare, Mexico; Mr. F. Rutten, Professor of Industrial Psychology, Netherlands; and Dr. Manuel Salcedo, Director, National Maternity and Child Welfare Service, Peru. UNRRA was represented by Miss Martha Branscombe, Chief of its Child Welfare Section.

Rehabilitation in Employment

Re-establishment of Veterans Termed an Opportunity for Employers

IN a radio address delivered over a trans-Canada network on July 30, the Hon. Humphrey Mitchell, Minister of Labour, outlined the steps being taken under the government rehabilitation program for the benefit of men and women returning to civilian life after service in the armed forces and referred to the responsibilities of employers and trade unions in making the program a success.

The text of the Minister's speech is as follows:

An Opportunity for Employers

Week after week, thousands of our men—sons, brothers and husbands—are returning home after years abroad. They sailed from our shores to take part in the greatest and most destructive war in history, carving Canada's name high on the pillar of courage and national pride. They have played a worthy part in the decisive defeat of the forces of evil in Europe.

These years have been taken out of young lives. They are years that in peace time would have been their most important and formative period on the road of life. I do not say that these men—sailors, soldiers and airmen, have begrudged the years they have given for their country. Far from it, we have had the greatest voluntary armed forces in our history—men who knew that the stakes were high—world liberty or world oppression. Nevertheless, the country as a whole has a sharp realization of the responsibility in seeing that our returning men are properly re-assimilated into civil life.

They have served Canada. It is Canada's turn now to serve them.

Canada's Rehabilitation Program

Our rehabilitation program, it has often been pointed out, equals if it does not surpass, that provided by any other country. Under it opportunities are provided for the veteran to take up farming; to open his own business; to acquire a home; to continue educational courses; to undergo trade training—or to establish himself in any one of several other ways. Then there are other benefits—war service gratuities, clothing allowances, certain medical and dental care, out-of-work benefits, and so on. To ease the return to peacetime employment, the Federal Government provides veterans with credit under unemployment

insurance, to make up for the time in the Forces.

Everything possible has been planned to assure the successful transition of a man from soldier to civilian. There are two reasons for this. First, appreciation by the nation for the service rendered; second, a realization of the fact that intelligent, orderly absorption into our civil economy is highly essential.

Canada still has her duty in the Pacific war—and will play the part assigned to her as nobly and effectively as in Europe. Then we have the post-war years—the reorganization of our life on a peace basis.

Modern war calls for total mobilization, for a wholesale shift in our national economy. Over a period of six years we have taken more than a million men and women out of peacetime pursuits in order to man our defences, and these we have separated from normal economic activity for a lengthy period.

The men and women who have been in our armed forces must be fitted into our economy as civilians, so that each will contribute to a greater Canada of the future. That is a prime reason for a Rehabilitation Program. Naturally, there is a limit to what governments can do. After all a government is the executive of the people. The government's money is the people's money, paid in taxes or loaned to run the country's business.

While the government, through certain measures may assist greatly in the finding of positions for veterans of the war—in the final analysis that may best be done through private channels. Free enterprise has brought this country far along the road of progress and prosperity. In the main most of the opportunities for jobs, careers, success in life, have come through free enterprise. I know how well employers are aware of this and how keen they are to co-operate with the government in making our rehabilitation program fully successful.

It can be truly stated, free enterprise is on trial in the problem of re-absorbing our servicemen and war workers into peacetime vocations. My sincere conviction is that free enterprise will meet the test in co-operation with the Government and our trade unions. All have shown a fine understanding of the debt we all owe to those who fought.

The men and women who, from now on for a year or more, will be seeking opportunities for useful peacetime lives, are the very

best of our population. They are young, they have shown their mettle in the armed services; they have learned the value of self-reliance—self-discipline—of cooperation and teamwork. Add that to their own personal characters and the combination indeed is one to make us feel encouraged as to Canada's progress in future years.

Skills Acquired in the Forces

In this war men in the armed forces have been given a greater degree of mechanical and technical training than ever before. That in itself should make them more useful and competent employees. So real has been this element of training in the Services, that the Government has set up a Royal Commission on Veterans' Qualifications, to co-relate training in the Services with civilian occupations. The work of this Commission will be helpful alike to employers and veterans. It is important to Canada that these skills gained in the Forces be used in civil occupations.

The Armed Services themselves and the Department of Labour have also done much work along the same line.

An important phase of the Rehabilitation Program is the Rehabilitation Training Plan, operated jointly by the Dominion and the Provinces. Apprenticeship, trade training in classes and training on the job, all come under this Plan.

By looking ahead, by anticipating his labour supply problem, the employer can arrange to engage veterans to fill up jobs, and through co-operation with Canadian Vocational Training he can see to it that those veterans are given trade training, with Government assistance, for the jobs he will have to fill. By searching out chances to give "training on the job", the employer will be doing a public service. In other words, the Training Plan helps both veteran and employer, to fit the man or woman into a job which takes acquired skill—to the advantage of both.

Reinstatement in Civil Employment

Considering the size of our Forces, the problem of veterans' re-employment facing employers is indeed large, but I for one have confidence our employers will measure up—to both their duties and their opportunities.

This confidence is based upon experience. As is well known, the Reinstatement in Civil Employment Act required employers to take back their employees who left jobs to enlist. Up to this time thousands of discharged

personnel have gone back to their old jobs under this statute. The National Employment Service, which administers the Act, has had to serve as referee in a few cases, but not in one single case has it been necessary to compel an employer to comply with the law!

Furthermore, a great many firms have gone to much trouble to carry through programs for the reinstatement of their employees under conditions even beyond the requirements of the Act.

I want to point out to employers that not all veterans have jobs to which they can return. In fact, more veterans must find new jobs than will be reinstated. There are those who left school to enlist—others who were in odd jobs before the war—persons whose work was not steady. All must be looked after.

We now have a National Employment Service to assist in placing veterans and others needing employment and I cannot urge employers too strongly to use the local offices across Canada, to meet their labour supply problems. These Employment Office staffs have been given special training for the task of bringing employer and veteran together, as employer and employee. The Offices will help both. Both need the Employment Service.

Handicapped Veterans

Then there is the handicapped veteran—he has a special appeal to our consideration. What we must keep in mind is that the handicapped man as an employee is not a liability; more often than not he is a better than average worker. He has proven so in our war plants during the past five years.

An employer should give consideration to engaging the war pensioner, partly as a patriotic duty; but once employed, I am sure the pensioner will prove his efficiency and faithfulness. To co-operate with employers the Dominion Government pays workmen's compensation for pensioners with disabilities of over twenty-five per cent.

I ask employers and trade unions to give careful thought to this question of rehabilitation. The Dominion Government, as an employer, is giving veterans a preference in appointments. The problem involved in the employment of veterans is great, but it offers rich rewards. A brighter, a better Canada for all will follow if we all do our share to make a success of a task which means so much individually and nationally.

Wartime Controls in the Transition Period

Activities of Wartime Prices and Trade Board, April 1—June 30, 1945

THE following article, prepared in the Economics Branch of the Wartime Prices and Trade Board, describes the developments in Board policy brought about by the end of the war in Europe.

The Board's work in controlling supplies and prices of foods, textiles, durable goods,

paper, and rentals and shelter is described from the point of view of the over-all objectives of meeting war needs, sending necessary supplies abroad, maintaining fair distribution at home, avoiding inflation and attaining a high peacetime level of employment.

Introduction

Developments in the second quarter of 1945 were shaped by the end of the war in Europe. The advent of the period of transition and of the one-front war led to a review by the Government of the policy governing wartime controls and a reconsideration of administrative procedures by the control agencies in the light of the new policy directives.

The government's policy in relation to the controls administered by the Wartime Prices and Trade Board, as well as by other agencies, was outlined in the "White Paper on Employment and Income" published in April. It was stated there that "in the period following the European war, when only a limited program of reconstruction can be begun, it will be the policy of the government to relax controls over production, materials and manpower as rapidly as supplies justify". It was pointed out, however, that many controls would continue to be needed for a time.

In his statement on wartime controls on May 10, the Minister of Finance, speaking as the Acting Prime Minister, pointed out that in addition to safeguarding needs of the Japanese war and essential civilian supplies, controls should be used, under conditions of inadequate supply, "to facilitate the use of manpower, materials and production facilities released from the war program for the purposes which the government has approved, viz., the rehabilitation of liberated countries, re-establishment and expansion of non-war exports, reconversion and expansion of industry, re-equipment of agriculture and primary industries, the housing program, and increases in the production of consumer goods".

It was expected that as war production was cut back, facilities and materials would become available for additional production of household appliances and other durable goods. While there was the possibility of increasing production, the rate and extent of

such increase was still limited by continuing shortages of sheet steel and other materials and components as well as by shortages of labour.

In some other fields, it was pointed out by the Minister of Finance, shortages could be expected to continue for some time, and in a few they might even be intensified. "The combined needs of the Japanese war and of European countries will cause world shortages to persist, particularly in the case of some food and textile products. Here the efforts of government agencies will be devoted to collaboration with other countries in ensuring equitable international allocation and to securing at home adequate essential supplies and fair and orderly distribution".

In accordance with the government's policy the Wartime Prices and Trade Board removed restrictions on the manufacture of a wide range of household appliances and other durable consumer goods. In the case of foods and textiles, on the other hand, controls were tightened. To meet the needs of liberated areas and continuing war requirements reductions in the consumption of various foods were planned in collaboration with the United Kingdom and the United States necessitating a tightening of domestic restrictions such as the reduction of the sugar ration and the planned re-introduction of meat rationing. In the field of textiles the world shortage, combined with domestic labour shortages and increasing requirements resulting from demobilization, made it necessary for the Board to extend its controls over production, in the form of directive programs to all essential garments and into the fabric field.

The Board faced aggravated problems in the fields of emergency shelter and eviction control as the return of servicemen began to intensify the housing shortage. While the government's program for the expansion of housing construction was making some pro-

gress, limitations were imposed by the continuing shortages of building materials and labour.

In regard to price control, it was stated in the White Paper on Employment and Income, and re-emphasized by the Minister of Finance, that "the government is determined to safeguard the stabilization program until its full benefits can be reaped in a smoother, more rapid transition to a prosperous peacetime economy". This decision was based on the recognition that inflationary pressures had not ended with V-E day and that the maintenance of stable prices would contribute greatly to the attainment of a high peacetime level of employment.

It was pointed out in the White Paper that "the most severe inflationary pressure came immediately after the war of 1914-18 and not during it". The cost of living index, which in November 1918 was 34 per cent over July 1914, rose to a point 92 per cent above the pre-war level in the next twenty months. This steep climb was followed by an even more abrupt decline which had widespread and disruptive consequences. By the latter part of 1921 the cost of living had dropped 29 per cent from its peak, wholesale prices were down 41 per cent and prices of farm products were practically halved. This drastic fall greatly increased the burden of debt (particularly to the farmers) and resulted in heavy inventory losses and widespread commercial failures. Factory employment and payrolls dropped sharply. Such a chain of events might recur in the present transition period if price control and other stabilization measures were not maintained.

The supply of civilian goods is still limited, as indicated above, by the overriding requirements of the Japanese war, by relief and other export requirements, and by a variety of supply bottlenecks. Moreover, on the side of demand, a considerable backlog of requirements for durable and capital goods has piled up in nearly six years of war. These needs, as well as new ones, are supported by an unprecedented accumulation of money and bonds in the hands of individuals and business, and by the improved credit standing of farmers, corporations and others. Family allowances and soldiers' gratuities are sustaining and even adding to the recent high level of public buying power.

Combined with shortages and accumulated demands, which provide a natural background for rising prices, higher costs of production are still pressing against ceiling prices in a number of spheres. The problem of higher

costs is of particular importance (and difficulty) in the industries that have been engaged in munitions production and are now reconverting to civilian production. Labour costs have risen during the war as a result of the labour shortage, overtime pay, high labour turnover, and higher wage rates. Material costs have been inflated by higher prices in other countries, high costs of shipping, and the need to use less economical substitutes. Though, in many cases costs will come down as shortages of shipping, materials and labour are eased, without controls higher costs, however temporary, might well contribute to an inflationary spiral of price and wage increases followed by a precipitous deflation as the overall effect of war contract cancellation on employment and incomes asserted itself.

The serious consequences of such a development were emphasized by the Minister of Finance in his statement. "If inflation were allowed to develop, people would lose their wartime savings or use them up without receiving decent value, and the men returning from the armed services to civilian life would not be able to buy the things they needed at fair prices". The importance of stable prices was also pointed out in the government's White Paper: "High postwar employment can be based only on high production and an absolute essential in achieving this objective is to keep prices in hand during the transition. Canada's dependence on exports gives special emphasis to this need, both because of the obvious necessity of competing in external markets and because of the dependence of large sections of the domestic market on export income".

In carrying out the government's policy of maintaining needed stabilization controls in the transition period, the W.P.T.B. had, of course, to take account of the changed considerations of policy brought about by the transition. While maximum employment was sustained by war production, financial relief in the form of subsidies or price adjustments was usually confined to producers and importers of essential goods and services who could show financial need. But now that war production is declining sharply, it is no longer feasible to draw a clear distinction between essential and less essential or non-essential production. Indeed, as the transition proceeds and as the leading objective of economic policy becomes a high level of employment, production which was regarded as non-essential becomes desirable and essential from the point of view of employment.

Of particular difficulty is the problem of setting maximum prices for the many products the production of which was suspended during the war. This question is discussed in the Chapter on Durable Goods (p. 1096).

In the present transition period the administration of price control must also take account of the ultimate objective of removing price control as the danger of inflation passes. If controls are to be removed without serious disturbance to the economic structure, it is important that ceiling prices and "free" market prices should be fairly well in harmony at that time. This means that major increases in costs which are likely to persist will have to be gradually recognized in the ceiling price structure, and the Board must gradually eliminate subsidies and other artificial means of keeping prices down.

In view of these difficulties of reconversion pricing and the need to remove subsidies, it has been suggested that the Board should abandon the "basic period principle" and should permit price advances whenever cost increases can be demonstrated. Such a policy would, however, result in numerous price adjustments that might well start a cumulative spiral of cost, price and wage increases. Moreover, since costs, particularly in the reconversion period, are difficult to forecast, departure from the basic period anchor would render the basis of pricing policy less and less clear and the difficulty of setting new prices would become increasingly great. The basic period principle is, therefore, being maintained as the anchor of the price control system, and necessary adjustments will be made in accordance with the considerations outlined above.

Foods

During the period under review the world food shortage that had been developing for some time had important repercussions in Canada. The general shortage, most serious in sugar and meat but also affecting oils and fats and dairy products, reflected increasing requirements, resulting from the liberation of Europe on the one hand and inability to maintain or expand production on the other.

The extremely serious food shortages in Europe are the result both of Nazi policies and of the destruction and dislocation caused by war. Before the war Continental Europe imported about 10 per cent of its total food supplies. Under German occupation the livestock population, particularly in Western Europe, was considerably reduced, and the yield of milk and meat fell even more. Draft power—horses and oxen—was diminished as a result of military requisitioning. Feed shortages affected livestock producers and fertilizer shortage reduced average yield per acre. Depreciation of farm machinery could not be made good and the supply of manpower was reduced by the claims of war. With the development of the Allied offensive these trends were intensified and, in addition, agricultural areas were damaged as a result of the movement of armies, construction of airports and other installations, laying of minefields and flooding. Livestock was slaughtered in areas of active operations and serious shortages of seed developed.

The 1944 harvest in Continental Europe was poorer than the already subnormal harvest of 1943. Grain and sugar beet production declined though the potato crop was slightly above the exceptionally low 1943 level. Compared with the prewar level, milk production in 1944-45 appears to have been reduced by about 15-20

per cent, egg production reduced by 40 per cent, and meat production by about 25 per cent. The greatly reduced food supplies are very unevenly distributed—both between town and country, and between Eastern and Western Europe—owing to the breakdown of internal transportation and to divided jurisdiction. There have thus been conditions approaching starvation in many areas, and actual starvation in some, and the need for increased supplies is urgent. It has been estimated that in the twelve months following V-E day Continental Europe will need 12 million tons of imported foods, notably wheat, fats, meats, eggs, dairy products and sugar.

At the same time various factors have adversely affected production in other parts of the world. The world output of meats has been declining owing to severe droughts in Australia, Argentine, and South Africa, and some shifting from livestock raising to commercial crops in Canada and the United States. Sugar supplies have been restricted by the Japanese occupation of the Dutch East Indies and the Philippines, and were further reduced in 1944 by drought and hurricanes in several important producing areas. Even with the liberation of the Philippines the restoration of sugar production in that area will take some time. Declining production of lard and flaxseed have contributed to the tightening of supplies of oils and fats. While there has been no recent decline in the output of dairy products and other foods, the high requirements of Continental Europe have necessitated further restrictions on North American consumption.

The world food shortage was reviewed during April at a tripartite conference of the

United Kingdom, the United States and Canada meeting in Washington. Various measures were decided upon to meet the numerous deficits and to increase shipments to Europe. The burden of the inevitable cuts in food consumption and stocks were to be shared among many countries, both importers and exporters of food. The effects of these decisions on Canadian domestic supplies of meat, sugar and oils and fats are reviewed below.

Meat

A shortage of all types of meat in the domestic market developed during May and June as a result of a decline in slaughterings on the one hand and increasing export requirements on the other. In the period Jan. 1 to June 6, 1945, slaughterings of hogs, sheep and lambs in inspected plants were substantially lower than in the corresponding period of the previous year though there was an increase in the slaughterings of cattle and calves. Total meat production showed a decrease of 19 per cent as compared with a year earlier.

In spite of this falling output, Canada has agreements to supply certain minimum quantities of meat to UNRRA and to the United Kingdom. At the Washington conference Canada undertook to make every effort to increase exports of meat by at least a further 25 million pounds of carcass meat for the United Kingdom and, in addition, to supply 114 million pounds of canned meat for use in liberated areas, where the breakdown of transportation and storage facilities makes the distribution of fresh meat nearly impossible.

These requirements were in addition to Canada's previous heavy export commitments. They were to be met by reducing civilian meat consumption in Canada from 149.1 pounds per head in 1944 to 135 pounds in 1945. Per capita consumption in the United States was to be reduced from 162.9 pounds in 1944 to 125 pounds in 1945 and in the United Kingdom from 115 pounds to 106.4 pounds. The actual reduction in consumption for the second half of 1945 was to be greater in Canada and in the United States than is indicated by the above figures, since consumption in the early part of the year had been running at or above the 1944 rate. For the second half of 1945 there are still outstanding commitments to export at least 78 million pounds of canned meat and 220 million pounds of bacon, as well as various other meat products and any available surplus of beef.

In the domestic market the demand for fresh meat was accentuated by the prohibition on sales of canned meat (see below), the call on poultry stocks to fulfill export commitments to the United States army and the continuing limitations on domestic supplies of canned fish.

Serious shortages developed at border points where United States citizens were buying meat in abnormal quantities.

The shortage of meats led to rising prices for live hogs and cattle so that their prices tended to move out of line with the ceilings for dressed meat. As a result, supplies were increasingly diverted from the large inspected slaughter houses to small slaughterers and local butchers, and indications of black markets began to appear in a number of centres.

This situation in turn affected the supplies available for export since very little beef was being offered for sale at floor prices and the procurement of hogs by the Meat Board for the United Kingdom had to be substantially reduced. Slaughterings normally reach their lowest point in the summer so that no improvement in the over-all position could be expected before the fall.

During the period under review, various attempts were made to improve domestic supplies and distribution and to ensure adequate exports.

Early in June the Meat Board was instructed by the Department of Agriculture to divert from its purchases of beef for the account of the United Kingdom up to 60 carloads a week for distribution in eastern centres. The intention was to remedy local shortages in the East by subsidizing the transportation of beef from the West. However, during the week ending June 16 only eight carloads were provided and in the week ending June 23, only one. These were the Meat Board's total purchases of beef in these two weeks.

In an attempt to provide more hogs for the domestic market, the Meat Board on June 11 reduced the quantity of hogs requisitioned for export to the United Kingdom. This step did not, however, have any material effect on the domestic supply situation.

In order to make available supplies of canned meat towards the fulfilment of the above mentioned export commitments, early in May stocks of canned meat in the hands of packers, wholesalers, chain stores and department stores were frozen. Most of these frozen stocks will be purchased by government agencies for export. Sales for Red Cross prisoner-of-war parcels, for ships' stores, and to persons in remote areas were still permitted. At the same time all further canning of meat and meat products by inspected packers had to be for export, or for sale to certain government departments, unless a special permit was obtained. This provision did not apply to poultry meat, baby foods and soups. It was expected that in this way over 90 per cent of the future meat pack would be made available for export.

Shortages of meat appeared in the United States at a time when the Canadian domestic situation was still satisfactory. As a result serious shortages developed at Canadian border points where United States citizens were buying meat in abnormal quantities. On May 25, at the request of the Mayor and City Council of Windsor, the government placed under permit control all exports of meat, including poultry, crossing the border at Windsor. No export permits were granted for individual purchases by visitors. In June, this arrangement was extended to all border points.

This export restriction included poultry since Canada had undertaken to supply during 1945 all surpluses of poultry up to a maximum of 30,000,000 pounds for the U.S. armed forces, and procurement for this program was disrupted by the large volume of purchases by individual visitors from the United States.

The above measures did not appreciably affect the general domestic situation which deteriorated steadily. Slaughtering decreased, complaints of shortages and illegal practices multiplied and overseas shipments could not be maintained, while at the same time, after V-E day, shipping became more easily available. At the beginning of July, therefore, the Government announced that slaughtering control and meat rationing would be re-introduced in order to maintain exports at the highest possible levels without causing a breakdown of orderly distribution and price control in the domestic market. It was indicated that the ration would be on a more restrictive basis than the meat ration in effect from May, 1943, to March, 1944, and would include all meats. As a first step the slaughtering of all livestock was placed under permit, and two meatless days a week were introduced in public eating places.

Oils and Fats

It was agreed at Washington that to meet the world deficit in oils and fats remaining after substantial stock reductions, the United States, the United Kingdom and Canada should reduce their consumption in proportion to their total usage of oils and fats. For Canada this meant an appreciable reduction in imports of animal and vegetable oils, while domestic production of lard was falling with reduced hog slaughtering.

Reduced vegetable oil imports made it necessary to reduce the production of shortening. In May, output was restricted, on a monthly basis, to 80 per cent of the average monthly amount distributed in 1941 to the retail trade, and 90 per cent of the amount distributed to bakers and other industrial users. Monthly quotas governing the use of oils and fats in various food products were also reduced.

Sugar

Cuts in the sugar consumption of the United Kingdom, United States and Canada were necessitated by the decline in production mentioned above and the need to provide a minimum of supplies for Continental Europe.

The decision taken at Washington was to reduce sugar consumption to an equal average level of civilian consumption in the three countries, namely an annual rate of 70.8 pounds per head for the last nine months of 1945. Compared with 1944 usage this involved a per capita cut of 18.2 pounds in the United States, 14.4 pounds in Canada and 0.7 pounds in the United Kingdom.

The reduced allocation necessitated sharp reductions in Canadian rations for consumers, restaurants and industrial users. The consumer ration for 1945 was reduced by a further 5 pounds per person (in addition to the 2 pounds reduction announced in February) by providing for a reduction of one pound in each of the months of June, July, August, October and December. The rations for September and November will remain at 2 pounds to permit a maximum of home canning and sufficient sugar for Christmas baking. The home canning allotment of 10 pounds of sugar or its equivalent in twenty preserves coupons, and the normal preserves ration were left unchanged.

Quotas for industrial users, which had already been reduced earlier in the year were further reduced from 75 per cent of 1941 usage to 60 per cent for bakers, from 70 per cent to 55 per cent for biscuit and breakfast food manufacturers, and from 65 to 50 per cent for others, such as manufacturers of soft drinks, candy, and confectionery. These reductions took effect on July 1.

Quotas for jams and wine manufacturers were also reduced. The allotments of restaurants, hotels, and similar quota users, which had been reduced by 10 per cent in January were cut by a further 15 per cent, effective July 1. The armed services agreed to substantial cuts in the sugar rations of service personnel.

Fruits and Vegetables

In contrast to meats, domestic supplies of fruits and vegetables were not affected by the world situation. Supply and price problems in this field reflected the influence of growing conditions in Canada and the United States on the one hand and of domestic demand on the other. The long period of cold and rainy weather during the three months under review retarded fruit and vegetable crops by several weeks so that in a few cases where maximum prices of fruits and vegetables were scheduled to decline in the period of heavy production,

the date of the price reduction had to be postponed.

Root Vegetables: The order setting maximum prices for beets, cabbage, carrots, parsnips and turnips was amended to postpone for two weeks the price reduction of $\frac{1}{2}$ cent per pound scheduled for July 1. These vegetables could, therefore, be sold during the first two weeks of July at the higher price set for June. This permitted the continued importation of supplies from the United States and the customary higher return to the early domestic producers.

A special arrangement had to be made to facilitate imports of carrots and cabbage during June, since a shortage was developing in Canada and supplies in the United States were not as plentiful as in the previous year. To permit the necessary imports maximum wholesale prices of carrots and cabbage were raised 1 cent per pound for the period June 5 to June 30 in the case of cabbage and June 5 to July 15 in the case of carrots. Retail prices were unchanged and the resulting "squeeze" was absorbed by retailers.

Potatoes: As in previous years a temporary shortage of potatoes developed during the period under review as stocks of the old crop disappeared before the new crop came on the market. The current shortage was intensified by the exceptional lateness of the crop and, as the repatriation of troops got under way by the increasing requirements of potatoes for ships' stores.

At the beginning of April it appeared that ample stocks of 1944 potatoes were available and the lateness of the crop was not yet apparent. The permit requirement for the export of potatoes to the United States was therefore suspended until the end of the month. At the end of the month the export permit requirement was reinstated and it was announced that no permits would be granted until domestic supplies had again improved.

In May, maximum prices for new potatoes were set at the same level as in the previous year. In order to relieve local shortages, arrangements were made, as in 1944, for subsidizing the transportation of potatoes from surplus to deficiency areas as well as imports from the United States. To assure that imports only took place where domestic potatoes were no longer available, import permits were required and were issued only on the approval of the Board. Imports were made during June as a result of close co-operation between the Board and the Wartime Food Administration in the United States.

With increasing troop movements, potato requirements in the Maritimes were exception-

ally high, and at the beginning of June shipments from the Maritimes to other parts of Canada were placed under permit to prevent any unnecessary drain of potatoes urgently required locally.

At the beginning of July, as the lateness of domestic crops became apparent, the date for the first seasonal reduction in producer prices was postponed from July 15 to July 22.

Fruits: Maximum prices for domestic strawberries and raspberries were set at the end of May at approximately the same level as in 1944, and as before, these prices were also applicable to imported berries in the period of domestic production. In all areas except Northern Ontario and Northern Quebec shippers' prices were established f.o.b. one of four basing points, instead of f.o.b. point of origin, in order to secure a single price level in each market. A seasonal reduction in maximum prices of strawberries was provided for in the Fraser Valley and in the Southern parts of Quebec and Ontario, but not in other zones.

As in the case of vegetables, the late strawberry crop made it necessary to postpone the scheduled price reduction. The date was changed from June 19 to June 26 in British Columbia and from June 24 to June 30 in Ontario and Quebec.

Maximum prices for cherries were set in June at the same level as that set for sweet cherries in 1944. Owing to the exceptionally small crop of sour cherries, which was almost a complete failure, prices of sour cherries were set at the same level as for the sweet varieties. Changes in the markup provisions were designed to secure more uniform retail prices regardless of the method of distribution.

Dairy Products

In May, the order setting maximum prices for cheddar cheese was revised to improve the enforcement of its provisions. The order had set the maximum price of highest quality cheese sold by manufacturers at 24 cents per pound, inclusive of a federal bonus of 2 cents, so that the maximum price to be paid by wholesalers was 22 cents. Many producers had, however, been selling their cheese at the price of 24 cents per pound, regardless of grade and bonus. In order to clarify the legal maximum price the new order stated the price for first grade cheese on a net basis, at 22 cents per pound, exclusive of federal bonus. The markup provisions for wholesalers and retailers were unchanged. The definition of a "wholesale distributor" was clarified to ensure that the wholesale markup was taken only by dealers who customarily perform the services of warehousing and distributing cheese.

Textiles

In the field of textiles, as in the case of food, the end of the European War brought an intensification rather than an easing of wartime shortages. World textile production, restricted by shortages of labour, had to meet large net demands from liberated areas, in addition to heavy military requirements for the Pacific War and increasing civilian demands. Canadian imports from the United Kingdom and the United States were restricted by these factors. In addition, shortages of labour for domestic production, requirements of demobilized servicemen and an inflated level of civilian demand operated directly to produce a threat of serious shortages in the domestic market.

Allocations of cotton fabrics from the United States and worsteds from the United Kingdom are lower in 1945 than in 1944, though still well above the prewar level. Domestic production of cotton fabrics has declined steadily since 1941, and production of wool fabrics has been dropping since 1943. Labour shortages, less skilled labour and high labour turnover contributed to this trend.

On the other hand, war orders were reduced considerably in 1944, so that civilian fabric supplies were well maintained in that year. In 1945, however, the decline in imports and to a lesser degree in domestic production, are reducing civilian supplies considerably.

Garment production has reflected the changes in fabric supply as well as labour shortages in some of the secondary industries. Civilian demand, on the other hand, has been increasing steadily since 1939, reflecting the growth of purchasing power. In the men's clothing field, this demand is being further augmented in the current year by the requirements of demobilized servicemen. In view of these trends, it became extremely important to ensure the most effective use of available materials, capacity and labour.

Production Directives

During 1943 and 1944 shortages in particular clothing lines had been averted or eased by the development of production programs involving specific directives to manufacturers and special efforts to improve labour supplies. Early in 1945, in anticipation of developing shortages, plans were made for extending the system of directive programs to all essential garments.

This comprehensive program, unlike the programs issued in 1943-44 involved a considerable degree of control over the produc-

tion and distribution of fabrics. The garment production programs were scheduled to absorb the bulk of available materials so that, in many instances, the normal pattern of fabric distribution had to be disturbed, supplies for less essential uses had to be reduced or denied, and fabric production had to be directed to the requisite lines and price ranges.

Production directives to garment manufacturers were issued in April and May and govern production during the second half of 1945 (some of the directives run from June 1 to December 1).

In the woollen field directives were issued for the production of women's and children's coats, suits, dresses, skirts and slacks, men's and boys' suits, coats, odd trousers, caps and work shirts, as well as boys' jackets. The quantities of these garments that manufacturers were directed to produce were determined in relation to production possibilities and essential current requirements.

The garment production programs were analysed to determine the types and quantities of fabrics required and, in addition, the yard goods requirements of the wholesale and retail trades were scheduled. On the basis of these requirements and of prospective imports, production directives were issued to woollen weavers and knitters. Garment manufacturers were given a Fabric Purchase Authorization and such authorizations were also given to certain essential industrial users and manufacturers of industrial and clerical uniforms. The mills were directed to ship fabrics only on war orders or orders authorized as described above. This system enables garment manufacturers to deal as far as possible with their normal suppliers; manufacturers unable to obtain their entire requirements report the deficiency to the Board and where possible an alternative supplier is designated.

Cotton garments under directive control include men's and boys' shirts, night shirts, pyjamas, shorts and combinations, women's and misses' dresses, blouses, slips, nightgowns and pyjamas, a variety of work clothing and children's garments. In the case of cotton garments it was necessary to ask manufacturers to report the types and quantities of fabrics they would need to meet the directives, and these requirements were reviewed by the Board before Purchase Authorizations were issued. The Board indicated to cotton mills the types and quantities of materials they were expected to produce. The mills were authorized to meet the needs of their

normal customers to the full extent of their quotas under equitable distribution in the case of war orders and industrial users, and to the extent of 85 per cent of their quotas in the case of garment manufacturers. The remaining 15 per cent of these quotas were used as a pool from which deficiencies reported by manufacturers working under directives could be met.

In the rayon field the output of certain articles of women's and children's clothing, including dresses, blouses, slips, nightgowns, pyjamas, panties, skirts, jackets, coats and suits, was placed under directive control. Caps were the only article of men's apparel included in the rayon directive program. The arrangements for the production and flow of fabrics were similar to those in the case of cotton.

The effectiveness of the expanded directive program can, at the time of writing, be judged only in the case of the new woollen directives, some of which have been operating since June 1. The program has tended to direct more fabric to essential lines and to restrict the flow to less essential ones. In the woollen field, manufacturers will receive only a small part of their import quota (if they have one) for the production of articles not under directive. In cotton they will be given 85 per cent of their normal allocation in the third quarter and possibly less in the fourth. The directive program has also resulted in a slight increase in fabric production, by requiring the bulk production of staple lines. It will undoubtedly tend to sustain and in some cases to increase production of essential garments.

Finally the programs have been designed to promote the maintenance of low and medium priced lines and of price-quality relationships. The directives issued to manufacturers stipulate that garments must be produced in 1942 price ranges (in some cases 1943 price ranges) with the same proportionate volume in each price range as in that year. Periodic reports of production, by price ranges, are furnished by manufacturers.

Price Problems

Control over price and quality at the retail level was further reinforced by an order issued in April which regulated the labelling of most garments and invoicing of all fabrics and garments. The order provided that when the garments specified are offered for sale, the name, trade mark or licence number of the manufacturer, as well as the style number and size, must be shown on each garment

or on a label or tag attached. Such provisions had been written into previous pricing orders but had only been applicable to garments manufactured after the effective date of the respective order, so that enforcement was hampered by the difficulty of proving the date of manufacture. The new order applies to all specified garments no matter when they were manufactured.

Another provision of the same order was designed to prevent the inequitable distribution of fabrics through manufacturers of wearing apparel who might have stocks of fabrics in excess of their requirements, selling such excess stocks to wholesalers or other manufacturers. The order prohibited such sales unless they were authorized by the administrator having jurisdiction in the seller's sphere of production. Invoicing requirements which had previously been applicable only to certain specified garments, were extended to all textiles and garments.

Early in the year the Board began a review of the maximum prices of men's shirts which had in many instances got out of line with basic period values. As a result of this review new maximum prices were fixed for all shirts, pyjamas, and flatcut underwear, each manufacturer's prices being determined by his actual performance in 1941. In May, all established maximum prices for these garments were cancelled and revised price fixations were issued. It was expected, as a result, that when dealers had disposed of old stocks there would be a reduction in the retail prices of many lines.

Distribution

At the beginning of May the Board introduced a plan designed to help discharged service personnel obtain a suit of civilian clothing without delay. At the time of discharge each serviceman or servicewoman is issued a "Priority Suit Purchase Certificate" entitling the bearer to priority in the purchase of a suit of civilian clothing. Retailers were encouraged to sell suits to those presenting these certificates, in preference to other buyers, since they could obtain replacement of suits sold against such certificates in addition to their quota of supplies under equitable distribution. The plan applied to both ready-to-wear and made-to-measure suits.

After V-E day it became evident that the rate of discharge would be greatly in excess of the rate expected when the priority plan was introduced. Further steps were therefore taken to limit sales to civilians so as to ensure that a definite proportion of total supplies would be available to demobilized per-

sonnel. An order issued at the beginning of July provided that a retailer could obtain only 65 per cent of his normal quota of suits in the usual way, while the remaining 35 per cent could be obtained only by passing on

Priority Certificates obtained on sales to demobilized service personnel. Retailers selling more than 35 per cent of their quota against certificates can obtain replacement in excess of quotas.

Durable Goods

Supply Problems

The cutbacks in war production accompanying the end of fighting in Europe made more metals and production facilities available for use in the manufacture of household appliances and other durable goods. In accordance with the government's policy of relaxing controls as rapidly as conditions justify and bearing in mind the desirability of removing purely restrictive controls at the earliest feasible time in order to allow producers freedom to make their plans for reconversion, the Board soon after V-E day, revoked most of the remaining restrictions on the manufacture of these goods as well as the remaining orders requiring the simplification or standardization of products. At the end of the period under review the only remaining restrictions on the production of metal articles were those applicable to metal office equipment and metal containers, and a modified system of control over the production of farm machinery. The distribution of certain kinds of farm and construction machinery, small arms ammunition and metal containers remained subject to control.

Household Appliance and Commercial Equipment

On May 14 the Board announced the revocation of a number of orders restricting the manufacture of various durable goods, mainly household and commercial appliances. The articles concerned included bicycles, washing machines, vacuum cleaners, sewing machines, commercial refrigeration, air conditioning, laundry and dry cleaning equipment and office safes. Later in May restrictions on the production of commercial electric equipment, such as waffle irons, toasters, broilers and dishwashers were withdrawn, as well as restrictions on the manufacture of electric stoves and domestic non-mechanical ice boxes. In June the prohibitions on radios and phonographs and on electric refrigerators were withdrawn. Some of these appliances, notably washing machines and electric stoves, had previously been produced in small quantities under special programs. Others, such as radios and refrigerators, had not been produced at all since 1941 or 1942.

The removal of restrictions meant that "programming" by the Board was discontinued

and that manufacturers could expand production as rapidly as they were able to reconvert their plants and to obtain labour and materials. While the supply of metals in general eased considerably with the reduction in war requirements there were still shortages of certain types of metal, particularly steel sheet, which were likely to restrict production for some time. The shortage of steel sheet was the reason for the maintenance of production controls on office equipment.

In obtaining materials and components from the United States which are still in short supply, Canadian manufacturers will receive the same priority treatment as United States manufacturers of civilian appliances. Under an arrangement worked out with the U.S. War Production Board early in July, Canadian manufacturers will receive the same type of priority assistance as the United States manufacturers on an agreed proportion of the number of units of any product programmed in the United States. The allocation of this priority assistance in Canada is to be handled by the Priorities Officer in the Department of Munitions and Supply, with the Wartime Prices and Trade Board acting in an advisory capacity.

The supply of labour for the production of appliances is likely to increase as war contracts are reduced and as demobilization proceeds. In general it is expected that the output of appliances will increase steadily in the second half of 1945 and in 1946.

Farm and Construction Machinery

Cutbacks in munition production made it possible to increase the farm machinery production program for 1945-46 and to relax controls considerably.

Early in 1945 it had been expected that production quotas for the 1945-46 season would have to be 27½ per cent lower than in 1944-45, since such a reduction had been planned in the United States owing to the heavy volume of war requirements. Just before V-E day, however, it was announced that plans had been revised, and in conjunction with U.S. production authorities quotas were set at about 100 per cent of the previous year's level. Restrictions on the manufacture and import of repair parts were removed completely.

After V-E day controls over production were further relaxed and the system of setting production and import quotas for each item was abandoned. The larger producers (those whose sales amounted to \$500,000 or more in 1941) were required to obtain the Administrator's approval of their production schedules, but smaller producers were free to produce without restriction. The Board continued its arrangement with the U.S. War Production Board under which sufficient materials for 100 per cent of 1944-45 production will be made available to Canadian manufacturers in 1945-46. It is expected, however, that manufacturers will be able to obtain additional materials on their own, and that output may reach 130 per cent of the 1944-45 level.

Permit rationing of farm machinery was continued since shortages of particular items still prevailed. Though a good many articles were taken off the ration in June, rationing was maintained on 25 items including a number of very important lines still in short supply.

Restrictions governing new and used construction machinery were greatly relaxed following V-E day. Controls over production were removed and the requirement of a permit for the purchase of new equipment was restricted to a few types. Owners of such equipment were no longer required to register it with the Board.

Construction Materials

In line with the government's housing program considerable efforts have been made by various departments, including the Board, to relieve the serious shortage of building materials. Cast iron soil pipe, lumber, brick and tile and certain plumbing fixtures are some of the materials in which the shortages are most serious. There are no government regulations restricting the output of these materials and in nearly every case the shortage is due to lack of the necessary labour. In spite of the efforts made to obtain additional labour, production in the first half of 1945 showed little improvement over the second half of 1944.

In May the government established the Interdepartmental Housing Committee consisting of representatives from the various departments concerned with housing and shelter, including the Chairman of the Wartime Prices and Trade Board. This committee replaced the Housing Coordination Committee established in 1942, and was intended to coordinate the activities of the departments concerned, in furtherance of the government's policy of assisting in the provision of essential housing and procuring materials and equipment. The

Building Materials Sub-Committee of this interdepartmental body, under the chairmanship of the Board's Coordinator of Capital Equipment and Durable Goods, has met with members of the building materials industries and studied their requirements. Recommendations have been made to National Selective Service regarding the direction of labour to firms in these industries in order to increase production.

The removal of the sales tax on building materials after V-E day (see p. 1098) was expected to have the effect of facilitating increased production on the part of firms whose output had been inhibited for financial reasons, enabling such firms to compete more effectively for available labour. It may be expected that as demobilization proceeds and skilled men are released from war production the output of building materials will improve.

Metal Containers

Quota controls on the uses of metal containers were maintained in operation since supplies of tinplate were still restricted. In May, additional temporary restrictions were imposed on the canning of various products in the period May-September, to ensure sufficient supplies both for the large quantities of canned meat required for export to Europe (see p. 1091) and for the canning of fruits and vegetables in the summer months.

Price Problems

The resumption of the production of household appliances and other durable goods meant that the Board was increasingly faced with the problem of setting maximum prices for goods that had not been on the market for some time. In pricing these goods the starting point is, of course, the basic period price. A number of manufacturers have contended, however, that they can no longer produce at 1941 prices, citing wartime increases in the costs of labour and imported materials, as well as increasing overhead costs resulting from a decline in total production as war orders are cut back. It has not been possible, however, to indicate conclusively the extent to which different manufacturers would suffer financial need at basic period prices, since there is no recent production experience on which estimates of prospective costs could be based. Moreover, a significant part of this cost increase is probably of a temporary character and in a great many cases should be gradually corrected as shortages of materials and labour ease.

It has therefore been difficult to apply the Board's usual procedure for pricing "new"

goods and for considering adjustments on the basis of "financial need" to the pricing of these "reconversion" goods. Moreover, with the limited staff at the Board's disposal it would have been out of the question to make the necessary financial surveys for the multitude of goods and components included, even if the necessary data could have been obtained which, in most instances, was not the case. At the same time, in view of the importance of a smooth transition to civilian production, it was essential that maximum prices should be established without undue delay.

The Board has thus been faced with a difficult pricing problem. Its task has been much facilitated by the government's decision to reduce or remove the special excise taxes on many of the articles involved. This decision was announced by the Acting Prime Minister on May 10 in his statement on wartime controls:

"To encourage and facilitate the rapid resumption for the home and export markets and the expansion of employment in house-building and non-war industry, the government has decided to discontinue or reduce to lower levels certain taxes which have been imposed for purely wartime purposes. The taxes affected were enacted prior to the imposition of the price ceiling and their modification at this time will go far toward making possible the realization of the objective already announced by the Wartime Prices and Trade Board, viz., that civilian goods whose production has been interrupted by the war should reappear on the market at 1941 basic

period consumer prices. The change will also facilitate the increase in supplies of building materials and encourage industrial modernization and expansion. Specifically, the special excise tax of 25 per cent on household electric and gas appliances has been repealed. The special excise taxes on passenger automobiles, radios, phonographs and cameras have been reduced to 10 per cent. The sales tax on building materials, which had been removed before the war and reimposed in 1941, has once more been removed. The War Exchange Tax, imposed for temporary purposes in 1940, has been rescinded insofar as it applies to producers' machinery and equipment and to building materials."

These tax reductions enabled the Board to maintain basic period ceiling prices for household appliance and motor vehicles, the production of which is now being resumed. While no corresponding price reductions were required where the tax was included in the basic period price—and as pointed out above the additional help thus given to manufacturers in meeting costs will greatly reduce the need of upward price adjustments—it is expected that manufacturers who do not require the full amount of financial relief available to them as a result of the tax changes will reduce their prices below the ceiling level. Indeed, a number of significant reductions have already occurred in the prices of building materials. As supplies increase and competition becomes keener, it is probable that the benefit of the tax reductions will, to an increasing extent, be passed on to consumers.

Paper

The outlook for pulp and paper supplies improved appreciably during the period under review. The response of farm workers and others to the appeal for labour in pulpwood cutting during the winter had increased the cut as compared with the previous year. High water levels in the spring made it possible to float the logs to the mills and brought in logs that had not reached the mills owing to low water levels in 1944. In spite of this improvement supplies of pulp and paper were still short in relation to requirements and quota controls over their use were maintained, although relaxed in some cases.

Newsprint

In May it was announced that wood supplies would permit an overall increase of 5.6 per cent in the production of pulp and paper in the second half of the year. The third

quarter allocation of newsprint for the United States was raised from 200,000 tons per month to 220,000 tons. The pulp allocation was set at 270,000 tons for the quarter compared with a previous allocation of 250,000 tons in each of the first two quarters. Quotas of newsprint for Canadian publishers were similarly increased.

Paperboard

Revisions in military demand made it possible to increase certain use quotas for paperboard in June although overall allocations to box manufacturers remained unchanged. Prohibitions on the use of paperboard in packaging certain articles were removed and quotas were established for these purposes.

Simplification Orders

While quota controls over pulp, newsprint, fine papers and paperboard were maintained,

it was possible to remove most of the remaining simplification orders and prohibitions concerning the manufacture of particular paper products. Some of these had been introduced before the establishment of quota controls, while others had been designed primarily to reduce costs rather than to conserve materials. Among the orders that were withdrawn in

May and June were those simplifying cardboard containers, packages for chocolates and confectionery, envelopes, greeting cards, cake cartons, beer bottle cartons, paper bags and other products. Restrictions on the weights of paper used in envelopes and paper bags were continued.

Rentals and Shelter

In the period under review there was no appreciable relaxation in the demand for shelter in congested areas, though the disturbance caused by moving day on May 1 was reduced by the operations of the Emergency Shelter Administration. After V-E day the return of demobilized men caused considerable pressure on railroad and hotel facilities and intensified the housing shortage in many areas.

Moving Day, May 1

One of the main results of the operations of the Emergency Shelter Administration has been to reduce the influx of newcomers to congested areas through the requirement of a permit to move into a residence. In addition, the fact that these areas are officially scheduled as "congested" has discouraged potential newcomers from attempting to move in. The reduced influx made the problem of moving day less difficult.

In April the Emergency Shelter Administrators in Hamilton, Ottawa and Hull ordered the registration of all vacant dwellings. A similar requirement was already in force in Toronto.¹ It enabled the Administrator to locate potential accommodation and to persuade owners to take in tenants, using his power of compulsion in one or two cases. This plan also helped to reduce the pressure on May 1.

The special authorization permit required for residents of a congested city wanting to move to a new house or apartment in the same city had some effect in preventing families from moving into larger accommodation. On the other hand, it required a great deal of administrative work and delay, and in Ottawa, Toronto, Hull and Hamilton it was found that the benefits did not justify the administrative difficulties involved. Since June 15, therefore, residents of these cities who were in the city on the date on which Emergency Shelter Regulations became effective have been free to move without a permit. In Victoria and Vancouver the internal control has been continued for the present.

¹ A similar requirement was introduced in Vancouver in July.

Problems of Demobilized Servicemen

The return of increasing numbers of servicemen in May and June raised many new problems in the field of shelter and rent control. Demobilized men living in congested cities and those that were eligible for permits to move into these areas were given priority in the allocation of available accommodation by the Emergency Shelter Administrations.

At the end of May the rental regulations governing the termination of leases for housing and shared accommodation were modified to expedite the recovery of accommodation owned by veterans. A veteran who had owned the accommodation at the time of his induction or, in the case of a veteran's wife at the time of her husband's induction, may give the tenant notice to vacate. The minimum length of notice is generally three months, but in the case of an apartment or duplex, six months' notice is required, and the notice, in the case of a monthly or weekly lease, must not be timed to terminate in the winter months. The same provisions apply where the landlord's father, mother, son, son-in-law, daughter or daughter-in-law is a veteran who occupied the accommodation at the time of his or her induction and desires to return to it for at least one year. These provisions represent an appreciable relaxation compared with those generally applicable, which required a minimum of six months' notice and included special restriction in the case of apartments and duplexes.²

Hotels

With the repatriation of increasing numbers of servicemen congestion of railroad and hotel facilities became an increasingly serious problem. To relieve the pressure the Board took steps to reduce the space taken up on trains and in hotels by large conventions. In March

² On July 25 an order was issued prohibiting the serving of further notices to vacate to tenants of housing accommodation where the landlord desires possession for himself or a member of his family. The new order, No. 537, also suspends and stays all outstanding notices to vacate given for the above reason, subject to a review of the case by the Court of Rental Appeals. These provisions do not apply in the instances discussed above when the accommodation is required for a returned serviceman.

arrangements were made with the larger hotels in Montreal, Ottawa, Toronto and Vancouver by which the space provided for conventions in any hotel would not exceed 10 per cent of total bedroom space and delegates would be required to double up in rooms so that every bed would be occupied. Since conventions were under permit control in the United States it was arranged that no convention planned in the United States and ineligible for a permit there would be accepted by these Canadian hotels.

In June the increasing congestion made it necessary to take further measures. On June

16 the government issued an appeal to hotels and the public to cancel all conventions and to avoid railway travel so far as possible. The Prices Board instructed the large hotels to cancel all convention bookings between June 20 and July 20, on the understanding that the situation would be reviewed in the meantime.*

*As the repatriation of servicemen was speeded up the Board reinforced the above arrangements by a formal order issued in July, which prohibited conventions involving more than 50 persons in travel by rail, bus or air and restricted hotel space in congested cities available to members of conventions or organized travel groups to 10 per cent of sleeping accommodation.

Survey of Canadian Homes

RESULTS of a survey of Canadian homes were recently announced by Lever Brothers, Limited. The survey involved personal consultation with several thousand housewives. This work was done by 135 specially trained interviewers and included "careful observations on a complete tour of the house, as well as the answers given to questions asked of the housewife." The stated purpose of the survey was not so much to secure information about external architecture or "collections of chromium and plastic automatic gadgets" as to ascertain existing conditions in Canadian housing "in terms of shelter, feeding and cleaning." Utilities, services and facilities such as heating, water, lighting, equipment, etc. were dealt with as they affect these primary functions.

Kitchen Equipment

It was found that three out of five homes have dining rooms, but three out of the four families who have dining rooms eat in the kitchen all the year around—still more in the winter.

Cooking practices differ seasonally throughout Canada, but "even in summer only two-thirds of urban homes cook with either electricity or gas," and "some 86 per cent of farm housewives stand over ranges—for wood, coal or sawdust—to cook the meals for those extra large farm households."

More than half of all families do their laundry work in the kitchen. About 25 per cent of urban houses and six per cent of farm homes have laundry facilities in the basement. Some do their laundry work in the bathroom or in porches or sheds. Commercial laundries get more work in the winter indicating a need for efficient driers.

Many Canadians take their baths in the kitchen; eight per cent in urban areas, 36 per cent in non-farm rural areas and 39 per cent in farm areas. In cities, one house in fifty and in rural areas, one in a hundred had people sleeping in the kitchen.

Although kitchen sinks are generally regarded as essential for the cleanly preparation and serving of food, one in 33 urban homes, one in eleven non-farm rural homes, and one in six farm homes have no sink. Moreover, one in fifty of the urban sinks and one in seven of the farm sinks have no drains or taps. Three in five farm sinks have no taps.

Refrigeration and Electricity

Refrigeration, as important for some foods as heating is for others, is far from adequate. One in five urban families is still without either ice or mechanical refrigeration, at any season of the year. Two out of five village families and two of three farm families are in the same plight.

In spite of the fact that half of the farms surveyed have electric power, six out of seven farmers' wives cook on wood or coal ranges. Even in cities, where electricity and gas are almost universal, one woman in three, living in low and medium-cost houses, cooks with coal or wood.

The survey "throws new light on the way in which housing answers the basic needs of the family for shelter, food and cleanliness, and is suggestive also in regard to safeguarding health and answering the emotional needs for comfort and a measure of happiness. If family well-being is to be fostered, the houses to be built must meet standards of quality," according to the report.

Technically Trained Persons in Post-War Industry

Wartime Bureau of Technical Personnel Conducts Special Survey

IN its monthly bulletin for June, 1945, the Wartime Bureau of Technical Personnel outlined the activities of the Bureau with reference to the placement of technically trained persons in post-war industry.

The Bureau has for some time been engaged in a survey of nearly 34,000 technical persons in Canada with a view to the utilization of their special qualifications in post-war reconstruction and to facilitate rehabilitation of those presently serving with the Armed Forces.

So far it has been found that 12,486 of the 34,000 technical personnel being surveyed, are engaged in positions which will last only for the duration of the war, that is, they are in the Armed Forces, in war industry or in other positions directly related to the war effort. The remainder are considered as regularly employed, having been in most cases employed prior to hostilities in their present posts in essential public services and industry.

In order to place in regular peacetime positions those technical personnel with the Armed Forces and in wartime occupations, a canvass of all employers in industry is being conducted. This allows the Bureau not only to place those men being currently discharged from the Forces, but by means of the survey which includes estimated manpower requirements of this type, for (in many cases) the ensuing ten years, the problem of industrial reconstruction as a whole can be better met. It is estimated that some 5,000 men from the Armed Forces will be available for placement in permanent positions of a technical and scientific nature when all hostilities are at an end.

The survey has disclosed that there will be 175 qualified geologists available for employment in the mining industry when demobilization has been completed.

During the war in Europe a high proportion of male university science graduates enlisted in the technical branches of the Armed Forces, given top priority by the Wartime Bureau of Technical Personnel. Those who were not going into the Forces were directed to high priority industrial and governmental occupations.

At May of this year 545 permits to take positions in high priority industry had been issued to this year's University graduating classes of technical personnel. In addition, 113 were

entered to qualify for technical appointments with the Forces and signed for the Pacific War, and 147 students with one more academic year to complete before graduation went into Naval and Military training for the summer. Their services are designed for the war against Japan if required for this purpose upon graduation in the spring of 1946.

Besides the above, other fields entered by the students graduating this year include chemical, electrical, mining and forest products industries, machinery, textile and aircraft manufacturing industries, food processing and production, construction and public utilities, and duty with the National Research Council of Canada.

Special Survey of Technical Personnel

Concerning the special survey of technical personnel, the bulletin states:

"The main task undertaken in June as part of the survey was to break down the numbers, first of technical personnel in the Armed Forces and secondly of all the technical persons on record, into age groups and fields of specialization. The figures thus obtained for those in the Armed Forces give an immediate indication of the size of the supply that can be expected in each branch of engineering or science due to demobilization. At the same time, by taking account of age groups, information is obtained as to the various amounts of experience which these people may be expected to possess. With the available supply determined, comparison can be made with the demands which may arise in industry, due to the desire of many employers to rebuild their staffs of engineers or scientists with a certain proportion of men coming out of the Armed Forces. A canvass by the Bureau of such demands has been under way for some time, and the information is being gathered as rapidly as employers' plans take shape and are made known to the Bureau's officers either at Ottawa or in the Regional Offices.

"As technical persons leaving or about to leave the Armed Forces approach the Bureau for counsel regarding civilian employment, it is possible to lay before them a very comprehensive picture of the employment field as it applies to the particular degree of skill and length of experience of the individual concerned.

Factors Affecting Placement

"The complete survey of all technical persons on record as to age groups and type of training and experience is of great value from the point of view of long range planning, apart altogether from its bearing on the handling of the 'resettlement' problem. For example, the extent to which employment opportunities will exist for the numbers of students who are taking or will take university training in engineering or science as part of the rehabilitation program is definitely affected by such factors as the numbers of technical persons who will have to be replaced due to age in any future period. Other important information which comes to light as a result of this part of the survey deals with the extent to which different branches of engineering or science have received more or less attention due to the shifting demands of industry over the past several decades.

"Taking two branches of engineering for examples, it is found that 40 per cent of the civil engineers registered are 55 years of age or over and 21 per cent are under 35. At the other extreme, only three per cent of the chemical engineers recorded are 55 years of age or over and 65 per cent are under 35. While these figures are indicative of an actual change in relative demand in the past, it is quite possible that there should be at least some reversal of this trend, if future needs are to be adequately met. This affects the whole field of engineering education, but no useful solution can be attempted until there is also available some long term forecast as to the

numbers and proportions of various types of technical persons which will be required by operations still very much in the planning stage.

Rehabilitation

"In connection with the rehabilitation of service personnel, the Bureau has naturally stressed that part of its operations having to do with actual employment openings. There are, however, a number of other ways in which it has been possible to render useful assistance. One such undertaking was the attendance of an officer of the Bureau at each of the 14 classes given at the R.C.A.F. Counsellor School at Rockcliffe for the purpose of giving a brief review of engineering as an occupational field.

"A second project which the Bureau undertook was the preparation of a booklet on engineering for the Canadian Legion Educational Services' series, known as 'Let's Consider Jobs'. At the same time, assistance was rendered to the Air Force in the preparation and editing of an occupational monograph as one of a series in wide use by R.C.A.F. Counsellors. Another minor task was the review of a draft precis dealing with the functions of the Bureau for the Staff Training Branch of the Department of Veterans Affairs.

"In all these and other related tasks, it was found that contacts made with the Armed Forces during the period the Bureau was assisting in meeting their manpower needs were most valuable in developing close and efficient co-operation."

Summer Courses Conducted by Workers' Educational Association

Annual Sessions at Port Hope, Ontario, and Ocean Park, B.C.

THE Workers' Educational Association's Labour College at Port Hope, Ontario began its season's work on Saturday, June 30 and will continue in operation until Labour Day. This college is the first of its kind in Canada. The voluntary nature of the Association is carried out fully. During the college sessions the only paid staff is the cook and her assistant. Administration is directed by a council consisting of the Chairman of Committees elected by and from among those in attendance, at their first meeting each Saturday night. Each chairman is responsible for certain duties to be carried out daily. For example, the chairman (or chairwoman) of the dining room committee appoints the waiters who set the tables and serve the food,

clear the tables and assist in washing the dishes. The chairwoman and chairman in charge of the women's and men's sections respectively are responsible for good order in these sections. Other chairmen look after the grounds, recreational activities and the library and one edits the school wallpaper, "The Sunburn".

Objectives of College

"The purpose of the Labour College", as indicated by the Director, Mr. Drummond Wren, "is to give working men and women an opportunity of learning to live together in a community; bringing together those with similar problems from various cities and different unions as well as the unorganized

workers; to break down petty prejudices that we acquire when living isolated from others who make up our Canadian nation, by bringing together in our 'league of nations' at Port Hope men and women of different racial extractions and various political and religious beliefs." In short, the W.E.A. Labour College endeavours to provide a practical demonstration of Canadian unity.

The rehabilitation of the property at Port Hope as a Labour College centre has been accomplished by the voluntary work of skilled artisans from a number of unions, and the membership of the Workers' Educational Association, who came each year and spent their week-ends prior to the opening of the College, from Toronto, Oshawa, Belleville, St. Catharines and Hamilton. Therefore, not only is this school conducted on a voluntary basis, but the buildings around the "shell" which the Association acquired have been created by voluntary labour.

W.E.A. College in British Columbia

Following the example of the Association in eastern Canada, the Workers' Educational Association in British Columbia has just completed its second annual summer school. This has been conducted at Ocean Park, B.C., for a ten-day period, with approximately 150 workers in attendance. Included among those 150 was a group from Seattle A.F. of L. unions with the Seattle Repertory organization which carried out the democratic features of all W.E.A. work—the "property man" in one skit might be the "leading man" in the next skit. In British Columbia a program similar to that carried on at Port Hope was conducted.

Labour leaders in British Columbia, including representatives of the Trades and Labour Congress of Canada, the Canadian Congress of Labour, the Trades and Labour Congress of Vancouver, and the International Woodworkers of America, took an active part in the school at Ocean Falls.

Nature of Programs

To illustrate the nature of the programs carried out in these colleges, the activities of the first two-week session at Port Hope provide interesting sidelights.

"There were forty-eight auto workers in attendance, members of the United Automobile, Aircraft and Agricultural Implement Workers of America during the first week, and thirty-five during the second week. The first week began with Professor Ray Birdwhistell, University of Toronto, discussing with the

group matters pertaining to the function of the trade union in its relationship to the community.

"During the remainder of the 14-day period, the group devoted their attention to talks and discussions on labour-management relations, collective bargaining, job evaluation and incentive wage plans, international trade and full employment, public and private enterprise, and the duties and responsibilities of union officers. Two approaches were made to these problems; one through the medium of capable university instructors and experienced labour leaders giving talks followed by discussion—the other, by members appointed from among the groups to present a question for discussion by the group. This was followed by a demonstration. For instance, arising out of a discussion on grievance procedure, a grievance was written up, and it was carried through the grievance procedure provided for in a union collective agreement. Some members of the group represented the union, and the "grievor", and others represented the several stages of management. When a mistake was made, the performance was halted while it was discussed generally. This procedure was carried right through to a Board of Arbitration. On another occasion, following a discussion of Board of Conciliation reports contained in the *LABOUR GAZETTE*, the group enacted a break-down of negotiations with the Company for the conclusion of a collective agreement; they demonstrated the appeal to the Labour Relations Board for intervention, the setting up of a Board of Conciliation, and the hearing at a Board of Conciliation.

"At later sessions greater emphasis will be placed on the general problems confronting Canadian workers, rather than on the union problems. During the remainder of the season further consideration will be given to the Dominion Government post-war program, including National Health Insurance, reconversion to peace-time industry, maintenance of the national income and full employment, taxation and international trade, labour legislation, and similar topics. Adequate time will be devoted to Workers' Educational programs in each community, and the setting up of education committees within organized labour and the planning of programs for these. Sociologists will give the background talks on such questions as racial and religious discrimination."*

—

* This report is a digest of notes supplied by Mr. Drummond Wren, of Toronto, Director, W.E.A. College, Port Hope, Ontario.

Seamen's Welfare in the United Kingdom

Extensive Study Conducted by Committee

THE Report of the Committee, appointed in November, 1943, by the Ministers of Labour and War Transport of the United Kingdom, to consider the welfare of seamen in ports in Great Britain, was published in January, 1945. The Committee included representatives of the shipowners, the National Union of Seamen, the Navigators' and Engineer Officers' Union, King George's Fund for Sailors and the Society of Incorporated Accountants.

The Committee was to consider the provision to be made for the establishment and maintenance of seamen's clubs (which term includes both residential and non-residential establishments), and the co-ordination of appeals for funds to be made to the public on behalf of seamen. In considering these matters, regard was to be had to the Government's acceptance, in 1938, of the Recommendation (No. 48) of the International Labour Conference concerning the promotion of seamen's welfare in ports (L.G. 1936, p. 1009).

Work of Voluntary Organizations

The Report points out that before 1940 only voluntary organizations played any effective part in seamen's welfare and neither the Government nor the shipping industry (a term including both shipowners and seafarers) came into the field to any extent. The Government's role was confined to control of seamen's lodging-houses under the Merchant Shipping Act and that of the shipping industry to participation by individual shipowners in the work of the voluntary organizations, through financial aid and work on local committees.

Voluntary organizations provided Sailors' Homes, managed by local committees which tried to make them self-supporting, and hostels of the religious bodies, generally established as annexes to churches or chapels. The increasing tendency of certain societies to separate the operation of hostels from the religious side of the work was approved by the Committee which believes that better service in both fields will result.

The British Council for the Welfare of the Mercantile Marine, organized in 1927 to promote welfare on broad lines, had formed, with other associations, a National Joint Committee which encouraged the formation of voluntary port welfare committees. King George's Fund for Sailors was established in 1917 to collect and distribute money to the societies working for naval or merchant seamen and their dependents, and to induce the

existing societies to co-ordinate their activities and to keep accounts in satisfactory form. In 1931, the Fund sponsored the organization of the Representative Council of Seamen's Missions and Sailors' Homes to prevent overlapping.

The Report emphasized the important stage in seamen's welfare marked by the adoption of the International Labour Recommendation (L.G. 1936, p. 1009). The Recommendation was accepted by the British Government in 1938 and in the following year the Ministry of Labour, in co-operation with the Mercantile Marine Department of the Board of Trade, made a survey of conditions in the principal ports. Following consultation with other Government Departments and with organizations of shipowners and seafarers, machinery was set up to implement the Recommendation.

Functions of Port Welfare Committees

The machinery consisted of a Seamen's Welfare Board, Port Welfare Committees, Seamen's Welfare Officers and a Central Consultative Committee of the voluntary organizations. The Board was to advise the Minister concerning the welfare of seamen in British ports and of the crews of British ships in overseas ports, including co-ordination of welfare work in ports, hostels and recreation facilities, health and the financing of seamen's welfare work in general. It was composed of representatives of the Government, of organizations of shipowners, officers and men, and of the voluntary organizations, together with a medical expert.

The Port Welfare Committees in the principal ports included representatives of shipowners, officers' and men's organizations, of the voluntary organizations, the local authority and the foreign consular corps. Their duties were to carry out the Recommendation locally, to collect information on port conditions, advise concerning measures for their improvement, and collaborate in carrying them out. The Committees were also to develop co-operation between British, Allied and other welfare organizations and to place the experience of the voluntary organizations at the disposal of all who were working in the interest of seamen.

Seamen's welfare officers at the principal ports carried out the policy of the Ministry of Labour and National Service, as recommended by the Seamen's Welfare Board and the Port Welfare Committees. They were full-time officers of the Ministry, who acted

as secretaries to the Port Welfare Committees and assisted in co-ordinating the efforts of seamen's welfare organizations. They also worked in close association with the regional officers of other Government Departments and with the local authorities and were responsible particularly for ensuring accommodation and recreational facilities in their areas.

Finally, the Central Consultative Committee of the voluntary organizations was to place their knowledge of special problems at the disposal of the Minister of Labour and National Service.

The Report points out that this machinery brought about a measure of co-ordination, higher standards of accommodation and recreation, and new types of residential and non-residential clubs. These include the Merchant Navy Houses and Clubs established by the Government. In some of the former, accommodation was provided for married couples, and to the Clubs, wives and women friends of seafarers were admitted. Waiting-rooms with canteens were also set up for seafarers attending the Merchant Navy Reserve Pool Offices and Rest Houses for Merchant Seamen suffering from the strain of war service.

Suggestions for Future

As regards the future, the Committee's principal recommendation is that a Merchant Navy Welfare Board, representing equally shipowners and seafarers, should be created by statute to replace the Seamen's Welfare Board of 1940, and deal with matters relating to temporal welfare. Believing that the income of the Board should be found by the shipping industry, the Committee suggests a maximum weekly contribution of 6d a head, shared equally by shipowners and seamen. This levy would be made on personnel domiciled and hired in the United Kingdom for ships registered there. The Committee considers that a contribution to the capital expenditure incurred by the Board should be made by the Government and suggests that 75 per cent of the total of such expenditure be granted. It is recommended that the Board should have power to make a continuous review of port conditions, to decide what clubs and other amenities are required, to close clubs which are redundant or not up to standard, and to prescribe standards of accommodation, meals, prices, etc. In order that voluntary organizations may be fully consulted, the Board should set up a Standing Joint Advisory Council representing the Board and the voluntary organizations. The

latter would be registered by the Board and only those on the Board's list would be allowed to appeal to the public for financial assistance. The Committee believes that, as far as possible, national appeals should be made under a central distributing body.

The Committee also recommends that voluntary organizations should have the right to appeal to an arbitrator from decisions of the Board regarding such matters as closing of premises, refusal to open such premises, refusal of registration or of permission to appeal for funds, or the fixing of standards of prices or accommodation; that the present system of Port or Regional Welfare Committees in all important port areas should be continued and that Regional Welfare Officers should be appointed to link the Board with the Regional Committees.

Additional recommendations of the Committee were: that in every port where a club is needed there should be at least one where beer can be obtained in decent surroundings; that accommodation should be provided for married couples and that wherever practicable a merchant seaman should be able to take his wife or a female relative or friend into the clubs; and that separate residential and recreational facilities should be provided for the "under-twenties" wherever possible. Recommendations were also made for the provision of clubs for Indian and Chinese seamen, under supervision of the Board, and for welfare facilities for Colonial and other seamen not resident in the United Kingdom.

The Report stresses the need for giving full effect to the provision of the International Labour Convention which urges that all who administer funds for seamen's welfare not to concern themselves with seamen of a particular nationality but to provide for them "irrespective of colour, creed or race."

The Report points out that, in spite of recent developments,

it is still a general principle in this country that as far as possible the functions of Government should be confined to those of a regulative character, and that it should not intervene directly in the affairs of individual industries if a reasonable alternative can be provided. The Government cannot escape from its responsibility under Recommendation No. 48, but it is better that it should not assume executive responsibility and should be in an independent position. We feel sure that the help of the Government within reasonable limits will always be available to the new organization and that it will watch sympathetically the progress of its development.

Decisions of National War Labour Board

RECENTLY the National War Labour Board issued decisions in the following cases:—

International Malleable Iron Company, Limited, Guelph, Ont., and United Steelworkers of America, Local 3000.

Saskatoon Cartage and Warehouse Company, and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 189.

McKee Moving and Storage Company, Saskatoon, Sask., and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 189.

Moose Jaw Cartage Company, Limited, and Union Transfer and Storage Company, Limited, Moose Jaw, Sask., and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 187.

Prince Rupert Drydock and Shipyard Company (Grand Trunk Pacific Development Company, Limited), and various local unions in shipbuilding industry.

Dominion Rubber Company, Limited, Montreal, P.Q., and Synthetic Rubber Workers' Union, Local No. 78.

Canadian Industries Limited, Windsor, Ont., and United Automobile Workers of America, Local 195.

Swift Canadian Company, Limited, Toronto, Ont., and United Packinghouse Workers of America, Local 208.

Canada Packers Limited, Peterborough, Ont., and United Packinghouse Workers of America, Local 210.

Canada Packers Limited, Toronto, Ont., and United Packinghouse Workers of America, Local 114.

Procter and Gamble Company of Canada, Limited, Hamilton, Ont.

Colgate-Palmolive-Peet Company, Limited, and Colgate-Palmolive-Peet Company Toronto Employees' Council.

Gainers Limited, South Edmonton, Alta., and Federal Union of Packing Plant Employees, Local No. 78.

Swift Canadian Company, Limited, Edmonton, Alta., and Federal Union of Packing Plant Employees, Local No. 78.

Burns and Company, Limited, Edmonton, Alta., and United Packinghouse Workers of America, Local 233.

Windsor Master Plumbers' Association and United Association of Plumbers and Steam Fitters of the United States and Canada, Local 552.

Retail Merchants' Association of Canada, Inc. (Fur Section), and International Union of Quebec Fur Workers, Local 68.

Terreau and Racine, Limitée, Quebec, P.Q. and International Moulders' and Foundry Workers' Union of North America, Local 74.

International Harvester Company of Canada, Limited, Hamilton, Ont., and United Steelworkers of America, Local 2868.

Forest Products Industries—Coast Region British Columbia and International Woodworkers of America, District Council No. 1.

Dominion Textile Company, Limited, and La Fédération Nationale Catholique du Textile, Inc., and Le Syndicat des Ouvriers catholiques du Textile de Magog, Inc.

B.C. Motor Transportation Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101.

Re: International Malleable Iron Company, Limited, Guelph, Ont., and United Steelworkers of America, Local 3000

Reasons for Decision

This is an appeal by the Company from a direction by the Regional War Labour Board for Ontario, dated February 8, 1945, of increases in wage rates for most of the classifications covered by the application. The Union's preliminary objection to the appeal, founded on a clause contained in the collective agreement, was dismissed by decision of this Board dated April 18, 1945 (L.G., May, 1945, p. 656).

In order to bring the rates in line with what its brief refers to as the "community rates", the Company requests permission to increase as follows the maximum of the established ranges for three classifications:

Moulders to 85 cents

Coremakers to 75 cents

Machinist improvers to 60 cents.

Otherwise it is apparent from an examination of the finding and direction under appeal

that the wage rates directed are generally higher than the rates for similar classifications prevailing in the Guelph-Galt area. On the other hand, we do not find that the rates being paid are "grossly unjust".

The Company agrees, however, that the schedule of job classifications and the rate relationships are in need of revision and it is willing to co-operate with the Union in establishing a balanced hourly and piece rate structure.

Re: Saskatoon Cartage and Warehouse Company, and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 189

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for Saskatchewan dated February 5, 1945 directing the company to increase its hourly rates by 2 cents, but refusing to direct the establishment of weekly rates. At the amount requested by the Union, the increase sought was, on an hourly basis, approximately 17 cents.

The main concern of the Union is frankly stated to be the establishment of a weekly

Except for approval of the increases in the maximum of the ranges for the above-mentioned classifications, we are of opinion that the appeal should be allowed, without prejudice to any further application which may result from the study which may be undertaken.

On the matter of female rates there appears to be no evidence to support the proposition that the Regional Board intended that the women employed should receive the same rates as the men.

June 21, 1945.

wage in lieu of the hourly rates. However desirable it may be to assure a worker's wage income, the point to be determined on an application of this kind under the wages control order must be whether it involves a wage increase which can be directed in conformity with the rule laid down in section 20 (1) (a) of P.C. 9384.

In this case, the Regional Board appears to have taken the proper view and we are of opinion that the appeal should be dismissed.

June 22, 1945

Re: McKee Moving and Storage Company, Saskatoon, Sask., and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 189

Reasons for Decision

This is an appeal by the Union and cross-appeal by the Company from a decision of the Regional War Labour Board for Saskatchewan dated February 5, 1945 directing certain increases in the ranges of hourly rates, but refusing to direct the establishment of weekly rates. At the amount requested by the Union, the increase sought was, on an hourly basis from 17 to 22 cents per hour.

The main concern of the Union is frankly stated to be the establishment of a weekly wage in lieu of the hourly rates. However desirable it may be to assure a worker's wage income, the point to be determined on an application of this kind under the wages con-

trol order must be whether it involves a wage increase which can be directed in conformity with the rule laid down in section 20 (1) (a) of P.C. 9384.

In this case, the Regional Board appears to have taken the proper view and we are of opinion that the appeal should be dismissed.

As to the Company's cross-appeal, it involves a plea of inability to pay. Having in mind that what the Regional Board did was to direct a range of rates, the maximum of which was 60 cents for certain classifications and 55 cents for others, and after having examined the evidence filed, we conclude that the cross-appeal should also be dismissed.

June 22, 1945

Re: Moose Jaw Cartage Company, Limited, and Union Transfer and Storage Company, Limited, Moose Jaw, Sask., and Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 187

Reasons for Decision

This is an appeal by the companies from findings and directions of the Regional War Labour Board for Saskatchewan dated November 22, 1944 and January 3, 1945. By these decisions the Regional Board directed:

- (1) the establishment of weekly wage rates in lieu of previous hourly rates, thereby, on the basis of a normal work week of 52 hours, increasing the rates from 7½ to 11 cents per hour, according to the classifications and introducing payment for statutory holidays, when no work is performed;

- (2) 10 days sick leave without loss of pay after 6 months of service;
- (3) One week's vacation with pay;
- (4) payment at the rate of time and one-half for overtime worked after 52 hours per week for city workers and after 56½ hours per week for country workers;
- (5) payment at the rate of time and one-half for time worked on Sundays, legal holidays or assigned days off, with a minimum allowance of one-half day's pay at the overtime rate;
- (6) minimum allowance of 4 hours at pro-rata rates for work performed outside regular working hours.

No serious objection is taken to items (3), (4), (5) and (6) and in respect of them the Regional Board's decisions will be sustained.

As to item (1), our view is that it is outside the purpose of our wartime wage control measures to introduce by compulsion such a change in the mode of payment, although it may be very desirable from the point of view of guaranteeing an income to the worker. We must consider the direction for a weekly wage rate in its effect upon the amount of remuneration. In this case, the effect is an increase

which has not been shown to be warranted under the provisions of section 20 (1) (a) of P.C. 9384.

It is true the hourly rates being paid are not high, but we fail to see that a case has been made out for the substantial increases awarded. We think, however, that the hourly rates should be increased by 3 cents, effective from November 1, 1944.

Sick leave (item 2) is a condition of employment which should not be imposed upon an employer through the medium of a wage control measure intended to assure economic stabilization and guard against inflation.

The appeal, therefore, is allowed in respect of items (1) and (2) and the findings and directions of the Regional Board should be varied in accordance with the foregoing. This is, of course, without prejudice to any application the parties may desire to make to the Regional Board following the execution of their agreement of March 1, 1945 which provides for a normal work week of 48 hours.

June 22, 1945

Re: Prince Rupert Drydock and Shipyard Company (Grand Trunk Pacific Development Company, Limited), and various local unions in shipbuilding industry

Reasons for Decision

This is an application by the Unions for a direction to the Company to pay its employees for the period of January 1, 1943, to May 17, 1944, on the basis of the bonus hours which had been provided for shipyard workers in Vancouver and Victoria.

Because of the urgent need for the construction of ships, the government introduced a system of bonusing steady attendance at work in the shipyards of British Columbia by allowing workmen working six shifts per week two extra hours' pay when working on the first shift, eight extra hours when on the second shift and eleven extra hours when on the third or "graveyard" shift. This was done by a special Order in Council, P.C. 3636, dated May 1, 1942. It would appear from the preamble of the Order in Council that the bonusing was to be contingent upon the shipyards conducting a 3-shift 7-day per week plan of continuous operation, each man having one day's rest in seven.

This plan of continuous operation was never introduced in the company's yard located at Prince Rupert because of shortage of manpower, but bonus hours were paid nevertheless in accordance with P.C. 3636 for its 2-shift 6-day per week operations.

Following pressure from some of the Unions in the southern Pacific Coast yards, who objected to the plan of continuous operations, a

Royal Commission conducted an investigation and the plan was retained, but extra bonus hours were granted: one hour for the first shift and two hours for the second and third shifts, per week. These extra hours were paid from January 1, 1943, until the respective yards returned to the conditions of their basic working agreements.

In the case of the respondent company, the return to a 44-hour week apparently took place on or about May 17, 1944.

The application is for the extra bonus hours for the period during which they would have been paid if the Prince Rupert Yard had operated under the continuous production plan, which was maintained in the Vancouver and Victoria yards until they also returned to their basic working conditions.

We recognize that the employees for whom this application is made were not responsible for the shortage of manpower which curtailed operations at Prince Rupert. But also we must note that these employees were not subject to the inconveniences of the continuous production plan which appear to have warranted the adoption of the extra bonus hours.

We fail to see how, consistently with the provisions, purpose and intent of our governing Order in Council, P.C. 9384, effect can be given to this application which, in our opinion, must be dismissed.

June 25, 1945.

Re: Dominion Rubber Company, Limited, Montreal, P.Q., and Synthetic Rubber Workers' Union, Local No. 78

Reasons for Decision

An appeal by the Union from a finding and direction of the Quebec Regional Board dated June 6, 1944, insofar as the said finding and direction refused to direct (1) payment of a 5-cent hourly premium for night work, (2) 2 weeks' vacations with pay for employees having five years' continuous service, and (3) a penalty rate at double time for work performed on Sundays and certain holidays. The application was made in respect of the Company's Papineau plant making mechanical rubber goods and, on the matters in appeal, was opposed by the Company.

In the Farm Implement cases (L.G., 1944, p. 1475), we indicated that the basis for a premium for night work, as approved in the first Ford Motor Company decision (L.G., 1943, p. 585), was the production of war equipment. According to the evidence, this plant of the Company did not fall in the category of war plants which the Board in the Ford case appear to have had in mind.

Another factor to be borne in mind in this case arises from the fact that there was some evidence that a certain amount of "continu-

ous processing" was required, although perhaps not to the extent shown in the Goodyear Tire & Rubber Co. case (L.G., 1944, p. 1473), where the premium was denied by both the Regional Board and this Board.

In our opinion, there were no circumstances which would justify our saying that this was a case in which it would have been proper under the Wartime Wages Control Order, 1943, for the Regional Board to direct an unwilling employer to pay the premium.

As to vacations with pay, we shall adhere to our policy of refusing to direct any extension beyond the provisions of D.B.17. The Company now grants one week after one year of service, and with the approval of the Regional Board, two weeks' after 10 years of service.

Penalty at double time for work required to be performed on Sundays and holidays is likewise a working condition which this Board has in no case imposed upon an employer. Under the existing condition, time and one-half is being paid.

The result is, therefore, that the appeal must be dismissed.

June 26, 1945.

Re: Canadian Industries Limited, Windsor, Ont., and United Automobile Workers of America, Local 195

Supplementary Reasons for Decision

An appeal by the Union from a decision of the Ontario Board dated November 17, 1944 refusing approval of a 5c per hour off-shift premium proposed by both the Company and the Union. The wage rate matters involved in this appeal were disposed of by this Board in its Reasons dated June 19, 1945. We are now dealing with the off-shift premium. The appeal on this point is not opposed by the Company.

In June, 1943, the Union had applied to the Regional Board, under the former Order P.C. 5963, for increases in rates and a 5 cent hourly premium for work performed on the second (evening) and third (night) shifts. The application was opposed by the Company and refused by the Regional Board. An appeal was taken to this Board, at the hearing of which the Company took the position that its existing rates included a premium for shift work, compensation which it said it had recognized for many years. The submission then made was that in 1929 the premium (paid since 1926) and the rates had been merged. The situation had then become somewhat like the one considered by this Board in the Electro-Metallurgical Company case (L.G.,

1944, p. 470). The Union's appeal was dismissed; however, "without prejudice to any application that may be made as the result of the job evaluation study, and that, of course, includes any application that may be made at that time for the off-shift bonus" (see oral decision reported in L.G., 1944, p. 273).

The application which was then being referred to was the application indicated in the following paragraph of the Company's written brief filed on that appeal:

We have completed in draft form an exhaustive job evaluation study which was commenced in March, 1943, and which has been under review by the Union and ourselves since 28th October, 1943.

We have informed the Union that we are prepared to submit with the Union a joint application to the Regional War Labour Board for Ontario for permission to increase to the proper level the rates of jobs that are now paid less than the rates indicated by the job evaluation study and for permission to show separately a premium of 5 cents per hour for all employees whose hours of work are from approximately 4 p.m. to 12 p.m. or from approximately 12 p.m. to 8 a.m.

The result of this job evaluation study was duly approved by the Regional Board and confirmed by this Board in its decision of the

19th instant. The rates are now set separately from the proposed off-shift premium.

In view of the foregoing circumstances and, particularly, because the Company had long prior to wage control established a practice of bonusing off-shift work, we are of opinion that

the appeal on this matter should be allowed and that payment of the premium in the terms of the application should be authorized, effective from November 17, 1944, the date when the new rates came into operation.

June 26, 1945.

Re: Swift Canadian Company, Limited, Toronto, Ont., and United Packinghouse Workers of America, Local 208

Reasons for Decision

This is an appeal from that part of a finding and direction of the Ontario Board dated January 24, 1945, declining to authorize payment of a premium of 5 cents per hour for work performed between 6 p.m. and 6 a.m. The application had been made jointly by the Company and the Union and followed a clause of their agreement dated September 15, 1944.

We are informed by the Regional Board that the basis of its refusal was the decision of this Board in the Farm Implement cases (L.G., 1944, p. 1475). It will be observed that in those cases the request of the Union had been opposed by the employers upon several grounds, among which was the fact that such a premium had never been paid in their indus-

try. In this case the employer has agreed to pay the premium subject to approval of the War Labour Board, and there is evidence that the premium is being paid in packinghouses in Ontario and Western Canada. These circumstances, in our opinion, place this case upon a different footing and make it possible, within the terms of section 20 (1) (c) (i) and its concluding paragraph, to authorize payment of a premium of 5 cents for work performed between 6 p.m. and 6 a.m. as provided in clause IX paragraph 4 of the parties' agreement, from September 15, 1944, subject however to the condition that the premium is not to be added to wage rates when calculating overtime.

We allow the appeal.

June 27, 1945.

Re: Canada Packers Limited, Peterborough, Ont., and United Packinghouse Workers of America, Local 210

Reasons for Decision

This is an appeal from that part of a finding and direction of the Ontario Board dated May 5, 1945, declining to authorize payment of a premium of 5 cents per hour for work performed between 6 p.m. and 6 a.m.

On December 18, 1944, the Company and the Union made a joint application to the Regional Board in the following terms:

We wish to introduce the practice of paying a night shift premium of 5 cents per hour for work performed between 6 p.m. and 6 a.m. This premium will not be considered as part of an employee's regular rate. It will not apply to part-time workers, or to temporary or regular employees engaged in manufacturing operations in the cannery. The Union agrees that when a job can be completed by an extra hour's work, employees will work through to 6 p.m. Mondays to Fridays and 1 p.m. on Saturdays without breaking off for supper.

With the Board's permission we would like to establish December 14, 1944, as the effective date . . . for paying night premium.

On account of heavy turnover of staff during autumn months, we would ask that retroactive payments be confined to employees actively employed in our Peterborough plant on the date of the Board's authorization, and to any members of our Peterborough staff who may have joined His Majesty's Armed Forces during the retroactive period.

We assume, on the information received in the Swift Canadian Company case decided concurrently, that the basis for the Regional Board's refusal of the premium for night work was the decision of this Board in the Farm Implement cases (L.G., 1944, p. 1475). It will be observed that in those cases the request of the Union had been opposed by the employers upon several grounds, among which was the fact that such a premium had never been paid in their industry. In this case, the employer has agreed to pay the premium subject to approval of the War Labour Board, and there is evidence that the premium is being paid in packinghouses in Ontario and Western Canada. These circumstances, in our opinion, place this case upon a different footing and make it possible, within the terms of section 20 (1) (c) (i) and its concluding paragraph, to authorize payment of a premium of 5 cents for work performed between 6 p.m. and 6 a.m. as provided in the above quoted application.

We shall allow the appeal and give approval to the terms of the joint application to be effective from the date and in the manner requested.

June 27, 1945.

Re: Canada Packers Limited, Toronto, Ont., and United Packinghouse Workers of America, Local 114

Reasons for Decision

This is an appeal from that part of a finding and direction of the Ontario Board dated March 6, 1945, declining to authorize payment of (1) a premium of 5 cents per hour for work performed between 6 p.m. and 6 a.m., (2) double time for work performed on Sundays.

A request for double time on statutory holidays was withdrawn at the hearing and need not be dealt with.

The following working conditions are provided in the agreement between the Company and the Union dated August 31, 1944.

Article IX—Night Premium

The Company agrees to pay, subject to approval by the Regional War Labour Board for Ontario, a special off-shift premium of five cents (5¢) per hour to all regular hourly rated employees for work performed between the hours of 6 p.m. and 6 a.m. This premium shall not be considered as part of such employees' basic rates.

Article X—Hours of Work and Overtime

3. The company agrees to pay to regular hourly rated employees double their regular rates for work performed on Sundays except by those workers whose work normally falls on Sundays. Sunday shall be defined as 12.01 a.m. to 11.59 p.m. Shift workers, who receive equivalent time off on some other day shall be paid at their regular rates for work performed on Sundays.

There was a joint application to the Regional Board for approval of these conditions.

We assume, on the information received in the Swift Canadian Company case decided concurrently, that the basis for the Regional Board's refusal of the premium for night work

was the decision of this Board in the Farm Implement cases (L.G., 1944, p. 1475). It will be observed that in those cases the request of the Union had been opposed by the employers upon several grounds, among which was the fact that such a premium had never been paid in their industry. In this case, the employer has agreed to pay the premium subject to approval of the War Labour Board, and there is evidence that the premium is being paid in packinghouses in Ontario and Western Canada. These circumstances, in our opinion, place this case upon a different footing and make it possible, within the terms of section 20 (1) (c) (i) and its concluding paragraph, to authorize payment of a premium of 5 cents for work performed between 6 p.m. and 6 a.m. as provided in Article IX, above quoted, of the parties' agreement.

On the matter of double time for Sunday work, there is a special circumstance in that the condition has been in effect for many years in the neighbouring Swift plant. This is, of course, not necessarily the determining factor under P.C. 9384. However, when there is an agreement, we are inclined at this stage of wage control to consider a penalty rate at double time for work on Sunday very much as we do the premium for night work and we think that approval should be given to Article X, paragraph 3, above quoted.

We shall, therefore, allow the appeal and the foregoing provisions shall be effective from September 1, 1944, subject to the condition agreed upon, namely, that retroactive payment shall be made only to employees now on the payroll and those who have joined the Armed Forces.

June 27, 1945.

Re: Procter and Gamble Company of Canada, Limited, Hamilton, Ont.

Supplementary Reasons for Decision

The Company and its employees had applied to the Regional War Labour Board for Ontario for permission to inaugurate payment of a 5-cent hourly premium for work performed by hourly paid employees between 7 p.m. and 7 a.m. The application was refused by that Board and, on appeal to this Board, we found no reason to disturb the decision and dismissed the appeal on January 12, 1945 (L.G., Feb., 1945, p. 142).

Subsequently we granted a hearing for review of our decision on the appeal. In view of our decision in the case of the Toronto Packinghouses (June 27, 1945) and having regard to the further submissions presented to this Board, our finding and direction of January 12, 1945, shall be rescinded and approval given to the joint application, effective from its date, subject to the condition that the premium shall not be included in the base rate for the calculation of overtime.

June 27, 1945.

Re: Colgate-Palmolive-Peet Company, Limited, and Colgate-Palmolive-Peet Company Toronto Employees' Council

Reasons for Decision

This is a joint appeal by the Company and the Union from a decision of the Regional War Labour Board for Ontario, dated May 25, 1945, wherein the Regional Board declined to permit the Company to establish an incentive production bonus plan for its employees who are now paid on a time rate basis. Leave to appeal to this Board was granted to the parties by the Regional Board.

The brief on the appeal, which includes material used by the appellants before the Regional Board, did not, in our opinion, demonstrate in sufficient detail how it was intended that the plan should operate. Moreover, the parties submitted that approval to the plan could be given in pursuance of Section 20 (1) (c) (v) and Section 24 of War-time Wages Control Order, 1943. A preliminary study of the brief indicated that said paragraph (v) and Section 24 could not apply because (a) the case did not appear to involve the establishment of a single rate calculated on another basis to be paid in conjunction with a time rate, and (b) the employer had no previously established incentive rate available to bring this case within Section 24. Further, there did not appear to be sufficient information in the brief to justify this Board to take any action under Section 20 (1) (a).

In view of the foregoing, representatives of the Company, the Union, and of the management engineers engaged in the preparation of the plan, were invited to meet the Board to discuss the conditions involved in the appeal. At the conference much additional information was furnished the Board by the parties.

We now recognize the plan as one involving the inauguration of an incentive bonus plan, and may therefore be considered as coming within Section 20 (1) (c) (iv) of P.C. 9384.

The employer's presently established work week consists of five periods of nine hours each, or forty-five hours per week. The objects of the incentive plan are to increase efficiency, reduce the working hours to forty per week,

and make it possible for the workers to obtain the same weekly take-home but without increasing labour unit costs.

The plan is so designed that its full effect may be realized only after the last of three steps is established. The production cost factors used as the basis for the plan were those established by the Company during the last six months' period of 1944, which, the Company states, compares favourably with proficiency in production over the corresponding period of 1938.

As a condition precedent to the adoption of the first step in the plan, it is necessary for the workers in the plant to achieve and maintain an increased efficiency of 5.9 per cent, and on the basis of the nine-hour day a reduction of 5.56 per cent in labour costs. This, it is stated, has been realized. It is now possible for the Company to operate under the first step of the plan and to shorten the work day for its employees concerned from nine to eight and one-half hours without suffering any loss in production, and to pay an incentive rate which combines the previously established single rate, and an amount equal to 5.9 per cent of the single rate, without increasing unit production costs. It should also be noted that the weekly take-home of the employees concerned will remain unchanged under this step.

The Board is prepared to approve the first step in the plan as aforesaid and to authorize the Company to put it into effect commencing July 1, 1945. The Board is not prepared at this time to approve the remaining two steps of the plan. The appeal is accordingly allowed, but to the extent only that the Company may put into effect the first step of its incentive plan. The Board reserves its decision in respect of the other two steps of the plan and grants leave to the parties to make further submissions in respect thereto in the light of experience gained through the use of the first step of the aforementioned incentive production bonus plan.

June 29, 1945.

Re: Gainers Limited, South Edmonton, Alta., and Federal Union of Packing Plant Employees, Local No. 78

Reasons for Decision

This is an appeal by the Union and a cross-appeal by the Company from a decision of the Alberta Board dated December 15, 1944, whereby that Board directed an increase of 5 cents per hour in the wage rates of the employees in the S.P. cellar handling and

throwing up Wiltshire sides into tanks, and dismissed the remainder of the Union's application. Leave to appeal was granted to both parties.

The Union had sought in its application:

- (1) a general increase of 10 cents per hour;
- (2) an additional 5 cents per hour in S.P. cellar rates;

- (3) automatic increases at fixed intervals within the ranges of wage rates;
- (4) double time on Sundays (and assigned days off) and holidays;
- (5) time and one-half after 8 hours Mondays through Fridays and after 4 hours on Saturdays (in effect a 44-hour week instead of the present 48-hour week).

Little need be said about items (4) and (5) above; they deal with matters which did not figure very much in the discussions at the hearing of the appeal and, in any event, our view is that the Regional Board took the proper decision in refusing to direct them. The demand for a general increase of 10 cents was founded upon the higher rates paid in packinghouses in Toronto and Vancouver. We have taken the position in many cases that the primary function of War Labour Boards in administering the Wages Control Order (P.C. 9384) was to stabilize the wage structure in Canada and that that purpose could not be achieved by equalizing wages across the various economic regions of the country. The Boards are empowered by section 20 of the Order to increase wage rates "only if and to the extent" that they find that the increase is "necessary to rectify a gross inequality or gross injustice". In our view there was no

inequality demonstrated in this case of the kind contemplated by the Order in Council.

As to item (3), we find on the evidence that the practice of the Company has been to increase rates progressively through the 5-cent ranges which were worked out by Professor J. C. Cameron for the various job classifications and directed by this Board on November 24, 1943 (L.G., 1943, p. 1642). The situation is, of course, quite different from the one in the Swift plant where a single rate system of job evaluation is in effect with an incentive bonus plan.

On the cross-appeal, the Company says that there is no reason to increase the rate for four Wiltshire handlers by 5 cents. It says there is no "throwing" required, due to mechanically operated conveyor tables operated on the same level as the top of the pickle tanks. It further contends that to single out for an increase one classification in the pickle cellar will cause dissatisfaction and a feeling of discrimination. Upon these representations, we must agree that there was no justification for this particular increase.

Our conclusion is that the appeal should be dismissed and the cross-appeal allowed.

June 29, 1945.

Re: Swift Canadian Company, Limited, Edmonton, Alta., and Federal Union of Packing Plant Employees, Local No. 78

Reasons for Decision

This is an appeal by the Company and a cross-appeal by the Union from a decision of the Alberta Board dated December 15, 1944, whereby that Board directed an increase of 5 cents per hour in the wage rates of employees in the S.P. cellar handling and throwing up Wiltshire sides into tanks, and dismissed the remainder of the Union's application. Leave to appeal was granted to both parties.

The Union had sought in its application:

- (1) a general increase of 10 cents per hour;
- (2) an additional 5 cents per hour in S.P. cellar rates;
- (3) automatic increases at fixed intervals within the ranges of wage rates;
- (4) double time on Sundays (and assigned days off) and holidays;
- (5) time and one-half after 8 hours Mondays through Fridays and after 4 hours on Saturdays (in effect a 44-hour week instead of the present 50-hour week).

It is convenient to deal first with the Union's cross-appeal. Little need be said about items (4) and (5) above; they deal with matters which did not figure very much in the discussions at the hearing of the appeal and in any event, our view is that the Regional Board took the proper decision in refusing to direct them. The demand for a general increase of

10 cents was founded upon the higher rates paid in packinghouses in Toronto and Vancouver. We have taken the position in many cases that the primary function of War Labour Boards in administering the Wages Control Order (P.C. 9384) was to stabilize the wage structure in Canada and that that purpose could not be achieved by equalizing wages across the various economic regions of the country. The Boards are empowered by section 20 of the Order to increase wage rates "only if and to the extent" that they find that the increase is "necessary to rectify a gross inequality or gross injustice". In our view there was no inequality demonstrated in this case of the kind contemplated by the Order in Council.

The matter of difficulty in the Union's appeal is in item (3) and to dispose of it, it is necessary to review some of the previous wage proceedings in the meat packing industry in Edmonton. In 1943 the Union made an application to the Regional Board to establish a uniform rate for each job in the four Edmonton plants equal to the highest prevailing rate in any one of the plants plus five cents. On May 1, 1943, the Alberta Board declined to equalize the rates, but increased them "as presently established" by five cents. An appeal was brought by the Union on the question of

uniformity and the matter was disposed of by a decision dated November 24, 1943 (L.G., 1943, p. 1642), in which the National Board adopted the report of Professor J. C. Cameron who had been retained by the Board to investigate the situation on the ground. As a general solution—the four plants being involved in the one proceeding, Professor Cameron had worked out ranges of rates to be common in all plants for the various classifications. The spread between the minimum and maximum of the range was 5 cents.

It was found that in the Swift plant there was a rigid single rate system of job evaluation supplemented by incentive bonuses, presumably on an individual basis. The result has been that employees whose jobs are evaluated at the minimum of the ranges established under the Cameron report are not progressively moved up to the maximum. The classifications evaluated below the minimum were brought up to the minimum in compliance with our finding and direction of November 24, 1943. The situation created by the existence of different wage practices in the four plants was clearly perceived by Professor Cameron and on his recommendation we attached the following conditions to our direction:

That increases within the specified wage ranges shall be granted in accordance with the established practice of each employer;

That establishment of the above ranges shall not disturb the system of paying incentive

Bonuses which is now in effect in Swift Canadian Company Limited and Burns and Company Limited.

It is apparent, therefore, that the situation about which the Union complains was contemplated in our order of 1943.

To give effect to the Union's cross-appeal on this point would, it seems to us, be affecting the Company's whole system of remunerating employees, a system which it says has been in effect since 1937. It may be timely now to begin making some revision of the plan, but that could best be done after negotiations and joint study by the Company and the Union, rather than by a haphazard direction from a War Labour Board.

As to the Company's appeal on the 5-cent increase for the approximately six Wiltshire handlers, the company argues that to single out for an increase one classification in the pickle cellar will unstabilize intra-plant and intra-department rate relationships. With that contention we think we must agree. With what knowledge we have of the work content of the great variety of job classifications in a large slaughtering and packing plant, it is fairly obvious that to increase one rate to compensate for unfavourable physical conditions of work is to invite dissatisfaction in the other classifications.

Our conclusion is that the appeal should be allowed and the cross-appeal dismissed.

June 29, 1945.

Re: Burns and Company, Limited, Edmonton, Alta., and United Packinghouse Workers of America, Local 233

Reasons for Decision

This is an appeal by the Company from the following directions contained in a finding and direction of the Regional War Labour Board for Alberta dated December 15, 1944:

(1) That where a female employee does the same job or operation as a male employee in any classification, the male rate of wages shall apply.

(2) That the basic rate for Men Handling and Throwing up Wiltshire sides into Tanks be increased ten cents (10¢) per hour.

On November 24, 1943, this Board adopted the Cameron Report for the four Edmonton packing plants (L.G., 1943, p. 1642). On the question dealt with in the first direction, the report (p. 6) found as follows:

Careful studies conducted at Burns' and Swift's prove that, on the average, when a woman is placed on a job which is ordinarily regarded as a man's job, her capacity is approximately 80 per cent of that of a male employee.

On the basis of this finding, we directed, where women were replacing men, a schedule

of female rates equivalent approximately to 80 per cent of the male rates. On the Union's assertions, it would seem that women in some cases are now completely replacing men, i.e. they would be maintaining the normal output and doing all operations formerly done by men, having regard to the necessity in a packing plant of transferring employees from one job to another.

The general approach of this Board to the question of wage rates for women doing men's jobs was enunciated in the Welland Chemical Works Limited case, as follows:

Unions have used the slogan for some time now, "Equal pay for equal work." Perhaps that slogan is a little indefinite in a way, in that we think there should be read into it that where the work produced by a female gets the same result having the cost factor in mind as that done by a male then the pay should be equal.

We realize, of course, that the authorization still leaves the question of classifying the female employees in the plant in order to comply with it, to the company, and we are not suggesting, at all, that females in the plant as such should necessarily obtain, or have, the same wages as

the males. It is a question of the efficiency of the female employee in each case.

(See L.G., April, 1945, p. 470.)

Applying these principles to this case, it is evident that the important considerations of productivity and cost have been omitted by the Regional Board and that the matter is one calling for an authorization rather than a direction. It will be the business of the Union and the Company to work out individual cases. Our formal finding and direction will therefore contain the following, effective from December 15, 1944:

As women demonstrate their ability to increase their output in jobs where they replace men the company is authorized to increase their pay above their starting rates up to the limit directed for each male classification in the plant by the order of this Board of November 24,

1943, in case file A-2. The principle on which progression should be based is that a woman's actual rate of pay shall be that proportion of the male rate which her output bears to the normal male output provided that such female rates do not increase the per unit labour cost above that attained by males.

With respect to the second direction above quoted, the company says that this increase to two employees is disruptive of its entire base rate structure based upon job evaluation and is bound to cause dissatisfaction not only in the cellar but also in the other departments. We are of opinion that effect must be given to this contention and the appeal on this matter should be allowed.

Findings and Directions in accordance with the foregoing.

June 29, 1945.

Re: Windsor Master Plumbers' Association and United Association of Plumbers and Steam Fitters of the United States and Canada, Local 552

Reasons for Decision

This is an appeal by the employers' association from a decision of the Ontario Regional Board dated March 6, 1945, directing a rate of \$1.25 per hour for journeymen plumbers and steamfitters employed by its members, an increase of 4 cents per hour.

This appeal involves certain unusual features. The employers joined with the Union in the application to the Regional Board. They now allege, however, that subsidiary to the joint application was an understanding with the Union that permission would be obtained from the Wartime Prices and Trade Board to increase the price of services to the public before the increase in wage rates would become effective. Subsequent to the decision of the Regional Board, application was made to the Prices Board who refused permission to increase charges to the public. Hence this appeal was asserted by the employers and vigorously opposed by the Union.

At the hearing it was argued on behalf of the master plumbers that the Union had not established the existence of any "gross inequality" requiring rectification. This is, of course, the argument it should have presented to the Regional Board in the first instance.

The conduct of the employers, in not asserting the provision of P.C. 9384 earlier instead of supporting the wage increase, is one deserving of censure. This case affords a clear indication of the care with which joint applications should be scrutinized by War Labour Boards.

The chief complaints of the employees lie in the fact that their present wage rates are not as high as those that prevailed for that particular trade in Windsor in 1929 and also that the bricklayers and electricians are receiving 4 cents more than the plumbers and steamfitters. Those circumstances are not sufficient to establish the "gross inequality" which, in our understanding of the Order in Council stabilizing wages, is contemplated by section 20 (1) (a). It should be remembered that these journeymen enjoy the highest rate paid to plumbers in any city in Canada and, with one exception, have received since 1939 greater wage rate increases than have been received by plumbers in any other city in Canada.

The appeal is, therefore, allowed, and the finding and direction of the Regional War Labour Board for Ontario dated March 6, 1945, will be set aside.

June 29, 1945.

Re: Retail Merchants' Association of Canada, Inc. (Fur Section) and International Union of Quebec Fur Workers, Local 68

Reasons for Decision

The Association represents five fur merchants in Quebec City: P. A. Alain, Limitée, J. O. Nadeau, Edgar Dechêne, Géofrédo Mercier, and Honoré Sansfaçon. The Union

has been certified by the Quebec Labour Relations Board as the collective representative of their employees.

On January 30, 1945, the Union made an application to the Regional War Labour Board for Quebec for an increase of about 15 per

cent in the weekly wage rates, a reduction of the working week from 48 to 44 hours, two weeks' vacation with pay after five years' service and certain holidays with pay. The schedule of the weekly minimum wage rates to be paid by furriers in the City of Quebec, the working week and the various working conditions are established, under the Collective Agreement Act (R.S.Q. 1941, ch. 163), by decree 3746 relating to the Fur Industry in the Quebec District. This decree is based on a collective agreement between the Appellant-Association and l'Union Nationale et Catholique des travailleurs en fourrure de Québec.

On February 27, 1945, the Regional Board granted a petition for modifications in the working conditions and for a 44-hour week, submitted by the Appellant-Association and the National Union and we suppose that decree 3746 has been or will be duly amended in conformity with the provisions of the Collective Agreement Act and that the new working conditions will be made applicable to the five above-mentioned employers. The scale of wage rates in the general Collective Agreement was not altered by the Regional Board.

On the same date, February 27, 1945, the Regional Board, dealing with the application of the International Union (the respondent herein), directed an increase in the wage rates of the employees of the five above-enumerated employers, numbering 75 out of the 300 em-

ployees subject to decree 3746. Hence, this appeal by the Association.

The Regional Board asserts that it acted pursuant to section 20 (1) (a) of P.C. 9384 and we are informed that it intended to reduce the differential between the Quebec and Montreal rates.

Counsel for the appellant argued that there could not be any "gross inequality or injustice" requiring rectification in wage rates which, although they are in the nature of statutory minimum rates, are nevertheless the result of negotiations between the parties to the agreement upon which is founded the decree 3746, and when the said parties, according to the Quebec Collective Agreement Act, should be representative of the "preponderance" of employers and employees involved. This argument is quite logical and convincing. We feel, however, that the Regional Board has, concerning the practical application of the Quebec Collective Agreement Act, a knowledge and first-hand experience which we do not possess. Moreover, the rates ordered do not appear to us to be enhanced rates under present conditions. For these reasons, we have come to the conclusion that we shall not interfere with the solution arrived at by the Regional Board in a situation where there appears to be a certain element of union competition.

The appeal, therefore, will be dismissed.

June 30, 1945.

Re: Terreau and Racine, Limitée, Quebec, P.Q., and International Moulders' and Foundry Workers' Union of North America, Local 74

Reasons for Decision

This is an appeal by the Union from a decision of the Quebec Board dated March 29, 1945, denying an application for a general wage increase.

On the matter of comparability, insofar as it may be a factor under the present Order, we do not think that this cast-iron foundry should be classed with either the larger Montreal and Three Rivers foundries, or with the foundries located in the rural centres in the Quebec City area. This was the view taken by the Board in ascertaining the amount of cost of living bonus properly payable to these employees under section 34 (3) of P.C. 5963

(L.G., 1944, p. 160). However, the fact is that the Company is paying more than the rural foundries.

At the hearing we understood that the Company was willing to accept the rates paid by F. X. Drolet, Limitée, whose foundry is also located in Quebec and where the base labour rate appears to be 49 cents as compared to the respondent's 46 cents.

The proper disposition to make of this appeal is, we believe, to return the matter to the Regional Board with leave to the parties or either of them to apply for the Drolet rates which we think should be adopted.

July 10, 1945.

Re: International Harvester Company of Canada, Limited, Hamilton, Ont., and United Steelworkers of America, Local 2868

Supplementary Reasons for Decision

This is a review of our decision dated November 27, 1944 (L.G., 1944, p. 1476), whereby we allowed the Company's appeal from the Ontario Board who had directed an off-shift

premium of 5 cents per hour on the ground, among others, that the case was not one falling within the Ford Motor Company case (L.G., 1943, p. 585), i.e. that this company was not engaged on the production of war munitions and supplies.

It was made known to us on this review that at the time of the original application there was off-shift work in two of the company's departments producing Universal Carriers and Scout Car armoured hulls. These units were *entirely* engaged on war work.

In view of these further representations, we believe our finding and direction should be modified and that payment of a premium of 5¢ per hour should be directed for employees for work performed by them in the Company's Departments No. 202 and No. 203 for that time

during which these Departments were engaged *solely* and *entirely* on war production, provided, however, that this direction will be retroactive to the effective date of the Regional War Labour Board's decision, namely, May 1, 1944, and provided further that the premium will apply only for time worked between the hours of 7 p.m. and 7 a.m.

The premium is not to be added to wage rates for the purpose of calculating overtime.

Finding and Direction accordingly.

July 10, 1945.

Re: Forest Products Industries—Coast Region British Columbia and International Woodworkers of America, District Council No. 1

Reasons for Decision

This is an appeal brought jointly, in behalf of 123 employers and by the Union, from certain provisions of the finding and direction of the British Columbia Regional Board dated June 5, 1945, limiting, in the matter of vacations with pay, the master agreement negotiated for the industry.

Of the three points involved, two are related to Decision Bulletin No. 17, which was issued on September 10, 1942 as a guide to Regional Boards in inaugurating vacation plans at the peak of the war effort. That was a time when collective bargaining on working conditions was necessarily more restricted than it need be today and, we are of opinion, that under the more liberal intent appearing in the final words of section 20 (1) (c) (working conditions) of the Wartime Wages Control Order, P.C. 9384, when contrasted with the restrictive wording of section 20 (1) (a) (wage rates), War Labour Boards can allow more scope to collective bargaining in such matters as vacations with pay.

It is for these reasons that we think that section 1 of Article VIII of the agreement can be approved as drafted, so that the two words "*for and . . .*" of the final sentence, in the following portion of the Regional Board's decision can be left out:

A vacation with pay will be granted after an Employee has completed one year's continuous service, i.e., a minimum of three hundred (300) days of actual work; vacation will be allowed for and during the following twelve months' service.

Section 2 of Article VIII provides as follows:

For five or more years' continuous service an additional week's vacation or pay in lieu thereof will be granted.

The Regional Board approved the two weeks, but refused payment in lieu of the additional week by introducing the following limitation taken from D.B. 17:

(c) Vacation pay will not be allowed for vacations not taken; in such case any unused vacation privileges will be allowed to accumulate until conditions permit them to be exercised.

The matter of vacation allowance for vacations not taken was dealt with in the Gair Company decision (L.G., June, 1945, p. 824), when this Board followed a policy which had been indicated in D.B. 14 referred to in the C.N.R. decision (L.G., 1944, p. 840). There is some evidence that the practice was established in some of the employing companies, prior to November 15, 1941, and we are told that urgently required production will be lost if the keymen, who usually qualify for the second week, have to remain on vacation instead of returning to work and taking the allowance. For these reasons and those previously stated we think that the limitation should be removed from the finding and direction of the Regional Board and that section 2 of Article VIII of the master agreement should be authorized, but only for the current year.

The third matter in this appeal is section 7 of Article VIII reading as follows:

Vacations for piece-work rates shall be based on the average daily earnings computed on the basis of the twelve months previous.

The Regional Board changed this to read as follows:

The vacation pay for piece workers shall be based on the regular time rates.

The companies contend that there are no time rates for many classifications in the forest products industries and that the decision is not of practical application, e.g. to sawyers and packers in the shingle industry, to timber felling in the logging industry. On the other hand, vacation pay for time workers is the amount earned for work performed during the normal working hours of the work week,

exclusive of overtime earnings. In order to maintain piece workers and time workers on the same basis, we shall approve section 7 in these terms:

The vacation pay for piece workers shall be based on the average daily earnings for

normal working hours computed on the basis of the twelve months previous.

The appeal is allowed and authorizations are given as indicated above, effective from March 15, 1945.

July 12, 1945.

Re: Dominion Textile Company, Limited, and La Fédération Nationale Catholique du Textile, Inc. and Le Syndicat des Ouvriers catholiques du Textile de Magog, Inc.

Reasons for Decision

This appeal was brought by the Company from a decision of the Quebec Regional Board dated December 26, 1944 whereby the rates for maintenance employees, directed by this Board in its decision dated June 29, 1944 (L.G., 1944, p. 840), were ordered in the Company's Magog Print Works.

It is apparent from its terms that the decision under appeal is based upon the view that our decision of June 29, 1944, applied to the print works at Magog. The final paragraph of our reasons for that decision and the finding and direction which was issued pursuant thereto make it clear that we were dealing with the employees comprised in the "classifications mentioned in the Company's original application". On reference to the covering letter which was part of that application it becomes apparent that only the grey cotton mills were involved and that the print works

were specifically excluded. The appeal, therefore, must be allowed and the decision of the Quebec Board dated December 26, 1944, must be set aside.

In the course of the proceedings in this appeal, the parties have come to an agreement providing an increase of 5 cents for all Magog maintenance employees and their classification into three wage categories. We are asked to give approval to this agreement. We find that the rates agreed upon are in keeping with those established in the grey mills.

There will be a finding and direction approving the provisions of clauses 2, 3 and 4 of the agreement dated May 26, 1945. As to clause 5, we do not think that, under wage control, the question of retroactivity can be entirely left to the parties for settlement, and we will await the result of the further negotiations contemplated.

July 12, 1945.

Re: B.C. Motor Transportation Limited, and Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Division 101

Reasons for Decision

This is an application by the Company for leave to appeal and an appeal from parts of two decisions of the Regional War Labour Board for British Columbia, dated, respectively, April 17, 1945, and May 4, 1945; and also an application for consideration of a joint application by both parties to the said Regional Board, dated June 6, 1945, and by that Board referred to this Board for consideration.

The Regional Board by its Finding and Direction, dated March 19, 1945, directed certain increases to Bus Operators and Junior and Senior Ticket Clerks. By its decision of April 6, 1945, it rescinded that Finding and Direction and in lieu thereof, *inter alia*, directed certain increases to the Junior and Senior Ticket Clerks, effective from July 1, 1944, and further directed increases to the Bus Operators effective from certain dates.

On the application of the Union for further consideration the Regional Board reviewed its

last-mentioned Finding, and on April 17, 1945, amended it by directing the Company to pay its Bus Operators from January 12, 1945, to February 28, 1945, 83½ cents per hour, or 4·8 cents per mile, whichever is the greater; and from March 1, 1945, 85 cents per hour, or 4·8 cents per mile, whichever is the greater.

Subsequently, on May 4, 1945, the Regional Board rescinded its Findings and Directions of April 6, 1945, and April 17, 1945, and, *inter alia*, directed that from July 1, 1944, to February 28, 1945, the Bus Operators be paid 83½ cents per hour, or 4·7 cents per mile, whichever is the greater; and from and after March 1, 1945, 85 cents per hour, or 4·8 cents per mile, whichever is the greater.

Before the Regional Board the Company had opposed the Union's application for increases. It now asks that the directions of the Regional Board, dated April 17, 1945, and May 4, 1945, be set aside. In our view the former having been rescinded by that of May 4, 1945, is of no effect and need not be further dealt with.

The Company does not now oppose the increases granted by the direction of May 4, 1945—and in fact by the joint letter of June 6, 1945, to the Regional Board now asks that the full increases be retroactive to July 1, 1944. It takes exception, however, to the basis of the Regional Board's Finding and Direction of May 4, 1945, as set forth in its Reasons for Decision—namely, that the declared policy of the B.C. Electric Railway Company, Limited (which owns all except the qualifying shares of the appellant Company, and all of which shares are in turn owned by the B.C. Power Corporation, Limited), and of the B.C. Power Corporation, Limited, has been for many years to pass on to the employees a general increase awarded to the employees of any of the major services.

The Union does not join in the appeal to set aside the orders of April 17, 1945, and May 4, 1945, but does not oppose setting them aside provided the retroactive date of the full increases to the employees concerned is July 1, 1944.

On the evidence before us—which was not denied—we have reached the conclusion that neither the B.C. Electric Railway Company, Limited, or the B.C. Power Corporation, Limited, exercise direct control over the policies of the appellant Company. The Boards of Directors are entirely separate and it is quite clear that the statements as to policy made by the officers of the said two Companies were intended to refer and did refer only to those departments and companies directly under their control.

The only question, therefore, remaining for consideration is the effective date of the increases to the Bus Operators. The agreement

between the parties expired on June 30, 1944, and shortly thereafter discussions took place between the parties as to the increases now sought. The Company says that it has always been its policy to make each new agreement retroactive to the expiry date of the immediately preceding agreement and this was well known to the employees; and that this promotes harmony during collective bargaining and that it desires to follow this long established practice. The Regional Board in the case of Junior and Senior Ticket Clerks made the increases effective from July 1, 1944, and from that there is no appeal. It is apparent that the increase of $4\frac{1}{2}$ cents to $83\frac{1}{2}$ cents was authorized by the Regional Board because of a similar increase granted to the employees of the B.C. Electric Railway Company, Limited, effective from March 1, 1944 (but here made retroactive only to July 1, 1944, because of the expiry on that date of the former contract) and it seems clear also that the full increase to 85 cents was made effective as of March 1, 1945, because of the increases allowed to the Vancouver Island Coach Lines Limited, effective on that date.

Under the special circumstances here disclosed, we are of the opinion that the Company should be authorized to increase its wage rates for Bus Operators from July 1, 1944, to February 28, 1945, to 85 cents per hour, or 4·8 cents per mile, whichever is the greater; and directed to pay the said rates from and after March 1, 1945.

Therefore, we grant the application for leave to appeal and allow the appeal to the extent above set forth and Finding and Direction will issue accordingly.

July 12, 1945.

Training

Vocational Training For Women

Survey Completed by Dominion Employment Service

A SURVEY of opportunities for pre-employment vocational training for women in urban centres has recently been completed. The survey was carried out by the women's divisions of the Dominion Employment Service in 33 cities, on the instigation of the Labour Department Committee on Post-War Training of which Mrs. Rex Eaton is chairman.

The scope of the survey included such occupations as household employment, textiles, stenography, hospital ward aides, hairdressing, salesmanship, retail selling, dressmaking, laundries and dry cleaning. A number of other occupations in which training might be useful was suggested in the reports from the Employment Offices, which were based on interviews with employers and other interested persons.

Selection of Trainees

Many of the employers consulted stressed the importance of obtaining workers well adapted to their employment. One of the valuable aspects of pre-employment training was that it facilitated the weeding out of workers unsuited for the particular occupation. On the other hand an employee well suited for her future work could be quickly trained and easily adjusted to her employment.

It was recommended everywhere that advice be given to a girl concerning her attitude to her job, her personal appearance, and her conduct while on the job as part of any training course.

Household Employment

In most localities the women's division of the Employment Service reported that training courses for household employees was considered to have valuable potentialities, since such training could be of assistance in raising the status of the occupation. Employers showed interest in the project, but the reports indicated that no great number of suitable students seemed likely to apply for training until there was a guarantee of reasonable wages and hours and an upgrading of the social status.

The occupation was placed first on the list in many reports, since there were more calls from employers for household workers than for women in other fields of employment.

Numerous suggestions were made in regard to a program for training in various forms of household work. It was suggested that a new approach to the occupation would include an emphasis on the trained household assistant with standard hours of work and standard scales of wages according to ability. It was felt also that there was need for education of employers in order to improve the conditions of work and the status of the employee. Training could be given to workers willing to undertake full-time or part-time employment.

Textiles

Pre-employment training was approved for the textile industry in many centres. In some cases training in the operation of power sewing machines was considered most desirable, and this, it was felt, would have the particular value of accustoming the trainee to the use of machinery, thus enabling her to commence employment with greater confidence. It would also enable the applicant's aptitude for such work to be determined. Other employers in this industry favoured on-the-job subsidized training for textiles operations.

Stenography

Refresher courses in stenography for girls who have been war workers are already taking place in some training centres.

A number of employers expressed the view that training standards for stenographic work were at present too low. Some felt that a basic reason for this was that a large percentage of girls undertake training in stenography without the proper educational foundation.

Hospital Ward Aides

Some reports indicated that owing to the shortage of hospital workers nurses are at present doing many domestic jobs which could more appropriately be done by qualified ward aides. Hospitals expressed interest in developing a course of training for hospital ward aides.

Salesmanship

Although many firms said that they preferred to train their own girls, a number of

stores, in particular some of the larger ones, expressed enthusiasm over the possibilities of a pre-employment course in salesmanship. A number of department stores pointed out also that training in salesmanship constituted a necessary approach to such professions as interior decorating, in which actual selling experience is considered requisite. A typical course, it was suggested, would begin with such matters as attitude of mind of the sales clerk, correct sales approach, obtaining interest of customers, display of merchandise, stock-taking, handling of cash, etc.; which might be followed by specialized training in connection with the goods to be sold, such as a study of fabrics, textures, etc. Some of the stores have their own basic training schools for new staff.

Waitresses

Considerable interest was expressed in a number of centres as to the possibilities for carrying on a training course for waitresses. As one possible aid, it was suggested that graduates be privileged to wear a pin, and that this would help to raise the standard of the occupation since the public would commence looking for the distinguishing badge in various eating establishments. The course would

be subdivided to meet the needs of hotels, restaurants, cafeteria staff, counter attendants, etc.

Other Occupations

The reports indicated that opportunities for establishing training courses vary considerably in different localities. Among the other occupations which were mentioned in some of the reports as having possibilities for pre-employment classes were the following: hair-dressing and beauty consulting, commercial cooking, medical laboratory technicians, binding help for the printing industry, and many others.

The reports on training possibilities received from the various Employment Offices have been submitted to Canadian Vocational Training to serve as a basis for further inquiry and planning, and to the Training Committee of the Unemployment Insurance Committee for the same purpose.

Commenting on the survey Mrs. Rex Eaton declared, "I should like to pay tribute to those who have successfully taken part in this work. Full and interested co-operation was given by the various groups in the community who were consulted and without whose assistance the reports could not have been secured."

Vocational Training for Ex-Service Personnel

THE Vocational Training Branch of the Department of Labour has issued a bulletin entitled *Vocational Training for Ex-Service Personnel*, outlining the methods being applied by the Branch in providing vocational training for men and women discharged from the armed services. It is designed primarily for the information of educational and vocational counselling personnel in the three armed services and at rehabilitation centres.

It is pointed out in the introduction that vocational training constitutes only one step, albeit an important one, in the rehabilitation of ex-service personnel. The Department of Veterans Affairs has requested the Department of Labour to assume responsibility for the provision of vocational training, as distinct from academic training, except in the case of categories of severe disabilities. For the latter, the Department of Veterans Affairs has made special arrangements, either through organizations such as the Canadian National Institute for the Blind, The Canadian National Institute for the Deaf, or by other organizations operated by or for the Department of Veterans Affairs.

The vocational training program is being carried on by the Vocational Training Branch in cooperation with the provincial governments. It utilizes the administrative and instructional organization built up during the war years, to train workers for war industries and for armed service tradesmen. In all, approximately 250,000 men and women were trained for war industries and over 120,000 tradesmen for the armed forces. During the three years ending November 30, 1944, vocational training was given to nearly 6,000 members of the armed services who had been given their discharge.

Procedure Followed

The procedure followed is to give as much predischARGE counselling and training as possible. Following discharge, members of the forces are referred to the Department of Veterans Affairs which is responsible for counselling. Those who desire vocational training are given further counselling and a recommendation is made in each case to the District Rehabilitation Board. Before training is given, each case must be approved by the

District Board, a representative of the Vocational Training Branch being present to advise on training opportunities. No tuition fee is charged any ex-service person and training Allowances are made by the Department of Veterans Affairs to cover living and incidental expenses. However, certain training costs, such as tuition fees paid to trade schools, correspondence schools, business colleges etc. are deducted from re-establishment credits. It is considered important that vocational counsellors, while informing an applicant concerning such deductions, should also point out that from a long range point of view, it is more advantageous to permanent re-establishment in most instances for the applicant to take a course of training rather than the re-establishment credit.

Principles Applied in Training

It is recognized, the bulletin points out, that rehabilitation is not complete until the trainee, whether a man or a woman, has been satisfactorily re-established in a peace-time job. Consequently, wherever possible, a definite job is found for every trainee prior to the completion of his training by representatives of the Department of Veterans Affairs, the Employment Service of the Unemployment Insurance Commission and by the Canadian Vocational Training Branch.

In the second place, it is pointed out, that the objective of the training is to develop a broad enough basis of practical skill and technical knowledge to enable the trainee to hold down a job in his chosen occupation in permanent peace-time employment. To accomplish this, such factors as the trainee's aptitudes, previous experience and education are

duly appraised and applied in directing the course.

Then too, the member to be trained in any single occupation is regulated as much as possible so as to avoid occupational overcrowding or the displacement of other workers by those who are being trained. This involves close co-ordination with the Employment Services of the Department of Labour and other organizations concerned with employment problems, such as employers' groups and organized labour.

Again, unlike war emergency training, instruction is given in daytime hours and only in exceptional cases in the evenings or on night shifts. The training is not necessarily given in a trainee's home town, as it is considered more efficient and, in the long run, more beneficial to the trainee to have a small number of competently staffed and well equipped training centres than to provide mediocre training in a larger number of centres.

Methods of Training

The methods of training are classified as follows, according to the demands of different occupations: (A) Pre-employment classes; (B) Indentured Apprenticeships; (C) Correspondence Courses; (D) Training on the Job in Industrial and Commercial Establishment; (E) Pre-Matriculation classes. Brief outlines of the plans followed for each of the courses are given in the Bulletin.

Lists of the Canadian Vocational Training Officials and of the courses given at the several Vocational Training Centres, as well as information respecting some seventeen standard trades are also included, providing ready information for counsellors and veterans alike.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the up-grading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Navy, Army and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the

present war and referred for training by the Department of Veterans Affairs;

- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program free of

charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to June 30, 1945, the gross enrolment under Canadian Vocational Training has been as follows:

Training in Industry.....	273,612
Army Tradesmen.....	48,952
Navy Tradesmen.....	9,051
R.C.A.F. Tradesmen.....	65,211
Rehabilitation (Discharged persons from the Forces)...	12,090
Students	7,649
TOTAL	416,565

Of the types of training that have been provided during the past few years as listed above, the following are being discontinued, except where there is particular need in a special type of industry, such as, the building trades and the textile industry:

- (1) Pre-employment classes
- (2) Part-time classes
- (3) Plant Schools
- (4) Training of tradesmen for the Armed Forces.

With this issue of the *LABOUR GAZETTE*, monthly publication of the tables dealing with training for the Armed Forces, training in industry and pre-employment training has been discontinued, but the rehabilitation training of discharged members of the Forces has been expanded under three tables: (1) to show those who are being trained on the job with individual employers in industrial and commercial establishments, (2) those who have been enrolled for a correspondence course or who have registered for pre-matriculation training prior to entering a university or

qualify for certain occupations, and (3) pre-employment training given in schools. These include provincial and municipal vocational schools, private trade schools and business colleges, special C.V.T. vocational training centres.

As of June 30 there were still under training in all provinces in full-time pre-employment schools, 38 men and 116 women; the majority of the latter comprise women enrolled in classes to train as stenographers for the Dominion Civil Service and in special classes to train as social welfare aides. The number of employed persons enrolled in part-time classes throughout the Dominion at the end of June was 88 and on the same date there were still under training 743 Army Tradesmen (largely comprised of clerks and young soldiers under the Canadian Technical Training Corps) and 25 Naval tradesmen.

Rehabilitation Training

The total number of discharged members of the Forces enrolled on June 30 in all types of training was 4,618, an increase of only 72 during the month. The field and supervisory staff has been substantially increased in most of the provinces, and additional appointments are being made, as qualified persons both men and women are being discharged from the Forces. Squadron Officer Marion Graham, who has recently been discharged from the Women's Division of the R.C.A.F., has been appointed Dominion Supervisor of Women's Training and assumes her duties at the beginning of August.

As buildings suitable for training purposes become surplus to Navy, Army or Air Force requirements, these are being turned over by War Assets Corporation; the same holds good for machine tools and other items of equipment, but the process is extremely slow, and the program still lacks the necessary buildings and equipment in many areas.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for three days during the month of July. During this period the Board received nine applications, held three hearings, issued ten certificates designating bargaining representatives, rejected one application, ordered two representation votes, and gave decisions in three appeal cases.

Certificates Issued

(1) Brotherhood of Railroad Trainmen and Michigan Central Railroad, (Canada Division) (New York Central Railroad Company, Lessee) St. Thomas, Ontario. (L.G., March, 1945, p. 289). The Union and Mr. F. A. Collin were certified as bargaining representatives for the road train conductors employed by the Michigan Central Railroad (Canada Division) (New York Central Company, Lessee)

St. Thomas, Ontario. Conductors employed in yard service were excluded from the bargaining unit.

(2) Brotherhood of Railroad Trainmen and Wabash Railroad Company, Lines East of Detroit (Buffalo Division) St. Thomas, Ontario. (L.G., March, 1945, p. 290). The Union and Mr. F. J. Kileen were certified as bargaining representatives for the road train conductors employed by the Wabash Railroad Company, Lines East of Detroit (Buffalo Division) St. Thomas, Ontario. Conductors in yard service were excluded from the bargaining unit.

(3) Brotherhood of Railroad Trainmen and Pere Marquette Railroad Company (Canadian Division) St. Thomas, Ontario. (L.G., March, 1945, p. 290). The Union and Mr. F. E. Crawford were certified as bargaining representatives for the road train conductors

employed by the Pere Marquette Railroad Company (Canadian Division) St. Thomas, Ontario. Conductors employed in yard service were excluded from the bargaining unit.

In each of these three cases a representative vote of the employees affected was taken by an official of the Board, following a public hearing by the Board.

(4) The Oshawa Railway and Thousand Islands Railway Clerical Association and Oshawa Railway Company, Oshawa, Ontario, (subsidiary of Canadian National Railways) (L.G., May, 1945, p. 665). The Union and Messrs. Nelson Whinfield and Thomas Driscoll were certified as bargaining representatives for clerks, accountant, yard foreman and clerk, shed foreman, cashier, rate clerks, claims and correspondence clerks, billers, yard clerks, cartage and posting clerks, inward clerks, claims inspector and billing clerk, stenographers, assistant biller and advice clerk, checkers, and janitrix in the freight office, the storekeeper-timekeeper in the stores department, superintendent's secretary, draftsman and relief despatcher in the superintendent's office. Certification followed a public hearing by the Board and an investigation of the application by an Officer of the Board.

(5) Canadian Seamen's Union, Pacific Coast District, and Kingcome Navigation Company Limited, Vancouver, B.C. (L.G., May, 1945, p. 665). Following an investigation of the application by an Officer of the Board, the Union and Messrs. J. M. Smith, and H. Sipes were certified as bargaining representatives for the unlicensed crew members of the deck, engine room, and steward's departments of vessels operated from Pacific Coast ports by the Kingcome Navigation Company Limited, Vancouver, B.C. Masters, mates and engineers were excluded from the bargaining unit.

(6) Canadian Seamen's Union and Marine Industries Limited, Leaf Barges Division, Sorel, P.Q. (L.G., June, 1945, p. 829). The Union and Messrs. J. A. Sullivan, D. Ferguson, C. E. Lenton and Theodore Roy were certified as bargaining representatives for the unlicensed personnel employed on vessels operated by Marine Industries Limited, Leaf Barges Division, Sorel, P.Q. Certification followed an investigation of the application by an Officer of the Board.

(7) Canadian Brotherhood of Railway Employees and Other Transport Workers, Division 199, and Canadian National Railways (lighterage), Moncton, N.B. (L.G., July, 1945, p. 962). Following an investigation of the application by an Officer of the Board, the Union and Messrs. A. R. Mosher, J. E. McGuire, F. H. Gillespie, F. D. Nicoll, J. A. Helder and L. B. Lang were certified as bargaining representatives for the employees of the Canadian

National Railways engaged in lighterage operations at Halifax, N.S. The Marine Superintendent, Pier Supervisor and Assistant Superintendent, and Deck Maintainer were excluded from the bargaining unit.

(8) Canadian Brotherhood of Railway Employees and Other Transport Workers, Division No. 59, and Canadian National Railways, Vancouver, B.C. (L.G., July, 1945, p. 962). The Union and Messrs. T. McGregor, J. H. Whiteman, H. Allison, James Detweller, and John A. McDonald were certified as bargaining representatives for the employees, comprising the grain door gang, employed by the Canadian National Railways, Vancouver, B.C. The foreman was excluded from the bargaining unit. Certification followed an investigation of the application by an Officer of the Board.

(9) Canadian Seamen's Union, Pacific Coast District, and Vancouver Barge Transportation Limited, Vancouver, B.C. Following an investigation of the application by an Officer of the Board, the Union and Messrs. J. M. Smith, H. Sipes, and G. H. Taylor were certified as bargaining representatives for the unlicensed crew members in the deck, engine room and steward's departments of vessels operated from Pacific Coast Ports, by Vancouver Barge Transportation Limited, Vancouver, B.C. Masters, mates and engineers were excluded from the bargaining unit.

(10) Canadian Seamen's Union, Pacific Coast District, and Victoria Tug Company Limited, Victoria, B.C. The Union and Messrs. J. M. Smith and H. Sipes were certified as bargaining representatives for the unlicensed crew members in the deck, engine room and steward's departments of vessels operated by the Victoria Tug Company Limited, Victoria, B.C. Masters, mates and engineers were excluded from the bargaining unit. Certification followed an investigation of the application by an Officer of the Board.

Application for Certification Rejected

Seafarers' International Union of North America, Vancouver Branch, Pacific District, and Vancouver Tug Boat Company, Limited, Vancouver, B.C. (L.G., July, 1945, p. 962). Following an investigation of the application by an Officer of the Board, the Board decided that the application could not be entertained for the reason that it had not been shown that the applicant union acted with the authority of the majority of the employees affected as prescribed by the Regulations.

Representation Votes Ordered

(1) Canadian Brotherhood of Railway Employees and Other Transport Workers and Northern Alberta Railway Company, Edmonton, Alberta (L.G., June, 1945, p. 829). The

eligible voters are the employees in the Mechanical and Stores Departments of the Northern Alberta Railway Company, Edmonton, Alberta. The Board decided that the employees in the Mechanical and Stores Departments affected by the application would constitute one unit and that a vote of the employees affected be conducted by an officer of the Board, the name of the applicant union as well as the name of the intervening union, the International Brotherhood of Firemen and Oilers, Helpers, Roundhouse and Railroad Shop Labourers appearing on the ballot.

(2) Brotherhood of Maintenance and Way Employees and Canadian National Railways, Western Lines, Winnipeg, Manitoba, (grain door repairmen at Lakehead Terminals) (L.G., June, 1945, p. 829). Those eligible to vote are the carpenters employed as grain door repairmen at Lakehead Terminals of the Canadian National Railways.

Applications for Certification Under Investigation

1. Canadian Seamen's Union on behalf of unlicensed crew members in deck, engine room and steward's department on vessels operating from Pacific coast ports of the Vancouver Barge Transportation Company Limited, Vancouver, B.C.

2. Canadian Seamen's Union on behalf of unlicensed crew members in deck, engine room and steward's department on vessels operated by the Victoria Tug Company, Victoria, B.C.

3. Canadian Air Lines Dispatchers Association on behalf of Flight Control Officers (alternate title "dispatchers") and assistants of Trans-Canada Air Lines, Winnipeg, Manitoba.

4. Canadian Brotherhood of Railway Employees and Other Transport Workers on behalf of bus drivers, truck drivers, mechanics, office clerk and coach cleaner employed by Canadian National Transportation Company Limited, Hornepayne, Ontario.

5. International Brotherhood of Electrical Workers on behalf of plant workers and outside

maintenance men employed by the Maritime Electric Company Limited, Charlottetown, P.E.I.

6. Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, Local 1374, on behalf of employees of Western Canada Greyhound Lines Limited, Calgary, Alberta, employed in the four western provinces.

7. Canadian Seamen's Union on behalf of the unlicensed personnel in deck, engine room and steward's departments on ocean going vessels owned and/or operated by the Imperial Oil Limited, Marine Departments, Toronto, Ontario.

8. Canadian Seamen's Union on behalf of the unlicensed personnel in deck, engine room, and steward's departments on vessels owned and/or operated by the British American Oil Company Limited, Toronto, Ontario.

9. Canadian Seamen's Union on behalf of the unlicensed personnel in deck, engine room, and steward's departments on vessels owned and/or operated by the Diamond Steamship Limited, Owen Sound, Ontario.

Decision of Board in Appeal Cases

The Board issued reasons for judgment in the following Appeal Cases:

(1) Union Mine Workers of America, District 18, appellant, and Western Dominion Coal Mines Limited, Taylorton, Saskatchewan, respondent, and Saskatchewan Coal Miners' Union (Taylorton Division) intervener respondent.

(2) Selkirk Foundry Workers' Unit, One Big Union, appellant, and Manitoba Steel Foundries Limited, Selkirk, Manitoba, respondent, and International Moulder and Foundry Workers' Union of North America (Local 402), intervener respondent.

(3) Scavenging and Incinerator Employees Unit, One Big Union, appellant, and the Corporation of the City of Winnipeg, respondent, and the Federation of Civic Employees, intervener respondent.

Between: United Mine Workers of America, District 18 (Petitioner) Appellant, and Western Dominion Coal Mines, Limited, Taylorton, Sask., Respondent, and Saskatchewan Coal Miners' Union (Taylorton Division) (Intervener) Respondent.

The Board consisted of the Vice-Chairman, A. H. Brown, and Messrs. Best, D'Aoust, Deschamps, Complin, Hills, Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal by the United Mine Workers, District 18, from the decision of the Saskatchewan Wartime Labour Relations Board

rejecting an application made by the appellant on Feb. 27, 1945, for certification of bargaining representatives on behalf of employees of the company because of the existence of a collective agreement entered into on Feb. 13, 1945, between the company and the Saskatchewan Coal Miners' Union on behalf of the same employees.

The decision of the Saskatchewan Board was based on the provisions of Section 9 of the Regulations, the effect of which is to constitute a bar to the election of new bargaining representatives and an application for certification until after ten months of the term of a subsisting collective agreement.

The agreement in question of Feb. 13, 1945, was negotiated to replace an agreement entered into between the company and the Saskatchewan Coal Miners' Union, dated Aug. 21, 1939, containing a closed shop provision and which had been amended by the parties on occasions in the interim.

Negotiations for the completion of a new agreement were initiated between the representatives of the Saskatchewan Coal Miners' Union in October, 1944, and were carried on down to the date of the new agreement on Feb. 13, 1945, in the course of which meetings of the employees were called by public notice by the representatives of the Union for the purpose of discussion of the terms of agreement under negotiation. On the other hand the appellant union did not attempt organization among the employees before the final stage of negotiation of the new agreement and bargaining representatives were not elected by that organization until Feb. 18, 1945. The appellant explains the delay in its attempt at organization on the grounds of an earlier undertaking given in the course of a strike settlement made in Sept., 1939, and a decision made again by it in the fall of 1944, to refrain from organization of the employees of the company in favour of the Saskatchewan Coal

Miners' Union during the period of the war and charges that bad faith on the part of the latter union and the Canadian Federation of Labour, by reason of the affiliation of that union with the Federation during the period of the war in breach of the same strike settlement, led to the later decision to attempt organization.

Whatever substance there may be in these charges, the fact remains that the appellant did not attempt organization until the final stage of negotiation of the agreement nor until a date which was too late to permit it to elect bargaining representatives and apply for certification before the company and the intervener had consummated the new agreement on Feb. 13, 1945, after a protracted period of negotiation. The Board is of opinion that in view of all the circumstances the agreement should stand and that the election of new bargaining representatives and the application are therefore out of order in point of time.

Leave to appeal is granted but the appeal is dismissed.

(Sgd.) A. H. BROWN,
for the Board.

Dated at Ottawa, July 17, 1945.

M. A. MacPherson, Esq., K.C., John Stokalak, Esq., Pat Conroy, Esq., for (Petitioner) Appellant; W. W. Lynd, Esq., K.C., A. E. Turner, Esq., F. H. Nord, Esq., for Respondent; E. Smith, Esq., J. J. Smart, Esq., N. Jennings Esq., for (Intervener) Respondent.

**Between: Selkirk Foundry Workers' Unit, O.B.U.—(Petitioner) Appellant,
and Manitoba Steel Foundries, Limited, Selkirk, Man., Respondent,
and International Moulders & Foundry Workers Union of North
America, Local No. 402 (Intervener) Respondent.**

The Board consisted of the Vice-Chairman and Messrs. Best, Complin, D'Aoust, Hills, Harmegnies, Mosher and Taylor.

Reasons for Judgment

This is an application for leave to appeal and an appeal taken by the Selkirk Foundry Workers' Unit, O.B.U., from a decision of the Manitoba Wartime Labour Relations Board rejecting an application made by the Union for certification of bargaining representatives of employees of the Manitoba Steel Foundries, Limited, following a vote, ordered by and taken under the direction of that Board, and from a refusal of the said Board to order a second vote on the application of the Union.

On the vote the Union did not obtain the support of a majority of the employees in the

bargaining unit and even if effect were given to its present objections as to the count of certain ballots, this would not affect the result. While objections are also taken to the manner of conducting the vote, the scrutineer of the appellant union signed a certificate following the balloting that the same had been conducted in a fair and reasonable manner and no evidence was submitted to the contrary effect to satisfy the Board that the vote was conducted in a manner prejudicial to the appellant or otherwise than in a fair and proper manner. While the appellant in making application to the Manitoba Board for a second vote claimed unfair interference on the part of the company in the election and unfair electioneering practices on the part of the

intervening union and bases its appeal on the refusal of the Manitoba Board to give effect to this contention, these charges were not substantiated by evidence before the Manitoba Board nor was evidence submitted to show that the result of the vote was affected by these alleged actions.

Leave to appeal is granted but the appeal is dismissed.

Dated at Ottawa, July 18, 1945.

(Sgd.) A. H. BROWN,
for the Wartime Labour Relations
Board (National)

**Between: Scavenging and Incinerator Employees Unit, O.B.U. (Petitioner)
Appellant, and The Corporation of the City of Winnipeg, Respondent
and The Federation of Civic Employees, (Intervener) Respondent.**

The Board consisted of Vice-Chairman, A. H. Brown, and Messrs. Best, Complin, D'Aoust, Hills, Harmegnies, Mosher and Taylor.

Reasons for Judgment

This is an appeal from a decision of the Manitoba Wartime Labour Relations Board refusing the application of the appellant Union for establishment of a grievance procedure pursuant to Sections 17 and 18 of the Regulations to dispose of a grievance of employees represented by the union and arising out of the promotion by the Corporation of the City of Winnipeg of an employee to fill the position of foreman in the Street Cleaning and Scavenging Department of the City. At the time this appointment was made in the fall of 1944, the representatives of the union were negotiating a new collective agreement on behalf of the employees in this division with the city authorities to replace an agreement between the city and the Committee of Civic Employees which had terminated on Feb. 29, 1944.

While the agreement was not in effect at the time the appointment was made, both the city authorities and the intervener which had

been a party to the former agreement state that the appointment complained of was made in accordance with its seniority provision: "by the employee in the same department who has served longest in the next grade junior to the position vacant." These parties further state that in making the appointment the matter was considered successively by the department heads, the legislative and reception committee and the adjustment committee of the Council and by the City Council itself.

The Manitoba Board decided that it had no authority under the Regulations to intervene to establish a grievance procedure under sections 17 and 18 of the Regulations since there was no collective agreement in effect at the time the appointment was made and as the matters involved were not matters involved in the negotiations of a new agreement. This Board is in agreement with the decision of the Manitoba Board.

The appeal is, therefore, dismissed.

Dated at Ottawa, July 19, 1945.

(Sgd.) A. H. BROWN,
for the Wartime Labour Relations
Board (National).

Conciliation Proceedings Under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiation for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agree-

ment might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During July reports were received from six Boards of Conciliation:—

Concerning Aluminum Company of Canada, Limited, Arvida, P.Q., and Le Syndicat National des Employés d'Aluminium.

Concerning Boeing Aircraft of Canada, Limited, Vancouver, B.C., and Aeronautical Mechanics, Lodge 756, International Association of Machinists.

Concerning Champion Spark Plug Company of Canada, Limited, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (U.A.W.-C.I.O.) Local 195.

Concerning Ford Motor Company of Canada, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 240.

Concerning Imperial Optical Co., Toronto, Ont., and Local 514 United Electrical, Radio, and Machine Workers of America.

Concerning H. Krug Furniture Co., Ltd., Kitchener, Ont., and Local No. 8, Canadian Aircraft Workers Association.

Concerning Motor Products Corporation, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America (U.A.W.-C.I.O.) Local No. 195.

Concerning St. Clair Processing Company, Sarnia, Ont., and United Gas, Coke and Chemical Workers.

Concerning Dominion Button Company, Kitchener, Ont., and National Union of Textile Workers.

Boards Fully Constituted

During July nine Boards of Conciliation were fully constituted:—

Canadian Marconi Co., Ltd., Montreal, P.Q.—The Board of Conciliation established to deal with a dispute between the Canadian Marconi Company Limited, Montreal, P.Q. and the Commercial Telegraphers Union, Canadian Marconi System, Division No. 59, was fully constituted on July 17 with the appointment of Mr. L. W. Brockington, K.C., Ottawa, Ont., as Chairman of the Board on the joint recommendation of the two other members of the Board. Mr. W. A. Merrill, K.C., Montreal, P.Q., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

Dominion Fabrics, Limited, Dunnville, Ont.—The Board of Conciliation established to deal with a dispute between Dominion Fabrics, Limited, Dunnville, Ont., and Textile Workers Organizing Committee, Local 21, C.C.L. was fully constituted on July 18, with the appointment of Dr. A. Brady, Toronto, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board, Messrs. James L. McLennan and Bora Laskin, both of Toronto, were appointed

on the nomination of the employer and employees respectively.

Frost and Wood Company Limited, Plant No. 1, Smith's Falls, Ont.—The Board of Conciliation established to deal with the dispute between the Frost and Wood Company Limited, Plant No. 1, Smith's Falls, Ontario, and United Steel Workers of America, Local 3140, was fully constituted on July 7 with the appointment of Mr. L. W. Brockington, K.C., Ottawa, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation of the other two members of the Board. Mr. D. P. Cruikshank, Ottawa, Ont., and Mr. Henry L. Carthwright, Kingston, Ont., were appointed on the nomination of the employer and employees respectively.

Holeproof Hosiery Company of Canada, Limited, London, Ont.—The Board of Conciliation established to deal with a dispute between the Holeproof Hosiery Company of Canada Limited, London, Ont., and United Textile Workers of Canada, Local 22, was fully constituted on July 9, with the appointment of His Honour Judge Egerton Lovering, Toronto, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Messrs. N. L. Matthews, K.C., and Irving Himel, both of Toronto, were appointed on the nomination of the employer and employees respectively.

Truscon Steel Corporation of Canada Limited, Windsor, Ont.—The Board of Conciliation established to deal with a dispute between the Truscon Steel Corporation of Canada Limited, Windsor, Ont., and the International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195, was fully constituted on July 26, with the appointment of His Honour Judge Egerton Lovering, Toronto, Ont., as Chairman of the Board, who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. Bruce Clause, Kingsville, Ont., and Mr. Bora Laskin, Toronto, Ont., were appointed on the nomination of the employer and employees respectively.

John Inglis Company Limited, (Ordnance Division), Toronto, Ont.—The Board of Conciliation established to deal with a dispute between John Inglis Company Limited, (Ordnance Division), Toronto, Ont., and Local 2900 United Steelworkers of America, was fully constituted on July 26, with the appointment of His Honour Judge W. D. Roach, Toronto, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from

the other two members of the Board. Messrs. E. MacAulay Dillon and H. Orliffe both of Toronto were appointed on the nomination of the employer and employees respectively.

A. R. Kaufman, Kitchener, Ont.—The Board of Conciliation established to deal with a dispute between the A. R. Kaufman, Kitchener, Ont., and United Rubber Workers of America, was fully constituted on July 23, with the appointment of His Honour Judge W. T. Robb, Orangeville, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. L. Matthews, Toronto, Ont., and Mr. A. Williams, Oshawa, Ont., were appointed on the nomination of the employer and employees respectively.

Atkins Stage Lines Limited, Chilliwack, B.C.—The Board of Conciliation established to deal with a dispute between Atkins Stage Lines Limited, Chilliwack, B.C. and Division 101, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America, was fully constituted on July 24, with the appointment of Mr. J. Howard Harman, Victoria, B.C. as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Messrs. Alan M. Russell and R. K. Gervin both of Vancouver were appointed on the nomination of the employer and employees respectively.

Firestone Tire & Rubber Company of Canada Limited, Hamilton, Ont.—The Board of Conciliation established to deal with a dispute between Firestone Tire & Rubber Company of Canada Limited, Hamilton, Ont., and Local 113, United Rubber Workers of America, was fully constituted on July 11, with the appointment of His Honour Judge W. D. Roach, Toronto, Ont., as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. Neil Petersen, Toronto, Ont., and Mr. A. Williams, Oshawa, Ont., were appointed on the nomination of the employer and employees respectively.

Boards Established

During July seven Boards of Conciliation were established but not fully constituted:—

Concerning Ford Motor Company of Canada Limited, Toronto, Ont., and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO).

Concerning Fahrloy Corporation of Canada Limited, Orillia, Ont., and United Electrical Radio & Machine Workers of America, Local 511.

Concerning Canadian Bridge Company, Plants 1 and 2, Walkerville, Ont., and United Steelworkers of America, Local 2471.

Concerning Canadian Car & Foundry Company Limited, (Aircraft Division), Fort William, Ont., and the International Association of Machinists, Aircraft, Lodge 719.

Concerning Fairfield & Son Limited, Winnipeg, Man., and Amalgamated Clothing Workers of America, Local 459.

Concerning Port Arthur Shipbuilding Company, Port Arthur, Ont., and Industrial Union of Marine & Shipbuilding Workers, Local 11.

Concerning Walker Metal Products Limited, Windsor, Ont., and International Union, United Automobile, Aircraft & Agricultural Implement Workers of America, (UAW-CIO), Local 195.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and the signing of an agreement:—

Concerning Atlantic Sugar Refineries, Limited, Saint John, N.B. and Sugar Refinery Workers' Union, Local No. 2—H. R. Pettigrove, Conciliation Officer.

Concerning Bryce Bakeries, Limited, Brandon, Man. and Canadian Bakery Workers, Local No. 1—Thomas Williams, Conciliation Officer.

Concerning Canada Bread Company Limited, Toronto, Ont., and Amalgamated Bakers & Confectioners of Toronto—F. J. Ainsborough, Conciliation Officer.

Concerning J. Fred Williamson Limited, Saint John, N.B., and Industrial Union of Marine & Shipbuilding Workers of Canada, Local No. 3—H. R. Pettigrove, Conciliation Officer.

Concerning MacDonald Bros. Aircraft Limited, St. James, Man., and Spitfire, Lodge 741, International Association of Machinists—Thomas Williams, Conciliation Officer.

Concerning Morton Engineering & Drydock, Quebec, P.Q., and Union Canadienne des Chaudronniers et Constructeurs de Navires en fer—L. Pépin, Conciliation Officer.

Concerning McGavin Bakeries Limited, Brandon, Man., and Canadian Bakery Workers', Local No. 1, C.C.L.—Thomas Williams, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:—

Concerning Falconbridge Nickel Mines, Falconbridge, Ont., and Sudbury Mine, Mill & Smelter Workers Union, Local 598—William Dunn, Conciliation Officer.

Concerning Aluminum Company of Canada Limited, Kingston, Ont., and Local 54, International Association of Machinists—James Hutcheon, Conciliation Officer.

Concerning Canadian Carborundum Company Limited, Niagara Falls, Ont., and Local 819, International Union, Mine, Mill & Smelter Workers—J. P. Nicol, Conciliation Officer.

Concerning Canadian Top & Body Corporation, Tilbury, Ont., and International Union, United Automobile, Aircraft & Agricultural Implement Workers of America, (UAW-CIO)—J. P. Nicol, Conciliation Officer.

Concerning Chrysler Corporation of Canada Limited, Windsor, Ont., and Local 195, International Union, United Automobile, Aircraft and Agricultural Implement Workers of Am. (UAW-CIO)—F. J. Ainsborough, Conciliation Officer.

Concerning Goderich Manufacturing Company, Goderich, Ont., and United Brotherhood of Carpenters & Joiners of America, Local 2622—F. J. Ainsborough, Conciliation Officer.

Concerning Park Steamship Lines Limited, Montreal, P.Q., and Commercial Telegraphers Union, Division 159—R. Trepanier, Conciliation Officer.

Concerning Perfect Circle Company Limited, Leaside, Ont., and United Steelworkers of America, Local 2729—George Fenwick, Conciliation Officer.

Concerning Sunshine Waterloo Company Limited, Waterloo, Ont., and United Steelworkers of America, Local 3292—H. Perkins, Conciliation Officer.

Concerning Thermoid Mould & Tool Works Limited, Welland, Ont., and Local 523, United Electrical, Radio & Machine Workers of America—J. P. Nicol, Conciliation Officer.

Concerning Frank Waterhouse Company, Vancouver, B.C., and Canadian Merchant Service Guild Inc.—G. R. Currie, Conciliation Officer.

Concerning John Bertrand & Sons Company and the Pratt & Whitney Company of Canada and the International Association of Machinists, Valley City Lodge, Local 1740—F. J. Ainsborough, Conciliation Officer.

McCord Corporation, Windsor, Ontario.—With regard to the case concerning the McCord Corporation, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195, (see LABOUR GAZETTE, July 19, 1945, page 965), the Union has withdrawn its application for conciliation and the case is thereby suspended.

Report of Board in Dispute between the Aluminum Company of Canada, Limited, Arvida, P.Q., and Syndicat National des Employes de Aluminium

On June 30 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Aluminum Co. of Canada, Limited, Arvida, P.Q., and Syndicat National des Employes de Aluminium.

The personnel of the Board was as follows: Hon. Mr. Justice C. G. MacKinnon, Montreal, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Walter A. Merrill, K.C., and Théodoré Lesperance, K.C., appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Aluminum Company of Canada, Limited, Arvida, Quebec (Employer), and Syndicat National des Employes de L'Aluminium (Employees).

The first question to be decided is the formal objection raised by the attorney for the company as to the jurisdiction of the Board of Conciliation.

This objection is based on the pretension that the Syndicat did not give to the company a formal notice as required under the provisions of Order P.C. 1003 with a view to requiring the company to enter into negotiations for proposed amendments to the existing agreement that the Syndicat wanted.

The attorney for the company submitted that the notice given by the Syndicat was irregular in that it first signified its intention to renew the agreement and then went on to express its intention to negotiate amendments to it; also that it was late as having been given only on the 15th of December, 1944, when the agreement was to terminate on the 31st of December, 1944. The attorney for the company maintained that under the terms of Article 16 P.C. 1003 this notice should have been given at the latest ten

clear days before the two months preceding the date of expiry of the contract.

This objection appears to us to be based on too rigorous an interpretation of the terms of the notice as well as of the provisions of P.C. 1003. This notice read as follows:—

Arvida, P.Q., le 15 décembre, 1944

Aluminum Co. of Canada, Ltd.,
a/s Monsieur R. H. Skelton,
Gérant des Usines,
Arvida, Qué.

MONSIEUR:

Le 25 août 1937, l'Aluminum Company of Canada, Limited, signait avec le Syndicat National des Employés de l'Aluminium d'Arvida, inc. une convention collective qui expirait le 31 décembre 1938. Mais en vertu d'une clause de renouvellement automatique qu'elle comportait, cette convention s'est renouvelée d'année en année jusqu'à date. Le Syndicat ne veut pas cette année encore rompre cette entente qui a apporté aux ouvriers d'Arvida des avantages appréciables.

Le Syndicat veut cependant faire amender la convention sur plusieurs points que nous vous avons déjà exposés. Nous regrettons que la Compagnie n'ait pas cru devoir se rendre à notre demande souvent répétée.

Si d'ici dix jours, délai fixé par la loi, la Compagnie n'a pas commencé les négociations au sujet de ces amendements, nous verrons à ce que la loi suive son cours.

We are of the opinion that this notice read in its entirety indicates sufficiently the intention on the part of the Syndicate to renew the agreement subject to certain amendments then under discussion between the parties. The notice refers expressly to the law and it appears clear to us that it sufficiently expressed the intention of the Syndicat to enter into discussions for the renewal of the contract in accordance with the dispositions of the law.

Article 16 of P.C. 1003 is as follows:—

Either party to a collective agreement may, on ten clear days' notice, require the other party to enter into negotiations for the renewal of the agreement within the period of two months prior to the expiry date, and both parties shall thereupon enter into such negotiations in good faith and make every reasonable effort to secure such a renewal.

We also believe that it would be interpreting this article too rigorously to say that the notice should be given ten clear days before the period of two months preceding the expiry date of the contract. We are of the opinion that under the terms of this article it is sufficient that the demand be made during the period of two months preceding the date of expiry. In the present case the notice was given on the 15th of December, 1944, and the date of the expiry of the contract was the 31st of December, 1944. Consequently the notice was given in sufficient time to permit the parties to enter into negotiations during

the period established by law to commence such negotiations.

For these reasons we believe that the Syndicate has sufficiently complied with the requirements of the law and we are of the opinion that the board is justified in taking cognizance of the differences between the parties and in making a report thereon.

During the hearing the parties met together separately and went over the proposed amended contracts submitted respectively by the company and the Syndicat and reached an agreement on certain clauses but there were others on which no agreement could be arrived at.

The draft contract attached hereto, based on P-3 the contract submitted by the Syndicat, contains Sections 1, 11, sub-sections 1, 2, 3, 5 and 6 of Section III, Section IV, Section VI, Section VII, Section VIII, Section IX, Section X, Section XI, Section XII and Section XIII which were all agreed upon. Section XII sub-section 2 in the attached agreement has been redrafted by the Board in accordance with its understanding of what the parties had mutually accepted.

Sub-section 4 of Section III was not agreed on by the Company.

The Board recommends that this sub-section 4 be accepted. This so-called check-off clause leaves any employee free to sign it or not as he may see fit and it is not to be inaugurated unless 50 per cent or more of the employees covered by the agreement have signed an authorization directing the company to deduct from the employee's pay each month the amount owing by the employee to the Syndicat in monthly or special fees. It also provides for compensation to the Company for cost incurred by the extra work involved to an amount not to exceed 5 per cent of the sums collected.

The Board also recommends that sub-section 5 of Section V in the draft agreement be replaced by the following sub-section 5:

Discrimination:—

Regarding the above paragraphs Nos. 1, 2, 3 and 4, relating to employment, promoting etc., should an employee feel that he has been discriminated against, it is his privilege to take the matter up in the manner provided in Section XIV (B) sub-sections a, b, c and d.

Sub-section 6 of this Section V should consequently be deleted.

There is not sufficient evidence before the Board to enable it to recommend that if the decision of a Works Manager is not satisfactory that the parties should proceed to arbitration. If this method of dealing with grievances as to employment, promotion, etc., does not prove satisfactory the question can

always be reopened when discussing the renewal of the present contract at its termination.

It is recommended that Section VI, subsection 3 of the attached draft agreement should be replaced by the following section which is similar to that contained in the agreement between the Company and the Syndicat known as Isle Maligne Agreement filed as exhibit P-10:—

The Company will, as promptly as is reasonably possible, prepare and have available for inspection by the Syndicate a list showing the seniority of all employees covered by this agreement, and will revise such list at least once every twelve (12) months.

It is considered that the company should not be asked to furnish a list of its employees outside the plant and as long as this information is available at the company's office the Syndicat can have communication of the list with very little trouble.

The Board also recommends that Section XIV of the draft agreement be replaced by the following:—

Section XIV (a) Works Grievance Committee and Grievance Committees

GENERAL UNDERSTANDING

1. The parties of the Agreement shall form a works Grievance Committee and Departmental Grievance Committee, the functions of which will be:—

FUNCTIONS OF WORKS GRIEVANCE COMMITTEE AND DEPARTMENTAL GRIEVANCE COMMITTEE

- (a) To provide a recognized and direct channel of communications between the employees and the management.
- (b) To promote in the Works a spirit of co-operation.
- (c) To improve the efficiency of the Works and the contentment of the employees engaged therein.
- (d) The examination of grievances, either individual or general that may be brought to the notice of the Committees in accordance with the grievance procedure outlined in Section XIV (b).
- (e) The consideration of any matters referred to the Works Grievance Committee by the management.

COMPOSITION OF COMMITTEES

2. The Committees shall be composed of an equal number of representatives; half will be appointed by the Company and half by the Syndicat. The Works Grievance Committee shall be composed of:—

- 6 employees appointed by the Company
- 6 employees appointed by the Syndicat.

A department Grievance Committee shall be appointed for each of the following divisions with membership as indicated below:—

Aluminum Plant.....	4
Carbon Plant and Alpaste.....	4
Electrical Department.....	4
Mechanical Department.....	6
Ore Plants and Fluoride.....	6

The number of committees and the number of members of each may be revised from time to time by mutual consent to conform with operating conditions.

RIGHTS OF COMMITTEE MEMBERS

3. It is agreed by the Company that employees' representatives shall be free to discharge their duties in an independent manner without fear that their individual relations with the Company may be affected in any way by any action taken by them in good faith while acting in a representative capacity.

BY-LAWS

4. The by-laws covering the working of these Committees shall be formulated by the Works Grievance Committee when appointed.

Section XIV (b) Grievance Procedure

1. Any employee or former employee having cause for complaint may present his case for investigation and consideration within 10 days of the occurrence by strictly following the procedure outlined below:—

- (a) The employee shall, in the first instance, take up the matter personally or accompanied by an employee of his choice, or a representative of the syndicate, with his foreman.
- (b) Failing satisfactory solution within 48 hours, the case may be submitted to the general foreman or supervisor of the department within the next 48 hours, at which time the case shall be reduced to writing. At this time, the employee may be accompanied by a fellow-employee or a representative of the syndicate.
- (c) Failing satisfactory solution within 48 hours the case may be submitted promptly for review to his Departmental Grievance Committee for its recommendation to the Superintendent.
- (d) Failing satisfactory solution within 48 hours from the date of this appeal, the case may be presented in writing, directly or through a representative of the employee's own choice, to the Works

Manager, who shall render his decision within seven days of the submission of the case, or refer it to the Works Grievance Committee for recommendation before he renders a final decision. In the event of the final decision of the Works Manager on any grievance other than those falling under the provisions of Section V hereof, not being considered satisfactory the question may be referred to arbitration as provided for in the following sub-paragraphs. Nothing herein contained shall be construed as permitting an arbitration on any point covered by Section V of this agreement;

DEALING WITH MISINTERPRETATION OR VIOLATION OF THE AGREEMENT

- (e) Where an employee, or the Syndicate on behalf of an employee, alleges that there has been misinterpretation or violation of this agreement, the difference between the parties shall be referred to a Board in the manner and under conditions as hereinafter prescribed. The request for a board shall be made in writing within five days of the decision in the preceding step.

The Syndicate and the Company shall each appoint one representative to a board of three members and these two representatives shall appoint a third member who shall act as chairman.

Should the representatives appointed by the Syndicate and the Company fail to agree within five days upon the appointment of a third member, the Minister of Labour of the Dominion of Canada shall be requested to appoint a third member.

Within three days from the date of the appointment of the complete board, a written stipulation signed by the employee concerned, or by the Syndicate on behalf of the employee concerned, shall be presented to the Board. Such stipulation shall contain a statement of the specific issue in dispute and a brief statement of the position of the Syndicate on the question at issue.

The Syndicate and the Company shall each pay the expenses of its representative, and the expenses and/or fees of the third member shall be paid equally by the Syndicate and the Company.

In any case under dispute the presumption shall be, until proof to the

contrary, that the provisions of this Agreement have not been violated nor misinterpreted, and no decision shall have a retroactive effect. The findings of the majority of the board, rendered within the scope of its jurisdiction, shall be final and binding upon all parties concerned, but in no case shall the board, alter, modify or amend any part of this agreement.

- (f) The company recognizes the right of any employee to request a hearing with any one of its officers, up to and including the Works Manager. These officers reserve the right to refuse such a hearing if the employee has not followed the above-mentioned procedure.

NOTE.—All time intervals quoted above are exclusive of Sundays and holidays or an approved absence.

It is recommended that Sections 1, 3, 4, 5, 6, 7, 8, 9, 10 and 11 of P-4 as attached or as were mutually amended at the discussions between the parties held between the 8th and 19th of June, form part of the proposed amendments as an appendix to the existing contract.

It is not recommended that the Syndicate's request for an extra man in the pot-room be allotted to the machines to break the ends of the pots as in the opinion of the board there is not sufficient evidence before it to determine that such an extra man is necessary.

In the opinion of the Board Sections 12 to 15 of P-4 deal with matters which should be referred to the Wartime Labour Board and as the Syndicate has expressed its intention of making application to the Board for its consideration of these items this Board does not consider that it has sufficient information or knowledge of the technical matters involved so that it can make any recommendation on these points.

As regards Section 16 of P-4 dealing with the atmospheric conditions in the plant no recommendation will be made as this question is still under discussion between the parties.

On the 11th of June the delay within which the present Board of Conciliation was to make its report was extended for a period of three weeks.

(sgd.) C. GORDON MACKINNON,
Chairman.

(sgd.) THEODORE LESPERANCE,
Member.

Montreal, June 29, 1945.

Proposed Amendments to Agreement

Proposed amendments to the existing collective Labour Agreement covering the Arvida Works of the Aluminum Company of Canada, Inc., between Aluminum Company of Canada, Limited, a corporation organized and existing under the laws of the Dominion of Canada and having an office in the City of Arvida, County of Chicoutimi, Province of Quebec, (hereinafter called the "Company,") and La Fédération Nationale des Travailleurs de l'Aluminium Inc. (Affiliated to the National Federation of Aluminum Workers Inc., and the Confederation of Catholic Workers of Canada and having an office in the city of Arvida, County of Chicoutimi, Province of Quebec, hereinafter called the "Syndicate.")

Whereas the Company is doing business in the County of Chicoutimi;

Whereas the Syndicate and Messrs. Leo Hubert, J. R. Leclerc, Eugene Labrie, Saul Girard, Phil Cusson, R. Harmegnies and J. B. Bellemare, have been certified as of the second day of March, 1945, by the Wartime Labour Relations Board as bargaining representatives for all employees mentioned in Section 1 hereinafter;

Whereas employment by the Company is open to anyone even though not a member of the Syndicate or any lawful association or organization;

Whereas the Syndicate desires to amend the existing agreement with the Company;

Whereas the Syndicate is authorized and able to make an agreement binding all the employees listed in Section 1 hereinafter; and

Whereas the Company is willing to amend the existing agreement with the Syndicate and to apply the terms of said agreement to all employees listed in Section 1 hereinafter.

Now therefore the Company and the Syndicate as the present bargaining agent for and in consideration of the covenants hereinafter set forth, mutually agree that the existing agreement be amended to read as follows:

Section 1—Application

EXTENT OF AGREEMENT

1. This agreement shall bind all the employees of the Company at the Arvida Works, except those excluded under certification of the second day of March, 1945, by the Wartime Labour Relations Board, namely:—All employees on weekly or monthly salary, constables, guards, watchmen and plant personnel staff, and except also those mentioned in the following paragraph 2. The word "watchmen" is interpreted to cover those employees whose duties are plant protection.

2. All employees who are or become subject to any decree issued under the Collective Agreement Act of the Province of Quebec are excluded from the effects of the present agreement for all of the time during which they are subject to said decrees, whether on a permanent or a temporary basis.

Section II—Purpose

INTENTION

1. This Collective Labour Agreement is entered into for the purpose of promoting and continuing the existing good relationship between the Company and its employees to provide a basis of mutual understanding on conditions of employment and rates of pay and more specifically to assure:

- (a) The highest quality of production obtained by the most economic and efficient operation of the Company's works at Arvida, Que.;
- (b) The cleanliness and protection of the Plant property;
- (c) The safety (sécurité) of employees;
- (d) The prompt and fair disposition of grievances;
- (e) The observance of all Provincial and Federal laws affecting this Agreement.

CO-OPERATION

2. It is recognized by the Agreement that it is the duty of the Company and its aforesaid employees, as represented by the Syndicate, to co-operate in the above mentioned ways and in every other reasonable way for the mutual benefit of the said employees and of the Company.

NO WAIVER OF RIGHTS

3. Nothing herein shall be construed as a waiver of any right or obligation of the Company, or of any employee, or of the Syndicate, under any present or future applicable Federal or Provincial law.

Section III—General Conditions

APPLICATION

1. The said working conditions, rates of wages, etc., hereinafter specified shall be as prescribed, the provisions of which shall be read and construed together.

COMPANY RIGHTS

2. Nothing shall be interpreted as limiting the Company in the exercise of all its rights, powers and authority to extend, limit, curtail or cease operations and to exercise all their regular customary functions of Management.

NO LOCKOUT NOR STRIKE

3. The Company, on the one hand, and the Syndicate on the other hand, undertake that no lockout, strike, general slowdown of work,

nor stoppage of work shall take place except in pursuance of a dispute in which the Company and the workers covered by this Agreement are directly concerned.

PAY DEDUCTION FOR DUES TO SYNDICATE

4. Subject to the following provisions, the Company, upon receipt of a written authorization from an employee will deduct from the first pay of each month, the amount owed by this employee to the Syndicate, in monthly or special fees.

FORM TO BE USED

- (a) The authorization from which the employee may sign or on which he may affix his mark shall be as mutually agreed upon by the Parties hereto and shall be made out in triplicate, the original to be retained by the Company, one copy for the Syndicate and the Third copy for the employee.

PLACE FOR SIGNING AN AUTHORIZATION FORM

- (b) When an employee wishes to sign the above authorization form he will do so only within the premises of the Company but he may call upon the Grievance Agent for assistance if he so desire.

CANCELLATIONS

- (c) An employee may authorize the Company to discontinue the pay deductions at any time he wishes to do so by signing or affixing his mark to a cancellation notice, the form for which will be as prescribed by mutual agreement of the parties hereto. This form shall be made out in triplicate, the original to be retained by the Company, one copy for the Syndicate and the third copy for the employee.

EMPLOYEE LISTS

- (d) The Syndicate will give to the Company a statement of the amounts owed to it by each employee who has presented a written authorization to this effect.

DISPOSAL OF FUNDS

- (e) Each month, the Company will pay to the representative appointed by the Syndicate the total of the deduction thus authorized less the cost of making the deductions, which is not to exceed 5 per cent of the sums collected.

COST OF ESTABLISHING

- (f) The Company will submit to the Syndicate an estimate of the cost of

any changes in equipment, etc., brought about because of the introduction of these pay deductions and this cost will be borne by the Syndicate.

MINIMUM REQUIRED

- (g) It is agreed by the parties hereto that pay deduction for this purpose will not be inaugurated unless 50 per cent or more of the employees covered by this Agreement have authorized the company to do so.

CO-OPERATION FROM SYNDICATE

5. The Syndicate agrees that it will co-operate with the Company and support Company efforts to assure a full day's work on the part of the employees whom it represents and that it will actively combat absenteeism and other practices which curtail production, and will support the Company in its efforts to eliminate waste and inefficiency; to improve the Company workmanship, to prevent accidents and to promote goodwill between the Company and its employees.

NO DISCRIMINATION

6. That the Company and the Syndicate will not discriminate against any employee by reason of race, colour, creed, nationality, religious or political beliefs, or of union affiliation, or non-union affiliation, or union activities, and will not tolerate any such discrimination.

Section IV—Termination of Agreement

DURATION OF AGREEMENT

1. This Agreement shall remain in force for a period of one year from the date of signing after which it shall renew itself automatically from year to year unless written notification of the intention to terminate the Agreement be given by one of the contracting parties to the other, at least sixty days before any automatic renewal.

Section V—Employment, Promotions, Etc.

COMPANY'S RIGHT

1. In accordance with the purpose of this Agreement and subject to the following paragraphs, the Company reserves the right to select employees to be hired, dismissed or released, suspended, transferred, promoted or demoted.

ENGAGEMENTS

2. When hiring employees, due consideration will be given to local residence, education, age, physical fitness, family status, and in so far as is possible employees with previous

service shall be hired, giving preference to those with the longest service, but efficiency and ability to perform the work must be the first consideration.

PROMOTIONS

3. When promoting an employee to a vacancy or to a new position, the employee having the greatest number of years of service, with due respect to length of service of employees in the same department or occupation, will receive the promotion provided his efficiency and ability to perform the work is as great or greater than other employees.

LAY-OFFS

4. When releasing employees because of curtailment in operations, employees with the shortest service will be released first and those with the longest service will be released last, bearing in mind local residence and hardships which may be incurred through family status, but efficiency and ability to perform the work must be the first consideration.

DISCRIMINATION

5. Regarding the above paragraphs Nos. 1, 2, 3, and 4 relating to employment, promoting, etc., should an employee feel that he has been discriminated against, it is his privilege to take the matter up in the manner provided for in Section XIV—"Grievance Procedure" hereinafter, except that the costs of arbitration will be borne as specified in (6) below.

COST OF ARBITRATION

6. In the event of the Works Manager's decision being disputed by the Syndicate the case may be referred to arbitration in accordance with "Grievance Procedure" Section XIV 3 (e). In the event of the Works Manager's decision being maintained, the Syndicate will pay all expenses of the three members of the Arbitration Board up to the limit specified in Section 35 paragraphs (1) and (2) of Wartime Labour Relations Regulations P.C. 1003. In the event of the Works Manager's decision being reversed, the Company will pay all expenses of the three members of the Arbitration Board up to the same limits.

Section VI—Service Regulations

RULES

1. Continuous service and vacation regulations of the Company are set forth and attached hereto as Appendices 1 and 11, respectively, forming part of the present agreement.

LISTS OF LENGTH OF SERVICE

2. At times of lay-offs involving more than 200 employees, the Company will give the Syndicate access to complete lists of employees' service records affected by the lay-off.

3. The Company will, as promptly as is reasonably possible prepare and give information to the Syndicate a list showing the seniority of all employees covered by this agreement, and will revise such list at least once every twelve (12) months.

Section VII—Working Conditions—Day Workers

DEFINITION

1. Except as noted subparagraph (b) hereinafter, the term "Day Workers" applies to employees normally working during a regular 8 hour period of the day for six days each calendar week in order to maintain plant operations not of a continuous nature. They generally have a set meal interval.

2. Except as noted subparagraph (b) hereinafter, the standard starting and stopping times of day workers shall be:—

- (a) Monday to Saturday (inclusive) 8 a.m. to 12 noon; 1 p.m. to 5 p.m. Meal interval 12 noon to 1 p.m.
- (b) The starting and stopping times of day workers may be advanced or retarded at the discretion of the management, for any particular department or set of operations, but the total hours worked per standard week shall not exceed forty-eight.

SUNDAY WORK

3. Day workers shall not be required to work on Sundays unless it is for one of the following reasons:—

- (a) A breakdown of plant or machinery affecting production.
- (b) An emergency necessitating the carrying out of urgent repairs, continuance of essential service, or the maintenance of minimum operations on production.

4. In case of emergency when employees are required to work through their regular meal interval, they shall be given their meal interval as soon as possible after the emergency has passed.

5. The followings days shall be observed as Statutory Holidays and no worker shall be required to work on these days unless it is for one of the reasons given in clause 3 above.

New Year's Day
Epiphany
Ascension Day

St. John the Baptist Day
 Dominion Day
 All Saints' Day
 Immaculate Conception Day
 Christmas Day

Section VIII—Working Conditions—Shift Workers

DEFINITION

1. The term "Shift Workers" applies to employees normally working during varying 8-hour periods of the 24-hour day in order to maintain continuous plant operations. It is understood that shift workers will be allowed time off for meals (not over 20 minutes) in the middle of the shift at such times as does not conflict with their duties and that such time will be considered as part of the employee's normal rest period.

WORKING HOURS

2. Except as noted in subparagraph (a) the standard starting and stopping times of shift workers shall be:—

- 12 midnight to 8 a.m.
- 8 a.m. to 4 p.m.
- 4 p.m. to midnight

(a) The starting and stopping times of shift workers may be advanced or retarded at the discretion of the management for any particular department or set of operations, but the total hours worked per standard week shall not exceed forty-eight, except as noted in Section XI, paragraph 2.

3. Shift workers may be required, in special cases, to take their meal on the job. The meal interval of shift workers shall be paid as though worked, i.e. at regular rate. In the case of men working more than one shift, a meal interval shall be provided at the end of each four hours of work. The meal interval of shift workers may vary and shall be arranged at the discretion of management.

REST DAY

4. Shift workers will be entitled to an average of at least one rest day per calendar week and shall not be required to work on that day unless it is for one of the reasons given in Clause 3 of Section 7.

HOLIDAYS

5. Owing to the nature of continuous operations, Statutory Holidays cannot be allowed shift workers.

Section IX—General Working Conditions

1. An employee not required for work on his regular shift shall be given at least sixteen (16) hours' notice.

2. Upon reporting for work, an employee not so notified on the previous day of a cessation of work on his shift shall be guaranteed four (4) hours' work or four (4) hours' pay. However, an employee who has been absent from work must assume the responsibility for ascertaining from the Company if work is available returning.

EMERGENCY

3. Any employee called back to work by the management for emergency work after he has left work for the day shall be entitled to at least the same pay as though he had worked a minimum of two hours.

EDUCATIONAL

4. Time spent on training courses, lectures, or conferences, if given on Company time and the employee's attendance is required, will be paid for at regular rates. Should it be necessary to extend the training beyond the normal stopping time, payments for the additional time shall not be rates higher than the employee's regular rate and the extra hours shall not be counted in the computation of overtime.

BUSINESS CONFERENCES

5. When conferences between employees, including Syndicate's representatives and the local plant management must be held at the latter's request during regular working hours, such conferences shall not result in any loss of time to any such employees.

TEMPORARY MOVEMENTS AND TRANSFERS

6. (a) Should an employee to meet the wishes of the Company be temporarily taken from his regular job to undertake work carrying a lower rate on pay than his regular rate, whilst work is still available for him at this regular job he shall be paid at least the rate for his regular job whilst at the lower-rated job.
- (b) Should an employee because of injury at work, or sickness be offered lighter work than his regular job on the advice of the Company Medical Officer as an alternative to lay-off the employee shall be paid at the rate on the job to which transferred.
- (c) Should an employee, because of shortage of work at his regular job, be employed in another job as an alternative to lay-off discharge, he shall be paid at the rate of the job to which he has been transferred.
- (d) Should an employee temporarily move to a job carrying a higher rate of pay

than his regular job, he shall be paid at least the minimum rate for the new job, provided the transfer is for a period equal to or exceeding one complete day or shift.

- (e) A temporary move or transfer shall not exceed a full pay period. At the end of this period the employee must either revert to this regular job or a permanent transfer be arranged, except in the case where he is substituting for an employee absent because of sickness or accident, in which case the temporary move or transfer may extend for a longer period.

Section X—Wage Rates

SCHEDULES

1. Rates of wages are as set forth in the annexed Appendix III, which is hereby made a part of this Agreement.

REVIEW OF WAGE RATES

2. The wage rates of employees will be reviewed by the Company once each year, and adjustments within the ranges laid down will be made, having regard to the individual employee's skill and capacity. Any adjustments arising from these reviews will become effective as and from the commencement of the pay period immediately following the revision.

Section XI—Overtime

BASE RATE

1. Time and one-half shall be paid for work required to be performed in excess of eight hours per day or forty-eight hours per week, providing a full week of forty-eight hours (as defined in Paragraph 2 below) has been worked. It is understood that credit for overtime on a daily or weekly basis shall not be decreased by reason of any approved absence from duty (as defined in paragraph 3 below) arising out of reasons beyond the control of the employee.

STANDARD WEEK

2. The standard week shall normally be forty-eight hours, but (except as noted next below) shall be reduced by eight hours for every statutory holiday specified in this Agreement and falling on a working servicing continuous processes or essential services and where the nature of the work required them to work regularly servicing such continuous processes or essential services, shall not be reduced for statutory holidays. Owing to the system of changeover and the variation in the number of shifts worked per week, the hours to be used per week above which overtime shall be paid shall, in all cases, be the standard hours appertaining to the shifts on which the employee was employed during the work in question.

APPROVED ABSENCE

3. In determining the hours worked by an employee in any week, for overtime purposes, allowance shall be made, on a basis of 8 hours per day or portion thereof, for an approved absence. An approved absence is defined as follows: Absence due to lay-off by the Company, to annual vacation, to suspension for disciplinary reasons, to non-employment by the Company due to engagement after the commencement of a regular pay week or to separation before the end of a regular pay week, to bona fide personnel illness or other unavoidable absence for reasons beyond the control of the employee and acceptable to the Company. The Company is to be the sole judge as to whether an absence from work constitutes an approved absence.

Section XII—Miscellaneous

POSTING OF NOTICES

1. The Syndicate shall be permitted the use of special bulletin boards as provided by the Company for the posting of notices concerning meetings of the Syndicate, and other Notices, provided that all notices have been approved by the Works Manager or the Personnel Manager.

REINSTATEMENT OF VETERANS

2. The Company and the Syndicate mutually agree to provide for the rehabilitation of veterans and the Company's employees who have served in the Armed Forces of the United Nations in the manner provided in the Reinstatement in Civil Employment Act and Amendments. The length of continuous service for the Company's employees who have served in the Armed Forces of the United Nations will be computed in accordance with the provisions of the said Act and Amendments relative thereto.

Refer to Appendix I.

Section XIII—Vacations

Vacation with pay will be granted in accordance with the rules set out in Appendix II hereof.

Section XIV—Grievance Procedure

GRIEVANCE AGENTS

1. The Syndicate will appoint, and the Company will recognize, Grievance Agents, the number of which will not exceed one for each two hundred and fifty (250) employees in each of the divisions listed in paragraph 2 following and whose duties shall be as follows:—

DUTIES

- (a) They will be chosen from the Company's employees who have at least one (1) month's service.

- (b) Each one will look after a specified group of employees within his allowed division.
- (c) They shall investigate and try to settle grievances submitted to them with the least loss of time possible.
- (d) Before leaving his place of work he shall obtain the approval of his foreman or assistant foreman and upon arriving in other department, he shall report to the foreman or assistant foreman in charge.
- (e) At the request of the grievance agent and with the consent of the complainant, the Company will furnish the Agent with the necessary personnel files to enable him to carry on his investigation.
- (f) They will carry on their duties as specified herein without fear that their individual relations with the Company will be affected in any way whatsoever.
- (g) They will be subject to the prescribed disciplinary rules of the Company, but in cases of lay-offs or transfer, they will be separated or transferred only after agreement between the Syndicate and the Company.

SECTION COMMITTEES

2. The Syndicate will appoint and the Company will recognize a section committee for each of the main divisions of the plant, with membership as indicated below, exclusive of

Grievance Agent:

Aluminum Plant.....	3
Carbon and Alpaste Plants.....	3
Ore and Fluoride Plants.....	3
Mechanical Department.....	3
Electrical Department.....	3

- (a) The articles regarding the Grievance Agents will apply also to the members of these section committees.
- (b) These committees will try by all means at their disposal to assure a loyal collaboration between the employees and the superintendents of their respective section by the improvements of the working conditions. They will look after the grievances submitted to them in appeal from a decision of the foreman and the general foreman.
- (c) These committees will meet the superintendents of their section twice a month when necessary, and as often as the circumstances demand it in an urgent case.

GRIEVANCE SETTLEMENT

3. Any employee or former employee within ten days of his discharge or lay-off, having just cause for complaint may present his case

for investigation and consideration by following the procedure outlined below:

- (a) The employee's grievance shall be submitted in the first place to his immediate foreman with or without the assistance of the Grievance Agent or through him.
- (b) Failing satisfactory solution within 48 hours, the case may be submitted in writing to the general foreman;
- (c) Failing satisfactory solution within 48 hours from this appeal, the case may be submitted through the section Committee to the superintendent concerned;
- (d) Failing satisfactory solution within 72 hours from this appeal, the case may be submitted to the Management which should render its decision within seven days of the submission of the case, or within such longer period as may be agreed upon by the parties concerned.
- (e) Any grievance, except as covered in Section V, which may not have been settled satisfactorily up to this point, may be submitted for arbitration. If either party decides to submit a case for arbitration, a board of three members shall be established, one member to be selected by the Company, one member to be selected by the Syndicate, and a third member to be selected by mutual agreement who shall act as Chairman. Should the parties hereto fail to agree on a Chairman, he shall be appointed by the Minister of Labour having jurisdiction over the industry at the time of the grievance. The decision of the Board shall be rendered within fifteen days of the appointment of the Chairman thereof, or within such longer period as may be agreed upon by the parties concerned. These decisions will that the Syndicate shall be responsible for the remuneration and expense of its representatives on the Board; the Company shall be responsible for the remuneration and expense of its representatives on the Board, and the remuneration and expenses of the Chairman as well as incidental expenses such as clerical assistance to the Chairman, hall rental, etc., will be equally divided between the Syndicate and the Company.

In witness whereof, the parties hereto, through their authorized representative, and the certified agents, have affixed their signature hereunder on this.

La Fédération Nationale des
Travailleurs de l'Aluminium Inc.
Aluminum Company of
Canada, Limited.

Appendix I

CONTINUOUS SERVICE RULES

1. Every new employee when hired is classified as a temporary employee.

2. After being continuously employed for a period of 12 months, an employee shall be classified as a regular employee unless there is an agreement in writing specifying additional employment as a temporary employee.

3. An employee shall be deemed to have been "continuously employed" for the preceding 12 months when:

- (a) A period of 364 days has elapsed since the date of his employment, and
- (b) He has worked a total of 2,400 hours, of which at least 1,800 hours must have been worked during the immediately preceding 365 days.

4. Continuous service shall be computed in years and days and shall apply to regular employees only. It shall be based on elapsed time from the date of employment, or if there has been a break in service from the date of re-employment.

5. Service with predecessor and other companies affiliated with the Aluminum Company of Canada, Limited, will count as service with the Company so far as it affects vacations and the Retirement Income and Life Insurance Plan.

6. Continuous service will not be broken by any approved absence, but when any such absence exceeds 30 days without pay (except as the result of an industrial accident or for approved Government service, such as with the Armed Forces) the total time lost shall be deducted.

Approved absence shall include:

- (a) Any lay-off not exceeding one year, providing the employee advises the Company every six months of his wish to return to work, and providing he returns to work within 72 hours, not including Sundays and holidays after he is called. If the employee cannot report within 72 hours but notifies the Company within that time of his wish to return, the Company may grant him an extra delay up to a total of ten days.
- (b) Annual vacations when approved.
- (c) Service with any Allied Armed Forces during wartime.
- (d) Suspension for disciplinary reasons.
- (e) Bona fide personal illness or other unavoidable absence for reasons beyond the control of the employee and acceptable to the Company.
- (f) Absence for any reasons not exceeding one year providing approval from the company is given in writing. Under special circumstances the Company may grant extension of absence beyond one year.

7. Unauthorized absence shall terminate an employee's continuous service record and, if re-employed, he shall start as a temporary employee.

Unauthorized absence shall include:

- (a) Repeated failure to report for duty unless leave of absence has been obtained.
- (b) Lay-off exceeding one year or failure to advise Company during such lay-off every six months of employee's intention to return to work.
- (c) Failure to return to work or give satisfactory explanation therefor within 72 hours, or after the expiration of the time

extension provided in paragraph 6 (a) not including Sundays and holidays, after all has been issued.

- (d) Absence following resignation, quitting without notice or discharge for cause.

Appendix II

VACATIONS

A. General Rules

1. All vacations granted must be taken at a time satisfactory to the Company and will be arranged where possible in accordance with the expressed preference of the employee.

2. Pay for vacation shall be equal to the employee's regular rate of earnings at the time vacation is taken and shall not include any allowance for overtime.

3. No employee shall be entitled to a vacation of more than two weeks in any calendar year. Vacations must be taken during the calendar year in which they become due and cannot be postponed except with the written consent of the Company.

4. In the event of termination of employment through no fault of the employee, but before vacation has been taken, the employee shall be paid a termination allowance at least equal to the vacation pay that would have been received had such vacation been taken.

5. In cases of dismissal, resignation or quitting without notice the Company retains the right to withhold total vacation allowance or any unallotted portion thereof.

B. Hourly Paid Employees

Hourly paid employees will be entitled to vacations with pay as follows:

1. Hourly paid employees will be entitled to one week's vacation with pay after one year of continuous service (as defined in Appendix I hereof). Thereafter employees shall be entitled to one week's vacation with pay each succeeding year, providing at least 1,800 hours (exclusive of overtime) have been worked since he last qualified for a vacation.

2. On the completion of 7 years of continuous service, hourly paid employees shall be entitled to two weeks' vacation with pay during that calendar year and each succeeding year thereafter, providing at least 1,800 hours (exclusive of overtime) have been worked since he last qualified for a vacation.

3. The Company retains the right to withhold the total of any proportion of allowance for vacation to any worker who has lost more than 48 hours from work without reasonable excuse during the preceding 12 months.

Appendix III

WAGES RATES

(Classifications) *Min. Max.*

NOTE: Special wage rates for handicapped persons may be established.

Working conditions submitted by the Syndicate as recommended by the Board, subject to any changes therein by mutual agreement between the parties (extract from exhibit P-4).

1. Que chaque cuviste n'ait pas plus de 9 cuves à opérer mais que l'ouvrage soit distribué de la

façon suivante: 10 cuvistes à 8 cuves et 6 à 9. Ceci occasionnerait moins de départ pour raison d'incapacité et de découragement.

2. Que la manière de travailler, soit les cuves, soit faire la coulée, changer les cadres, arracher et planter les gougons, lever les tiges, distribuer la pâte, l'alumine, et les matières à alliage, soit identique dans chaque salle de cuves. Ceci contribuerait à l'augmentation de la production car tous et chacun ne se sentirait pas nouveau à chaque fois qu'il lui faut changer de salle ou d'équipe, et le travail en étant toujours bien fait, augmenterait la production.

3. Que les morceaux nécessaires soient fournis pour les machines à casser et à arracher afin qu'elles soient mieux réparées et donnent plus de rendement.

4. Que les roues des chariots, pour les machines ou pour le transport des gougons, soient recouvertes de caoutchouc afin que ces diits chariots soient insolés complètement et par le fait même, plus légers et moins durs à déplacer.

5. Que les équipes de planteurs, arracheurs et leveurs ne travaillent que de jour seulement avec leur contremaître.

6. Les planteurs ne devraient pas avoir plus de 9 cuves pour planter les gougons.

7. Que les leveurs n'aient à faire le travail dans 3 cuves sur tiges doubles et 6 sur les tiges simples durant l'été ainsi que 4 et 8 respectivement sur tiges doubles et simples durant l'hiver.

8. Que les arracheurs n'aient à arracher les gougons que de 8 cuves.

9. Que sur son quart régulier, un employé ne fasse que le travail assigné de par sa classification.

10. Que pour 12 mois par année il y ait 4 assistants-chefs-cuvistes dans chaque salle de cuve, sur chaque quart.

Minority Report

In the matter of a dispute between Le Syndicat National des Employés de l'Aluminium d'Arvida, Inc. (Employees), and Aluminum Company of Canada Limited, Arvida, Quebec (Employer).

It is with regret that I find myself unable to agree with my two colleagues on the Board, Mr. Justice C. G. MacKinnon, Chairman, and Mr. Theodore Lesperance, Representative of Le Syndicat National des Employés de l'Aluminium d'Arvida, Inc. (hereinafter called the "Syndicate"), for the following reasons:—

A Collective Labour Agreement has existed between the Company and the Syndicate since the 25th of August, 1937, and it is provided in this Contract—which was to remain in force until the 31st of December, 1938—that it shall renew itself automatically from year to year, unless written notification of *intention to terminate* the Agreement be given by one of the contracting parties to the other party at least fifteen (15) days before any automatic renewal.

On the 15th of December, 1944, the Syndicate wrote to the Company a letter in the following terms:—

Le 25 août 1937, l'Aluminum Company of Canada, Limited, signait avec le Syndicat National des Employés de l'Aluminium d'Arvida, Inc., une convention collective, qui expirait le 31 décembre 1938. Mais en vertu d'une clause de renouvellement automatique qu'elle comportait, cette convention s'est renouvelée d'année en année jusqu'à date. Le Syndicat ne veut pas cette année encore rompre cette entente qui a apporté aux ouvriers d'Arvida des avantages appréciables.

Le Syndicat veut cependant faire amender la convention sur plusieurs points que nous vous avons déjà exposés. Nous regrettons que la Compagnie n'ait pas cru devoir se rendre à notre demande souvent répétée.

Si d'ici dix jours, délai fixé par la loi, la Compagnie n'a pas commencé les négociations au sujet de ces amendements, nous verrons à ce que la loi suive son cours.

It is to be noted that this letter is not a fifteen days notification of intention to terminate, as provided in the Contract, but on the contrary is notice to the Company that the Syndicate did not wish the Contract to be terminated for the year 1945.

In the second paragraph of this letter, the Syndicate points out that it wishes to have the Contract amended in regard to several matters, but that the Company was not in agreement in regard thereto, and in the last paragraph of the letter the Syndicate gives notice to the Company that if, within ten (10) days, negotiations have not commenced in regard to these amendments, the Syndicate will see that the Law would follow its course.

It is elementary that amendments to an existing Contract can only form part of the Contract if they are mutually agreed upon by the contracting parties.

Some time in the month of March, 1945, the Syndicate submitted to the Company, instead of amendments to the existing Contract, what was tantamount to a completely new Contract and when discussions and negotiations broke down between the parties, at the request of the Syndicate, Mr. Raoul Trepanier was appointed Conciliation Officer and the Company was notified of such appointment on the 19th of April, 1945.

On the 20th of April, 1945, the Company forwarded the following telegram to the Director of Industrial Relations:—

Will be pleased to see Mr. Trepanier as requested your telegram of the 19th April but believe there must be some misunderstanding on part of the Quebec Wartime Labour Relations Board about expiration of thirty-day limit stop The Company has an agreement with the Syndicate which has not been cancelled and the negotiations referred to are only voluntary negotiations concerning proposed amendments to the existing contract stop We believe any request for conciliation by Syndicate at this time is premature and Company would prefer to continue negotiating directly with the Syndicate re amendments desired by both parties.

Mr. Trepanier failed to bring about an agreement between the parties as to proposed amendments to the Contract, reported his failure to his Superiors and recommended that a Conciliation Board be appointed in accordance with the provisions of Order in Council P.C. 1003, notwithstanding that the Company had taken the position with the Syndicate, with the Director of Industrial Relations and with Mr. Trepanier that there was a Contract in force between the parties that had not been cancelled and which could only be amended voluntarily by mutual agreement.

By telegram addressed to Mr. P. H. Skelton, Works Manager of the Company at Arvida, on the 22nd of May, 1945, the Director of Industrial Relations called upon the Company to appoint its nominee to a Board of Conciliation, in answer to which the Company telegraphed the Director of Industrial Relations as follows:—

Reference your telegram twenty-second May addressed to me at Arvida stop We are pleased to nominate Mr. Walter A. Merrill, K.C., 240 St. James Street West, Montreal, as the Aluminum Company representative on Conciliation Board stop You appreciate this nomination is made without prejudicing in any way our claims that the appointment of a Conciliation Board at this time is without legal foundation.

The Board having been constituted and having convened at Arvida on the 5th of June, 1945, the Attorney of the Company, Mr. Alex. Prud'homme, K.C., at the opening of the Hearing, formally objected to the jurisdiction of the Board, submitting that a Contract between the Syndicate and the Company—which did not terminate until the 31st of December, 1945—was in full force and effect, binding upon the parties and could only be changed or amended by mutual consent, that both the appointment of Mr. Raoul Trepanier as Conciliation Officer and the appointment of a Board of Conciliation were illegal, irregular and premature.

The Company's Attorney, however, stated that, without prejudice and under reserve of this objection, the Company was prepared to discuss proposed amendments to the Contract with a view of seeing whether some mutual agreement could be arrived at.

Proposals and counter-proposals were submitted by the parties, but the Board found itself unable to conciliate, as the proposals submitted by the respective parties could not be mutually agreed upon, an essential element requisite to changing the Contract before its termination.

The Company submitted that the Syndicate had the option of exercising two courses of action, *one*, to give fifteen (15) days' notice of termination of the Contract in accordance

with its terms, or *two*, to give the notice requiring the other party to enter into negotiations for the renewal of the Agreement provided for in Section 16 of Order in Council P.C. 1003.

The Company further submitted that as notice of cancellation had not been given in accordance with the terms of the Contract, the only alternative for the Syndicate was to have given notice in accordance with Section 16 of P.C. 1003, which notice should have been given by the Syndicate ten (10) clear days before the 1st of November, 1944, and that the failure to give such notice resulted in the Contract being automatically renewed for the calendar year 1945 as it stood, and could only be amended by mutual consent.

The Syndicate, on the other hand, submitted that the letter of the 15th of December, 1944, above quoted, having been given fifteen (15) days before the expiry date of the Contract this notice was a compliance with the provisions of Section 16 of Order in Council P.C. 1003 and that on failure of the parties to satisfactorily negotiate, the provisions of the Order in Council dealing with the appointment of a Conciliator and a Board of Conciliation then became open to the Syndicate.

In support of its contention, the Syndicate filed a finding of the National War Labour Board dated the 30th of January, 1945, in a matter between Local 195 United Automobile Aircraft and Agricultural Implement Workers of America U.A.W.-C.I.O., and Motor Products Corporation, in which the Board, through its Chairman, gave it as its opinion that notice given on the 8th of March, 1944, relative to the renewal of a Contract, which expired on the 30th of April, 1944, was a compliance with Section 16 of P.C. 1003, and further went on to say that the Board interprets renewal in Section 16 as meaning renewal with or without amendment.

I am unable to agree with this finding on the interpretation of Section 16 of P.C. 1003 for the following reasons.

It has repeatedly been held by our Courts that Orders in Council passed by the Government in virtue of War Orders and Regulations are Laws of exception and must be strictly interpreted.

On reading and giving effect to the punctuation as well as the ordinary meaning in the English language of the words used in Section 16 of P.C. 1003, I find myself unable to come to any other conclusion but that a Notice by either party to a Collective Labour Agreement to enter into negotiations for the renewal of the Agreement must be given two months plus ten (10) clear days prior to the expiration of the Contract

To give Section 16 of P.C. 1003 any other meaning or interpretation than the above would bring about the result that Notice could be given ten (10) clear days prior to the expiry of the Contract, which would leave no time for negotiation.

It is obvious that it is the object of this Section that the contracting parties have a sufficient period of time, namely: two months, in which to carry on negotiations and even arbitration in order to bring about a renewal of the Contract by the time of its expiry.

The Company filed with the Board a Majority Report of a Board of Conciliation dated the 4th of April, 1945, in a matter between Local Lodge 631 International Association of Machinists and Peacock Brothers Limited, signed by the Chairman, the Honourable Mr. Justice Wilfrid Lazure, and Mr. T. R. Ker, K.C., in which the majority of the Board found that where a Collective Labour Agreement was in force and the parties could not mutually agree to

amendments proposed by the Union, no recommendation should be made other than that both parties abide by the existing Contract until it shall have been terminated according to its provisions in that regard.

The Contract between the Syndicate and the Company has not been terminated according to the provisions of the existing Contract, and, therefore, as the parties have failed to mutually agree to proposed amendments to the Contract, which is still in full force and effect, I am in agreement with the position taken by the Company that the appointment of a Conciliation Officer and the setting up of a Board of Conciliation should not have taken place and that no other recommendation should be made but that both parties abide by the existing Contract until it shall have been terminated according to its provisions in that regard.

Montreal, 29th June, 1945.

(Sgd.) WALTER A. MERRILL,
Member of the Board.

Report of Board in Dispute between Boeing Aircraft of Canada, Limited, Vancouver, B.C., and Aeronautical Mechanics Lodge 756, International Association of Machinists

On June 25 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between Boeing Aircraft of Canada, Ltd., Vancouver, B.C., and Aeronautical Mechanics Lodge 756, International Association of Machinists. A minority report was submitted by Mr. W. A. Sutton.

The personnel of the Board was as follows: Mr. Clarence Darling, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. W. A. Sutton and Birt Showler, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

In the matter of the Wartime Labour Relations Regulations, P.C. 1003, and of a dispute between Boeing Aircraft of Canada, Limited, Vancouver, B.C., (Employer) and Aeronautical Mechanics Lodge 756, International Association of Machinists, (Employees' Representatives.)

As reported in the Conciliation Officer's Report made in this matter on the 13th day of February, 1945, the parties had agreed on all articles in a certain draft agreement with the exception of two clauses sought to be included by the Employees' Representatives

(hereinafter referred to as "the Union"): one respecting union membership and the other respecting payroll deductions or "check-off".

These two proposed clauses read as follows:

Union Membership

"The Employer agrees to retain in its employ only members in good standing of the Union, but it is agreed that the Employer shall be free to employ non-Union employees, provided said non-Union employees shall make application and become members of the Union after completing a probationary period of 30 days. This clause to apply to all employees covered by this agreement.

Payroll Deductions

"The Employer agrees to the principle of payroll deductions on behalf of the Union, of Union dues and assessments authorized under the constitution of the I.A. of M., in the following manner:

- (a) Payroll deductions for Union monthly fees shall be made only upon receipt by the Employer of written instructions from the individual employees and shall continue until cancelled in writing.
- (b) The Employer, subject to the above regulations, shall deduct from the second pay cheque of each month the Union dues for that month and shall forward

same to the Financial Secretary of the Union, and shall be responsible to him for all such dues collected. In the case where there are no earnings by the employee during this week, a double deduction shall be made the following month. The Employer shall not, however, be responsible for nonpayment of any dues of any Union member in the absence of written instructions from the employee to make deductions from pay therefor.

- (c) Cancellation of payroll deductions for Union dues shall be made in the following manner: The employee shall give notice, in writing, of his desire for deductions to stop, and be delivered by him to the business office of the Union. Such cancellation must be delivered by the first day of the month for which the cancellation becomes effective. The Union shall forward this notice to the Personnel Office of the Employer.
- (d) Union initiation fees shall be deducted upon the presentation to the Employer of authorization signed by the employee."

Review of Procedure

The Board held a preliminary meeting on the 29th day of March, 1945, a copy of the minutes of which were sent to the Minister on the 3rd day of April, 1945.

After some delays owing to absences from the City of members of the Board, and of the Employer's General Manager, the Board met on the 16 of May when both parties were represented.

After some discussion it was evident the parties were not at that time prepared to come to an agreement with respect to the said two clauses, that is to say, the Union desired to urge the inclusion of the said two clauses in the agreement and wished to place before the Board its reasons, supported by evidence and argument; and on the other hand the Employer wished to have an opportunity to submit evidence and argument in reply and state its reasons why it was not prepared to accede to the requests of the Union in that regard.

The Board suggested that as a preliminary step to the hearing the Union submit its representations in writing and that the Employer make written answer their "case", and that thereupon the Union have a right of reply which should also be submitted in writing. This procedure was agreed to by the parties and the hearing was adjourned until the 1st day of June following, and during the interval the parties duly filed and exchanged their written "pleadings".

The hearing proceeded on June 1 when the Union formally presented and read its "case", called witnesses, filed certain exhibits, and submitted verbal argument; to which the Employer made answer, called witnesses, and submitted argument both written and verbal. The Union's representatives then proceeded to reply to the Employer's answer. The hearing was adjourned to June 4 before completion. The hearing proceeded on June 4 when after further argument on the part of both parties the hearing was further adjourned to June 6 at 1 p.m. to allow the Union's representatives to sum up and address the Board in final argument. The Board met again on June 6 when the hearing was completed in the afternoon, without any agreement being concluded between the parties regarding the matters in question. The Board announced that it would reserve its decision and endeavour to make its report and recommendations as soon as possible.

Review of the facts of the case and of the representations submitted

1. It was clear from the outset that the most friendly relations have always existed between the Employer and the Union which continued throughout the hearings, and that there was abundant evidence of mutual co-operation between the parties during the past six years or more in furthering the best interests of both Employer and Employees and the industry in which they were engaged.

2. The Boeing Aircraft of Canada, Limited, is, and has been since the commencement of the war a high priority essential war industry, and is a subsidiary of the Boeing Aircraft Company of Seattle, Renton and Wichita, U.S.A. and the Board was greatly impressed with the size and importance of the industry, the large number of employees both in the shops and on the technical and administrative staffs, and the complexity of its operations, and the Company in the course of its argument submitted that it was essential that at least until its "war job" is completed care should be taken to avoid the introduction of any changes or elements that might interfere with or disturb its present good relations with its employees and the harmony which at present exists.

3. The main points in the Union's submission are as follows:

- (a) That it has earned and merited the "security" which it seeks, as set out in its written presentation.
- (b) That membership in the Union has proved beneficial both to the Employer and employees in that: it assists in settling disputes and adjusting grievances before reaching a serious stage;

assists the company to solve many of its problems affecting successful and efficient operation; assists, advises, and helps plan procedure in cases of layoffs; carries on educational work amongst its members, leading to greater efficiency, man hour saving, incentive, morale, and contentment, and the discouragement of absenteeism. The Union further assists and encourages the protection and maintenance of the equipment and property of the Company.

- (c) That at the time it was certified as the bargaining representatives nearly 80 per cent of all hourly paid employees, and at present 60 per cent to 70 per cent of the employees are members. Any falling off of membership is due to "turnover" and restrictions and difficulties with regard to canvassing for membership.
- (d) That it is unfair that non-Union members should have and accept the benefits and advantages of the work done by the Union without at the same time accepting the responsibilities of membership in the Union and helping with its expenses by paying membership dues. ("riding on the backs of Union members").
- (e) That there would be greater control in settling disputes, ironing out grievances, solving problems, and exercising discipline, etc., if all employees were members of the Union.
- (f) That friction is likely to arise between Union and non-Union members which would be dispelled by a "closed shop" and bring about more team spirit.
- (g) The Parent Company in Seattle have a closed shop and since then efficiency has increased rather than lessened.
- (h) The Union does not interfere with and never has prevented employees advancing out of the Union.
- (i) That with reference to "check-off" the clause only requires the employer to make reductions from payroll when a member *voluntarily* makes a request for the employer to do so. There is no provision in the by-laws or rules of the Union requiring members to make such request; that many members are negligent about payment of their dues and the arrangement would avoid having to "dun" members continuously and would facilitate collection; and that the arrangement should not add very much to the work of the accounting and payroll staff.

The Employer, by its representatives, Mr. Stanley Burke, Mr. John McGraw, and Mr.

Henry Ayling submitted its brief in answer to the Employees' case and addressed the Board stating the Employer's principal objections to the Union membership and payroll deduction clauses in the proposed agreement:

Mr. Burke emphasized the fact that the Boeing Aircraft establishment was a war industry engaged in war work of the most urgent and important nature, at present mainly in manufacture of a material part of the B-29 Bomber urgently needed in the Japanese war and has been classified as a designated establishment with an "A" priority rating under the National Selective Service Regulations. The Company while favourable to organized labour takes a serious view of the proposal that it should retain in its employ (as hourly paid employees) only members of the Union in good standing. This would mean that it would be obliged to discharge all employees who refused to join the Union or who were not in good standing in the Union. The Employer regards this as a most drastic step involving, *inter alia*, the possible necessity of dismissing faithful and trained employees of long standing in the service of the Company. A great many employees also are real "war workers," i.e. who want to do something for the war and which is their sole or principal interest. The employer further submitted that this form of coercion or compulsion is repugnant to its sense of fairness to those of its employees who have not chosen to join the Union and it does not wish to be a party to such an arrangement. It may be very true that the work and services of Unions have proved to be very beneficial to all employees including those not belonging to any Union; but to say that the latter "ride on the backs" of the Union is too strong and Mr. Burke illustrated by saying that many welfare organizations render beneficial services to a great many people; but it does not follow that every person benefited should be compelled to join the organization and pay membership fees and assessments. The "benefits" may be forced on them whether they like it or not.

Mr. Burke readily admitted that the most cordial relations had always existed between the Management and Union officials and fully acknowledged the co-operation and assistance given by the Union with respect to the matters referred to by the Union's representatives in their submissions; but pointed out that the management also always had the interests of all employees, both male and female, at heart, and they too are concerned and deeply interested in their welfare and are entitled to due credit for the steps taken and procedures adopted on their part in that regard.

Mr. Burke pointed out that the workshop and the work in which the hourly-paid employees are engaged is a comparatively small part of the plant and program and they know of only a minor portion of the problems of the whole undertaking; and he referred to the Company's engineering department; tool design, methods and program, technical control; new processes, and the necessity of management and technical staff to apply themselves to continual study of trade and technical journals, also visiting and receiving the benefit of the other plants' experiences, his point being that while valuable suggestions come at times from employees working on the job, the management and technical staff are directly responsible for personnel of employees, efficiency in operation, time and cost saving methods and high standard and quality of product that meet specifications with precision.

On the point that the Union sought "security" Mr. Burke replied that everyone is after security and in the present instance it is a mutual affair. The Union, however, want it for their own sake and that the grounds submitted by the Union are irrelevant. They ask for "reward," but their case should be on its merits.

The Company submitted that the relations between it and its employees are at present harmonious and have been generally so, and theirs is a grave risk that a Union membership clause, being highly contentious and involving coercion and compulsion would disturb the present good relations when harmony is of the utmost importance. It might also cause large numbers of employees, some of them important and valuable men, to leave the Company's employ at a time when their services are urgently needed.

Then, again, if the Company should discharge employees in this a designated establishment it would involve a breach of the National Selective Service Civilian Regulations unless permission were first obtained from a Selective Service Officer on good cause being shown; and that a voluntary agreement with a third party to discharge an employee is not a good cause.

With regard to the provision in the proposed Union Shop clause that while the Company would be free to employ non-Union members, the employer may not retain them in its employ after 30 days unless they join the Union within that period, the Employer's representatives here again pointed out that this might involve another breach of the law, viz, the provisions of the Reinstatement in Civil Employment Act.

The Company further submitted that by P.C. 1003, Sections 5 to 9 a code is provided for employees to be free to choose their bar-

gaining representatives by a majority vote and that if all were compelled to join the Union the Union would continue as bargaining representatives in perpetuity which would be contrary to the spirit and interest of the Regulations, which do not contemplate a "closed shop".

On the question of "check-off" the Company declines to agree to a payroll deduction clause as it regards this as an internal matter within the Union, in which the Company should not be concerned. It does not wish to be a collecting agent for the Union—at least until it is by law compelled to be.

On the whole the Company maintains its objection to a Union or "closed shop" and asks "where is this sort of thing going to lead?" It is progressive step to preventing any person from getting a job unless he is a member of some Union which has the power to reject or expel and raise dues and assessments. An employee should have and enjoy the right and privilege of joining any Union he wishes or none at all and on the other hand the right of an employer to select his own employees and retain them in his employ as he may see fit should not be interfered with, and the Company does not wish to be "hamstrung" in that regard.

The Company is not opposed to employees joining the Union and would be willing to co-operate in securing membership rather than agree to resort to compulsion.

The Company submitted in conclusion that the Union had not made out a case.

In reply, the Union representatives state that while admission to the Union requires the approval of two-thirds majority of members present at a meeting, the Union has never been known to refuse membership to an applicant; that its by-laws (which were produced) provide that a member can only be expelled by a two-thirds majority vote of members present at a meeting duly called on notice specifying the matter and that the member concerned has a right of appeal to the international body. The Union representatives further state that they were convinced that very few (if any) employees would leave their employment rather than join the Union; and that no worthwhile new employees would object to joining at the end of the 30 day probation period. Furthermore that employees had not experienced any difficulty with the National Selective Service Officer in obtaining permission to terminate where a Union shop agreement existed and it became necessary to terminate pursuant thereto. As to reinstatement of Veterans the Union representatives submitted that the Unions were rendering helpful services to returned men and most, if not all, of them would be pleased to know that in coming

back to their former jobs they would have the protection, help, and security that a Union shop gives and that they would be ready and willing to join the Union.

The Union submitted in conclusion that the Employer had not effectively answered their case and had not shown any good or valid reason why the request for a Union Shop and check-off, as set out in the draft clauses in dispute, should not be acceded to.

A certain amount of time was spent in discussing general issues and the arguments at times went rather far afield. It would seem unnecessary to further refer thereto in this Report as the Board was only concerned with the parties immediately involved and the particular facts and issues of the present case.

Members of the Board took occasion to ask questions of witnesses and of the representatives of the parties respectively and on some occasions to cross-examine, and as a result of the hearing believe they are in a position to fairly judge of the facts and of the values of the submissions.

Neither of the parties made any suggestion by way of a compromise and the Board saw that further negotiations at the time were useless—the parties indicating they would each look forward with interest to hearing the recommendations which the Board may make in the matter. The Board therefore reserved its decision.

Without expressing their respective personal views on the various points discussed but taking all the facts and circumstances into consideration the majority of the Board makes the following recommendation:—

RECOMMENDATION

(By Majority of Board)

The Board does not recommend at this juncture that the Employer should agree to, and adopt, the Union Shop clause as submitted by the Union.

On the other hand the Board would recommend that in lieu of the Union Shop clause submitted the parties mutually agree to the insertion in the agreement of the following "Maintenance of Membership" clause:—

ARTICLE III

"Employees of the Employer, covered by this Agreement, who are at the date of this Agreement members of the Union in good standing according to the by-laws of the Union, or who subsequently become such members, shall, as a condition of employment, be required by the Employer to maintain such membership for the duration of this Agreement, *Subject to the Proviso* hereinafter set forth.

All Employees engaged by the Employer after the date of this Agreement shall within 30 days of their employment become members of the Union, and shall, as a condition of continued employment, be required by the Employer to maintain such membership according to the by-laws of the Union for the duration of this Agreement.

Provided that nothing in the foregoing Article contained shall oblige or require the Employer to terminate the employment of any employee, present or future, or refuse to engage or employ or re-engage or re-employ any person, contrary to the provisions of any Statute of Canada or of the Province of British Columbia or any regulations made thereunder or any law in force in the said Province.

Provided, however, that where the only statutory or legal requirement or pre-requisite is the obtaining of permission of a Selective Service Officer to terminate employment the employer shall duly make application for such permission in any and all cases where an employee has failed to maintain his membership in the Union or, in the case of new employees, where he has failed to become a member of the Union within the 30 days of his employment as by this Article required."

And also that the parties mutually agree to the insertion of the *voluntary* payroll deduction clause as submitted except for the following amendments, namely that the words "and assessments" after the words "Union dues" in the second line of said clause be struck out, and that the second sentence in sub-clause (b) should be amended to make the procedure a little more clear in case there should be no earnings during a pay period. The Article therefore should read as follows:—

ARTICLE IV

"The Employer agrees to the principle of payroll deductions on behalf of the Union, of Union dues authorized under the constitution of the I.A. of M., in the following manner:—

- (a) Payroll deductions for Union monthly fees shall be made only upon receipt by the Employer of written instructions from the individual employee and shall continue until cancelled in writing.
- (b) The Employer, subject to the above regulations, shall deduct from the second pay cheque of each month the Union dues for that month and shall forward same to the Financial Secretary of the Union, and shall be responsible to him for all such dues collected. Should there be no earnings by

the Employee during the pay period represented by such second pay cheque, a double deduction shall be made from the second pay cheque in the following month. The Employer shall not, however, be responsible for non-payment of any dues of any Union member in the absence of written instructions from the employee to make deductions from pay therefor.

- (c) Cancellation of payroll deductions for Union dues shall be made in the following manner: The employee shall give notice, in writing, of his desire for deductions to stop, and be delivered by him to the business office of the Union. Such cancellation must be delivered by the first day of the month for which the cancellation becomes effective. The Union shall forward this notice to the Personnel Office of the Employer.
- (d) Union initiation fees shall be deducted upon the presentation to the Employer of authorization signed by the employees."

Respectfully submitted.

(Sgd.) CLARENCE DARLING,
Chairman of the Board.

(Sgd.) BIRT SHOWLER,
Member of the Board.

June 19, 1945.

Minority Report

In the matter of the Wartime Labour Relations Regulations P.C. 1003, and of a Dispute between Boeing Aircraft of Canada, Limited, Vancouver, B.C., Employer, and Aeronautical Mechanics Lodge 756 International Association of Machinists, Employees' Representatives.

A Collective Agreement between the above mentioned parties was agreed upon with the exception of two clauses which the Union insist should be embodied in the Agreement, one respecting Union membership and the other payroll deductions. These two clauses read as follows:

UNION MEMBERSHIP

The Employer agrees to retain in its employ only members in good standing of the Union, but it is agreed that the Employer shall be free to employ non-Union employees provided said non-Union employees shall make application and become members of the Union after completing a probationary period of 30 days. This clause to apply to all employees covered by this agreement.

PAYROLL DEDUCTIONS

The Employer agrees to the principle of payroll deductions on behalf of the Union, of Union dues and assessments authorized under the constitution of the I.A. of M., in the following manner:

- (a) Payroll deductions for Union monthly fees shall be made only upon receipt by the Employer of written instructions from the individual employee and shall continue until cancelled in writing.
- (b) The Employer, subject to the above regulations, shall deduct from the second pay cheque of each month the Union dues for that month and shall forward same to the Financial Secretary of the Union, and shall be responsible to him for all such dues collected. In the case where there are no earnings by the employee during this pay period, a double deduction shall be made the pay period in the following month. The Employer shall not, however, be responsible for non-payment of any dues of any Union member in the absence of written instructions from the employee to make deductions from pay therefor.
- (c) Cancellation of payroll deductions for Union dues shall be made in the following manner: The employee shall give notice, in writing, of his desire for deductions to stop, and be delivered by him to the business office of the Union. Such cancellation must be delivered by the first day of the month for which the cancellation becomes effective. The Union shall forward this notice to the Personnel Office of the Employer.
- (d) Union initiation fees shall be deducted upon the presentation to the Employer of authorization signed by the employees.

On the hearing before this Board written arguments and replies thereto were submitted by the Union and the Company. The Union based their demand for the inclusion of the clauses upon the following grounds:—

1. That it is right and just that these clauses be included.

2. That the Union has earned the security of a Union shop by virtue of the assistance it has rendered to the Company in settling disputes and adjustments and grievances and solving many other problems affecting the operations of the Company.

3. That it is unfair that non-Union members should obtain the benefit of work done by the Union without accepting their responsibility as members of the Union.

The Company objects to the inclusion in the Agreement of the two clauses upon the following grounds:—

1. That as they are carrying on a war industry with an "A" priority rating many workers are directed to employment in their Company by the Selective Service; that many of their employees are working for patriotic reasons and that the Company should not be put in the position of compelling such employees to join this or any other Union upon the penalty for not so doing of losing their employment.

2. As the Company is producing parts for the B-29 Boeing Aircraft, which is urgently needed in the Japanese war, it is of the utmost importance that there should be no disruption

in that production; that by the very nature of its business it has many highly trained personnel who could not be quickly replaced and if they refused to join the Union the Company would be compelled to discharge them.

3. That compulsion to join the Union with a penalty of loss of their employment for not doing so would be an infringement of the civil rights of the employees.

4. That every employee must have the right to choose for himself the Union, if any, to which he wishes to belong and that there should not be any compulsion in the exercise by him of that right.

5. That the relations between the Company and its employees are and have been harmonious and any compulsion now exercised by the Company to force employees to join the Union might create discord with the result that the production so urgently needed would be curtailed.

6. That adoption of the Union clauses would involve a breach of Selective Service regulations as well as a breach of the reinstatement of veterans under the "Civilian Re-establishment Act of 1942."

7. That the inclusion of the Union clause would result in the Union being the bargaining representatives of the employees in perpetuity.

As regards the payroll deduction clause the Company maintain that: (1) it would not willingly agree to the principle of deducting dues and assessments authorized by the constitution of the lodge on the ground that it regarded this as a matter of internal management within the Union with which it should not be concerned.

2. That until employers are required by law to act as collecting agents for a Union they should not be asked to agree to do so.

3. That the Company cannot be placed in the position of deciding whether or not assessments are authorized by the constitution of the Union.

It is my recommendation that the Union membership and payroll deduction clauses should not be embodied in the Collective Agreement hereinbefore referred to for the following reasons:—

1. Because the Company is engaged in producing a product urgently needed in the prosecution of the war against Japan and any compulsion exercised by the Company to make employees join the Union might cause serious discord which would lead to disruption in the operations of the Company.

2. That such compulsion would be interfering with the civil rights of the employees.

3. That inclusion of the Union clause would involve a breach of Selective Service Regulations as well as a breach of the reinstatement of veterans under the "Civilian Re-establishment Act of 1942".

4. That the inclusion of the clause would result in the Union being the bargaining representative of the employees in perpetuity contrary to the express provisions of P.C. 1003.

5. That as regards the payroll deduction clause the Company should not be made a collecting agent for the Union.

Dated at Vancouver, B.C., this 27th day of June, 1945.

(Sgd.) W. A. SUTTON,
Member.

Report of Board in Dispute between the Champion Spark Plug Co. of Canada, Ltd., Windsor, Ont., and Int. Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (UAW-CIO) Local 195

On July 23 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the Champion Spark Plug Co. of Canada, Ltd., Windsor, Ont., and Int. Union, United Automobile, Aircraft & Agricultural Implement Workers of America (UAW-CIO) Local 195.

The personnel of the Board was as follows: Hon. Mr. Justice W. D. Roach, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Gordon L. Fraser, K.C., and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:

Report of Board

To the Honourable the Minister of Labour,
Ottawa, Ontario.

In the matter of the Wartime Labour Relations Regulations, P.C. 1003 and of a dispute between Champion Spark Plug Company of Canada, Limited, Windsor, Ontario, (Employer) and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America, (U.A.W.-C.I.O.) Local 195, (Employees).

The undersigned Chairman and Members of the Board of Conciliation established in this matter pursuant to the provisions of Section 13(1) of The Wartime Labour Relations Regu-

iations, P.C. 1003 respectfully report as follows:

The Company's plant is located in the City of Windsor and the Company is engaged in the manufacture of spark plugs for motor vehicles. There are presently on the pay roll of the Company in the unit to be affected by the collective bargaining agreement 145 employees of whom, it is said, 136 are members of the Union.

The Company and the Union entered into a collective bargaining agreement under date February 24th, 1943, for a term of one year, subject to automatic renewal on the expiration of that term from year to year thereafter. That agreement, subject to certain amendments which are not now in controversy, was extended for a further term of one year expiring on February 22nd, 1945. Negotiations have been in progress since on or about January 12th, 1945, for a renewal of the agreement, and the parties had agreed on all the provisions to be contained in such renewal save only the following all of which were requested by the Union:—

Item A: A provision for a union shop.

Item B: A provision for check-off of union dues.

Item C: An arbitration clause as part of the grievance procedure.

Item D: The agreement dated February 24th, 1943, contained the following provision:—

Section 7(b)—“Upon the signing of this agreement, the wage scale of the employees shall be as is established in Exhibit “A”, which is attached to this agreement.

The Union requested that this clause be deleted from the agreement.

The Board met with the parties at the City of Windsor on the 1st day of June, 1945. The Company was represented by its solicitor, Mr. S. L. Springsteen, K.C. The Union was represented by Mr. Drummond Wren; and by Mr. Robert Hood, an employee and past member of the negotiating committee; Mr. Joseph Bruce, vice-chairman of the negotiating committee; and Mr. Lloyd Smith, chairman of the negotiating committee.

The Board desires to record its appreciation of the co-operation and assistance given to it by the representatives of the parties.

During and as a result of the Board's discussions with the parties, the parties agreed as to items C and D, and their agreement on those items was substantially as follows:—

Re Item C: As part of the grievance procedure to be covered by the agreement, that there shall be an arbitration clause which shall be final and binding on the parties only as to the interpretation of the agreement and any alleged violation of it.

Re Item D: The present wage structure shall be attached to and form part of the

agreement with the right reserved to the employees to apply to the Regional War Labour Board at any time within six months of the date of the agreement for a revision of such wage structure, but that there shall not be more than one application by the employees during the life of the contract.

As to items A and B, the parties seemed to be hopelessly deadlocked. No good purpose would be served by this Board recording in this report the arguments advanced by the Union in support of its request for a union shop and check-off of union dues and those advanced by the Company's representative against those provisions. They are the arguments usually advanced for and against such provisions. Employer-employee relations at this plant have been reasonably harmonious, and the Board sees no reason why they should not continue to be harmonious. In view of the conflict between the parties on items A and B, the Board suggested by way of compromise a maintenance of membership clause with some reasonable escape period. After considerable discussion the Union intimated that it would forego its demand for a union shop and a check-off and accept in lieu thereof a maintenance of membership provision such as the Board suggested. The representative of the Company requested time within which to confer with the directors of the Company, and pending the decision of the Company with respect to the proposed maintenance of membership clause, the matter stood adjourned. The representative of the Company has now advised the Board that the Company is unwilling to agree to that proposal.

In view of the history of the relationship between the parties and the strength of the Union among the employees in this plant, in the opinion of the majority of this Board the maintenance of membership clause set out in Schedule “A” hereto would, in the circumstances, be reasonable and the Board accordingly recommends that, in lieu of a provision for union shop and check-off of union dues, the formal agreement between the parties contain a provision for maintenance of membership substantially in the form set out in Schedule “A”. Mr. Fraser, the employer's nominee, agrees in this case with the principle of maintenance of membership but suggests that the clause be in the form set out in Schedule “B”.

All of which is respectfully submitted.

Dated this 19th day of July, 1945.

Sgd. W. D. ROACH,
Chairman.

Sgd. BORA LASKIN,
Sgd. A. F. FRASER.

SCHEDULE "A"

MAINTENANCE OF MEMBERSHIP

(1) Every present employee who is a member of the Union shall be given a period of fifteen days from the date upon which the agreement is posted, as hereinafter provided, within which to elect in writing, to be filed with the Company and the Union, either to remain a Union member or to withdraw from the Union. If he elects to retain his membership in the Union, then the continuance of his membership during the life of the agreement, but not including any possible automatic renewal thereof, and subject to a right to withdraw from the Union within the period as hereinafter provided, shall be a condition precedent to his retaining his employment with the Company.

(2) Every employee, whether present or future, shall once he becomes a member of the Union retain his membership in the Union during the life of the agreement, but not including any possible automatic renewal thereof, and subject to a right to withdraw from the Union within the period as hereinafter provided, as a condition precedent to his retaining his employment with the Company.

(3) During the two weeks immediately preceding the anniversary date of this agreement, any employee who is then a member of the Union shall be at liberty to withdraw from the Union without thereby in any way affecting his right to continue in the employ of the Company.

(4) In order to acquaint all employees with the terms and provisions of the maintenance of membership clauses in this contract, the Union shall post on the Company bulletin boards, not later than the day next following the date upon which the contract is signed, a notice containing all the maintenance of membership clauses and showing the date upon which the contract was signed. This notice shall remain posted on the bulletin boards during the life of the agreement.

(5) At least quarterly the Union shall give to the Company a list containing the names of employees who are members of the Union, and

it shall be the obligation of the Union to notify the Company of any revision in that list as occasion or altered circumstances may require.

SCHEDULE "B"

MAINTENANCE OF MEMBERSHIP

(1) Every employee who is a member of the Union shall be given a period of fifteen days from the date upon which the agreement is posted, as hereinafter provided, within which to elect in writing, to be filed with the Company and the Union, either to remain a Union member or to withdraw from the Union. Any member of the Union after such period of election or any employee who subsequently becomes a member of the Union, shall retain his full seniority unless it is changed by a meeting of the employees. When notified in writing of such a change the Company will place the employee at the bottom of the seniority list where he will remain unless he applies for and is granted re-instatement by the employees within one calendar month after the date upon which he was moved to the bottom of the list.

(2) If during the life the agreement less than 50 per cent of the employees for the time being in the bargaining unit are employees in good standing of the Union, then the provisions with respect to the maintenance of membership shall for the remainder of the life of the agreement become and be null and void.

(3) During the two weeks immediately preceding the anniversary date of this agreement, any employee who is then a member of the Union shall be at liberty to withdraw from the Union without thereby in any way affecting his seniority.

(4) In order to acquaint all employees with the terms and provisions of the maintenance of membership clauses in this contract, the Union shall post on the Company bulletin boards, not later than the day next following the date upon which the contract is signed, a notice containing all the maintenance of membership clauses and showing the date upon which the contract was signed. This notice shall remain posted on the bulletin boards during the life of the agreement.

Report of Board in Dispute between the Ford Motor Co. of Canada, Ltd., Windsor, Ont., and Local 240, United Automobile, Aircraft and Agricultural Implement Workers of America

On July 5 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the Ford Motor Co. of Canada, Ltd., Windsor, Ont., and Local 240, United Automobile, Aircraft and Agricultural Implement Workers of America.

The personnel of the Board was as follows: Dr. Cecil A. Wright, Chairman, appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board; Messrs. S. L. Springsteen, K.C., and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003 and Ford Motor Company of Canada, Limited, Windsor, Ontario, and Local 240, United Automobile, Aircraft, and Agricultural Implement Workers of America.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

SIR:—

The Board of Conciliation appointed by you pursuant to the provisions of P.C. 1003 reports as follows:

1. Public hearings were held at the Court House at Sandwich, Ontario, on April 7th,

27th, 28th, May 11th and 12th. At these meetings the Company was represented by W. A. Clark, Personnel Manager, Robert Allen, Assistant Personnel Manager and J. B. Aylesworth, K.C., Counsel. The Union was represented by M. H. Featherston, President of Local 240, Dan Cassey, Chairman of the Bargaining Committee, Hans McIntyre, International Representative and Drummond Wren, International Representative. Oral and written submissions were made by both parties.

2. The present dispute arose from the inability of the parties to agree on any of the terms of a collective agreement covering the office personnel of the Company at Windsor. The constitution of the present Board was the last in a lengthy series of proceedings beginning on January 25, 1943, when the present Local and Formocan Employees' Association made application for a Board of Conciliation under the Industrial Disputes Investigation Act with respect to collective bargaining rights on behalf of the office employees. The Board reported in June of 1943, defining the bargaining unit and recommending a vote. The Union rejected the Board's report and in August, 1943, applied to the Labour Court of Ontario for certification under the Ontario Collective Bargaining Act. Pursuant to an Order of that Court a vote was taken on November 15, 1943. Out of 733 eligible employees the present Union obtained 355. This vote was set aside by the Court because of Union violation of a clause in the Order directing a vote forbidding electioneering or organizational activity. A subsequent vote was taken pursuant to Court Order on February 25, 1944. On this vote, out of 747 eligible employees, the Union obtained 393 votes. By Order of the Labour Court dated March 17, 1944, the present Union was certified as the collective bargaining agency.

3. Negotiations for a collective agreement under P.C. 1003 which supplanted the Ontario Act did not commence until May 19, 1944, despite repeated requests by the Union, due to the Company's position that the Union had failed to "conform exactly" to the procedural requirements of P.C. 1003, s. 10, in light of P.C. 2301, until May 6. Negotiations proceeded until October 21, 1944, when the Union made an application for intervention to the Regional Labour Relations Board which ultimately resulted in the establishment of the present Board on February 21, 1945, the Board being fully constituted by the appointment of a Chairman on March 21, 1945.

4. As a result of the negotiations the Company produced its first complete draft

agreement embodying the Company's position on September 11, 1944. The only complete draft of the proposed union agreement was given the Company on October 21, 1944, the same date on which the Union took steps to obtain the present Board. A subsequent draft of the Company, unaffected in any way by the Union's proposals, was made in December, 1944. A third draft of the Company's proposals was made on April 2, 1945, just prior to the first sitting of this Board. During the present hearings the Company filed a final draft—embodying textual changes only—on April 27. It is this draft of the Company which is referred to as the Company's final draft in this report. At a hearing on May 11, 1945, the Company submitted a revised draft of clauses 15 and 16, dealing with seniority rights of returned men. The Union's "points of differences", returned with the Union draft and the Company final draft with this report, is based on a comparison of the Union draft and the Company draft of September, 1944.

5. The fact that almost two and a half years have elapsed since the present Union commenced proceedings looking to the conclusion of a collective agreement—proceedings which have been contested throughout by the Company—is sufficient indication of the difficulties which faced the present Board. At the first hearing the Company stated there were eight main points on which there was disagreement:

- (1) union security;
- (2) payment to union officials by the Company for the time spent in working hours on "Union business";
- (3) the time to be permitted to union officials performing work in connection with grievances, etc.;
- (4) the Company's desire to make definitive statements of what is permitted to Union officials in the way of grievances, etc., as compared to the Union's proposal to leave these matters at large;
- (5) differences as to seniority;
- (6) the refusal of the Company to grant a recognition clause;
- (7) whether arbitration of grievances shall be final and binding on the parties;
- (8) secondary points regarding grievance procedure.

6. As the hearings proceeded, however, it became quite evident that the Board had no alternative to going into each clause proposed by the Company and by the Union. This was done thoroughly and exhaustively. At the outset there was agreement on practically nothing. In the course of the hearings concessions were made by both parties on several points. In the main, however, there were so many underlying differences, sometimes capable of clear statement, sometimes inhering in the language of the clauses themselves, that

the Board felt it could only write a report by examining clause by clause the matters on which there was disagreement and on which it had failed to obtain agreement.

7. It was our hope that we could deal merely with broad issues, leaving the parties to agree, or disagree, on our recommendation of principle. In the course of numerous attempts to deal with the many issues presented to us, however, we felt that the parties being so far from agreement we should be as helpful as possible and, to illustrate our discussion, and in the hope of assisting towards an agreement, we have in many places suggested clauses which, or something similar, we felt the parties might accept. At the first hearing the Union agreed to accept whatever recommendations the Board might make. The Company did not so agree. It should be clearly understood that we are not putting forward any clause with the view that either party should, of necessity, stand on it. Ours is not primarily a task of drafting. It should also be borne in mind that anything recommended herein has reference only to this particular unit and therefore cannot be used as a precedent in other situations where the facts may differ. This is of particular importance in the present case where we understand a Local of the same international union represents the employees in another unit. With that situation we are neither concerned nor informed.

8. We can only express our hope that both parties will consider the following recommendations with a willingness to cooperate and make mutual concessions. Without that willingness collective bargaining in an impossibility. The attitude of both parties, in the course of two years of negotiations, has been fairly unyielding. From the concessions mutually made in the latter stages of the proceedings before this Board we feel that both parties manifested a spirit which make the voluntary conclusion of an agreement much more hopeful than we had believed possible when the hearings began. This Board's task in dealing with the many and detailed matters involved in dispute has not been easy. If both parties approach the following discussion and recommendations without considering who has won a victory on this or that, but bearing in mind that the Board has attempted to find a solution that it believes will work with the least friction, we believe that they should be able to conclude an agreement under which both can perform their respective duties in harmony.

1. UNION RECOGNITION

9. At the hearings the Union strongly objected to the fact that the Company refused to insert a clause expressly recognizing the Union as the sole collective bargaining agency for the employees in the certified unit. The Company maintained that by setting out the fact of certification proceedings in the recital it followed, as a matter of law, under P.C. 1003 that the Union became such bargaining agency. The Company frankly stated it objected to going beyond the words of the regulations. While the Company's position may be, from a strictly legal standpoint, correct, it became evident in the course of discussions that the refusal to give a recognition clause was bound up with the extent to which the Company was willing to recognize the Union as a third party in interest in such matters as grievance procedure, which will be dealt with hereafter.

10. If the Agreement contains a short recital to the effect that it is entered into pursuant to the order of the Labour Court in the Supreme Court of Ontario we feel that the Company should voluntarily agree to recognize the Union by express provision. A failure on the Company's part so to do might, we believe, jeopardize all possibility of obtaining an agreement between the parties. The Company either is or is not willing to recognize the Union as a party with a real interest of its own in the industrial relations between employer and employee, and we do not believe that the co-operation which a collective agreement requires can be obtained by a Company rigorously insisting that the fundamental principle of recognition be left to implication from a government regulation. We are, therefore, unanimously of opinion that the agreement should contain as a first clause something similar to the following:

The Company agrees to recognize the Union as the sole collective bargaining agency for all office and salaried employees employed by the Company at the City of Windsor in the County of Essex, who are certified by the Order of the Labour Court in the Supreme Court of Ontario, dated March 17th, 1944, such employees being described as follows: (set out here the enumeration and certification order). Such employees are hereinafter called "employees".

11. It will be noted that in this clause we have substituted the word "Union" for the word "Local" which appears throughout the Company's draft. In this instance as in others to be mentioned, we believe that the Union is entitled to describe itself and its officers by whatever name it chooses rather than to have the Company dictate its form of terminology. Furthermore, P.C. 1003 con-

templates an agreement with a "trade union", (s.2) (1) (d). Therefore, in stating the "parties" at the beginning of the Agreement, we think that while Local 240 is the proper party with whom the Company contracts, it should, if the Union chooses, be "hereinafter called the 'Union'." In place of the word "local" in any clause of the Company's draft which we recommend in its original or a revised form it is to be understood that the word "Union" is to be substituted.

12. In view of the first clause which we have suggested being a recognition clause, we think that the recital in the Company's draft might be considerably shortened in as much as the boundaries of the unit are outlined in the recognition clause and we therefore suggest that the recital, opening the Agreement, might be somewhat as follows:

This agreement is entered into pursuant to the provisions of the Wartime Labour Relations Regulations, P.C. 1003, a judgment of the Wartime Labour Relations Board (National) dated February 14, 1945, and an Order of the Labour Court in the Supreme Court of Ontario dated March 17, 1944.

2. UNION SECURITY

13. The Union draft (cls. 2-5) contained provisions requiring existing and future employees to become and remain members of the Union as a condition of employment, ("Union Shop") and also provisions for a check-off of Union dues by the Company. Before this Board the Union based its request for these provisions on the express attitude of the Company in refusing, in connection with recognition for example, to go further than the law requires, and because it stated that there had been no evidence of a willingness on the Company's part to establish a good relationship, which led to a fear of elimination on the part of the Union. There is no doubt that the Company is not overly cordial in receiving or embracing the Union but it does not follow that the existence of the Union as bargaining agency is actually jeopardized by any action of the Company. Both parties have, perhaps, contributed to a feeling of mutual irritation in the prolonged negotiations over the present agreement.

14. Undoubtedly some form of union security would serve to allay the suspicions and fears of the Union as to what it believes to be the policy of non-co-operation and "straight-jacketing" of the Union as illustrated, in the Union's opinion, in the discussion of other provisions. We believe, however, that if the Company grants the concessions and compromises recommended in this report with respect to the working parts of the agreement, so that the Union will have an opportunity

of carrying on as bargaining agency free from what it considers irritating limitations on its activities on behalf of the employees, the Union might, in view of the strongly held views of the Company, withdraw its request, at this stage, for provisions relating to union security. This is, after all, a first agreement and the Union in certification proceedings, was supported by a vote of less than 55 per cent of eligible employees. We are, therefore, dealing with a Union which, in this unit, cannot be said to be far past the organizational stage—an item which must be borne in mind when considering the Company's refusal to pay Union representatives for time spent in servicing grievances, etc. Such a Union, certified as a bargaining agency has a valid claim not to have the performance of its duties unduly impeded or restricted by the Company. Granted the reasonable freedom from restraint and the opportunities for carrying on employer-employee relations which the recommendations we are making contemplate, we believe that the Union should withdraw its request for the union shop and check-off, and we so recommend.

3. REPRESENTATION

Union Committeemen or Stewards— Their Functions, etc.

15. In clauses 2 to 9 of the Company's final draft the Company purported to deal with the following matter:

- (a) the appointment or election of stewards and their numbers;
- (b) the qualification of stewards;
- (c) a definitive enumeration of a steward's duties, including a definition of a grievance;
- (d) the procedure which a steward must follow in order to absent himself from his regular Company duties and the time during which he can so absent himself;
- (e) the election or appointment of a negotiating committee as a group separate from the stewards;
- (f) the procedure which a committeeman must follow in order to absent himself from his regular Company duties and the time during which he can so absent himself.
- (g) the functions of a Chairman of the negotiating committee.

16. In these provisions the Company attempted to make an exhaustive enumeration of those activities of Union officials which would be permitted, to the exclusion of all others, on the Company premises during working hours. The Company's object in so doing,

as stated to this Board, was to obviate the difficulties which the Company said it had experienced in its "plant" due to a failure to enumerate specific items of business which Union officials were "permitted" to carry on. The Union opposed any attempt to confine its officials to what it described as a "strait jacket". The Union felt that the strictness of the provisions, the tying down of Union officials to detailed, and in its opinion barren and, in effect, clerical duties, was an indication that the Company was commencing bargaining relations in the belief that the Union needed curbing; that the Union officials could not be recognized as having, in the language of cl. 10 of the Union draft, regular duties to perform in connection with their employment, which duties were the concern of the Union and not to be dictated by the Company; and that to place detailed and elaborate curbs on Union officials' activities would, and in its opinion was intended to result in paralysing any effective work which it was the Union's function to perform on behalf of the employees and on its own behalf. Particularly was this the case when such limitations were considered together with the Company provision by which Union officials were to receive no pay when absent from their regular work in connection with the minor and attenuated functions permitted them by the Company draft. The relevant clauses in the Union draft are cl. 2-11, 13, which leave at large the question of Union "officials" functions to be determined, presumably, by the Union. It seems to this Board that there is merit in the contentions of both parties and that in this, as in most other matters of collective bargaining, the parties should endeavour to reach a compromise fair to both.

17. Since the Company's draft contains the most elaborate provisions, we purport to make most of our recommendations on the basis of changes to that draft rather than to take the simpler draft of the Union and attempt to build on to it such particulars as to us seem fair from the Company's point of view. In so doing we have, as will be obvious, used the Union draft as a basis of comparison. Before examining detailed clauses, however, certain general observations on some of the points covered in the Company's draft as it affects the matters here in issue may be relevant particularly as some of them are interrelated with other parts of the proposed agreement and have an importance beyond that of Union officials' functions as such.

18. In the first place, the definition of Union officials' functions centres to a large extent around "grievances". In keeping with Company policy to define exhaustively officials' activities this leads the Company to define a

grievance and to exclude activities of Union officials unless related to that definition. Without considering here what we believe to be an undue limitation in the definition (a limitation which is carried over to grievance procedure and excludes, as we see it, the Union as such from either presenting a grievance of its own or making an individual grievance a matter of Union concern to be carried on by the Union concurrently with an individual or even after the individual is satisfied), it is our opinion that it is neither feasible nor practical to define a grievance. A grievance, after all, is a complaint. We should have imagined that it was in the interest of the Company to have all complaints of employees, groups of employees or the Union itself aired and discussed freely with the Company. To attempt to treat any complaint as if it did not exist is, in our opinion, to invite trouble. A complaint will remain a complaint either of one or more or all the employees until it has been dealt with openly as between the Company and its employees. To bottle it up, or to exclude a Union official from listening, perhaps soliciting, or not infrequently himself settling a complaint of any kind would in our opinion likely lead to far more friction and ultimate expense than to permit the utmost freedom to a bargaining agency in investigating and presenting any complaint of individuals, groups of individuals or the Union with regard to working conditions in its widest possible sense. It may be that certain specific matters should not be involved in grievance procedure. If so those specific matters should be enumerated. To confine grievances, however, as the Company has attempted to do, and to confine Union officials' activities to such a definition is, we believe, an impossibility since if there is any complaint of an employee, or group of employees organized or unorganized, a Union steward will undoubtedly concern himself with it. To attempt to check him by artificial limitations is either to invite breaches of the agreement or to sterilize Union activity. Neither should be an objective of a collective agreement.

19. Throughout the Company draft a distinction is made between "stewards" and "committeemen". The Union objected to the term "stewards" and wished to have the term "committeemen" substituted for "steward". As a mere matter of terminology there is no answer to the Union's claim to describe its officials as it chooses. There is, however, more involved. Both the Company and the Union agree that there should be one "steward" or "committeeman" allocated to each zone of the present unit on the basis of approximately one "steward" or "committee-

man" to each 114 employees. In the Union's view the "negotiating committee" should comprise all of the committeemen from the various zones with an international representative having the right to attend conferences between the Committee and Management. The Company wishes to have a smaller negotiating committee than the total of all "stewards"—hence the necessity for different names. If there were a great number of zones—as undoubtedly exist in the Company's "plant"—we can see the necessity for the differentiation. As there are only six zones in this unit we believe that the simplest method of operation would be to have the negotiating committee composed of the "committeemen" from each zone. This would save duplication of officials and prevent the necessity of elaborating the difference between "stewards" and "committeemen". We accordingly purport to use the phrase "committeeman" in place of "steward" throughout since we recommend that the Negotiating Committee be on the basis outlined by the Union.

20. We sympathize with the Company's endeavour to particularize those matters with which a Union committeeman should be concerned during working hours, and while we do not believe that a committeeman's duties can be as stereotyped and rigid as the Company proposes, we have endeavoured to reach a middle ground by which some particularity is given to a committeeman's duties without unduly limiting the proper work of the Union, and consequently a committeeman, in serving the interests of the employees in the broadest way. If the Union feels that it is being "cribbed, cabined and confined" the Company cannot expect helpful co-operation so much as a bursting of the seams. On the other hand a Union should be willing to regularize the routine of its officials as far as possible in the interest of Company discipline. The answer probably lies in particularization within limits plus the possibility of expanding the particularization. With these considerations in mind, we have approached the Company's clauses and our recommendations take the following form.

21. In place of clause 2 in the Company's final draft which provides that the Local may elect or appoint stewards who "shall function as such only in accordance with the provisions of this agreement" we suggest that the parties might agree on a clause somewhat in the following form:

Committeemen elected or appointed by the Union from among the employees, shall for the purpose of this agreement perform only such functions as are agreed upon in this agreement or as may from time to time be agreed upon between the personnel manager

and the negotiating committee (hereinafter provided for). The president of the Union shall notify the personnel manager of the Company in writing the name of each employee so elected or appointed as of the date of this agreement and shall likewise notify the personnel manager of the name of any employee subsequently elected in addition to or in substitution for such committeemen. Every such employee is hereinafter called a "committeeman". No employee shall perform any committeeman's duties as defined under this agreement until the personnel manager shall have received the appropriate notification above provided for.

22. Clause 3 of the Company's draft providing for six stewards for the six month period commencing on the date of the Agreement, which number shall be adjusted at the end of six months to a number not exceeding one steward to each 114 employees and a provision for allocation of stewards to zones, etc., is satisfactory to both sides provided the word "committeeman" is substituted wherever the word "steward" appears.

23. The Company's clause 4 provides that each steward shall be an employee with regular duties having not less than 12 months seniority and shall reside in Canada and be a British subject or a citizen of the United States of America. The Union objects to the latter part of this clause. In our opinion, if an employee, whatever be his nationality, is competent to work for the Company, and has worked for the Company for a period of one year, he is likewise competent to act on behalf of his fellow employees at their instigation and election. We therefore recommend the deletion of the words quoted above and in their place suggest that the Company's clause 4 should read as follows:

A committeeman shall be an employee having regular Company duties to perform and shall have not less than 12 months seniority as such.

24. Clause 5 of the Company's draft is that which purports to state definitely a steward's duties. The Company clause permits him to absent himself from his regular work to investigate a grievance as defined in the section and to receive from an employee a completed grievance or appeal form, which form, by later provisions, an employee is to obtain from a Company representative. The section further provides that a steward may notify the chairman of the negotiating committee of the name of an employee who has obtained a notice of appeal form from a Company representative. The clause also provides that a steward shall only perform these duties if an employee has, as provided elsewhere, notified his department head that he wishes to see the steward and the steward has been so informed.

25. The clause defines grievance as "any act or neglect of the Company as the employer

of an employee who, in connection with his working conditions, alleges that he has been directly and personally affected injuriously by such act or neglect and with respect to which such employee has obtained a grievance form" from a Company representative as provided for later in the Agreement.

26. It is this definition to which we had reference earlier when speaking of artificial limitations on a union official's activity. Clearly, to require that an official abstain from investigating a complaint because an employee has not obtained a grievance form is to ask the impossible as well as the undesirable. More important, however, is the emphasis which the clause places on the purely individual nature of a grievance by excluding the Union from itself carrying a grievance through the grievance procedure. This is a subject to which further reference will be made in connection with the clauses on grievance procedure. Suffice it to say here that we do not believe it to be in accord with collective bargaining, as we understand it, to exclude the group interest in an individual complaint or to exclude the group interest in a claim which an individual has but is unwilling to press. Furthermore, the insistence that the individual employee should obtain grievance forms from representatives of the Company rather than from, or at least to the exclusion of, Union committeemen, was quite frankly stated by the Company to have been dictated by a desire on its part to keep to a minimum grievances and to obviate what the Company felt were likely to be the presentation of grievances "manufactured" by the Union.

27. Frequent reference was made before this Board to what the Company referred to as unhappy experience in their "plant" with another local of this same international union in connection with "manufactured grievances". This Board has no knowledge of the situation in the plant other than the statements of the Company, which are clearly not evidence, and we do not believe that in a first agreement between this Local and the Company that the Board should accept as a premise that a bargaining agency is interested in presenting grievances without foundation. To commence collective bargaining relations in a spirit that one of the parties will take unfair advantage of its position, would be fatal to any possible success in collective bargaining. We are willing to assume in making our recommendations that both parties are interested in maintaining the best possible relations between employer and employee. To do so, we believe that the Company must be willing to afford the employees what the latter (and government policy as well) deems to be a better method of protecting employees' interests

than prevailed prior to the introduction of collective bargaining. It may be true, that the number of grievances presented will be in excess of those presented prior to a bargaining agency's appearance in the plant. We would be surprised if it were not so. This, however, cannot afford sufficient reason for this Board to agree to this and other provisions of the Company's draft designed to limit grievances by rendering Union assistance and participation unduly difficult or expensive.

28. As we indicated previously, we can see considerable merit in the Company's attempt to indicate the nature of the duties which a committeeman would ordinarily perform. We have been concerned with an endeavour not to treat such duties as settled for all time but to infuse as much flexibility into the agreement as seems to us consistent with orderly collective bargaining in this unit. Accordingly in place of clause 5 of the Company's final draft and of clause 10 of the Union draft we suggest that a clause somewhat along the following lines might be adopted by both parties.

The Company recognizes that a committeeman represents, on behalf of the Union, the employees in the zone to which he is allocated with respect to such matters as hours, wages, seniority, grievances and other working conditions or terms of employment; and the Company agrees that a committeeman may, upon compliance with the provisions of (sec. 6, Company draft as amended in this Report) absent himself from his regular Company duties for the purpose of dealing with any such matter on behalf of the employees, or on behalf of the Union in the interest of such employees within the zone to which he is allocated. For greater clarification the purposes for which a committeeman may so absent himself from his regular Company duties are as follows: (a) the investigation and preparation of employees' grievances and appeals on grievances and the submission of written grievances to a department head or the communication of a notice of appeal of a grievance to the Chairman of the Negotiating Committee; (b) the delivery to an employee of the decision of a department head on a grievance; (c) the inspection of the seniority list of any department in the zone to which he is hereby allocated to the extent reasonably necessary for him to ascertain the seniority status of any employee employed therein; (d) consultation with the Chairman of the Negotiating Committee on matters pertaining to hours, wages, seniority, grievances, and other working conditions or terms of employment of the employees within the zone to which he is allocated; (e) attendance at a hearing before an umpire or a conference, between the negotiating committee and the personnel manager or other representatives of the Company under clause (grievance, and that recommended below in para. 39);

Subject to the provisions of section (see clause recommended in substitution for Company draft clause 9, re Chairman of Negotiating Committee—*infra* paragraph 40), a committeeman shall not absent himself from

his regular Company duties for any purpose other than those specifically enumerated in clauses (a) to (d) unless such purpose has been agreed upon between the personnel manager and the negotiating committee as one concerning hours, wages, seniority, grievances or other working conditions, or terms of employment of employees within the zone, and failure of the personnel manager and negotiating committee to agree shall be deemed a question of interpretation of this agreement within the meaning of clause (13 of Company's draft).

29. Clause 6 of the Company's draft deals in detail with the procedure to be adopted by "stewards"—to be changed to "committeemen"—when absent from their regular Company duties. Some of these provisions may require slight change to accord with the view we take that a steward and committeeman should, in this unit, be the same person. This may also lead to a simplification of other sections. In the main, provisions in the Company's draft are concerned with the time to be taken from an employee's regular duties, the carrying of a "clock card" to record the time so spent etc. By paragraph (h) of the Company clause it was provided that a steward "shall not absent himself from his regular Company duties for more than the 30 minutes immediately preceding his regular lunch period and the 30 minutes immediately preceding the regular time at which his shift ends". The Union felt that this rigid limitation in half-hour periods was not sufficient to allow a steward an opportunity of properly carrying out his work. The Union requested a clause leaving the time to "such . . . as is necessary to attend to the business of administering this agreement", subject to a maximum absence of two hours per working day and a further limitation of three hours in any two consecutive working days in one week. (Cl. 10, Union draft.)

30. The Company's limitations on time and the provisions for carrying clock cards etc., cannot be divorced from the Company's further insistence that Union officials shall not be paid while absent from their regular Company duties (clause 10, Company draft.) A severe limitation in point of time plus the deprivation of pay is a little difficult to understand. One might think that if an employee were to be deprived of pay while servicing grievances etc., it was no concern of the Company how long he took from his regular duties. On the other hand if an employee is to be limited in time it might seem that a Company had done sufficient to discourage what it feared would be the "promotion" or "manufacture" of grievances. The two taken in combination do seem to us to be unduly severe.

31. As we have already stated, we are not prepared to assume that a bargaining agency which has not as yet had an opportunity of functioning in this unit is so likely to waste time in promoting frivolous grievances as to warrant a Company adopting the most rigorous methods to limit its activities. At the same time, we can see no objection to the stewards (committeemen) carrying clock cards and otherwise checking their time as provided in the Company's clause 6, since these records will help to prove or disprove any allegations of wasted time or to show that the time allocated has not been sufficient. At the hearing we suggested to the parties that while the two broken half hour periods per day did not seem to be wholly satisfactory, since an official might find his work unnecessarily interrupted, we felt that as the Union was here negotiating for time without previous experience in this unit, it should be prepared to accept a limitation of one hour per day to be taken as the occasion demanded. We therefore recommend that in place of paragraph (h) of clause 6 of the Company's draft a clause somewhat similar to the following be accepted by both parties:

He shall not, save for the purpose of attending conferences between the negotiating committee and the personnel manager or attending before an umpire, absent himself from his regular duties for more than one hour in any one working day, provided that such time may, by agreement between the negotiating committee and the personnel manager, be extended or varied to meet the circumstances of any individual case.

32. We would also recommend that paragraph (d) of clause 6 of the Company draft be changed to read,

Immediately upon completion of his duties he shall record the time on such clock card and deliver it to the supervisor from whom he obtained it.

33. With these changes, together with the substitution of "committeeman" for "steward" wherever it appears, we believe that the Company clause 6 should be accepted by both parties.

34. Clause 7 of the Company's draft provides that a steward is, upon application to a department head, to be advised of the names of employees who have informed the department head that they desire the steward or, in the case of appeals on grievances, the Chairman of the Negotiating Committee informed. This clause is related to part of the Company's clause 5 which purported to limit a steward's duties by confining him to employees who had so advised the department head and requested a steward to act on his behalf. It is also related to clause 9 (a) of the Company draft, which defines the duties of the Chairman of the negotiating

committee in investigating a grievance appeal by an employee who has notified the department head of his desire to have the chairman informed. Both of these provisions are likewise related to clause 11 (b) of the Company's draft, which provides, in addition to an employee notifying the department head of his desire for a steward or the chairman to be notified, that the employee must also obtain a grievance form or an appeal form from the department head and, if he so desires, request the department head to inform the steward or Chairman of the Negotiating Committee of such form having been obtained.

35. The Union objects to this interposition of management between the employee and the Union officials, on the ground that it is directed to the stifling of Union activity in connection with grievances, and is also an indication of the company's insistence on dealing with the individual directly and only permitting the Union to come in as a kind of "fifth wheel". Taken in conjunction with other provisions as to no pay for stewards, and limitations of stewards' time these provisions indicate quite clearly the Company's fear of "manufactured" grievances, and as a consequence they are all directed to reducing to a minimum Union participation in grievances save under stringent Company regulation. We have already indicated our view in this regard, when dealing with time restrictions, and in our recommendation in place of clause 5 of the Company draft, (See *supra*, paras. 25-28). We believe that for a Company to insist on interposing itself between Union and employee at every turn is so opposed to the basic principle of collective bargaining, in which the Union represents the employees' interests in dealing with management, as to nullify the very advantages which a union acting for the employees in their dealing with an employer is designed to obtain. For this reason we are likewise opposed to the Company's representatives having sole control of grievance and appeal forms.

36. While we are opposed, therefore, to an employee *only* seeing a steward when he so advises his department head, we can see that there is considerable advantage in having an employee contact his steward (committeeman) through his department head if he chooses. From both the Union and the employees' standpoint this may in most cases be the most efficient method of making a desired contact. For this reason, therefore, we recommend that something similar to clause 7 of the Company's draft be retained (deleting the phrase "during the 30-minute periods referred to in clause (h) of section 6"). In view of the fact that we are recommending the dele-

tion of compulsory Company intervention in other parts of the agreement, clause 7 will then not be understood as a condition precedent to committeemen's functions in connection with grievances.

37. By clause 8 of the Company's draft, provision is made for a negotiating committee of five, including four employee members and a representative of the International Union. In view of our recommendation that in this unit, where there is a maximum of six zones, each having a committeeman, the negotiating committee should consist of these committeemen (*supra*, para. 19) the present section can be simplified. We have already provided for the absence of committeemen from regular work for the purpose of attending conferences with management in our recommendation in place of Company clause 5. Qualifications of committeemen are previously covered. We believe that instead of making the international representative a member of the negotiating committee a separate clause should give the Union the right to have such accredited representative of the International Union as the International may from time to time designate, present at any conference between the negotiating committee and management.

38. If the clause recognizing a negotiating committee states, as we think it should, that it is for the purpose of attending conferences with management, then we believe that there should follow a clause stating when conferences will be held; the method of convening them and any relevant procedure. As special provisions are made for a conference on grievance appeals, this general clause, (which in effect is in substitution for clause 30 of the Company draft) should be subject to those special provisions.

39. In light of the foregoing we recommend that, in place of Union draft clause 13, and Company clauses 8 and 30, clauses somewhat in the following form be adopted:

The Company recognizes a negotiating committee, for the purpose of attending conferences with the personnel manager or other representative of the Company, which shall consist of the committeemen elected or appointed for the time being, and whose election is notified to the personnel manager as provided in clause (2). One member of such committee shall be designated as chairman by the Union and the president thereof shall notify the personnel manager of the name of the person so designated.

Subject to the provisions of clause—(grievance procedure) conferences between the personnel manager or other representatives of the Company and the negotiating committee shall be held when mutually agreed upon or at the written request of either party on three clear days' notice and in any case if an agenda has been supplied at least once

in every two weeks. Matters to be considered at any such conference shall be recorded upon an agenda to be supplied by the party requesting the conference to the other party at least one regular working day prior to the day for which the conference is requested. Such agenda if supplied by the Union shall be signed by the Chairman of the Negotiating Committee and delivered to the office of the personnel manager and if supplied by the Company shall be signed by the personnel manager and delivered to the office of the Union.

No conference of the negotiating committee with the personnel manager or other representatives of the Company shall be held unless at least a majority of the members thereof are present thereat, and any action taken or decisions reached at any such conference shall bind both the Union and the Company.

At any conference between the negotiating committee and the personnel manager or other representatives of the Company, the Union has the right to have present such an accredited representative of International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) as the International Union may from time to time designate. The president of the Union shall notify the personnel manager from time to time in writing of the name of such accredited representative.

40. The Company's draft clause 9, in keeping with its policy of definitive description of the occasions on which a Union employee can absent himself from regular Company duties, contained an enumeration of the Chairman of the Negotiating Committee's functions. As such chairman is also a committeeman, whose functions have already been defined, and as the grievance procedure we are recommending has been modified in many respects, Company clause 9 will need some modification. We believe that a clause somewhat as follows should be accepted by both parties:

The Chairman of the Negotiating Committee, upon compliance with the provisions of clauses (b) to (g) inclusive of section 6 (See Company draft clause 6 as modified herein) may absent himself from his regular Company duties for the following purposes in addition to those specifically provided for committeemen in sec.—(see recommendation in substitution for Company clause 5, *supra*, para. 28) namely:

- (a) to consult with another committeeman on matters pertaining to such committeeman's duties;
- (b) to inspect the master seniority record in the Personnel Department of the Company to the extent reasonably necessary for him to ascertain the seniority status of any employee;
- (c) to deliver to an employee the decision of the personnel manager and/or of an umpire, selected as provided herein, on an appeal;
- (d) to lodge notice of appeal forms with the personnel manager as provided in clauses (d) and (e) of section 11 (Company draft as modified);

- (e) to submit special grievances to the personnel manager as provided in clauses (a) and (b) of section 12 (Company draft);
- (f) to deliver agenda to the office of the personnel manager as provided in clause (d) of section 11 (Company draft), and section—(see recommendation in place of clause 30 Company draft, *supra*, para. 39);
- (g) such other purposes as, in accordance with the provisions of sec.—(see recommendations in substitution for Company clause 5, *supra*, para. 28) may be agreed upon between the personnel manager and the negotiating committee.

In addition to the time during which, as a committeeman, the chairman is entitled to absent himself from regular Company duties under clause 6 (h) (as recommended *supra*, para. 31), the chairman shall be entitled to another hour per day if he deems it necessary, for the purposes of performing his duties as Chairman of the Negotiating Committee.

4. PAYMENT OF UNION OFFICIALS

41. One of the most difficult issues presented to this Board, and one which has given it the greatest concern, is the Company's insistence on the provision found in clause 10 of the Company draft to the effect that Union officials "shall not be paid by the Company while absent from their respective Company duties". The Company admitted that in the majority of cases where collective bargaining prevailed in this country and the United States it was probably true to state that the Company did pay Union officials for time spent in investigating grievances, attending conferences, etc. The limited experience of members of this Board with collective agreements confirm this view, although sometimes agreements provide that if the stewards etc., use an unreasonable period of time the Company may refuse to pay for such excess. There may be other variations, but we know of no actual situation where all payment for time away from regular duties is denied by the Company. This is not to say that the majority practice is necessarily the one which should be recommended in all cases.

42. The Company based the issue on general principle, contending that as Union officials were doing the Union's business, the latter ought to bear the expense incidental to that business and the Company should not be called upon to pay what were in essence "advocate's fees" for their employees. On the surface this view is appealing if it is possible to assume that you can separate completely the "Union's business" in a given concern from the "employee's business". The Company throughout the discussions did make this distinction, and in one connection stated, with reference to Union officials, that "no man can serve two masters".

43. While in one sense it is true that a bargaining agency exists to promote the interests of the employees which may, from one point of view be deemed in opposition to those of the employer, we do not believe it is sound or desirable completely to separate the component parts of one industry. Certainly the employees themselves must be considered as part of a given enterprise. The introduction of a bargaining agency merely adds a third party to the whole. While it may have been added primarily in the interest of the employers, it was also added and should be accepted as the link between individual employees and management making for better industrial relations, in the one business on which both employee and employer are ultimately dependent. It is no doubt true, as the Company pointed out, that the introduction of a bargaining agency results in increased costs to the employer. For a company willingly to accept the costs of maintaining good industrial relations in the absence of a bargaining agency and to throw back on the employees—for it is they on whom the burden will fall—part of the increased costs under collective bargaining might lend colour to the Union's contention that this was but another method of combating collective bargaining itself.

44. Accepting the declared policy in favour of collective bargaining as a means of settling differences between employers and employees "by peaceful means", the question of bearing the cost of obtaining industrial peace cannot be viewed solely as one between a Union on the one hand, and an employer on the other. If the Union were to be made to bear the burden of time spent in the settlement of grievances by employees who were Union officials, this cost could only be borne ultimately by the employees themselves. On the other hand, if it is borne (like workmen's compensation), by the Company, it will become another item in the ordinary costs of production recoverable ultimately from the community at large. In other words, the Union cannot pass this charge on to anyone save the employees. The Company can, and does pass it on. The question is, therefore, whether industrial peace, which is the purpose behind collective bargaining, is of sufficient public importance to warrant the spreading of this cost to the public. This is a matter on which opinions may differ, but we believe that the trend of legislative policy furnishes strong ground for believing that it is. Further, granted a more or less common practice in this regard, to exempt one employer from costs assumed by others in the same industry would, in reality, be an undue preference in costs of

production to the one so exempted. In the absence of some countervailing reason we are not prepared to make a recommendation on this basis.

45. We prefer to avoid basing our recommendations on the answer to these broad questions of principle. We are willing to accept what has become common practice, unless some reason is shown on the facts of this case to make such practice unfair in this instance. We readily admit that there may be valid reasons where we would recommend a denial of pay to Union officials. Such a case might arise where Union officials had consistently wasted Company time on frivolous or non-essential matters. In the present case the Union has had no experience in this unit whatever, and while the Company referred to its experience in the "plant" with another local of the same International, we have no evidence on the situation there, nor is it, we believe, relevant to the matters before us. As we have repeated so often, we are not prepared to assume that a Union commencing bargaining relations is doing so with the object of wasting Company time. Not only that, but in this case the Company has placed rigid limits on the time that can be spent by committeemen in investigating grievances etc. It may be that this limitation will prove either too narrow or too liberal. That will be a matter of adjustment when the agreement is renegotiated. Having placed these limits, however, we believe that so long as the officials stay within them they are entitled to be paid for services performed just as much in the interests of employer and employees alike as those of a personnel manager.

46. Leaving aside questions of principle, another factor which weighs heavily with us, is that in this instance we are dealing with a unit of office employees all of whom, we believe, are paid on a weekly or monthly basis. The Union pointed out that most of the employees in this unit had such special experience and skill in the work allotted to them that any time spent away from their work was usually made up by them in the evenings or after hours, since their work accumulated in their absence. If this be so there would seem to be little justification for the Company's claim to deduct a proportionate amount of wages for time spent in "Union business", unless the discouraging of Union activity in connection with grievances can be called a justification. Without suggesting that the issue of pay or no pay should be treated differently in the case of piece work rates, the factual situation in such case would seem to be quite different from that before us. In

view of this factor alone we cannot recommend that the Company's clause be adopted in this plant. Even if there be merit in making a Union bear some part of the cost of servicing grievances etc., we understand the argument to be confined to unions well past the organizational stage in a given unit. As we had occasion to remark in recommending against union security provisions in this case, it can scarcely be said that this Union in the present unit is so fully supported by the employees as to merit being described as well past the organizational stage. This is another reason why we cannot recommend the Company clause in the present case.

47. Taking into account the limitations of time placed on committeemen in this agreement, we believe that such committeemen should be entitled to be paid by the Company only so long as they keep within those limits. We accordingly recommend that in place of Clause 10 of the Company draft and Clause 12 of the Union draft, a clause somewhat as follows be accepted:

Committeemen while attending a conference between the negotiating committee and the personnel manager or other representatives of the Company, or attending before an umpire appointed pursuant to the provisions of this agreement, or during any other time they are absent from their regular Company duties in conformity with the provisions of this agreement shall be paid by the Company at their regular rate of pay. (N.B. if all employees in this unit are on weekly or monthly pay this last clause may read "shall not suffer any deduction from their regular pay".

5. GRIEVANCE PROCEDURE—ARBITRATION

48. The ordinary grievance procedure in the Union's draft, (cl. 14-16) and the Company's draft (cl. 11) is alike in that both contemplate three stages only: (1) the submission of a written grievance to a department head; (2) an appeal in writing to the personnel manager; (3) an appeal to an arbitrator. There are, however, important differences in procedure.

49. In the Union's draft, the Union only, at all stages, has the carriage of the grievance. The employee presents the grievance through a committeeman, and if the decision is unsatisfactory to the committeeman, an appeal is taken through the negotiating committee. In the Company's draft, however, the emphasis is not so much on the Union as on the individual. We have already commented on some of the Company provisions in another connection. A brief statement of the salient points, on which there is disagreement, will indicate the differences. In the Company's procedure, (1) a grievance was, as we saw, defined in clause 5, as an individual matter

between employer and employee; (2) the Company requires that an employee must obtain a grievance form or an appeal form from his department head, and shall, if he wishes a Union official informed, so advise the department head; (3) the individual employee may submit a grievance to his department head either directly or through a Union steward (committeeman) and if directly, the Union is not advised of the decision (clause 11 (c)); (4) if the decision is unsatisfactory to the employee, the latter may appeal, again either directly or through the negotiating committee, to the personnel manager; no right of appeal is given the Union, and if the employee appeals directly there is no Union participation or knowledge of the decision (cl. 11 (d)); (5) if the decision is unsatisfactory to the employee an appeal lies to an umpire.

50. The question of interposing a representative of the Company between an employee and the Union committeeman by compelling the employee to obtain a grievance form from the department head, we have already commented on (*supra*, para. 35). We cannot agree with the principle. We believe that an employee should be able to get such forms from either the Union committeeman or the department head as he wishes.

51. Outside of this, however, we believe that the Union's claims for entire control of grievance procedure, and the Company's provisions, in which an individual and the Company may so ignore the Union, that the latter may not even be informed of decisions vital to the employees as a whole, are not entirely satisfactory. In order to bring the parties together, we believe that a grievance procedure should recognize the right of both an individual employee and the Union to participate in the settlement of grievance. The principles which we believe should govern the respective rights of Union and individual employee in grievance procedure were fully dealt with by a unanimous Board in a dispute concerning *Steel Company of Canada (Hamilton and Ontario Works)* (45 Lab. Gaz. 55 at pp. 59-60). With these principles we agree, and recommend that the grievance procedure in the present instance be brought into accord with such principles.

52. For the purpose of clarity we might restate these principles in concise form:

(1) An individual employee or group of employees should be entitled to present a grievance directly on its or their own behalf and, if discussion is permissible under the grievance procedure, should be entitled personally to attend and discuss the grievance.

(2) As the disposition of every grievance may be of concern to the body of employees as a whole, the Union is entitled to be advised of all decisions and, where discussion is permissible, to attend and negotiate at the disposition of a grievance.

(3) If a grievance is not settled to the satisfaction of all three parties—the individual employee or group of employees, the Union, and the employer—the dissatisfied party may carry the grievance on until the grievance procedure is exhausted. This follows from a recognition that the disposition of any individual grievance may be of concern to the group interest represented by the Union.

(4) If the Union refuses to participate in the settlement of a grievance, the grievance may be settled without its consent and unless such settlement is inconsistent with or contrary to the terms of the collective agreement the Union should be bound by such settlement.

53. In relation to the three stages of grievance procedure contemplated by both the Union and Company drafts in the present case, these principles when here applied should lead to the following results:

(1) Since grievances are the complaint of an individual employee or group of employees, in the first stage of written complaint to the department head, there being no oral representation, we believe the individual employee should be entitled to submit his grievance either directly or through the committeeman of his zone at his option. In order to prevent any possible suspicion of unfair dealing with an employee who goes direct, without Union intervention, and to recognize the possibility of group interest in all grievances, we believe that the department head, in rendering his decision to an employee who goes directly should also give a copy of such decision to the employee's committeeman. These provisions would be in substitution for the procedural provisions of clause 11 (c) of the Company draft.

(2) If such decision is unsatisfactory either to the employee or employees concerned, or to the committeeman of such employee's zone, either may lodge a notice of appeal. In the case of the Union lodging an appeal it goes on the agenda of the negotiating committee. We believe that notice of a direct appeal by an employee to the personnel manager should be given by the personnel manager to the chairman of the negotiating committee. Unless the chairman informs the personnel manager in writing that the Union does not intend to participate in the appeal such appeal together with all appeals lodged through the chairman of the negotiating committee should

be placed on the agenda for consideration at the conference next following between the personnel manager and the negotiating committee. At such conference, in the case of an appeal lodged directly by an employee, such employee should be entitled to attend the conference and make such representations on his own behalf as he sees fit. Provisions incorporating this principle would be in substitution for clause 11(d) of the Company draft. Other provisions in that clause concerning the holding of conferences are satisfactory. The decision of the Company on any appeal placed on the agenda would be given to the chairman of the negotiating committee as provided in the clause.

(3) If the negotiating committee is dissatisfied with the decision on any grievance considered at a conference, the chairman of the negotiating committee may lodge a notice of appeal to an umpire within four days. In the case of an employee or group of employees whose grievance has not been discussed at a conference between the negotiating committee and the personnel manager or in the case of an employee or group of employees whose grievance the negotiating committee, upon request made to a member of such committee, has refused to appeal, such employee or group of employees may lodge a notice of appeal to an umpire directly with the personnel manager. These provisions are in substitution for part of clause 11 (e) of the Company draft.

54. So far as the three steps in the grievance procedure are concerned we have outlined the principles which we believe should be adopted and we have given the above illustrations of changes in the steps set out in clause 11(c)-(e) as a possible method of carrying these principles into effect. We do not put forward suggested clauses in this connection since the same results can be achieved in different ways (see the Conciliation Board report in the Steel Company of Canada Ltd., already referred to, and see the form of agreement recommended by another unanimous Board in the as yet unreported report in re Canadian Westinghouse Company Limited (Hamilton)) and we believe that if the parties agree on the principles involved they should have no difficulty in arriving at the wording of clauses. We accordingly recommend the adoption of the principles outlined.

55. Outside the three steps in procedure outlined there are other points in dispute. The Union objected to Company clause 11(a) which provides that no grievance shall be considered which usurps any function of management. As "functions of management" are nowhere defined, if the Company has the right

to refuse to consider any grievance which it states "usurps the function of management" it is evident that the consideration of what is and what is not such a function must remain completely within the Company's discretion and could not even be considered by an arbitrator. Other clauses of this agreement deal with the Company's power of disciplining, of transferring employees and making rules etc. If the Company wishes to make an enumeration of other specific matters which it wishes to exempt from grievance procedure we believe it should have that opportunity. We do not consider, however, that this is really practical.

56. Undoubtedly an arbitrator or umpire must consider whether any claim infringes matters which are either expressly reserved to Company discretion or are customarily reserved by business practice. We cannot imagine that the right to have a grievance considered or arbitrated will involve a transfer of Company management to an umpire. With the express reservations in this agreement on other matters we believe that while it may be an answer to a grievance that it "usurps a function of management" that answer should itself be subject to the regular grievance procedure. For this reason, therefore, we would recommend the omission of clause 11(a) of the Company draft.

57. With regard to clause 11(b) of the Company draft, dealing with obtaining forms for submission of grievances and appeals etc., we have already expressed our view, and therefore we recommend that a clause somewhat as follows be adopted in place of that clause:

An employee may obtain a grievance form or a notice of appeal form, to be supplied by the Company, either from his division head, assistant department head or his department head or from the committeeman allocated to his zone. A grievance or an appeal respecting a grievance shall be considered by the Company only if submitted or lodged in writing on the appropriate form signed, in the case of a grievance, by the employee concerned, and in the case of a notice of appeal, by the employee or the Union committeeman of the zone in which the employee concerned is employed.

58. One small matter in connection with clause 11(c) of the Company's draft has not been referred to. The Company clause gives the Company the right to refuse to consider any grievance the circumstances of which originated or occurred more than five days before its submission; it is also optional with the Company to decline to make a decision retroactive to a date more than five days before submission. The Union did not object to the clause but, this being a new agreement, requested that this period should not

become operative for thirty days after the signing of the agreement. As the Union has not yet the right to participate in grievances there is merit in this suggestion. The Union, is, however, familiar with existing conditions and we believe that the proviso to clause 11(c) would be quite fair to both sides if it read in the following recommended form:

provided, after the expiration of ten days from the signing of this agreement, it shall be optional etc.

59. This leaves for consideration the question of arbitration of grievances. The Union draft clause 16 provides that the decision of an umpire shall be "final and binding on both parties". The Company clause 11(e) provides that "neither party. . . need be bound by the decision of the umpire".

60. If grievance procedure looks to the ultimate solution and satisfaction of grievances, we can see no point in providing for arbitration which, in effect, may be rejected by either party who loses the decision. It might, indeed, be better to have no arbitration at all since in that event, the parties are at least saved the incidental expense, to say nothing of the expectations of settlement which an arbitration would naturally create. We have considered the possibility of a clause by which the parties in advance of arbitration "may, but need not, elect to be bound by a decision of the umpire." Such a clause is a slight, but very slight, improvement over the present clause and would likely lead in practice to a virtual repeal of the arbitration provision. To be effective as a real step in grievance procedure we believe that the decision of an umpire should be final and binding. We, therefore, recommend that a clause be inserted in the agreement to this effect.

61. Clause 12 of the Company draft dealing with grievances concerning improper discharge, suspension or lay off needs only to be modified to accord with the recommendations made concerning the ordinary grievance procedure. Thus in connection with paragraph (a) of clause 12 we recommend a clause somewhat as follows:

A special grievance form, to be supplied by the Company, may be obtained from the personnel manager or a Union committeeman by any employee or former employee who considers that he has been improperly discharged, improperly suspended for six days or more, or improperly laid off.

62. To carry out the same principles of clause 11, we recommend that paragraph (b) of clause 12 be modified to provide that the employee can submit the special grievance form directly or through the chairman of the negotiating committee to whom the grievance has been communicated by the committeeman

allocated to the employee's zone. The decision of the personnel manager will be given in writing to the person submitting the grievance, provided that if it is submitted directly by an employee the chairman of the negotiating committee shall also be given a copy of the decision. If the decision is unsatisfactory to the employee or the Union, the employee or the chairman of the negotiating committee can appeal to an umpire as in clause 11. In this case, even more so than in clause 11, we believe and recommend that the decision of the umpire shall be final and binding on both parties.

63. Clause 13 of the Company's draft was agreed to between the parties as satisfactory.

64. The Union objected to the sweeping restriction placed by clause 14 of the Company draft on an umpire, who was deprived of jurisdiction to vary, reduce or set aside any penalty imposed on an employee, or to substitute a different penalty for one so imposed by a Company for a breach of discipline or infraction of the Company's rules. We believe, however, that if the Company has communicated to its employees to what form of penalty or discipline they are liable, for specific offences, or specific breaches of discipline, so that the employee knows at the time of acting to what disciplinary action he is liable, the Company should have the right, subject to grievance procedure on whether a breach has occurred, to determine the form or quantum of disciplinary action within the published limitations. Furthermore, if the Union believes that the punishments prescribed generally for breaches of rules, etc., are too severe, these matters of rules and regulations may be placed on the agenda of a conference with management.

65. We therefore recommend that the Company clause be adopted but that it contain a proviso after the word "employee" in the sixth line, somewhat as follows:

provided that such penalty is prescribed by and imposed pursuant to rules and regulations of the Company posted or otherwise communicated to the employees as provided in s. (37 of Company draft as recommended for revision below) etc.

6. SENIORITY

66. Both parties agreed on clause 15(a) of the Company draft, filed with the Board on May 11th, which is similar to Union clause 19. By clause 15(b) the Company purported to give seniority to any employee who was attested for or served overseas or in the merchant marine of any of the United Nations, on his reinstatement by the Company within 90

days of discharge, dated back to September 10, 1939, if that date was prior to the seniority date based on actual length of employment under clause 15(a). This provision also gave the same seniority to a returned man who at the time of his attestation or dispatch for overseas service was a probationary employee. This clause, which goes beyond the requirements of the Reinstatement in Civil Employment Act 1942, along with Company clause 16(b), to be presently discussed, represents a commendable effort on the part of the Company to make some compensation or reward to the men who were subject to enemy fire during the present war.

67. While the Union felt compelled to object to the Company draft, such objection was in no way prompted by, nor can it possibly be considered as an indication of, less concern over the future of the returned man. The Company made no claim to a monopoly of patriotism. In matters of this kind, however, one must be careful that the desire on everyone's part to do all that can possibly be done for the returned men does not lead to a course of action which might create bitter feelings where none should exist. With the principle of giving the returned soldier credit in seniority rating for the time spent in military service no one can have the slightest objection. The present provision, however, gives a returned man a preferential seniority over any employee hired after September 10, 1939, regardless of the length of service of either the returned man or the other employee. Thus, to take an extreme case, one person who may have attempted to enlist for overseas service and been rejected, might have been hired in October 1939 and have remained in the Company's employment ever since. Another person may have been in the Company's employ for a few weeks only in 1944. He might have been drafted and dispatched overseas. On his return and reemployment by the Company such employee would obtain seniority over the other man and, in the event of a lay-off would be retained in employment. Bearing in mind, as we must, that those persons who remained in employment during the war years would either be of advanced age, married, physically unfit for active service, or as necessary to the war effort in their present positions as those in the army, we do not believe that the Company's solution is one which we can recommend or is one which the returned men themselves would, in fairness, ask. It is not a question of adequate reward to the returned man. No reward in his case is too great. But a reward bought at the price of another's job who was, for one reason or another, compelled

to assume the more unheroic role, is too great a sacrifice to demand from the latter.

68. Moreover, in the present unit, of 245 employees now serving in the Armed Forces, we were informed by the Company that some 140 were in the Company's employ prior to the end of 1940 and of these 71 were hired before the end of 1939. The 71 would undoubtedly have their seniority if time on Active Service accumulated to them and the other 70 would have theirs up to 1940. Of the rest, an additional 70 were in the Company's employ prior to the end of 1941. Thus there is a comparatively small number who would receive the preferential treatment this clause envisages. We cannot believe that the injustice the clause might work in a few cases warrants us in departing from the principle enunciated in the Act referred to. Further, we do not believe for the purpose of this clause that there should be any differentiation between members of the Armed Forces on the basis either of types of overseas service or overseas service as opposed to other kinds of service. We therefore recommend that in place of clause 15(b) of the Company draft of May 11 a clause somewhat similar to the following be substituted therefor:

The seniority of former employees, including probationary employees, who left their employment with the purpose of, and have been since serving in the Armed Forces or the Merchant Marine of any of the United Nations, shall, upon reinstatement in the employ of the Company within 90 days of discharge from such service, date from the date upon which he was last hired by the Company or to the date six calendar months prior to the date upon which he completed 180 days intermittent employment as the same is defined in section 15 (a).

69. Company clause 16 in the draft of May 11, contained two paragraphs. The first dealt with probationary employees and provided that they had no seniority rights and that their employment could be terminated at any time without the availability of grievance procedure. The Company admitted that its chief concern with regard to this latter provision was to avoid the possibility of having a miniature seniority list among the probationary employees. The Union's only objection to the clause as it stood was to the unlimited discretion given the Company which might unless guarded against, leave a discriminatory termination of employment without redress. The Company certainly did not intend that this should be the effect of the clause. To meet both parties' understanding we recommend that after the word "grievance" in the second last line of clause 16 (a), something like the following be substituted:

other than a claim of discrimination in connection with a lay-off or discharge, or a grievance concerning working conditions.

70. Company clause 16 (b) was the other provision by which the Company attempted to deal with the problem of the returned man. By this clause the Company provided that a man, even though not formerly an employee, who had been attested or dispatched for overseas service and who was hired by the Company within 90 days of discharge should "for the purpose of determining his seniority date" be allowed credit for the number of days of such service provided he was, for a year before being attested or dispatched for overseas service, a resident of the County of Essex. While this provision goes beyond the Reinstatement Act, we think that the only real difficulty to its acceptance by the Union lies in an obscurity of wording and a failure to make clear its exact object.

71. The Union was opposed to the idea that a man who had not been an employee of the Company at any time could be hired so as to displace an existing employee. The Union was, however, not opposed to a returned man, not a former employee, obtaining a seniority rating as provided by the clause, *after* his hiring. We are not sure that the clause contemplates the possible displacement of an existing employee. Certainly that might be the case where a former employee returns and is reinstated by the Company pursuant to its legal obligation in that behalf. As there is an obligation to take back a former employee under clause 15 (b) the only concern of the parties is, as that clause provides, to assure him his seniority standing "upon reinstatement". In the present case, the question when the returned man may be hired is of importance. We do not think it right merely to give the returned man in question here seniority *after* hiring in accordance with his military service. In the event of there being a lay-off of any considerable number at the time he applies, if at that time he has no seniority he would never stand a chance of being hired. We believe that he should be conceded a seniority rating for the purpose of being hired in relation to other employees who have been laid off, in accordance with his time in military service. Thus if he applies for a position, he should not be able to displace an existing employee who is not laid off. If there is an opportunity for taking on new employees, no difficulty arises in his case. If there are employees laid off, this returned man should be entitled to be hired in priority to those having less seniority rating than his time spent on military service. So understood we think the Company clause should be accepted as a real effort on its part to assist in the solution of a difficult problem. We therefore recommend that the

Company clause 16 (b) be clarified to accord with this understanding, somewhat as follows:

A person not being a former employee or probationary employee, who was attested in the Armed Forces of any of the United Nations for overseas service during the present war, or was dispatched overseas pursuant to P.C. 8891, dated November 23, 1944, or served in the Merchant Marine on any vessel under the registry of any of the United Nations during the said war, and who presents himself for employment within 90 days of discharge shall, in relation to other employees who have been laid off, be eligible for employment as if he were himself a former employee with seniority equal to the number of days spent in such service and in any case, after his employment by the Company, he shall for the purpose of determining his seniority date be allowed credit for a number of days equal to the number of days of such service, provided etc....

72. Company clause 17 deals with the posting of seniority lists and their finality within a given period of time after posting. By agreement between the parties, for the "ten" days referred to throughout, the word "fifteen" is now to be substituted. In order to carry out the understanding of the parties expressed at the hearing, and since the present proviso in the clause is not necessary in view of the finality we have recommended in connection with grievance procedure, we recommend the following proviso in place of that which the clause now contains:

provided that any inaccuracy in a posting, although deemed to have been accepted in accordance with this section, may be corrected on a subsequent posting within 15 days of such posting or as a result of a grievance submitted within that 15 day period.

73. The parties are agreed on clause 18 of the Company draft which corresponds to clause 30 of the Union draft.

74. The Company provisions with regard to lay-offs, being clauses 19, 20, 21 (b), are much more elaborate than those of the Union. A distinction is made between a lay-off and a "temporary lay-off". In the latter no seniority is to be invoked at all. Such a lay-off is defined in clause 19 as "a reduction in the number of employees working due to the temporary discontinuance by the Company of the performance of any work or to a temporary reduction of the volume of work to be performed." There is no provision as to who is to determine the distinction between a lay-off and a "temporary lay-off". That there may be some occasions where there is such an obvious guarantee that all persons laid off will be very shortly recalled to work, so that seniority provisions can be totally disregarded is a possibility. As all lay-offs look to the ultimate recall of employees, such an occasion, we believe, should be a matter of agreement between the Company and the

Union, and the term "temporary lay-off" in that event merely means a lay-off in which it is agreed that seniority provisions are not to apply. We think that it might be simpler so to stipulate, but as the Company draft refers in different places to a temporary lay-off we are willing to leave the term provided it is defined as we have indicated. The Union further complained that there was no statement that the Company would observe seniority rights in lay-offs. The Company stated that it did not wish to be so confined. As a working compromise, which we believe gives effect to the different points of view of both parties and with a view to clarifying the situation on which the parties are not really apart in substance, we recommend that in place of Company clauses 19, 20 and 21 (b) clauses somewhat in the following form be adopted:

In the event of a lay-off of employees other than a temporary lay-off (as herein defined) the Company agrees that in situations where employees have approximately equal merit, ability or efficiency seniority shall be given preference and in such case employees shall be laid off in the order in which they hold the least amount of seniority.

In the event of a lay-off of employees, other than a temporary lay-off, the matter will be discussed by representatives of the Company with the negotiating committee prior to such lay-off, and if and to the extent that the Company intends to depart from an inverse order of seniority in individual cases it shall give the negotiating committee reasons for such departure.

In the event of a temporary lay-off (as herein described) the provisions hereof with respect to seniority rights shall not apply. "Temporary lay-off" when used herein is a lay-off to which the negotiating committee and representatives of the Company agree seniority rights shall not apply, either because it is one involving a reduction in the number of employees working due to the temporary discontinuance by the Company of the performance of any work or to a temporary reduction of the volume of work to be performed, or for any other reason.

75. Our first reading of Company clause 21 (a) gave us the impression that it was to much the same effect as the Union clause 21 which provides that in the event of a vacancy within a department the Company shall consider persons working in the department in order of seniority, with the difference that it included former employees within the department who left the department for service overseas. A closer reading leads us to believe that the clause is not clear and is capable of the view that it only deals with the case of the returned man. As such returned men, in accordance with the provisions already outlined are entitled to their accumulated seniority we think that the clause should be clarified to make certain that all persons, whether returned men or not are entitled to consideration on

the basis of seniority. As the parties are agreed on the first part of the clause, we recommend that the proviso be reworded somewhat as follows:

provided, subject to the provisions of sections 23 and 26 (of the Company's draft) in the filling of any such position which becomes vacant, employees who at the time of the filling thereof are employed in the department in which such vacancy occurs, and employees who left their former employment in the department with the purpose of, and who have since been serving in the Armed Forces or the Merchant Marine of any of the United Nations, and who are competent and willing to perform satisfactorily the duties thereof, shall be entitled to due consideration in the order in which the greatest amount of seniority is held by them respectively.

76. In connection with seniority on transfers from one department to another the parties differ. The Company (clause 22) wished to have a transferred employee carry his seniority at once to the new department and to lose all claim to re-transfer to his former department. (Save in the case of employees transferred at other than their own request since September 9, 1939, as to which no difference of opinion arose). The Union (clause 27) wished an employee to retain for 60 days his seniority in the department from which he was transferred. We believe that an employee transferred at the request of the Company, and who may have been quite unwilling to make the change, should not because of his inability to perform his new duties forfeit all claim to employment by the Company. On the other hand, if an employee requests a transfer we see some merit in questioning whether he should still keep one foot in the department from which he has requested to be moved. Accordingly, as a compromise between the parties' conflicting views we recommend that a clause dealing with the matter somewhat as follows be adopted:

An employee transferred at his own request from one department to another shall carry his seniority to the department to which he is transferred, shall be entitled to have his name placed upon the seniority list thereof and shall have no claim whatsoever to re-transfer to any department in which he was formerly employed. An employee transferred from one department to another at other than his own request will for a period of 60 days after such transfer retain his seniority in the department from which he has been transferred, at the end of which time he will carry his seniority to the department to which he has been transferred and shall from that time have no claim whatsoever to re-transfer to the department from which he was transferred. Notwithstanding anything elsewhere herein provided (then follow the provisions of Company clause 22 in relation to employees transferred since September 9, 1944).

77. Both parties expressed their agreement to Company clause 23, subject to the Union's

objection to the reference to s. 15, on which we have already made our recommendation.

78. With regard to recall of employees after a lay-off both parties agreed in principle to Company clause 24 save that in place of the provision permitting the Company to recall "up to 25 employees" without regard to seniority, it was agreed by both parties before the Board to substitute a percentage of those laid off. We recommend "up to 10 per cent of those employees laid off and who had seniority, or such larger number as the negotiating committee and representatives of the Company may mutually agree." (We might say in passing that we do not see why Company clause 24 is made subject to s. 26 since the latter deals with persons on leave of absence and such persons can scarcely be considered laid off.)

79. Both parties agreed before this Board to the provisions of Company clause 25 with the agreed amendment in paragraph (b) which now will read, "is discharged for just cause and is not reinstated in accordance with the provisions of this agreement."

80. Both parties are agreed as to clause 26 of the Company's draft.

81. Both parties are agreed upon the wording of clause 27 of the Company's draft with regard to preferential seniority to Union stewards (now, as recommended, "committeemen") in the event of lay-off. Both parties agreed, however, before the Board, on the committeemen being continued at work when "15" rather than "25" employees (as the draft now reads) remain in a given zone.

82. Both parties are agreed on clause 28 of the Company draft which is similar to Union clause 32.

83. There is a difference of opinion in connection with freeing the Company from seniority provisions in the choice of employees to take inventory (Company clause 29, and Union clause 33). We see no reason why, subject to the overriding consideration of competency, seniority should be ignored in this connection. On a matter of this kind, however, we are willing to give effect to the Company's position by removing the Company's decision from the ordinary grievance procedure. This, in our opinion, would still leave open, under the clause we are recommending, an "interpretation and violation" arbitration if the Union felt the Company was flagrantly violating the provisions. We accordingly recommend a clause in place of Company clause 29, and Union clause 33 somewhat as follows:

Employees required from time to time for work in connection with the taking of inventory shall be selected by the Company on the

basis of competency for such work, but the Company will, when reasonably possible, share such work as evenly as possible according to seniority among those competent to perform the work, provided, however, that the selection by the Company shall not be subject to the grievance procedure provided herein.

7. MISCELLANEOUS PROVISIONS

84. The Company requested the inclusion of the following clause (31 of the Company draft):

An employee charged with the violation of any Federal or Provincial statute or regulation issued pursuant thereto or apprehended by any law enforcing body may be suspended by the Company and no such employee or former employee shall be entitled to lodge a grievance as the result of such suspension or discharge.

The Union strongly opposed this clause as being unnecessary and covered by the ordinary situation of discharge for just cause, and in the second place as being much too wide in scope. We can, however, see merit in the Company having the right to suspend an employee immediately on being charged with certain types of offences, but considering the multitudinous array of offences of a petty nature created by Federal and Provincial statutes and regulations, the commission of which would have no relevance to an employee's loyal performance of his duties as employee, we do not think that any argument is necessary to show that the wording of the present clause is altogether too wide. If the Company feels that it would be helpful to have a power to suspend and to discharge without the availability of grievance procedure, this right, in our opinion, should be confined within narrow limits and restricted to serious criminal charges affecting the Company's property or premises. We accordingly recommend that the present clause be modified to read somewhat as follows:

An employee charged with the commission of any criminal offence concerning the Company's property or premises such as theft, wilful damage or a like offence, may be suspended by the Company and if convicted upon such charge may be discharged, and such employee shall not be entitled to lodge a grievance as the result of such suspension or discharge.

85. Company clause 32 was designed to protect the Company's Power House or substation from interference. Notwithstanding that the Power House is not directly related to this unit in any way, or perhaps because of this, the Company clause not only requires a covenant from the Local not to interfere with such plant but also required the Local to covenant "not to permit any

member to cause or take part in nor will any member thereof take part" in such interference. Further, for the purpose of this clause, the Local included the International Union and its officers and agents as well as those of the Local. Considering that the Company has opposed every move to have the International Union made a party to this agreement, in addition to the fact that the Union stated that the Local had no power to bind the International, this last provision should, we believe, be deleted. We are also of opinion that in extracting a promise regarding the "permitting" of members to do certain things the clause is unreasonably wide. Notwithstanding the fact that it might be argued that any clause on this matter does not come, in this unit, within the term "working conditions" of s. 2 (1) (d) of P.C. 1003 we are willing to recommend a modified form of this clause somewhat as follows:

The Union shall not in any circumstances cause or take part in any restriction of or interference with the operation of or the work connected with the Power House and/or any substation of the Company.

86. While the Union felt that Company clause 33, reserving the Company's right to discipline any employee was unnecessary we can see no serious objection to its retention and therefore recommend that the Company's request for inclusion be accepted.

87. Company clause 34 provided shortly that an employee who desired a leave of absence should apply in the manner set out to the Company and that the personnel manager would deal with the application and notify the employee, seniority to accumulate during such absence. The Union's objection to this clause was that the Company did not agree to give leave of absence for any reason whatsoever. I particularly requested, in a modified form of Union clause 34 which was presented to the Board, that the Company agree to grant leave to delegated Union officials to attend conferences and conventions. The Union clause also requested that the Union be notified of employees on leave of absence.

88. The Company was opposed to granting leave to Union officials "as of right" and it was in this connection that the Company referred to the fact that "no man can serve two masters". While we are convinced that the Company would probably grant leave to Union officials as the occasion arose, we can also appreciate the claim of the Union that it is entitled to assurance, as part of the recognition accorded to the Union, that such leave will be granted. The Union objects to the Company's unfettered discretion. We

believe that the Company can likewise object to the unfettered discretion of the Union as to the number of men who might come under the sweeping terms of the Union clause, and to the fact that no limits of time are placed on Union officials' "right" to leave. With a view to reconciling the conflicting claims we asked the Union to supply us with an estimate of the maximum number of occasions on which leave might be necessary in a year and the maximum number of officials who might participate on these occasions. With that before us, and as a compromise solution we recommend a clause somewhat as follows in place of Company clause 34 and Union clause 34 (as modified at the hearings):

An employee desiring leave of absence shall make application in writing to his department head. The application shall be dealt with by the personnel manager and the employee notified of the disposition thereof. The personnel manager shall, from time to time, supply to the chairman of the negotiating committee a list of all employees who have been granted leave of absence. Seniority shall accumulate during the period of a leave of absence.

Provided however, and it is agreed between the parties, that an employee elected, appointed or delegated by the Union to attend a convention or conference of the Union shall be granted leave of absence without pay for a reasonable length of time not to exceed seven days on any one occasion in any calendar year for this purpose with continuity of service if reasonable notice is given. Not more than five employees shall be entitled to such leave in any one calendar year and the total number of days to which any of such five employees shall, in the aggregate and including all occasions, be entitled to in any one year shall not exceed fourteen, or such increased number as the personnel manager and the negotiating committee may, from time to time, agree upon.

89. With regard to the use of bulletin boards on the Company premises, the parties were not apart on matters of substance so much as on the working of their respective clauses. The Union felt that the Company clause was irritating in reserving to the Company without restriction the time during which notices would remain on the Board, and by the opening clause by which the Company "extends the privilege" of using in its clause 35. The matter is perhaps a small one, but in accord with the general spirit of compromise in which this report is written we think that in place of the Union clause 35, the Company clause 35 can be accepted if it is modified in the following particulars which we recommend: In place of the opening words, substitute "The Company agrees that the Union may use the existing bulletin boards etc." In place of the last paragraph of the Company clause substitute something like the following:

It is mutually agreed that such notices may remain posted for a reasonable time and outdated notices shall be removed.

90. Company clause 36 provides that the Union, any officer, representative or an employee "shall not on premises owned or occupied by the Company perform any act in any manner whatsoever relating to or in connection with any trade union" save as expressly provided in the agreement. This clause is so worded that it would exclude reference to any matter of Union concern on the Company premises. As such it seems to us an attempt to do the impossible and, in our opinion, the undesirable. As another Board of Conciliation said in connection with a similar Company request in the Steel Company of Canada dispute (45 Lab. Gaz. at p. 59): "To attempt to impose restrictions so severe seems an impossibility. Even if it were possible, such interference with the individual freedom of employees seems difficult to justify We fail to see how a Company can demand that some matters affecting the employees' interests may not be discussed between them, for example where the Union is involved, and yet permit discussions where other matters, for example, management may be involved." With that we agree.

91. We can understand a Company's unwillingness to permit its premises being used for holding Union meetings. We can also understand the Company's objection to Union activities such as soliciting dues, etc., on Company time. To refuse employees to solicit dues, etc. on Company premises during their own time seems to us a further manifestation of the Company's unwillingness to recognize the Union as an integral part of the industry. It also demands a Union employee so to develop a split personality that he must, in effect, temporarily sever his Union allegiance and affiliations each time he enters the Company's premises. The Company's draft, defines with great particularity the functions of Union officials in connection with grievances, etc. These particular, as modified herein, we have recommended the Union accept. To go as far as this clause purports to go in addition, does not seem to us desirable. We recommend, therefore, that a clause somewhat as follows be adopted in place of Company clause 36:

The Union shall not hold meetings on Company premises, and no employee, Union official or representative shall solicit members, collect dues or engage in any Union activity during his working hours or on Company time save as expressly provided in this agreement.

92. With regard to Company clause 37 and Union clause 36, dealing with the making of rules and regulations, at the hearing it was our understanding that both parties had agreed to the Union clause with the addition of the words "or otherwise communicated to the employees and to the Union". These provisions regarding publication and communication of rules and regulations are complementary to the recommended changes in Company clause 14.

93. Company clause 38 deals with employees absenting themselves from Company duties to attend a hearing before an umpire. The clause provides that no employee shall so absent himself without the approval of the Company and that no employee shall be paid for the time he is away unless the payment is approved by the personnel manager. The Union objected to the Company retaining sole control over absences for this purpose and also objected to the principle of no payment for employees. The clause regarding "no pay" is consistent with the Company's position already discussed in connection with grievances, etc. We have already recommended that committeemen be paid by the Company when attending before umpires as well as other times. The present clause, therefore, is confined to employees attending to give evidence on their own behalf or of employees who may be called as witnesses for either party to a dispute. We were informed by the Company that its practice in the "plant" was to pay those witnesses called by the Company and to leave the witnesses called by the Union to be paid by the latter. Apparently the individual employee without the Union affiliation must fend for himself.

94. While the Company indicated its willingness to amend the clause with regard to its approval of absences by adding, "which approval shall not be unreasonably withheld", we think that the clause should clearly state that any party to a hearing before an umpire has a right to have present any person having factual knowledge of the matters in issue. We agree that the witness should, before absenting himself, notify his department head and follow the procedure with regard to time cards, etc. We cannot believe that payment by the Company of favourable witnesses and non-payment of non-favourable ones will serve any other purpose than to discourage arbitrations. In addition, as such it is not in accord with the views we have already discussed as those which we believe should apply to expenses of grievance procedure in this unit. We appreciate that the right to call witnesses to be paid by the Company may be abused by

calling unnecessary employees. To cover that situation we think that the clause should provide that the Company will pay in addition to Committeemen, only those employees that the umpire lists over his signature as necessary witnesses or participants at the hearing. Such a list can be made at the hearing by the umpire at the request of either party. This removes any possibility of discrimination by the Company and of abuse by the Union or employees of their privilege of having witnesses attend. In place of Company clause 38, we therefore recommend that something like the following be adopted:

The Company, the Union, an employee or a group of employees shall have the right to have present at any hearing before an umpire, selected as herein provided, any employee or other person possessed of factual knowledge touching the matter or matters in question. Before an employee leaves his regular Company duties to attend such a hearing he shall, a reasonable length of time prior to the hearing, advise his division head, or if there be no division head to whom he is responsible, his assistant department head or his department head in such order that his presence is required at such hearing, and immediately prior to leaving his regular Company duties for such purpose shall record the time on his clock card in the proper manner at the time clock at which he ordinarily records his regular time and immediately prior to returning to his regular Company duties shall likewise record the time on his clock card. In addition to Union Committeemen, employees attending such a hearing and who are listed in writing by the umpire over his signature as "necessary employee witnesses or participants", shall be paid by the Company at their regular rate of pay.

95. Clauses 39-42 of the Company draft (being Union clauses 39-40 and 53), dealing with general matters of interpretation, etc., were agreed upon by both parties before this Board.

96. In connection with Union clause 41 dealing with a proposed change of hours of work in the summer months, the Company indicated its willingness in principle but stated that the change was dependent on transportation difficulties. We recommend the matter be left over and placed on the agenda for consideration at subsequent conferences between the negotiating committee and management after an agreement is concluded.

97. Union clause 42, dealing with hours of work, clause 43 requiring pay for overtime, clause 49 regarding "sick leave", and clause 50 regarding vacations, are all concerned with matters outside the jurisdiction of this Board and we therefore make no recommendation concerning them.

98. Before this Board, the Company agreed to accept Union clauses 44 and 45.

99. Union clause 46 to the effect that all employees be placed on a salary basis and Union clause 47 with regard to pay days, as well as Union clause 51, concerning rest periods and Union clause 52 regarding smoking privileges, we recommend should not be included in the present agreement, but be reserved for discussion, after an agreement is concluded, at a conference between the negotiating committee and management.

100. The Company strenuously opposed the insertion of Union clause 48, dealing with female employees on the principle of "Equal pay for equal work". In view of this opposition, and as there is in existence a government policy under which rates will be determined, we recommend that the Union withdraw this clause.

8. TERMINATION

101. The only remaining question concerns the clause relating to duration or termination of the agreement. P.C. 1003 is far from clear on this matter. We believe that it is highly desirable that on the termination of a stated term in an agreement there should be no period between the expiration date and the execution of a new, or amended agreement when the unit is without a collective bargaining agreement. As matters now stand, in the two months prior to the expiry date either party can give notice requiring negotiations to be entered into for the renewal, or modification of the agreement (P.C. 1003, s. 16). This section contemplates that an agreement will, no doubt, be concluded by the expiry date. Due to the possibility of negotiations breaking down and going through conciliation procedure it may not infrequently happen that much more than two months will be required before the negotiations reach a successful conclusion. The length of proceedings in the present case affords ample evidence of this. If the agreement, on the other hand, is made for more than a year, while s. 15 provides for a notice of termination the Regulations are singularly silent as to renewals or negotiations, or the persons to conduct them.

While in one sense it might seem desirable, in this state of uncertainty, to make the agreement for one year only, thus leaving the situation to be governed by whatever legislation may be in effect at the expiry date, it seems to us that the parties should be willing to agree on terms which would prevent the possibility of a disruption of relations at an expiry date, so long as they are not otherwise deprived of any statutory provision of which either may wish to take advantage. With this in mind, we feel that the following or a similar

clause could reasonably be adopted by the parties and we so recommend:—

This agreement shall be effective for one year from the date of its execution; provided that if at the end of such period a new bargaining agency, or bargaining representative, has not been certified or substituted in place of the Union to represent the employees for the purpose of collective bargaining in accordance with any provision of law then regulating such matter, then this agreement shall, subject to the provisions of any law then regulating collective bargaining, remain in full force and effect until a new collective agreement shall be executed.

All of which is respectfully submitted.

Dated at Toronto this 23rd day of June, 1945.

(Sgd.) CECIL A. WRIGHT,
Chairman.

(Sgd.) BORA LASKIN,
Member.

Minority Report

Re: Wartime Labour Relations Regulations P.C. 1003 and Ford Motor Company of Canada, Limited, Windsor, Ontario and Local 240, United Automobile, Aircraft, and Agricultural Implement Workers of America.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:

1. It is with considerable regret that I find myself in disagreement with the Chairman and the Union's nominee on the Board on a number of points.

2. Dealing first with the recital of events leading to the appointment of this Board and the conduct of the parties as set out in the earlier part of the majority report, there seems to be an expressed or implied criticism of the conduct of the Company culminating with the statement that the Company had throughout contested the steps taken by the Union over a period of two and a half years. I did not so interpret the proceedings. Until the 17th of March, 1944 there were two Unions contending to represent the bargaining unit and the Company merely said in effect "establish which of you represent a majority and we will bargain with you".

3. Thereafter the Company asked only that the Union comply with the provisions of P.C. 1003, s. 10, having regard to P.C. 2301. This was not done until the 6th of May, 1944. One might, at first blush, think the Company unduly technical in insisting upon this provision but when it is remembered that the Company was confronted with similar proceedings with different units of the U.A.W.-

C.I.O. not only in Windsor but also in other cities, the names of which I have forgotten and which are not important, it seems to me the Company was quite justified in taking the position it did apart altogether from the fact that it had the legal right to do so.

4. The parties commenced negotiations for a collective agreement with the representatives of the Union on the 19th day of May, 1944, a lapse of only thirteen days after the Union had qualified itself to negotiate. This seems to me to indicate reasonable despatch on the part of the Company.

5. Partial drafts of an agreement seem to have been prepared by the Company and submitted to the Union from time to time as negotiations proceeded and a complete draft seems to have been presented to the Union by the Company on the 11th of September, 1944.

6. It appears that the Union did not submit anything in the way of a draft to the Company until the 2nd of October, 1944 and contemporaneously therewith the Union made application for intervention under s. 11 of P.C. 1003. In my opinion this is significant of the attitude of the Union. I am satisfied that the Union had no intention of concluding any agreement which did not contain drastic Union security clauses not included in any major collective agreement in this area of which I am aware, and which this Board is unanimously of the opinion ought not to form a part of the agreement in contemplation in these proceedings. I am influenced in arriving at this conclusion not only by the proceedings before this Board but also by my general knowledge of the current attitude of the U.A.W.-C.I.O. in collective bargaining in this area.

7. I realize that much of the foregoing is merely a restatement of the early paragraphs of the majority report but in a somewhat different focus. It is largely because of this different perspective together with the facts about to be stated that I find myself unable to concur with my colleagues on the points upon which I hereinafter express a different view.

8. In the discussions between members of the Board prior to the drafting of any report and during the consideration of the majority report, deliberation proceeded upon the basis that Local 240 U.A.W.-C.I.O. was a new Union with which the Company had no experience except in the negotiating stage and therefore all its experiences with Local 200 U.A.W.-C.I.O. ought to be ignored in these proceedings. I was at first inclined to accept this view and if this were a Judicial or quasi

Judicial proceeding I still would. In view of the fact that it is neither, I am of the opinion that the Board ought to consider not only that experience on the part of the Company but also matters of common and public knowledge within the area.

9. This view presses itself all the more forcibly upon me because of the fact that Mr. George Burt, Regional Director of the U.A.W.-C.I.O. has interested himself actively in both Unions, and in these proceedings as well as in the proceedings now pending between Local 200 U.A.W.-C.I.O. and the Company.

10. After the personnel of this Board has been publicly announced it is reported in the Windsor *Star* of the 27th of March, 1945 that a special meeting of the Union and Non-Union Ford office workers was held at the Local's clubrooms at which Mr. Burt is reported to have said "We challenge the Company to go down the line on the report of the Board of Conciliation".

11. Almost immediately after the conclusion of the public sittings of the Board, conciliatory proceedings commenced between Local 200 U.A.W.-C.I.O. and the Company before Mr. Justice Richards in Windsor. These proceedings received prominent notice in the Windsor *Star* from time to time and involved many of the same points as are in issue in these proceedings.

12. In contrast with the challenge issued by the Union in these proceedings it is significant that after the conclusion of the Richards Commission The Windsor *Star* prominently reports that the Union (Local 200) held a mass meeting of over 8,000 members at which Mr. Burt announced that if the Union did not get what it wanted in the Richards report it would hold a strike vote. To me this smacks of intimidation.

13. It may be suggested that there is no connection since the Union in these proceedings agreed to adopt the report of the Board. I cannot adopt that view. The views of both my colleagues on many of the points in issue in these proceedings had been previously expressed publicly in reports of other Boards of Conciliation upon which they had acted as members. From these views so expressed under different circumstances it is understandable that the Union should issue the challenge it did in these proceedings.

14. It may be said that the two Locals will pursue independent courses of action and I have not overlooked paragraph seven of the majority report but I cannot resist the very

strong feeling that the actions of both locals are dominated by Mr. Burt. When considering the independence of action of this Union I cannot overlook two statements heard over the radio twice within the last forty-eight hours as I write this portion of my report when Mr. R. J. Thomas, President of U.A.W.-C.I.O. ordered (not recommended) 40,000 workers back to work in the City of Detroit. This is not particularly unusual for Detroit. I recall not long ago hearing announcements that another senior U.A.W.-C.I.O. official had ordered 33,000 men back to work. If they can be ordered to work they can be dominated in other respects and I have no doubt they are.

15. Since the elections which have recently been held, both Provincially and Federally, there have been increased demands by the various locals of the U.A.W.-C.I.O. calling upon both the Provincial and Federal Governments by legislation and regulation to compel employers to go much further in the way of collective bargaining than governments have heretofore thought it politic or necessary to require them to go and further than employers have themselves thought it necessary or desirable to go in the interests of harmonious relations. It would therefore seem quite obvious that the Union proposes to endeavour to advance its position by force of one kind or another. Political force if it can bring sufficient pressure upon the government concerned or economic force (which has become the polite expression to describe a strike) applied to the employer direct.

16. It may appear that I have devoted undue space and effort to developing the local background with some references to Detroit. It must be borne in mind however that many industries in this area are subsidiary to or affiliated with industries in Detroit. It must also be remembered that labour in this district is constantly surrounded by this atmosphere. It is impossible for me to detach myself from all these surrounding circumstances and I do not think I should attempt to do so because undoubtedly both parties to these proceedings have approached the conference table as fully conscious as I am of all the matters referred to if not more so. Future negotiations will also be similarly influenced.

17. There is one further element of a general nature which is not local in its character but which I believe is important to consider in approaching the problems before this Board. P.C. 1003 was promulgated under the provisions of the War Measures

Act Cap. 206, R.S.C. 1927 and it was "deemed necessary by reason of the war." While this Nation in common with its allies is still engaged in a war with a ruthless and far from beaten enemy, nevertheless we should take cognizance of the very different situation which exists to-day, since the defeat of Germany, from that prevailing at the time P.C. 1003 came into effect. This difference evident from the rapid and progressive relaxation of many Governmental controls since the war with Germany concluded. So much so that it has been publicly announced that the automobile industry in this country has been granted authority to manufacture 10,000 passenger automobiles during the remainder of this year. It has for some time been manufacturing civilian trucks in volume. Obviously this industry is now in the phase of transition to a peacetime industry. During the war with Germany the Company had one customer only, namely, the Government. If the Government desired a certain policy to be followed with respect to labour relations it mattered little to the Company what the result in cost amounted to because the Government as its only customer absorbed that cost.

18. Many Boards of Conciliation have been appointed under P.C. 1003 and many of the reports indicate anxiety to maintain production of war materials. It is interesting to observe also that many of the reports follow patterns and principles laid down by the National Labour Relations Board of the United States. A consideration of many orders of that Board discloses that resumption of production of essential war materials after serious work stoppages was an important consideration in the making of the orders.

19. The immediate and pressing necessity of war production being apparently somewhat removed I approach the problems before this Board somewhat differently than I would have a few months ago. Then it was a matter of high public policy to maintain war production. Now it is more nearly, though not entirely, a matter of private concern between the Company and its employees.

20. In this setting I approach the specific points upon which I differ from my colleagues as well as those upon which I may not differ but upon which I feel I should comment.

21. Union recognition

The majority report suggests that both parties should approach the recommendations of the Board without regarding any particular recommendation as a victory or defeat on that particular point. With this suggestion

I am in whole hearted accord. I have considered carefully clause (1) of both the Company's final draft agreement referred to in the majority report, and the Union draft as well as paragraph ten of the majority report and I am quite unable to see that any statement to the effect that the Company "recognizes the Union as the sole collective bargaining agency" serves any purpose except to permit the Union to say "we won our point on Union recognition". The fact is the Union has been certified by the Labour Court in the Supreme Court of Ontario. P.C. 1003 directs thereafter that the parties shall bargain in good faith. Those are the factors, and the only factors, which brought the parties to the conference table. It seems to me quite unnecessary, if not superfluous, to require or recommend that the Company admit or recognize anything beyond those simple facts which in my view are adequately recited in the Company's draft. In my opinion so far as the effectiveness of the agreement is concerned either from a practical or legal point of view, it makes no difference whether the agreement contains a recognition clause or not.

22. *Representation and Payment of Union Officials*

The payment or non payment by the Company of Union representatives for time absent from Company duties while engaged in authorized Union activities has given me considerable concern. During the hearing the Board inquired as to the practice in England and Sweden and we were subsequently advised by Mr. Wren that the practice is that the employer pays for such time. I have made further inquiries however and I find that the Union dues here are much higher, even in proportion to wages, than in the countries mentioned. If Local 240 stood entirely alone without support either financial, moral or economic from the U.A.W.-C.I.O. I would recommend payment by the Company. The U.A.W.-C.I.O. is however a strongly organized Union in this area and I think well able to afford the payment of its representatives in the bargaining units for time necessarily spent in Union activities.

23. During the hearing Mr. Wren was bitter in his denunciation of what he called the approach of the Company throughout its draft. As I understood his submission it was that the Company's draft was substantially a codification of permissions which the Company agreed to extend to the Union and its representatives. While I do not so regard the Company's draft I am not shocked if it could properly be so described. I am still old fashioned enough to think that the primary

reason an employer has for employing someone is that there are certain duties for that employee to perform and that within the law of the land and the terms of employment the employer has an absolute right to prescribe the working activities of the employee. If the employer is by agreement going to limit that general right with respect to all or some of its employees it seems only proper that it should be free from doubt as to the extent of that limitation. Uncertainty and disputes between labour and management as to the privileges, duties and discipline of Union representatives has in my opinion caused more disputes and work stoppages than any other single aspect of collective bargaining in this area, particularly in Detroit. We hear it broadcast over the radio nearly every morning and stoppages on this account have undoubtedly affected hundreds of thousands of men.

24. In this connection I have read the Union draft repeatedly and I am unable to find any point upon which the Union proposes to accept or assume any responsibility. It seems to me to be a recital of privileges to be granted to Union representatives at the expense of the Company and of limitations of the ordinary rights of an employer. Mr. Wren and his committee professed that their object in seeking a collective bargaining agreement is to promote harmonious relations with management. I think it was made quite clear by the representatives of the Company that the collective agreement between the Company and Local 200 U.A.W.-C.I.O. had no such effect but on the contrary had been a very expensive luxury from the standpoint of the Company. I am therefore of the opinion that the Company ought not to pay the Union representatives such as stewards or committeemen when they are absent from their Company duties or Union business and so recommend. I believe if the Union bears some share of the cost of carrying out the terms of the agreement and servicing grievances thereunder it is more likely to serve its professed objective, namely, industrial harmony.

25. I am in a little doubt about the language of the majority report in Paragraph 16 toward the bottom of page 7. I understand the intention is that apart from the time authorized for Union activities the Union representatives have regular Company duties to perform but within the time allowed for Union duties such representatives' activities ought not to be too circumscribed by the terms of the agreement. With this I would agree if the Company is not required to pay such representatives for time so employed.

26. Since a majority of the members of the Board are not in agreement with me with

respect to payment of Union officials I feel I should comment on that part of paragraph 47 of the majority report setting out a proposed draft clause dealing with payment of Union officers. The clause as set out in the proposed draft would seem to recommend payment for all time spent on Union activities away from regular Company duties. I feel sure it was the intention of the members of the Board joining in the majority report that payment should be limited to the maximum time allowance stipulated in the agreement.

27. *Grievances*

Clause 11 (a) of the Company's draft provides that no grievance shall be considered which usurps any function of management. The members of the Board joining in the majority report seemed to think this term vague and uncertain. I agree that it is difficult if not impossible of definition. The identical term is, however, used by the Wartime Labour Relations Board in a proposal put forward to the Company and Local 200 U.A.W.-C.I.O. which this Board was advised was accepted by both parties. A somewhat similar expression appears in the preamble to the constitution of the International Union U.A.W.-C.I.O. I asked Mr. Laskin to inquire whether in the opinion of the Union, the Company had ever unjustifiably resorted to this clause to refuse to deal with a grievance. I have been advised of no such case and in my opinion the clause has a well understood meaning between the parties and should lead to no abuse or confusion.

28. If the collective agreement contains such a reservation then I would recommend, that if grievance is properly defined, that the decision of the umpire be final and binding if the umpire is selected by agreement between the parties or failing such agreement by the Attorney General of the Province or some other accredited Government official from among the County Judges of Essex, Kent or Lambton Counties.

29. I am in slight disagreement with the recommendation of the majority report with respect to the payment by the Company of witnesses called before an umpire. If the umpire be chosen in accordance with the recommendation which I have made I would recommend that the payment or non payment of witnesses, called before the umpire, be left to the discretion of the umpire and that the umpire in exercising his discretion should certify for payment by the Company, the names of only such witnesses or participants as in his opinion were reasonably necessarily called as witnesses or participants for the proper disposition of the grievances before him.

30. *Seniority*

In dealing with the question of seniority I will touch only service personnel. The provision suggested by the Union proposes to place such an employee in a somewhat less favourable position than if he had not left the employment of the Company. I cannot feel that this is suitable recognition for a person who in almost every case volunteered to leave a position of security with good pay to place himself in a position of danger to serve his country. I have no doubt many of them actually gave their lives; others were wounded; many will carry the effects, although possibly not physically wounded, for years. I have no doubt that many of them if they had so desired could have received deferments from time to time because of the nature and importance of their work in the war effort.

31. It was urged on behalf of the Union that many people either through age, infirmity or for some other reason found it impossible to so serve their country and that to grant seniority to those who served overseas beyond the actual time so served would result in placing those who could not go at a disadvantage. I fully agree that this is the effect but I am also strongly of the opinion that it is a recognition which ought to be granted. In my view the submission of the Union does not go far enough in recognition of overseas service. On the other hand I do not think that the proposal of the Company takes into consideration to a sufficient degree the varying lengths of service and I accordingly recommend something that was not submitted by either party to the Board.

32. In my view such personnel ought to be divided into two groups. The one group having not less than 18 months' service with the Company prior to being attested for overseas service or despatched pursuant to P.C. 8891 or entering service in the Merchant Marine on any vessel under the registry of any of the United Nations during the war. The other group would consist of those with less than 18 months' service with the Company, prior to the periods before mentioned. With respect to the first group the employees' seniority should be an aggregate of the time of employment with the Company plus one and one-half times the time between the periods above mentioned and honourable discharge provided that such seniority so accumulated does not antedate the 10th of September, 1939, and if it does antedate the 10th of September, 1939, then that date shall be the date of seniority. Seniority of employees who became employed by the Company prior to September, 1939, shall date from the date of their original employment.

33. With respect to those who had less than 18 months' service with the Company prior to entering service, as above defined, I would recommend that seniority date from the date of original employment by the Company and with respect to such service personnel who have never been employed by the Company, I recommend that seniority be from the date of entering service as above defined.

34. There is a further point which was not mentioned by either party before the Board and was not considered by the members of the Board in conferences, prior to and during the consideration of the majority report. The drafts submitted by both the Company and the Union provide that to entitle a returned man to re-instatement or re-employment with the Company, he must make application within 90 days of his discharge. In view of the threat before referred to by Local 200 U.A.W.-C.I.O. to go on strike, if it is not satisfied with the report of Mr. Justice Richards, in which event such a strike would undoubtedly spread to the office, I have been concerned as to the position in which such an employee would find himself if the 90 days within which he has to make application for re-employment or reinstatement should expire during a period when the plant is struck. An extended strike could have the practical result of depriving such service personnel of their right to re-employment or re-instatement. It might be said that under such circumstances application for re-employment or re-instatement could be made in writing by mail. This is true but I think impractical. I think the practical result would be that such personnel would undoubtedly find a picket line which would discourage him from going near the employment office or any other office of the Company. I also think that most

service personnel on their return to this country and upon discharge will fairly well take advantage of their full ninety day period before seeking re-employment. It will undoubtedly be necessary for them to do so to re-acustom themselves to civilian life before they would be suitable to undertake steady employment. Many of such personnel are just now returning home so that they might very readily be deprived of all the rights to re-employment and seniority by a strike or lock-out at the plant or at the office. Accordingly I would recommend that at all times during which a strike or lockout is in progress or a partial or complete stoppage of work or the period during which any picket line exists on or near the Company premises, should be excluded in calculating the 90 days between discharge and application for re-employment or re-instatement.

35. I find on reviewing what I have already written that I have omitted to deal with the qualification of a steward or a committeeman. The members joining in the majority report did not see fit to recommend that such a person should reside in Canada and be either a British subject or a citizen of the United States of America. From my knowledge of collective bargaining in this area and from my familiarity with various contracts now in existence, I feel confident in saying that such a provision is almost universal in this area, I think it a serious and proper one and so recommend.

All of which is respectfully submitted.

Dated at Windsor, Ontario, this third day of July, 1945.

(Sgd.) S. L. SPRINGSTEEN,
Member of the Board.

Report of Board in Dispute between the Imperial Optical Company, Toronto, Ont., and Local 514, United Electrical, Radio and Machine Workers of America

On July 9 the Minister of Labour received the report of the Board of Conciliation established to deal with a dispute between the Imperial Optical Company, Toronto, Ont., and Local 514, United Electrical, Radio and Machine Workers of America.

The personnel of the Board was as follows: Dr. Alexander Brady, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. Macaulay Dillon and I. Himel, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

40403—8

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003 and Imperial Optical Company, Toronto, and Local 514, United Electrical, Radio and Machine Workers of America.

THE HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR,
OTTAWA, ONTARIO.

This Board of Conciliation appointed by you to investigate this dispute first met the parties to hear evidence on the 14th of May, 1945. The Company was then represented by Messrs. Sidney Hermant, F. White and J. C. Adams, K.C., and the Union by Ross Russell,

J. Beattie, F. Kremer, Donald Bain and Marie Alter. Subsequent meetings of the Board were held with the parties represented on the 18th and 19th of May and the 27th and 29th of June. The Board directed the parties to carry on negotiations in the intervals between meetings.

At the outset there were some ten matters evidently in dispute between the two parties and these may be listed thus:—

1. Union Security.
2. Grievance procedure in part.
3. Seniority in event of lay-off.
4. Labour-Management production committee.
5. Safety and health committee.
6. Question of reduction of hours in preference to layoff of employees.
7. Maintenance of existing privileges in the shop.
8. Title of agreement.
9. Status of probationary employees.
10. Certain job classifications, wage rates and related matters which do not come within the jurisdiction of the present Conciliation Board.

As a consequence of discussions with the Board and direct negotiation between the parties, agreement was reached on all points except the matter of Union security. This agreement, however, was subject to the reservation by the Union that the collective agreement finally contain clauses providing for maintenance of membership and voluntary check-off and to the reservation by the Company that nothing be inserted in the agreement under either of these headings.

However, at the final hearing on June 29, it was discovered that there was a further difference between the parties, not referred to above, namely, as to whether the agreement should be signed forthwith, as the Union desired, or following the final disposition of wage submissions which the Union had already made to the Regional War Labour Board. It appeared that hitherto there had been no real negotiations with respect to wages. This, to say the least, was unfortunate.

RECOMMENDATIONS

1. The Board recommends that the parties revise their reservations on Union security referred to above and that the Union withdraw its request for maintenance of membership and that, on the other hand, the Company include in the agreement the following

clause, taken from Clause (b) of Paragraph 3 of the Union's first draft:

Upon written authority from an employee member the Company shall deduct the current monthly dues to the amount of \$1.00 and/or initiation fee of \$2.00 and shall, together with a detailed list of such collections, remit same to the Financial Secretary or other designated Union official before the 15th of each month.

This recommendation is a reasonable compromise to ask the parties to accept and in particular would reflect the earnest desire of both parties to reach a working agreement.

2. On the final matter in dispute, namely, the date upon which the agreement should be signed, the Board believes that here again a reasonable compromise between the two opposing positions and the one best designed to establish satisfactory relations between the parties contained in the following recommendation:—

That the parties proceed forthwith to negotiate wage rates in an effort to reach an agreement upon which a joint submission to the Regional War Labour Board could be made. But, irrespective of the result of these negotiations, the agreement should be signed by the parties not later than the 1st August, 1945. It is, of course, hoped that the negotiations on wage rates will be finally completed by August 1st, 1945. If the wage negotiations do not result in agreement, then the collective bargaining agreement to be signed on or before the last mentioned date should contain a provision that upon the ultimate determination of the wage rates by the proper tribunal, the Union and the Company would undertake to make no further applications in respect to wage rates during the currency of the agreement.

The Board was impressed by the fact that both parties made conscientious efforts to resolve their differences since the first meeting of the Board, whatever may have been their respective attitudes before. It is confident that the signing of an agreement on the lines suggested above, granted the presence of goodwill on both sides, will ensure a satisfactory relationship between the parties.

All of which is respectfully submitted.

Dated at Toronto, this 5th day of July, 1945.

(Sgd.) ALEXANDER BRADY,
Chairman.

(Sgd.) IRVING HIRNEL,
Board Member.

(Sgd.) E. MACAULEY DILLON,
Board Member.

Report of Board in Dispute between the H. Krug Furniture Company, Limited, Kitchener, Ont., and Local No. 8, Canadian Aircraft Workers Association

On July 14 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the H. Krug Furniture Co., Limited, Kitchener, Ont., and Local No. 8, Canadian Aircraft Workers Association.

The personnel of the Board was as follows: Hon. Mr. Justice W. D. Roach, Chairman, appointed on the joint recommendation of the other two members of the Board; Messrs. A. W. Boos and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations, P.C. 1003 and of a dispute between H. Krug Furniture Company, Limited, Kitchener, Ontario, (Employer) and Local No. 8, Canadian Aircraft Workers Association, (Employees).

TO THE HONOURABLE
THE MINISTER OF LABOUR,
Ottawa, Ont.

The undersigned Chairman and Members of the Board of Conciliation established in this matter pursuant to the provisions of section 13 (1) of the Wartime Labour Relations Regulations P.C. 1003, beg to report as follows:—

The Company owns and operates a plant at the City of Kitchener in which it manufactures office furniture and various types of special contract and household furniture. It has on its pay roll at the present time 130 employees of whom 110 are within the bargaining unit to be affected by any collective bargaining agreement.

The Local Union was chartered by the C.A.W.A. in August, 1944 and was certified as the collective bargaining agent of the Company's employees, not including the office staff, by the Ontario Labour Relations Board on November 29, 1944. Prior to the establishment of this Board the Company and the Union for a period of many weeks attempted to consummate a collective bargaining agreement. They were able to agree upon many of the provisions to be contained in such agreement and were unable to agree on others. This resulted in the establishment of this Board.

The Board met with the parties at the City of Toronto on June 22. The Company was represented by Mr. H. J. Krug, Vice-President, and Mr. J. K. Sims, its solicitor.

The Union was represented by Mr. Donald Rawlins, Manager and International President of the Union, Mr. H. J. Danberger, an employee of the Company and president of the Local Union, and Mr. J. J. Boegel, an employee of the Company and a member of the negotiating committee.

When the Board first met with the parties the matters in dispute were as follows:—

Item 1: Union Security

Item 2: Periods of wage payments.

Item 3: Transfers from one department to another.

Item 4: Rest periods.

Item 5: Overtime rates for maintenance workers.

During and as a result of the Board's discussions with the Parties agreement was reached by them as to Items 2 and 4. As to Item 5, the Board pointed out to the parties that the matter of wage rates was beyond the jurisdiction of this Board. The parties recognized that fact and therefore this Board makes no recommendation.

The Union sought to have the agreement provide for a union shop and check-off. The Company refused to accede to this request. There has not previously been any collective bargaining agreement between the Company and its employees and, notwithstanding that fact, the relations between the Company and its employees have always been most harmonious. The Company has apparently always treated its employees fairly and the employees have reciprocated by giving to the Company a high degree of loyalty and co-operation in its undertaking. This condition having happily obtained over many years the Company has acquired an attitude of paternalism towards its employees. The Company might well be described as a family company. The business was founded by the late Hartman Krug in 1886 and since his death in 1933 has been carried on by his sons. No outside capital has ever been engaged in the operations of this Company. The number of employees on the Company's payroll has never been too large to prevent the executives of the Company becoming reasonably intimate with each employee and this association and degree of intimacy has not infrequently led to employees discussing with members of the executive personal problems outside the ordinary matters that an employee usually discusses with his employer. It is understandable that the executives of the Company do not look with favour

on the interjection of the Union into that relationship. They regard it as reflecting adversely on the attitude which the Company had constantly maintained towards its employees and as not essential for the continuance of the good employer-employee relations that had theretofore existed. Not only do the executives of the Company think that the presence of the Union in its plant is not essential to a continuance of that good relationship, but they are not convinced that many of the employees really wanted the Union, despite the fact that they have joined it. It is not surprising that under these circumstances the Company should be adamant in resisting the demand of the Union for what has come to be known as union security. This Board was unanimous in stating to the Union that in asking for a union shop it was seeking a form of union security to which it was not presently entitled; that before asking much in the form of union security it should first demonstrate to the Company that it is an agency for good in the field of employer-employee relations in this particular plant. The common-sense of this view was recognized by the Union and at the meeting of this Board with the parties the Union agreed to forego its demand for union shop and accept in lieu thereof a provision for voluntary check-off irrevocable during the term of the agreement. At the conclusion of the Board's meeting with the parties the Company requested time to consider that alternative suggestion. It has now advised the Board that it is unable to agree to it. The Board, therefore, recommends that in the particular circumstances here existing the Company should accept that alternative with this modification, namely, that any employee who may authorize in writing a check-off of his union dues by the Company should be at liberty to revoke it at any time within the last thirty days of the term of the agreement.

RE ITEM 3, TRANSFER FROM ONE DEPARTMENT TO ANOTHER:

The Company and the Union have each agreed to the inclusion of the following provi-

sion in the proposed collective bargaining agreement:—

"In considering applications by employees for transfer from one department to another the Company will endeavour to act reasonably and fairly in all the circumstances before giving its decision."

The Company demanded that the following sentence be added thereto:—

"Seniority being by departments applications by employees for transfers shall not be subject to the grievances procedure."

It will be noted that this provision deals with applications for transfers by employees,—not a transfer at the instigation of the Company. There may be occasions upon which an employee for reasons of ill health, or some such other reason, might request the Company to transfer him from one department to another, but the Company, in its opinion, acting reasonably and fairly, might be unwilling to grant that request. The employee might consider such refusal to be unreasonable but, even so, this Board recognizes that it is the prerogative of the Company to decide such questions without its decision being subject to review under any form of grievance procedure. It is purely a question of management and in the opinion of this Board the decision should be left to the uncontrolled discretion of the Company. The Company's proposal is reasonable and the Board recommends that the Union accept it.

The Board desires to record its appreciation of the assistance and co-operation given to it by the representatives of the parties.

All of which is respectfully submitted.

Dated this 13th day of July, 1945.

Report of Board in Dispute between Motor Products Corporation, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local No. 195

On July 10 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between Motor Products Corporation, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO) Local 195.

The personnel of the Board was as follows: His Honour Judge Harold E. Fuller, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board; Messrs. W. Gordon Thomson and Bora Laskin, appointed on the

nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations, P.C. 1003, as amended, and in the matter of Motor Products Corporation, Windsor, Ontario, and Local 195, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO).

TO: HONOURABLE HUMPHREY MITCHELL,
MINISTER OF LABOUR OF CANADA,
OTTAWA, ONTARIO.

Sir: The Board of Conciliation appointed by you in the above matter begs to report as follows:—

The Board sat at Windsor and at Toronto to hear representatives of the parties, and met at Toronto and at Welland for its own deliberations. As the result of an interim memorandum to the parties, it was able to conciliate their differences on all but one of the points in dispute, as hereinafter set forth. At the hearings before the Board, the Company was represented by Mr. G. P. Dickson, counsel; John Reeves, personnel director; P. W. Edmunds, comptroller; and William Reevely, superintendent; and the Union was represented by Drummond Wren, international representative; G. R. Foley, international representative; W. Kerr, chairman of the negotiating committee; and J. Graham, secretary of the negotiating committee.

Written and oral submissions were made on behalf of the parties on the matters in dispute between them which arose during negotiations for the renewal of a collective agreement dated April 24, 1942. While these negotiations were fruitful in results, issues arose on which the parties were unable to reconcile their differences. These issues stemmed from proposed changes in the collective agreement which were suggested both by the Company and by the Union. Thus, the Company desired a reduction in the number of union stewards and wished to add certain clauses dealing with seniority in relation to transfers of employees from one department to another, and with the employment of non-production personnel on production work. The Union proposed changes in the termination clause of the collective agreement, in the grievance procedure, especially as it related to final arbitration, and in the recognition clause. In this last connection, it sought the inclusion of a provision for union shop and check-off.

The Company employs presently about 265 employees who are eligible for membership in

the Union, and the Union claims that all but five or six of these are members in good standing. This the Company disputes but its counsel stated that it was willing to admit that a bare majority of such eligible employees were members of the Union. Collective relations between the parties were not the outcome of certification proceedings under collective bargaining legislation but followed upon a supervised representation vote early in 1942 by which the Union established a claim to bargain collectively with the Company on behalf of employees. The Company pointed out during the Board's hearings that its peacetime employment force was larger than its present one, and that it expected to employ from 375 to 400 persons following the conclusion of the war.

Some of the matters in dispute were settled to the mutual satisfaction of the parties at the initial Board hearing and all others, save the issue of recognition involving union shop and check-off, were made the subject of a memorandum which the Board addressed to the parties with a view to facilitating an agreement upon such matters. At a subsequent hearing the parties submitted a joint statement indicating that they had arrived at a settlement on all the items which were the subject of the Board's memorandum, this settlement being subject only to the approval of the members of the Union which approval the Union representatives would seek to procure. It developed at this hearing that the Union did not understand that in withdrawing its requested amendments to the grievance procedure (this being one of the terms of the settlement) it was abandoning its claim to have final arbitration of all grievances. It believed that it was merely abandoning its proposal for shortening the steps in the procedure prior to arbitration. The Company had agreed to final and binding arbitration of disputes concerning the interpretation or violation of the collective agreement, in accordance with the mandatory provisions of P.C. 1003, as amended, but it had clearly indicated that it was not prepared to go any further. Counsel for the Company stated that in acquiescing in the joint statement of the terms of settlement he had acted in the belief that all disputed matters connected with grievance procedure had been settled by the Union's abandonment of its proposed amendments.

The Board is of the opinion that while the Union's misunderstanding was unfortunate, yet, since the joint statement of settlement was the outcome of the Board's attempt to reconcile the parties on all points in dispute, save that of recognition involving union shop and check-off, the Union should accept the statement as binding it not to ask for final arbi-

tration of disputes other than those concerning the interpretation or violation of the collective agreement. A copy of the statement of settlement is attached hereto for purposes of record.

It remains to consider the composite issue of recognition involving union shop and check-off, upon which the parties were unable to reach common ground. The agreement of April 24, 1942, contained a provision by which the Company recognized the Union as the exclusive collective bargaining agency for those of its employees who were members of the Union in good standing. The Union seeks to extend this provision and to add other terms to the renewal agreement which would give it "union security". The Board had the benefit of full argument and discussion in which representatives of the parties set forth their respective views on "union security" and particularly on the claim of the Union in this case to have a union shop and check-off. The Company questioned the jurisdiction of the Board under P.C. 1003, as amended, to make recommendations on "union security" clauses. This objection to jurisdiction has been raised before other Boards of Conciliation, some of which did and some of which did not see fit to enter into an assessment of its merits. This Board is of the opinion that because it has powers of recommendation only, it should leave the jurisdictional issue for disposition by some other forum or authority and should make its proposals for settlement of the dispute in accordance with the sworn undertakings of its members and in pursuance of the obligations to that end imposed upon it by s. 13(2) of P.C. 1003, as amended.

With this in view, and upon a consideration of the facts and arguments adduced before it, the Board recommends:

- (1) The inclusion in the renewal collective agreement between the parties of the following clause:

The Company will negotiate at all times necessary in the manner provided herein, with the chosen accredited representatives of the Union for the purpose of determining any disputes which may now exist or which may arise as to wage, hours, working conditions, or any other question affecting employees.

- (2) The inclusion in the renewal collective agreement between the parties of a provision for maintenance of membership by those employees who are or who become members of the Union; and
- (3) The inclusion in the renewal collective agreement between the parties of provisions for the deduction of union dues monthly from the pay of all employees who so signify in writing, and for the remission of the sums so deducted to the secretary-treasurer of the Union.

The Board is desirous of recording its appreciation of the assistance and co-operation of the representatives of the parties who thereby facilitated the Board's work.

Dated at Toronto this twenty-fifth day of June, 1945.

Sgd. HAROLD E. FULLER,
Chairman.

Sgd. BORA LASKIN,
Member.

Minority Report

In the matter of The Wartime Labour Regulations P.C. 1003, as amended and in the matter of Motor Products Corporation and Local 195 United Automobile Aircraft and Agricultural Implement Workers of America (UAW-CIO)

To: The Honourable HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Ontario.

I have had an opportunity of reading the majority report and am pleased to concur in the first part of the report namely that part dealing with the matters upon which the board was able to effect an agreement between the parties, and the recommendation that the union should accept the statement of settlement as binding which part of the report concludes with the attachment to the report of a copy of the statement of settlement between the parties.

With respect to the two matters relating to so-called "union security" proposals, namely "maintenance of membership" and "check-off" my colleagues and I were unable to agree.

Counsel for the employer submitted that proposals for the inclusion of clauses with respect to these two matters do not come within the provisions of P.C. 1003 and in particular section 2 (1) (d) thereof, and brought to the attention of the board the differences in the wording of the relevant provisions of The Industrial Disputes Investigation Act. The board's attention was also directed to the provisions of sections 9 and 19 of P.C. 1003. This matter of jurisdiction was discussed at length by Senator J. J. Bench, K.C., in his report as a member of the board in a recent conciliation hearing between Upper Canada Mines Limited and Local 240 Kirkland Lake Mines and Mill Workers Union, reported in the March 1945 issue of the LABOUR GAZETTE. In my view the words "working conditions" do not include or extend to matters of "maintenance of membership" or "check-off". Moreover, provisions in a collective agreement with respect to such matters would in my opinion be inconsistent with the wording and meaning of said sections 9 and 19.

Apart from the question of jurisdiction, various arguments for and against "maintenance of membership" and "check-off" have been set forth in the reports of various boards of conciliation. Motor Products Corporation is said to have a normal peace-time pay roll of about 375 to 400 employees in the unit but unlike most other businesses it has had a lesser number of employees during recent war years, the number being approximately 265. There are 106 employees now in the armed forces while of the employees presently working in the unit slightly more than 50 per cent have been employed since the outbreak of the war. The employer expects that in peace-time, employment will be resumed at the former level so that the composition of the plant will likely change materially in the near future.

The board was informed by counsel for the employer that in the automotive plants in the Windsor Area collective agreements do not contain provisions for "maintenance of membership" or "check-off".

The union and the employer agree that the union has a membership consisting of a majority of the employees in the unit. The union further contends that its membership has increased so that it consists of practically all of the employees of the unit. This the employer disputes. Representatives of the

union stated to the board that they did not anticipate difficulty in maintaining membership under the existing collective agreement but suggested that the union might have to be "militant". Regarding "check-off", in my view the collection of union dues is a financial transaction within the union itself rather than a matter between the union and the employer. I feel that where the parties as in this case differ so strongly on the principles involved in these two union requests, a board whose function is to conciliate would not advance the interests of either the employees or employer if it endeavoured to force views (even indirectly) on either party.

Both the employer and the union joined in stating that the existing collective agreement has worked quite well, and both have made concessions thereby arriving at a number of mutually acceptable amendments. Under all the circumstances it may be that the union will see fit to withdraw its request for "maintenance of membership" and "check-off" provisions.

All of which is respectfully submitted.

Dated at Windsor, Ontario, this 6th day of July, 1945.

(Sgd.) W. G. THOMSON,
Member of the Board.

Report of Board in Dispute between the St. Clair Processing Company, Sarnia, Ont., and United Gas, Coke and Chemical Workers

On July 25, the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between St. Clair Processing Company, Sarnia, Ont. and United Gas, Coke and Chemical Workers.

The personnel of the Board was as follows: Hon. Mr. Justice F. H. Barlow, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. R. A. Carscallen and Bora Laskin, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations, P.C. 1003, as amended, and in the matter of a dispute between St. Clair Processing Company, Sarnia, Ont., and United Gas, Coke and Chemical Workers.

To the Honourable HUMPHREY MITCHELL,
MINISTER OF LABOUR,
Ottawa, Ont.

Sir:

The Board of Conciliation appointed by you in the above matter begs to report as follows:

The Board sat at Sarnia to hear the submissions of the parties, and at Toronto to formulate its recommendations. At the Sarnia hearing the Union was represented by F. Joyce and T. McLean, International representatives, by R. Miller, Chairman of the local Union, and by A. Breayau, C. Shaver, E. Wilbert and D. Lwa, members of the Union Negotiating Committee. The Company was represented by F. C. Lantz, Manager, A. P. Mechin, Secretary-Treasurer, and by J. J. Robinette K.C., counsel.

The dispute between the parties arose during the negotiation of a first collective agreement between them, following the certification of the Union by the Ontario Labour Relations Board on January 24, 1945. The certification followed upon a vote in which the Union obtained the support of about sixty-four per cent of the eligible voters, and of some seventy-five per cent of those who voted. The Union gave no indication at the hearing of the number of employees in the bargaining unit who were members in good standing. About 900 employees of the Company are included in the bargaining unit specified by the certification order. The Company is one of three privately-owned corporations, which together operate Polymer Corporation, the Government-

owned synthetic rubber enterprise situated in Sarnia. The other two Companies, Dow Chemical of Canada Ltd. and Canadian Synthetic Rubber Ltd., have each entered into a collective agreement with Unions. The Dow Company's agreement is with Local 12901, District 50, United Mine Workers of America. It was entered into on April 17, 1945, and covers about 60 employees. The Canadian Synthetic Company's agreement is with the International Chemical Workers Union, affiliated with the American Federation of Labor. It was entered into on April 10, 1945, and covers about 200 employees. While the parties to the dispute before this Board overshadow the other Companies and Unions in respect of the size of the bargaining unit, it is a fact that there are three different Companies having collective bargaining relations with three different Unions, and committed to the operation of a continuous processing undertaking which has come into being since the outbreak of the present war.

The negotiations between the parties for a collective agreement seem to have been fruitful, because through their own efforts, and with the assistance of a conciliation officer a draft agreement was completed, with only one minor item outstanding, namely, the method of selecting the Chairman of the Arbitration Board, for which provision was made in connection with the final settlement of disputes and grievances. It is the Union's submission that while the draft agreement was agreed upon between the respective representatives of the parties, it was subject to ratification by the parties themselves. It is because the Union membership turned down the draft agreement that this Board was called on to function.

At the hearing before this Board the Company was content to stand by the draft agreement aforementioned, with the result that the recommendations which this Board makes stem from demands for changes sought by the Union. These demands, the Company's reactions to them, and the Board's recommendations with respect to them, are listed in order as follows:

1. UNION SECURITY

The Union seeks a union shop and check-off.

In the Board's opinion, it has not made out a case for this substantial form of security. The Company is agreeable to a form of voluntary check-off. The Board is of opinion that a clause should be included in the agreement providing for a check-off of Union dues, upon voluntary authorizations therefor by the respective employees, which authorizations may be stated to be irrevocable for the duration of the agreement.

2. SERVICE QUALIFICATION OF STEWARDS AND COMMITTEEMEN

The Union asks that the service qualification period of stewards and committeemen shall be three months, while the Company insists that such persons should have at least six months' service in the section of the plant which they are to represent. The Company contends that no section would be deprived of representation under a six-month qualification period, and, on this assumption, the Board recommends that the parties adopt the six-month period as an initial experiment, subject to the modification that this period may be six months of service with the Company generally, and not necessarily in a particular section.

3. CONSTITUTION OF ARBITRATION BOARD

The Union wishes that arbitration should be by a single arbitrator to be chosen by the Ontario Labour Relations Board, if the parties cannot agree on who he should be. The Company desires a three-man Board, with the Chairman to be a member of the judiciary of the Province of Ontario, chosen by the Dominion Minister of Labour, if the parties' nominees to the Board cannot agree on a Chairman. This Board is of opinion that a one-man arbitration tribunal would be more expeditious and probably less expensive; and it recommends this to the parties. On the question of the selection of the arbitrator, this Board recommends that the agreement contain a clause that if the parties cannot agree upon an arbitrator, a Judge of the Supreme Court of Ontario, if available, should be selected by the Dominion Minister of Labour to act as arbitrator.

4. MANAGEMENT RIGHTS

The Union seeks the inclusion in the collective agreement of a provision, in connection with the management's acknowledged right to establish plant rules and regulations, that such rules and regulations should not be inconsistent with the terms of the collective agreement. The Company agreed to this request at the hearing, so that it is settled accordingly.

5. PRIOR CONSULTATION IN CASE OF DISCIPLINE, DISCHARGE, ETC.

The Union seeks the inclusion of a clause which would require management, before exercising its rights of discipline, discharge, etc., to consult with the Union. While there is nothing to prevent the Company from doing this as a matter of practice, and while the Company may well consider it wise so to

do, where feasible, this Board does not feel justified in recommending, in the circumstances of this case, the inclusion of a provision in the agreement such as the Union seeks.

6. INDIVIDUAL PRESENTATION OF GRIEVANCES

The Union wishes to have all grievances presented through its stewards and carried through all stages of the grievance procedure by its officials. The Company insists on the retention of a clause set out in the draft agreement aforementioned, which reads as follows:

"Nothing in this grievance procedure shall be deemed to take away the individual right of any employee to present any of his personal grievances to the Company."

Further, the Company considers that this clause covers any employment grievance.

The issues raised by the respective positions of the Union and the Company have been fully dealt with by Boards of Conciliation established to deal with disputes affecting employees of the Steel Company of Canada in both its Hamilton and Canada works. (*See LABOUR GAZETTE*, 1945, p. 55 at p. 59 following; *LABOUR GAZETTE*, 1945, p. 488). This Board adopts the solution reached in those cases, which involves recognition of the Union's right to be present at and to follow through the hearing and disposition of grievances, with the addition of a provision reading as follows;

"Nothing herein shall prevent an individual employee from presenting and discussing his grievance directly with the Company at any stage, but this shall be in addition to and not in substitution for the procedure for the adjustment of disputes in this agreement."

7. TIME LIMIT FOR FOREMAN'S DECISION

The Union contends that a foreman with whom a grievance is lodged, should be required to give his decision within twenty-four hours; the Company says forty-eight hours would be more appropriate. The difference is hardly of major import, but since there has been no experience in this plant, of which the Board is aware, on which to base any judgment, the Board is of opinion that the forty-eight hour period should be given a trial.

8. ACCESS OF UNION CHAIRMAN TO PLANT

The Union wishes to have provision made for access to the plant by the Union Chairman, should his services be required in his off-shift periods. The Company stated at the hearing that it was satisfied with such a provision, if its operation was conditioned on the securing of the permission of management. This was acceptable to the Union and the matter was settled accordingly.

9. "NO STRIKE OR LOCK-OUT" CLAUSE

The Union wished to modify the "no strike or lock-out" clause which was in the draft agreement aforementioned, by making the "no strike or lock-out" pledge operative only until the grievance procedure is exhausted. Since all disputes between the Company and the Union are to be subject to final arbitration, and, in view of the provisions of P.C. 1003 as to strikes and lock-outs, the Board is of opinion that the "no strike or lock-out" clause should remain as in the draft agreement.

10. SENIORITY FOR VETERANS NOT PREVIOUSLY EMPLOYED

The Union submitted a draft clause for inclusion in the collective agreement, under which ex-service men who have not previously been employed by the Company, would, upon employment and after serving the probationary period, receive seniority credit, retroactive to the date of the certification of the Union, namely January 24, 1945. The Company's position in this respect was simply that it preferred to rest on the Re-instatement in Civil Employment Act and regulations thereunder. The Board is of opinion that the ramifications of the Union's proposal, and in fact of any proposal designed to complicate the application of the seniority provisions of a collective agreement, are such as to make it undesirable, at least in the circumstances of this case, to put into effect what the Union proposes.

11. RIGHT TO VACATION PAY AFTER LEAVING COMPANY'S SERVICE

The Union requested the inclusion of a provision in the collective agreement which would provide that an employee who leaves the Company's service after qualifying for vacation pay, but before receiving it, should be paid the amount due to him in this respect. The Company agreed, at the hearing, that it would work out a clause in this matter with the Union, so that the Board takes it that the matter is settled in principle, and that the parties will work out the details between them.

12. APPLICATION OF SENIORITY PROVISIONS

The clause in the draft agreement aforementioned which dealt with promotions provided that "preference shall be given to those employees having longest plant service, provided that the employees in question are, in the opinion of the Company, relatively equal in ability." The Union wishes the deletion of the words "in the opinion of the Company" on the ground, apparently, that their inclu-

sion would prevent the lodging of any grievance by an employee who had a complaint in connection with the application of this clause. The Union, moreover, wants seniority alone to be the governing factor in connection with promotions, and suggests that it be left to the individual employee to refuse a promotion if he feels he is not fit for a position to which his seniority would entitle him.

This Board is of opinion that since it is for the Company to exercise its judgment in the first place, in determining the relative ability of employees contending for a promotion, it is desirable that the words "in the opinion of the Company" be deleted, so as to ensure that the grievance procedure would be available for the settlement of any dispute which might arise in the application of the promotion clause. The Board does not recommend any other change in the clause.

13. PROBATIONARY EMPLOYMENT

The Union suggests the inclusion of a clause under which an employee shall be deemed to have served his probationary period if he has completed three months service in a twelve-month period. The Company's position is that an employee shall be considered probationary for the first three months continuous service. Apparently the Union is concerned that an employee may be engaged intermittently in such a fashion that he may be unable to satisfy the probationary qualification, and would thus never be put on the seniority list. The Company stated, at the hearing, that there was no such thing in its service as intermittent work, and on this basis the Board feels that the Company's proposal on this matter should be accepted.

14. ACCUMULATION OF SENIORITY DURING LEAVE

The draft agreement aforementioned contains a provision under which an employee absent from work with leave for more than thirty days, accumulates seniority for thirty days, but does not accumulate seniority thereafter unless, in the opinion of the Company, an exception should be made. The Union's position is that seniority should accumulate during the whole period of leave. The Board

is of opinion that the Union's contention has merit, and it therefore recommends the inclusion of a clause in the collective agreement which would provide that an employee absent from work with leave will accumulate seniority during the period of such leave, but will not accumulate seniority after the expiration of the period of leave.

15. PREFERENTIAL SENIORITY FOR COMMITTEEMEN

The Union submitted to the Board a draft clause that committeemen will head the seniority lists in their respective jurisdiction during their term of office. This Board appreciates the desire of the Union to see that experienced officers are continuously available to service employees' grievances, and otherwise to assist in the administration of the collective agreement. As the Board understands it, the Union seeks preferential seniority for committeemen only with respect to lay-offs. On this basis the Board recommends that the parties include in their collective agreement a provision that committeemen be given preferential seniority according to the following formula: if, at the date of the execution of this agreement the number of employees in any section is less than 75, the committeeman for the section shall be entitled to preferential seniority until the number of employees in the section is reduced to 15 or less. If the number of employees in any section is, at the date of the execution of the agreement, more than 75, the committeeman in the section shall be entitled to preferential seniority until the number of such employees is reduced to 25 or less.

The Board desires to record its appreciation of the assistance which it obtained from the representatives of the parties who appeared before it. All of which is respectfully submitted.

Dated at Toronto this 23rd day of July, 1945.

Report of Board in Dispute between the Dominion Button Company, Kitchener, Ont., and National Union of Textile Workers

On July 14 the Minister of Labour received the Report of the Board of Conciliation established to deal with a dispute between the Dominion Button Company, Kitchener, Ont., and National Union of Textile Workers.

The personnel of the Board was as follows: His Honour Judge Ian Macdonell, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Lawrence

Sefton and A. W. Boos, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and re Dominion Button Company, Kitchener, Ont., and National Union of Textile Workers.

The Honourable HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings, and now submits its report. At all sittings the Union was represented by Mr. Arthur Williams, Secretary-Treasurer of the National Union, accompanied by Mr. Gus Miller, President of the Local; Mr. J. K. Sims attended as Counsel for the Company, and the Company was represented at the hearings by Mr. M. C. Gross, President; Mr. A. C. Gross, Secretary-Treasurer; and Mr. M. C. Brubaker, a Director of the Company.

The Board is grateful to those representatives of the parties who came from out of town so that it was possible to hold all sittings in Toronto.

All clauses of the Collective Bargaining Agreement have been settled with the exception of those dealing with:

- (1) Hours of Work;
- (2) Maintenance of Membership;
- (3) Check-off.

With regard to (1), the Board is unanimously of the opinion that this matter is governed by the Wages Order as administered by the War Labour Boards and by the Ontario Hours of Work and Vacations with Pay Act. The Board therefore feels that it would be unwise for it to make any recommendation affecting this matter.

The Union commenced organization of button plants in the Kitchener area in the year 1940. In 1941 a strike took place on the issue of wages and Union recognition and involved three plants. The strike, insofar as Dominion Button Manufacturers Limited was concerned was of brief duration and was settled through the intervention of the Ontario Department of Labour when certain wage adjustments were made. There was, however, no recognition of the Union involved in the settlement. The Union continued its organizational activities in the Kitchener area resulting in the certification of the Union as bargaining representatives for certain employees of the

Company by the Ontario Labour Relations Board in December, 1944. It is clear that at that time only a very few members of the Union were paid up members, the great majority having signed membership cards without having paid an initiation fee or any dues. It was also clearly established that those who had not paid an initiation fee or dues only intended to do so on the consummation of a collective Agreement. It also appears, however, since certification and while negotiations toward the consummation of a collective Agreement have been in progress that 69 of the 103 persons who constitute the bargaining unit have signed authorities requesting a check-off.

The present Company was started to take over an existing business by about twelve workmen who had been employed by the previous owners. Substantially the same group is still in control of the business. In the Bargaining Unit over thirty employees have had more than twenty years' service with the Company; from this it may be seen that the turnover of labour is by no means large.

It is not thought necessary to deal in this report with the general arguments for and against the various forms of union security. They have often been fully set out in reports of Conciliation Boards; in fact in the argument before the Board it was more or less assumed that the Board was familiar with these arguments. The feeling of the Board is that in disputes of this nature all the surrounding circumstances should be taken into consideration before recommending any form of union security. In particular it was felt that the length of time over which the Union can demonstrate satisfactory relations at the plant is of paramount importance.

In this case, it is considered that while matters may well develop satisfactorily in the future, much more is necessary than has been shown by the Union before a Union Shop should be forced upon the Company. If a Union Shop, or some form of maintenance of membership, should be adopted in the future, it is felt that a much greater degree of harmony would result if this were accepted as a result of mutual trust and experience than if it were brought into effect at this stage more or less by compulsion. It should also be remarked that there are a certain number of employees who appear to be opposed to joining the Union at the present time, some of whom have been in the employ of the Company for many years.

Under the circumstances, the Board does not feel, for the reasons indicated, that this is a case in which they should recommend a Union Shop or Maintenance of Membership clause at the present time. In view of the fact, how-

ever, that a substantial percentage of the employees have signed cards in which they state their desire for some form of union security, the Board recommends the following clause be inserted in the agreement:

"Upon presentation of proper authorization from the employee, the Company agrees to deduct One dollar each month from his earnings as Union dues during the duration of this agreement, such monies to be remitted monthly to the Financial Secretary of the Local Union."

In making the above recommendation the Board feels that it has adequately protected the rights of the old employees who do not wish to join the Union. It has also given effect to the desires of those employees who have clearly indicated a desire in writing for a form of check-off. In the submissions filed on behalf of the Company it was argued that as there were actually few paid up members of the Union, the Company should not be asked to afford artificial support to an organization that has not been able to collect its own dues, particularly as the representatives of the Union admitted that there was an understanding within the Union organization that no dues would become due and payable

until an Agreement had been entered into with the Company. At least one member of the Board was at first inclined to the view that under these circumstances the Board should not recommend a check-off even in a voluntary revocable form. In a spirit of harmony and in order to enable the Board to present a unanimous report, this member of the Board now concurs in the draft clause pertaining to check-off as set out above. We feel that the written requests signed by a substantial number of the employees mentioned are, at least to a large extent, a sufficient ground on which to base our recommendation with respect to check-off.

In conclusion, the Board wishes to express its appreciation of the assistance obtained from all parties, and the able arguments presented.

All of which is respectfully submitted.

Dated this 4th day of July, 1945.

Sgd. I. M. MACDONELL,
Chairman.

Sgd. L. SEFTON,
Employees' Nominee.

Sgd. A. W. BOOS,
Company's Nominee.

Conciliation Work of the Industrial Relations Branch During July, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

OFFICERS of the Industrial Relations Branch dealt with 17 industrial disputes during the month of July, involving 19,004 work-people employed in 68 separate establishments. Of these, eleven were new disputes which originated during the month and 6 were situations which had been untermiated as of June 30 and received further attention in July. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the Conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fredericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal

are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of Industrial Relations and staff are situated in Ottawa.

Brief summaries of a few of the cases of chief interest are given below:—

Packing Plant Workers, Hamilton, Ont.—In mid-June a request was received for the appointment of an Industrial Disputes Inquiry Commissioner to investigate a charge that an employee of the F. W. Fearman Company Ltd., Hamilton, Ont., had been discharged for the reason that she was a member of or working on behalf of Local No. 239, United Packing-house Workers of America. Following a preliminary investigation by Mr. R. H. Hooper, Industrial Relations Officer, and upon a request by the Minister of Labour for Ontario, the Dominion Minister of Labour appointed His Honour Judge W. T. Robb, of Orangeville, Ontario, as a Commissioner for the purpose of making a formal investigation under Section 5 of Order in Council, P.C. 4020. A hearing was called in Hamilton on July 23, attended by representatives of the Company and the Union. When the person on whose behalf the complaint had been lodged failed to appear, the Union's charge was dismissed.

Metal Products Workers, Longueuil, P.Q.—During July the Minister of Labour received a joint request from Lodge 1596, International Association of Machinists, and the Dominion Engineering Works Limited, Longueuil, P.Q., for the appointment of the chairman of an Arbitration Committee under the terms of the collective agreement between the parties. Mr. Bernard Rose, K.C., of Montreal, was named

as chairman of the three-man Committee. The dispute involved the dismissal of two employees on the ground that they had violated company rules in regard to punching time clocks. In a majority report of the Committee of Arbitration the dismissal of one employee who had been previously warned for similar offences was sustained; the Committee ruled that the second employee had suffered prejudice since he was not given any previous warning and, while not condoning his offence, recommended his reinstatement. A minority report stated that the recommendation was outside the Committee's terms of reference.

Coal Miners, Nova Scotia and New Brunswick—In previous issues of the *LABOUR GAZETTE* (March, April, June, July, 1945) reference was made to a threatened strike over wage demands by members of District 26, United Mine Workers of America, who are employed by seventeen coal mine companies in the Maritime Provinces, and to negotiations which followed upon the report of an Industrial Disputes Inquiry Commission under the chairmanship of the Honourable Mr. Justice W. F. Carroll, of Halifax, N.S. During July conversations took place between the Minister of Labour and officers of his Department and the Executive Board of District No. 26. The Board was accompanied by the International Secretary-Treasurer of the United Mine Workers of America, Mr. Thomas Kennedy. Pursuant to a proposal made by the Union on July 27, in which it was intimated that the Union was prepared to engage in a program seeking to increase coal production and to stabilize conditions by entering into a contract with the operators for a period of two years as from the expiration of the last contract year, the Minister of Labour on July 31 informed the Union that the Government would authorize an increase of 33 cents per ton in the price of coal on the understanding that the increased revenue derived would constitute a fund in the hands of each operator which would be passed on to the miners upon whatever terms result from collective bargaining negotiations between the Union and the operators. It was further stipulated that the new contract between the operators and the Union would be for a period of two years, effective as from February 1, 1945, to February 1, 1947. On August 3 the District Executive and the International Secretary of the Union joined in accepting the Government's proposal.

Journemen Plumbers, Windsor, Ontario—A strike occurred at Windsor, Ontario, on July 12, 1945, when some 70 employees of sixteen plumbing and heating contractors quit work because they were denied an increase in wage rates from \$1.21 to \$1.25 per hour. The workers belonged to Local 552, United Asso-

ciation of Journeymen Plumbers and Steamfitters of the United States and Canada, and most of the employers were members of the Windsor Master Plumbers Association, a branch of the National Association of Plumbing and Heating Contractors. The background of the dispute was that pursuant to an understanding between the Master Plumbers Association and the Union, an application had been made to the Regional War Labour Board for Ontario for a 4-cent increase in wage rates. The application was not opposed by the employers' Association and was granted. Later, an appeal was lodged with the National War Labour Board by the Master Plumbers Association which claimed that its acquiescence in the application was conditional upon securing permission to pass the increased costs along to the consumer. This had been denied and certain of the employers involved pleaded inability to pay the increase. After hearing

the appeal the National War Labour Board revoked the increase on the ground that no gross inequality or injustice had been proved. When the strike occurred, Mr. H. Perkins, Industrial Relations Officer, Toronto, was assigned to the case but was unable to secure a resumption of work. It was intimated to the Union that the case could be re-opened for reconsideration by the National War Labour Board only upon the presentation of new evidence. On July 25 a new application for the establishment of a \$1.25 per hour wage rate was submitted, this time by a group of seven employers designating themselves as the Windsor Plumbing and Heating Contractors Association, who stated that they had not been parties to the earlier appeal. As the LABOUR GAZETTE went to press the case had not been disposed of and the men were still on strike.

Workmen's Compensation in British Columbia

THE twenty-eighth Annual Report of the British Columbia Workmen's Compensation Board, covering the calendar year, 1944, was issued recently.

In a brief historical summary, it is pointed out in the report that during the past 28 years 873,177 workmen have filed claims under the British Columbia Workmen's Compensation Act. Death resulted in 5,508 of the accidents reported, an average of 197 for each year. In 1944, awards were made to 1,057 workmen who sustained some permanent, partial, or permanent total disability, bringing the total number of such awards in the 28 years to 18,444.

Over 220,000 men and women were protected under the Act in 1944. A total of 60,463 accidents were reported during the year, of which 178 were fatal. This was a decrease of 8,192 from those reported in 1943 and the number of applications for compensation filed in 1944 declined nearly twelve per cent from the preceding year. Of those injured, 2,537, or eight per cent claimed to be carrying some type of accident insurance other than that provided under the Act.

The percentage of accidents resulting in three or more days loss of time were distributed by industries as follows: lumber

industry, 30 per cent; steel shipbuilding, 17 per cent; construction (other than steel shipbuilding), 16 per cent; general manufacturing and delivery, 14 per cent; metal mining and smelting, five per cent; coal mining, four per cent; railroading groups, four per cent; navigation, three per cent; all other classes, seven per cent.

The total revenue of the Board for 1944 amounted to \$11,889,354.63, of which \$7,716,976.02 was derived from 1944 payroll assessments; \$1,306,079.82 from assessments, 1943 and prior years; \$46,646.56 from penalties; \$747,270.96 from medical aid contributions; and \$791,333.21 from medical aid dues from workmen. The remainder of the revenue accruing to the Board in 1944, amounting to \$1,281,048.06 was on account of interest on investments, premiums on U.S. funds and profits realized on sales.

Disbursements during 1944, totalled \$12,605,596.06, the major component items being: compensation to workmen, \$4,408,527.37; medical aid (physicians, hospitals, drugs, etc.), \$1,181,914.41; pension payments, \$1,910,917.15; investments purchased less sales, \$4,759,546.90; general and administrative expense, \$290,087.30. The cash balance at the end of 1943 amounted to \$1,257,996.75. The balance at the end of 1944, was \$541,755.32.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the *LABOUR GAZETTE* from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining: Coal Mining

CROW'S NEST PASS DISTRICT, ALBERTA AND BRITISH COLUMBIA.—CROW'S NEST PASS COAL CO. LTD., MCGILLIVRAY COAL AND COKE CO. LTD., INTERNATIONAL COAL & COKE CO. LTD., WEST CANADIAN COLLIERIES LTD., HILLCREST MOHAWK COLLIERIES LTD.—AND THE WESTERN CANADA FIREBOSSSES ASSOCIATION.

Agreement to be in effect from April 12, 1945, to September 30, 1946, and thereafter from year to year, subject to notice. This agreement governs the wage rates and working conditions for firebosses or examiners whose duties include the firing of shots, the supervision of districts, etc. The companies recognize a local committee in each mine or colliery for the settlement of disputes. Check-off: dues and assessments to be collected by check-off.

Hours: hours to continue as previously, firebosses working an average of 26 days per month. There are ten recognized holidays and examiners will not be asked to work on these days nor on Sundays if there is no need for their services.

Wages for examiner: \$221 per month. Vacation: two weeks with pay for employees with one year's continuous service. Sick leave: two weeks with full pay in any one year for absence due to bona fide illness; if absent and receiving compensation due to an accident received in the course of his employment, an examiner will be paid his full salary less compensation received up to a period of six months.

Employment: examiners' sons to have the same privilege of obtaining employment as miners' sons and preference over outside men. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Edible Plant Products

WINNIPEG, MANITOBA.—FOUR BAKERIES AND CANADIAN BAKERY WORKERS' UNION, LOCAL No. 1.

Agreement to be in effect from February 1, 1945 to January 31, 1946, and thereafter from year to year subject to notice. The employers agree to recognize the union as the sole bargaining agency for all employees. All employees at present employed must join the union, and new employees must join within 30 days; all employees must remain members in good standing for the life of the agreement.

Hours: 48-hour week for inside employees (less 8 hours for each public holiday therein). Bakery salesmen have 5½-day week, Wednesday afternoon off. Overtime to be paid for at time and one-half rate. Vacation of two weeks with pay, between May 1 and Sept. 30, for employees after twelve months' service; salesmen to be paid any surplus over \$28 per week earned by route during their holidays; if statutory holiday occurs during vacation period, employee entitled to extra day.

Wage rates: doughmen \$30 to \$33 per week, assistant doughmen \$26 to \$29; ovenmen \$29 to \$31.50; oven dumpers \$24 to \$26.50; dividermen and table hands, \$25 to \$30; oven feeders, machinemen and improvers \$20 to \$25; bakers' helpers \$18 to \$25; shippers and maintenance men, \$27 to \$30; checkers, stable men and firemen \$25 to \$28; city deliverymen \$26 to \$29; cleaners \$20 to \$25; city salesmen \$17 per week plus commission on sales; country truck salesmen \$21. plus commission. Guaranteed minimum wages for regular salesmen \$28. after first five weeks, for relief and spare salesmen \$30. Night shift workers to be paid bonus of 5 cents per hour. The company is responsible for all returns of stales and culls. Definitions of duties of each class of employees are included. Provision is made for seniority rights and grievance procedure.

Manufacturing: Wood Products

MONTREAL, QUEBEC.—WOODHOUSE CO. LTD. AND INTERNATIONAL UNION OF UPHOLSTERERS OF AMERICA, LOCAL 302.

Agreement to be in effect from October 20, 1944 to October 19, 1945. The company recognizes the union as the sole bargaining agency for all employees. All employees must within 15 days become members of the union and must remain in good standing.

Hours: 44-hour week, Monday to Friday. Overtime to be paid at rate of time and one-half. Public holidays to be paid double time.

Wage rates: to be submitted to Regional War Labour Board for adjustment.

Provision is also made for seniority rights and settlements of disputes.

Transportation and Public Utilities: Steam Railways

CANADIAN PACIFIC RAILWAY COMPANY AND THE BROTHERHOOD OF SLEEPING CAR PORTERS.

Agreement to be in effect from June 1, 1945 and thereafter subject to 30 days' notice.

Hours: 240 hours' service, or less, in assigned service, to constitute a basic month's work. All time worked in excess of 240 hours shall be credited extra. Sleep periods: where the requirements of the service permit, employees will be released from service for sleep, 4 hours each night on runs of over 12 hours; on extended special tours (72 hours or more elapsed time), a maximum of 8 hours sleep will be allowed out of 24 hours. Not less than 96 hours off duty each month in 24 hour periods or multiples thereof allowed at designated home terminal.

Monthly wage rates for sleeping car porters, including the cost of living bonus and the National War Labour Board award: for sleeping car porters, from \$112.41 during first six months to \$127.41 after 48 months, compartment car porters \$132.41, porters in charge of sleeping car \$20 per month extra, if in charge of more than one car to be paid at conductor's minimum rate, parlour car porters (including those in charge) \$132.41. Any employee required to perform interior cleaning of car at layover points shall receive 70 cents per car additional pay. Employees deadheading to receive credit of 12 hours for each 24-hour period. Porters in service or deadhead will be served meals in dining cars at half rate, and will have free sleeping accommodation during layovers or rest periods at terminals away from home station, if possible.

Provision is made for seniority rights.

Transportation and Public Utilities: Electricity and Gas

TOWNSHIP OF YORK (TORONTO VICINITY), ONTARIO.—YORK TOWNSHIP HYDRO SYSTEM, AND NATIONAL ORGANIZATION OF CIVIC, UTILITY AND ELECTRICAL WORKERS. BRANCH No. 1.

Agreement to be in effect from January 1, 1944, to December 31, 1945, (Revised February 5, 1945). The company recognizes the Union as bargaining agency for all employees. All employees who are or who become members of union must maintain their membership.

Hours: line gang—40-hour week; meter installers, readers, substation men, inspectors, consumers' troublemen, Bicknell clerks, and stock-keeper, 44 hours; line trouble men, street lighting patrol and repair, and office caretaker 48 hours; meter testing and clerical help 38 hours per week. Overtime is paid at time and one-half or double time, according to time when worked. In certain cases time off is given in lieu of extra pay. Employees working 38-hour week receive no pay for overtime. Statutory holidays paid at regular rates. Two weeks' vacation with pay for employees with one year's service. Two weeks sick leave with pay when required for employees with one year's service.

Wage rates: linemen 81 cents to 96 cents per hour; troublemen, same rate plus 9 cents an hour; patrolmen 76 cents; groundmen 66 cents to 70 cents; substation mechanics 65 cents to 96 cents; meter installation and removal 65 cents to 94 cents; line truck driver 66 cents to 72 cents; inspectors and consumers' troublemen \$27.50 to \$32.50 per week; meter repair and testing \$25 to \$32.70; meter readers \$25 to \$29; Bicknell clerks \$25 to \$30; clerical staff, from \$15 to \$46; storekeeper \$30 to \$32; caretaker \$25 to \$29. Cost of living bonus added to above rates.

Provision is also made for seniority rights and grievance procedure. Transportation is provided for all employees, as well as majority of necessary tools and work material.

Collective Agreement Act, Quebec

In Québec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the

same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning the legislation is given in the LABOUR GAZETTE, January, 1943, page 86. Proceedings under this Act and earlier legislation have been noted in the LABOUR GAZETTE monthly since June, 1934.

Recent proceedings under the act include the extension of three new agreements and the amendment of seventeen others, all of which are noted below. Two corrections of previous Orders in Council are also published. A request for a new agreement for the ornamental iron industry at Montreal was published in the *Quebec Official Gazette*, June 23. Requests for the amendment of the building trades agreement at St. Jérôme, uncorrugated

paper box industry for the province, retail trade agreement at Chicoutimi, garage employees at Quebec, men's and boys' clothing industry for the province and firefighters at Sherbrooke were also gazetted June 23. Requests for the amendment of both the work and fine glove industries for the province were gazetted June 30. Requests for a new agreement for retail stores at St. Hyacinthe, and for clerks and accountants at Jonquière were published July 7. Requests for the amendment of the agreements for barbers at Sherbrooke, and wholesale fur trade at Montreal were gazetted July 14.

Orders in Council were also published approving or amending the constitutions and by-laws of certain joint Committees and others approving the levy of assessment on the parties.

Manufacturing: Fur and Leather Products

RETAIL FUR INDUSTRY, MONTREAL, P.Q.

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., November, 1944, p. 1368; April, 1945, p. 517). Agreement to be in effect to May 1, 1946 or April 30, 1947, if no notice given. Minimum weekly wage rates: cutters \$40 and \$46, operators \$30 and \$37.50, finishers \$27.20 and \$33.20, blockers \$22 and \$30, female operators \$23.50 and \$30, female finishers \$23.50 and \$28.50, female coat closers \$30, lining makers \$28.50, apprentices (cutters and trimmers) from \$30 during first six months to \$35 during fifth six months. Vacations: $\frac{1}{2}$ day for each month's service up to 6 days a year.

No contracting or subcontracting or piece work shall be permitted whether inside the factory of the employer or in another establishment, or elsewhere, unless all the employees in the shop are working and all said contractors or subcontractors have duly registered with the Parity Committee. However, for the duration of the war, work may be done at home in September, October, November and December providing all employees in the shop are working and names of employees engaged in homework are submitted in writing to the Parity Committee.

Another Order in Council dated July 6, and gazetted July 14, corrects the Order in Council of June 8. This correction does not affect the summary given above.

WORK GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry, (L.G., June, 1943, p. 812; July, 1944, p. 867; September, p. 1141).

Hours: 48-hour week. Overtime for males is payable at 30 cents per hour in excess of regular rates, and 15 cents per hour for females. Vacation: one week with pay each year.

FINE GLOVE INDUSTRY, PROVINCE OF QUEBEC

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., June, 1943, p. 812; July, 1944, p. 867). Hours: 49-hour week, with no change in overtime rates.

Manufacturing: Textiles and Clothing

MEN'S AND BOYS' HAT AND CAP INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., April, 1940, p. 389; October, 1941, p. 1314; April, 1943, p. 489; July, 1944, p. 867).

Minimum weekly wage rates: cutters \$30.35, operators \$28.15, blockers, \$22.09, lining makers \$18.60, hand finishers \$15.55, general hands \$13.45. Every employee earning up to and including \$24.99 per week shall receive an increase of \$1 per week, and every employee earning \$25 and over per week shall receive an increase of \$1.50. Vacation: one week with pay after one year's continuous service.

Manufacturing: Pulp, Paper and Paper Products

PAPER BOX MANUFACTURING (UNCORRUGATED), PROVINCE OF QUEBEC.

An Order in Council, dated June 8, and gazetted June 16 and corrected in the June 23 issue, makes obligatory the terms of a new agreement between l'Association Patronale du Commerce de Quebec inc. and Le Syndicat national catholique des Employés de l'industrie des Boîtes de Carton. Agreement to be in effect from June 16, 1945 to April 1, 1946, and thereafter from year to year until 45 days' notice. Territorial jurisdiction comprises Zone I, the island of Montreal and the territory comprised in a radius of fifty miles from its limits; Zone II the remainder of the province.

Hours in Zones I and II: 50-hour week; firemen (stokers), enginemen 60-hour week. Overtime is payable at time and one-quarter up to 55 hours, time and one-half thereafter; for firemen and enginemen time worked in excess of 60 hours is payable at time and one-quarter the minimum rate. Employees working the night shift are to be paid 20 per cent higher than the day rate and overtime is computed on the 20 per cent higher rate. Work performed on specified holidays is payable at time and one-half.

Minimum hourly rates for females in Zone I: foreladies 33 cents; handwork, first class 31 cents; S & S machine operators, top-piece machine operators, covering machine operators, staying machine operators, tyers, stitchers 30 cents; hand-fed table gummers 28 cents; other help 22 cents; apprentices from 24 to 28 cents after third six months. The average minimum wage for females, including apprentices shall not be less than 32 cents per hour. Minimum hourly rates for males in Zone I: foremen 68 cents; scorers 58 cents; cutters on knife 53 cents; end-piece operators, single and double 48 cents; brightwood machine operators 54 cents; feeders 35 cents; four-corner stayer operators 54 cents; feeders 35 cents; slitter operators, bale press operators, circular saw operators, assistant die makers 43 cents; punch operators 38 cents; shippers, truck drivers, automatic glueing machine 48 cents; machinist 58 cents; maintenance and repair men 45 cents; die makers 63 cents; cylinder box press feeders, coil press feeders 41 cents; stationary enginemen: chief enginemen \$39.95 and \$42.95 per week; other enginemen from 52 cents to 68 cents per hour; boiler fireman 42 cents; other

help 28 cents; apprentices from 30 per cent to 15 per cent less the minimum rate after fourth six months. Average minimum rate for male employees shall not be less than 50 cents per hour. Employees working the night shift are paid 20 per cent higher rate. Minimum hourly wages in Zone II: females—forelady 40 cents; hand worker 30 and 38 cents; top piece machine operator, covering machine operator, staying machine operator, stitcher 30 cents; certain classes of apprentices 23 to 28 cents; other help 21 cents; males—foreman 75 cents; scorer 55½ cents; cutter on knife 50½ cents; splitter operator, bale press operator, assistant die maker, circular saw operator 41 cents; colt press operator, truck drivers 47½ cents; stationary engine-men 48 to 63 cents; firemen 38 cents; general helper 45 cents; apprentices on machines from 15 to 30 per cent less than the regular classification; other help 26 cents. Vacation: one week with pay after one year's service.

Wages, labour and apprenticeship conditions of employees of the printing trades working in establishments governed by this decree are governed by decree (L.G., May, 1944, p. 637; Feb., 1945, p. 182; Mar., p. 349; June, p. 873, July, p. 995, and previous issues) relating to printing trades in Montreal and decrees (L.G., Nov., 1943, p. 1530; April, 1944, p. 495; Dec., p. 1515) relating to printing trades in Quebec with the exception of the duration of working hours which shall consist of 48-hour week.

CORRUGATED PAPER BOX INDUSTRY, PROVINCE OF QUEBEC.

An Order in Council, dated June 21, and gazetted June 30, amends the previous Orders in Council for this industry (L.G., April, 1942, p. 483, Sept., p. 1097; Jan., 1943, p. 88; April, p. 490; Nov., p. 1529; Feb., 1944, p. 198; Sept., p. 1141; June, 1945, p. 873).

Hours: 55-hour week for all classes. Overtime for work in excess of 55 hours is payable at time and one-quarter.

Manufacturing: Printing and Publishing

PRINTING TRADES, MONTREAL.

An Order in Council, dated June 21, and gazetted June 30, extends the time of the agreement (L.G., May, 1944, p. 637; Feb., 1945, p. 182; Mar., p. 349; June, p. 873, July, p. 995, and previous issues) to September 30, 1945.

Manufacturing: Metal Products

GARAGES AND SERVICE STATIONS, MONTREAL.

An Order in Council dated June 8, and gazetted June 16, extends the time of the previous Orders in Council, for this industry (L.G., March, 1945, p. 349 and previous issues) to June 24, 1946.

Construction

BUILDING TRADES, THREE RIVERS.

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., March, 1944, p. 359, and previous issues) by providing that urgent work which can not be performed during the day may be done in other periods subject to the daily 8-hour limit. The Parity Committee must be notified. From March 1, to November 1, a 9-hour day is permitted for the first five days of the work week, but hours must not exceed a 48-hour week.

BUILDING TRADES, MONTREAL.

An Order in Council, dated June 21, and gazetted June 30, extends the time of the agreement (L.G., January, 1945, p. 71 and previous issues) to September 30, 1945.

Trade

RETAIL FOOD STORES, QUEBEC CITY

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., June, 1944, p. 754; July, 1945, p. 996). Minimum wage rates are increased by two cents for classes A, B and C in both zones. Other amendments do not affect the summary already given.

RETAIL TRADE, QUEBEC

An Order in Council, dated June 21, and published June 30, amends the previous Orders in Council for this industry (L.G., August, 1944, p. 1007, September, p. 1142). The amendment does not affect the summary already given.

WHOLESALE TRADE, SHERBROOKE

An Order in Council, dated June 8 and gazetted June 16 makes obligatory the terms of a new agreement between the Retail Merchants Association of Canada, inc., and Le Syndicat des Employés de Magasins de Gros des Cantons de l'Est. Agreement to be in effect from June 16, 1945 to June 15, 1946 and thereafter from year to year until 60 days' notice.

Hours in establishments for food products, bonbons, tobacco, cigarettes, hardware, ironmongery, electrical accessories, wall-paper, butter, eggs, fowl: a 49-hour week; a 50-hour week for meat trade; a 54-hour week for grains and corn mashes establishments; a 60-hour week for milk, fruits, vegetable, soft drinks and ice cream establishments. TRADE AND OFFICE EMPLOYEES, ARVIDA, JONQUIERE AND ST. JOSEPH d'ALMA.

A correction of the Order in Council of March 10 (L.G. April, 1945, p. 518). Weekly wage for men in classification junior clerk, stenographer, typist—from \$10.50 to \$26 after fifth year instead of from \$10.50 to \$28.

Service: Business and Personal

BARBERS AND HAIRDRESSERS, QUEBEC

An Order in Council, dated June 8, and gazetted June 16, amends the previous Orders in Council for this industry (L.G., October, 1944, p. 1247; March, 1945, p. 351).

Hours in zone 11, 59-hour week, zone 111, 56-hour week. Hours during which shops may be open are specified.

BARBERS AND HAIRDRESSERS, SHERBROOKE

An Order in Council, dated June 21, and gazetted June 30, amends the previous Orders in Council for this industry (L.G., October, 1941, p. 1315; February, 1942, p. 234; April, 1943, p. 490, May, p. 639). Territorial jurisdiction comprises the city of Sherbrooke, and Lennoxville, Bromptonville, Magog, Windsor, Richmond, Asbestos, East-Angus, Cookshire, and Bury, Danville and within 5 miles of them.

Hours during which barber shops may be open are specified for each municipality.

Minimum wages for barbers or hairdressers \$18 per week plus 60 per cent of receipts over \$26; extra employees \$2 per day plus 60 per cent of receipts over \$3.50.

Minimum prices for services are included. Apprenticeship regulations are also included.

BARBERS AND HAIRDRESSERS, THREE RIVERS

An Order in Council, dated June 21, and gazetted June 30, amends the previous Orders in Council for this industry (L.G., February, 1945, p. 182 and previous issues).

Hours during which barber shops and hairdressing parlours may be open are specified for each zone. Apprenticeship regulations are slightly changed.

FUNERAL UNDERTAKERS, MONTREAL

An Order in Council, dated July 6, and gazetted July 14, extends the time of the previous Order in Council for this industry (L.G., August, 1943, p. 1131) to October 17, 1945.

BARBERS AND HAIRDRESSERS, MONTREAL

An Order in Council, dated July 6, and gazetted July 14, amends the previous Orders in Council for this industry (L.G., November, 1943, p. 1530 and previous issues as therein mentioned) by changing hours during which work may be performed in zone 1. No work shall be performed on Monday.

Labour Law

Labour Legislation in Alberta and British Columbia in 1945

Alberta

THE Alberta Legislature which met on February 22 and was prorogued on April 6, 1945, enacted a new coal mines Act. Amendments were made in the Industrial Conciliation and Arbitration Act, and in statutes dealing with mothers' allowances, hours of work and minimum wages.

Collective Bargaining and Industrial Disputes

The Industrial Conciliation and Arbitration Act was amended to extend, from 14 to 21 days, the time allowed for the Board of Industrial Relations to complete inquiries and report on a dispute.

When there is a dispute concerning the proper bargaining agent of a union, the matter may be referred to arbitration. One arbitrator must be appointed by the employees' bargaining agent, who has been reported by the Board of Industrial Relations as properly elected, and the other by the bargaining agent claiming to have been appointed, or by the employer if the dispute is between a bargaining agent and an employer.

No arbitrator may have any pecuniary interest in the dispute and may not have acted within six months as solicitor, counsel or paid agent of either party.

Persons entitled to vote, where the Board is dissatisfied with the election of a bargaining agent, or where acceptance or rejection of an award is in question, must be employees who, for not less than three months, have been, and who are, members in good standing of a trade union or employees' organization and also employees who have been in that employment for at least three months.

No collective agreement may be made for less than one year, and there must be a provision for its termination at any time after one year on two months' notice by either party. The bargaining agent must continue as such for ten months, but at any time after that period a new bargaining agent may be elected. In a plant or industry which operates on two or three shifts, a vote for the election of a bargaining agent must be taken during each shift.

On the request of the employer, or on receipt of a petition signed by not less than 50 per cent of the employees entitled to vote, or on the direction of the Minister, the Board of Industrial Relations may direct a vote to be taken on any question involving relations between the employer and all or some of his employees or in case of a dispute concerning the classification of the employees as to which an expression of the employees' opinions is desirable. In any inquiry held under the Act, the Board of Industrial Relations is to have the powers conferred upon commissioners by the Public Inquiries Act.

An amendment clarifies the prohibition of a strike to stipulate expressly that no strike may occur until a majority of the employees affected have voted in favour of a strike.

No trade union or organization of employees and no person acting on its behalf may encourage or engage in a "slow-down" or any other activity designed to restrict production, but this provision may not be interpreted to limit a trade union's legal right to strike and provisions in a collective agreement for the safety or health of the employees may not be considered a "slow-down" or designed to restrict or limit production.

Hours of Work

The Hours of Work Act is amended to strike out as unnecessary the definition of "overtime" which is now defined in the Minimum Wage Acts. The Act now provides that working hours of all employees must be limited to eight in a day and 48 in a week. Previously, the maximum hours for males were nine in a day and 54 in a week. Another change stipulates that an order may provide for consecutive rest-periods in relation to a work-period of four weeks instead of in relation to a work-period of one month.

Minimum Wage Acts

Both the Male and Female Minimum Wage Acts were amended to bring them into conformity with the change in the Hours of Work Act already noted. In each case the

definition of "overtime" is amended to mean time worked in excess of nine hours in any one day or of any lesser number of hours fixed under the Hours of Work Act, or, time worked in excess of 48 hours or any lesser number of hours prescribed under the Hours of Work Act in any one week.

Both Acts now require employers to pre-serve for 12 months all records of earnings and working-hours of employees. Under each Act an employee who has received less than the minimum wage may sue for the difference, but an action must be brought within 12 months of the date when the cause of action first accrued. An employee must give notice of intention to bring an action within six months of leaving the employment, or if he or she does not leave, within six months of entering the employment or of the making of the minimum wage order, whichever is later. The Female Minimum Wage Act is amended to state that the action must be limited to wages for the six months prior to bringing the action or prior to termination of employment. The Male Minimum Wage Act introduces a new section stating that contraventions of Board orders are offences under the Act.

The Coal Mines Regulation Act

The Coal Mines Regulation Act repeals the Mines Act, 1939. New provisions in the Act are noted below.

Mines must be inspected by the Electrical Inspector and his report on his inspection must be posted at the mine. An inspector may examine any report, document, instrument, lamp, or anything he may in writing demand, and where there is an accident he may take possession of any of these things, provided he gives a receipt for it and leaves it with the nearest detachment of the Royal Canadian Mounted Police where the owner or manager may have access to it at any reasonable time.

New employees and those who have not been employed in a mine within six months preceding re-employment must furnish medical certificates, in a form satisfactory to the Workmen's Compensation Board, both as to physical fitness and eyesight.

The minimum age for employment of men in charge of or operating any engine, windlass or gin, or any machinery, ropes, chains or tackle connected therewith, used for conveying persons in or about a mine, has been reduced from 21 to 19 years, but a hoisting engineer in charge of a hoisting shaft must be at least 21.

Wages must be paid every two weeks on Saturday, rather than twice a month as formerly, and each payment must cover wages earned up to seven days before the date of payment.

Where a check-weigher or check-measurer has been removed from office by a court order on the complaint of the mine-operator, the period of his disqualification for such employment at any mine has been reduced from a period of three years to one year from the date of the judge's order.

Several changes have been made with respect to certificates. The Act adds as an alternative to three years practical experience in a coal mine that a candidate for a third-class certificate of competency must hold a diploma or degree in scientific and mining training granted by an approved educational institution and must have had two years experience underground, including one year at the face. New qualifications for a certificate of competency as a mine electrician include a minimum age of 21 and, as alternatives to the two years electrical experience in a mine previously required, four years practical electrical experience together with six months electrical experience in a mine, or a degree or diploma from a recognized electrical school with two years practical experience, six months of which must have been in a mine. The holder of such a certificate must, within two years, produce a certificate of qualification in first-aid and ambulance work. The Act requires a mine electrician to hold a certificate of competency as a mine electrician, but adds the stipulation that in the case of mines using electrical energy not exceeding 30 kilowatts, the Chief Inspector may, under certain circumstances, grant a provisional certificate.

The Act no longer distinguishes between Class "A" and Class "B" miners' certificates. To qualify for a miner's certificate a man must be at least 20; have a working knowledge of the English language; have had 12 months underground experience, six months of which must have been at the working face; and must satisfy the Miners' Board upon examination that he is competent to take charge of a working face. Provisional miners' certificates granted by a District Inspector are to be valid only within the district assigned to him, and are to be in effect only until the next examination held by the Board. The Lieutenant-Governor in Council may make regulations for granting permits enabling a person who does not hold a miner's certificate to be employed at the working face under the supervision of a properly certificated

person, provided the number of permit-holders does not exceed the number of holders of miners' certificates.

Provision is made for an electrician, mechanic, pipe-fitter or any skilled employee, when the mine is in normal operation, to repair coal-cutters, machinery, cables, motors or other equipment at the working face, notwithstanding that he is not the holder of a miner's certificate. Wherever the mine is not in normal operation, such workman must be accompanied by a person who holds a first, second or third-class certificate. Where the Minister cancels or suspends a certificate because of an infraction of the regulations, the offender's employment is not restricted in respect to any lower certificate he may hold. The Minister may authorize the Chief Inspector to grant provisional certificates when there is a shortage of experienced officials. Certificates may be issued to qualified persons holding certificates granted in other provinces and other parts of the British Empire.

No person may act as manager of more than one mine at the same time unless he has the written permission of the Chief Inspector and the mines are operated by the same owner. Provision is made for the appointment of an assistant manager who is to have the same powers and duties as a manager and is to be subject to the same responsibilities. In a mine other than a small mine, the overman may not act as examiner or shot-lighter except with the written approval of the District Inspector. The Chief Inspector may, in a grave emergency, issue a provisional third-class certificate to any person he considers qualified to act as an examiner. Every report to be recorded in a book must be countersigned by the manager within three working days from the day on which the report is made. All accidents must be reported by the examiner or outside foreman on a special book. Workmen employed in a mine must, at the request of the owner, agent or manager, appoint a committee to inspect the mine, and the cost of such inspection must be borne by the owner.

Various new provisions have been made for ventilation. Any person taking air measurements must chalk his initials and the date of measurement on the roof or sides of the roadway. No person may brush or waft out gas from any working place in a mine. Where an attendant is required at a ventilating door, a nearby place of refuge must be provided. Auxiliary or booster fans underground must be installed so that there may be no recirculation of draft. Any part of a mine

must be considered to be in a dangerous condition if the percentage of inflammable gas in the air is two and one-half or more.

Other precautionary measures include the inspector's power to require the retaining of solid pillars where there are overlying accumulations of water or the dewatering of the area. The maximum number of men allowed to ride in a cage must be approved by the District Inspector. The rope used on cylindric-conical drums must be examined every six months instead of three months but the safety factor of the rope must not be less than eight when new.

The rules for the care, handling and use of explosives in the old Act have been repealed and provision made for regulations on these matters by the Lieutenant-Governor in Council.

Employment of Boys in Bowling Alleys

The Billiard Room Act prohibited the employment in a billiard room of any person under 18. An amendment stipulates that, during the war, a boy or girl between 16 and 18 may set up pins in a bowling-alley, but only with the written consent of parent or guardian.

Mothers' Allowances

An amendment in the definition of "widow" in the Mothers' Allowance Act reduces the period of desertion necessary to entitle a woman to the benefit of the Act from five years to three years, and gives the Superintendent in charge of the Act authority to determine when a woman qualifies. "Widow" now also includes a common-law wife who has been such for five years before a man's death, and who has borne children registered as his.

Municipal By-Laws

The Edmonton Charter gives authority to the City Council to pass a by-law for establishing a plan of group insurance for the civic employees. The Council may contribute to any such plan and require contributions by deductions from employees' earnings.

Under amendments in the Calgary Charter, the City Council, subject to certain statutes, may by by-law require garages and gasoline service stations to remain closed for such hours as the Council may determine. The Council may exercise this power provided that a petition has been received to this effect, signed by at least two-thirds of both owners or lessees and employees of the garages or service stations.

Housing

Statutes were enacted to promote better housing in the Province and provision was made for co-operation with the Dominion under the National Housing Act.

The National Housing Loans Act (Alberta) was enacted to facilitate the making of loans under the National Housing Act, 1944. Certain statutory provisions do not apply to loans under the National Housing Act secured by a mortgage on lands in the Province. Provisions in such mortgages for the mortgagor to become the tenant of the mortgagee, at a fair and reasonable annual rent, are to be valid. The Mechanics' Lien Act, as it existed prior to March 30, 1943, is to apply to any land and premises subject to a mortgage under the National Housing Act.

The Alberta Housing Association Act provides for the incorporation of an association

of that name to promote the building of houses in the province, and to lend money on mortgage to assist in such building. The first or provisional directors of the Association are to include two members of the provincial Government, three deputy ministers, civil servants and municipal appointees.

Sections of the Edmonton Charter enacted in 1938 dealing with housing are replaced by new clauses to bring under the National Housing Act, 1944, the city's housing projects undertaken under the Dominion Housing Act of 1935. The Act as amended empowers the Council to promote the incorporation of a limited liability company for the purpose of doing business as a lending institution or as a limited dividend housing corporation. It may act as a limited dividend housing corporation and carry on low rental housing projects as defined in the National Housing Act.

British Columbia

During the session of the British Columbia Legislature which began on February 6 and ended on March 28, 1945, the Social Assistance Act was passed, and laws relating to attachment of wages, old age pensions, municipal superannuation and conciliation boards were amended.

Attachment of Wages

The section of the Small Debts Courts Act has been amended which provided for the attachment of debts and exempted from attachment wages up to \$60 in the case of a married person or one with dependants and up to \$30 in the case of one unmarried. In this section the words "debts, obligations, and liabilities owing, payable, or accruing due," or any similar expression, now include wages or salary due or payable within four days after the day on which an affidavit is sworn.

Conciliation Board Members

The Wartime Labour Relations Regulations Act was amended to add a section permitting a member of the Legislative Assembly to act as a member of a Conciliation Board with an allowance or expenses for his services.

Forty-Eight-Hour Week for Firemen

The Fire Department Hours of Labour Act grants two days of 24 hours each off duty per week to each employee of a fire department in cities and other places in which there is a paid fire department. The Act is now amended to limit the hours on duty in any one week to 48, or an average of 48 hours in a week when

computed over a number of weeks. Where, however, the Fire Departments Two-Platoon Act applies, it must be complied with. These amendments are to come into effect on Proclamation, but if one year after the end of the war a date has not been fixed, the Act will automatically take effect on the expiry of that year.

Municipal Employees' Pensions

Amendments in the Municipal Superannuation Act clarify certain sections and set out the conditions under which the net liability of the service pensions is to be computed with respect to each employer.

Old-age Pensions

An Act, effective April 1, 1944, amends the Old-age Pension Act to enable an agreement for a scheme of old-age pensions in the Province to be made with the Dominion pursuant to any past or future Dominion statute. Previously, the Act specified that the agreement was to be made pursuant to a Dominion statute "relating to old-age pensions."

Social Assistance

The Social Assistance Act which came into operation April 1, 1945, covering generally any form of aid necessary to relieve destitution and suffering, is to be administered, under the Provincial Secretary, by a director of welfare, who is empowered to grant assistance, without discrimination as to race, colour, creed, or political affiliations, wherever individuals or

families are unable to provide for their needs through their own efforts. "Social assistance" means assistance in money or in kind, institutional or foster-home care, nursing, counselling service, health services, occupational training or therapy for indigents and mentally or physically handicapped persons, and aid to municipalities, boards, commissions, organizations or persons providing aid, care or health services to indigents, sick or infirm persons.

Funds are available for aid to any municipality or village which is maintaining social services on a basis consistent with the provisions of the Act. Such aid does not, however, relieve municipal authorities of any duties imposed on them by law.

As regards counselling service, health services or occupational therapy, the Act stipulates that these may be provided without reference to the conditions as to "residence" set out in the Residence and Responsibility Act.

Subject to the approval of the Minister, the director may make regulations and formulate policies not inconsistent with the Act on both a local and provincial basis. He may supervise the expenditure of funds by local units, and may withhold funds if local authorities fail to comply with the Act. He may grant assistance to any needy person eligible under the Act, and, as approved by the Minister, may recover the moneys spent from the local area in which the person has "residence" according to the Residence and Responsibility Act.

Persons who obtain or seek to aid another to obtain social assistance by fraud, or who fail to report additional resources or income

which become available to them after they have made application for assistance are subject to penalties under the Act.

The Lieutenant-Governor in Council may enter into agreements with the Dominion Government as to any scheme of family allowances, social insurance, or other forms of social legislation in the Province pursuant to any existing or future Act and regulations of the Dominion, and may make reciprocal agreements with Provincial Governments in respect to health and welfare measures.

Bills Not Passed

Several Private Members' Bills were introduced but failed to pass. These included a Bill to provide for an annual two weeks' holiday with pay for all employees, other than those engaged in agriculture. A Bill which would have prohibited any person from engaging in a trade to which the Act was made to apply without a certificate of proficiency was also withdrawn. Three Bills would have amended the Coal-Mines Regulation Act to allow a 16-hour rest between work-periods, time and a half for work under ground in excess of eight hours, a 12 days' holiday with pay after one year's employment, and to require wash-room accommodation when more than 20 persons are employed below ground without the necessity of a petition from the majority. A proposed amendment in the Female Minimum Wage Act would have brought farm-laborers, fruit-pickers and domestic servants within its scope. A Bill to amend the Control of Employment of Children Act, 1944, would have applied the Act to the sale of magazines and newspapers in public places.

Recent Regulations Under Dominion and Provincial Legislation

THE control of the assets and property of the Montreal Tramways Company has been re-vested in the Company. Labour Exit permits may now be issued by Selective Service officers without reference to the mobilization regulations. Veterans' preference in Civil Service appointments has been extended to cover veterans of the war against Japan. Rehabilitation, and Government Services Selection and Release interdepartmental committees have been authorized. The Order in Council permitting 16 year old boys and 18 year old girls to work in coal-mining has been rescinded. The Government Employees Compensation Act now applies to all Government employees in the Yukon and Northwest Territories. Provision has been made for the elimination of

duplication of benefits by way of family allowances and income tax credits for children. Additional regulations under the Canada Shipping Act have been issued to deal with dangerous goods.

In Alberta the trade of a bricklayer and mason, etc. is now covered by the Apprenticeship Act and the Tradesmen's Qualification Act now applies to the beauty culture trade. In Quebec the Apprenticeship Commission of the Building and Engineering Construction Trades of Montreal has been incorporated. The minimum wage order covering maintenance men in public buildings has been amended, and a new order covering the shoe-counter industry in Quebec has been issued. In Sas-

katchewan the regulations governing the payment of mothers' allowances have been amended. Rules for establishing Conciliation Boards in Saskatchewan were issued recently.

Regulations governing the motor vehicle repair trade and building trades have been made under the Saskatchewan Apprenticeship Act.

Dominion

Control of Montreal Tramways Co.

By Orders in Council of June 9 and June 14, 1945, (P.C. 4154 and 4174) the Order of Aug. 11, 1944, (P.C. 6416) as amended, respecting the control of the Montreal Tramways Company (L.G., 1944, pp. 971, 972) was revoked, and control of the company's property and assets re-vested in the company. The Controllers appointed by the Government and any persons acting on their behalf or under their authority are declared to be not liable for anything done or omitted, in the exercise of any power or authority vested in them. (L.G., July, 1945, p. 986.)

Labour Exit Permits

An Order in Council of June 22, 1945, (P.C. 4274) amending the National Selective Service Civilian Regulations (P.C. 2976) of April 24, 1945, revises section 401 (1) to allow Labour Exit Permits to be granted by Selective Service Officers without reference to the National Selective Service Mobilization Regulations.

Veterans' Preference

The Regulation made by Order in Council (P.C. 8541½) of November 1, 1941, to stipulate that veterans of the war against Germany should have preference in appointments to the Civil Service was amended by an Order in Council of June 20, 1945, (P.C. 4320) to include persons who serve in the war against Japan provided they were residents of Canada at the time they became members of the Forces.

Interdepartmental Committee on Rehabilitation

An Order in Council of June 20, 1945, (P.C. 4383) provides for an interdepartmental committee to consider and report upon any problem of an interdepartmental nature, involving policy concerning the re-establishment or rehabilitation of service men or women or the employment of war workers in civilian industry.

In particular the committee is to co-ordinate the activities of the various departments concerned with the matter, to consider arrangements for preferential treatment of men and women from the Forces in private business and in Government employment, and the most effective utilization of the services of the Armed Forces stationed in Canada, pending

their demobilization, in the production of essential food and other commodities. The committee is to consist of representatives of the Departments of Labour (Chairman), Veterans Affairs (Vice-Chairman), National Defence (Army, Naval Services, and Air), Reconstruction, Finance, Agriculture, and of the Privy Council Office (Secretary).

Government Services Selection and Release Committee

An Order in Council of June 28, 1945, (P.C. 4644), provides for an interdepartmental committee to make appropriate recommendations to the Industrial Selection and Release Board established under an Order in Council (P.C. 3683) of May 24, 1945, (L.G., 1945, p. 811). This Government Services Selection and Release Committee will consist of one representative from each of the Departments of Labour, National War Services, Munitions and Supply, Post Office, and National Defence, and one representative of the Civil Service Commission who is to act as chairman and convenor of the committee.

The committee may undertake surveys and make inquiries, besides making recommendations to the Board concerning the discharge or release of persons in the Armed Forces for employment in the Government service. The Industrial Selection and Release Board will review the committee's recommendations and in turn will make recommendations for discharges or releases to the Armed Forces if in the Board's opinion the releases are necessary for efficient administration or are otherwise in the national interest. The Armed Forces will implement the Board's recommendations according to the exigencies of the Service and subject to the concurrence of the man concerned.

Employment of Young People in Coal Mining

An Order in Council of May 17, 1943, (P.C. 4092, L.G. 1943, pp. 739, 740 and 741), issued to deal with the national emergency in coal production, permitted, among other things, the employment of boys at least 16 years old as coal-miners, and women at least 18 years old as surface workers in and around coal mines, regardless of any Dominion or Provincial law.

This provision has now been struck out by an Order in Council, (P.C. 4845) of July 10, 1945. The new Order, however, permits such persons to continue in their employment if they are now employed as coal-mine or surface workers.

Government Employees Compensation Act

An Order in Council (P.C. 3650) of May 4, 1943, (L.G. 1943, p. 859), provided for the application of the Government Employees Compensation Act to Dominion Government employees suffering injury or death in the course of their employment while performing war work in the Yukon or Northwest Territories. Compensation was to be paid as though the accident had occurred in the Province in which the worker was ordinarily resident, and was not affected by the length of time the worker was employed in the Territory concerned.

A new Order (P.C. 4599) of July 10, 1945, which went into effect April 1, 1945, rescinds the 1943 Order. The above provisions are continued but they are extended to all Government employees whether or not they are engaged in war work. Those ordinarily resident in the Yukon or Northwest Territories or their dependants are to be compensated for industrial accidents occurring while performing work in the Northwest Territories, according to the law of the Yukon Territory. The Government employees Compensation Act provides that compensation for Government employees shall be paid according to the law of the provinces in which the accidents occur.

Family Allowances

Provision is made for the elimination of duplication of benefits by way of family

allowances and income tax credits for children by an Order in Council (P.C. 4405) of June 20, 1945, gazetted June 30.

After July 15, 1945, every employer is required to deduct additional amounts of income tax from the salaries or wages of employees who are claiming as dependants children under 16 years of age for whom family allowances are being paid during 1945. The employees in question are to inform their employers in writing regarding the amount of family allowance payments they expect to receive each month during 1945, their marital status, and their estimated earnings for the calendar year 1945. Tables published with the Order list the percentages of family allowances to be offset by additional income tax deductions.

Canada Shipping Act

By an Order in Council (P.C. 3632) of May 22, 1945, gazetted July 7, under Section 456 (1) of the Canada Shipping Act, 1934, certain materials are declared to be dangerous goods, and provision is made for the method of packing and stowing them, the quantities which may be carried in any ship, and the places within a ship in which they may be carried. The regulations now apply to passenger-ships carrying more than twelve passengers, replacing the former limit of more than twenty-five.

Advisory Boards, Labour Department

An Order in Council of July 24 (P.C. 5209) changes the designation of Regional Selective Service Advisory Boards, which will now be known as Advisory Boards, Labour Department. (See elsewhere in this issue, p. 1083.)

Provincial

Alberta Apprenticeship Act and Tradesmen's Qualification Act

By Orders in Council of June 12, 1945, gazetted June 30, the trade of a bricklayer, mason, tile setter and terrazzo worker is designated as a trade coming within the provisions of the Apprenticeship Act, 1944, and a number of trades under the general description of the "Beauty Culture Trade" are designated as trades to which the Tradesmen's Qualification Act, 1936, applies. "Beauty Culture Trade" includes the various beauty treatments for women, and manicuring for men or women. Only persons holding valid certificates of proficiency in these trades are permitted to engage in them.

Quebec Apprenticeship Assistance Act

The Apprenticeship Commission of the Building and Engineering Construction Trades of Montreal was incorporated under section 6 of the Apprenticeship Assistance Act, 1945, by an Order in Council of June 28, 1945, gazetted July 7. The purpose of the Commission is

to give assistance in the apprenticeship of workers, in the adaptation and readaptation of the infirm, of the injured through industrial accidents and of the wounded in war, in the Island of Montreal and a radius of fifteen miles from its limits.

Quebec Minimum Wage Act

Ordinance No. 14, dealing with maintenance men in public buildings in the district of Montreal, was amended in several respects by an Order in Council of June 21, 1945, gazetted June 30. The Order had been renewed in July, 1944, until Sept. 1, 1945, (L.G. 1944, p. 1053); the amendment became effective on June 30, 1945. As before, the Order applies to Montreal Island and the area within a five-mile radius.

Clauses dealing with maintenance of present earnings, and the ages of elevator operators (not permitting males under 17 and females under 18 to operate elevators) are repealed. The title of the Order is now "Real Estate Undertakings" which includes apartment houses, office buildings, tenement houses, dwellings, and any buildings. Not governed by the amended Order are hotels, restaurants, lodging and boarding-houses, refrigeration and public warehouses, places of amusement as defined in the Amusement Tax Act, and charitable institutions and hospitals which are governed by Ordinance 11, 1944. Stationary enginemen and firemen, who remain under Ordinance 6, 1943, and employees of undertakings not principally doing work covered by Ordinance 14, are also not governed by the Order.

By an Order in Council of May 18, 1945, gazetted July 14, a new Ordinance No. 7 governing the shoe-counter industry in the province of Quebec replaces the former one (L.G. 1938, p. 1350). The new Ordinance which went into effect on July 15 and is to remain in force until Jan. 1, 1947, sets out both minimum and maximum hourly rates, the maximum rates being the highest which employers may pay under the Wartime Wages Control Order (P.C. 9384), according to a finding of the Quebec Regional War Labour Board: Apprentices are defined as employees with less than six months' experience. The rates are as follows:

	Minimum cts. per hr.	Maximum cts. per hr.
Moulders, dinker cutters, machine setters and sample makers	40	55
Moulder-apprentices, and female moulders on automatic machines ...	30	40
Wetters	35	45
Head shippers and shippers	30	50
Female moulder-apprentices on automatic machines.	25	30
Other employees	25	40

The regular work-week of the employees is 50 hours, time and one-half the regular rate is to be paid for work over 12 hours a day and 50 a week. Double time is to be paid

for work on Sundays and on the six wartime public holidays (New Year's Day, Good Friday, Dominion Day, Labour Day, Thanksgiving Day and Christmas Day).

Saskatchewan Child Welfare Act Mothers' Allowances

By an Order in Council of June 15, 1945, gazetted June 30, the regulations governing the payment of mothers' allowances (L.G. 1945, p. 916) were amended by the addition of two clauses to Regulation No. 20.

The Regulation deals with proofs which may be required by the Board before the granting of allowances. The new clauses provide for the Board requiring complete information regarding a transfer or an assignment of any property made by an applicant for a mother's allowance before applying to the Board. If the Board believes that the transfer or assignment was made for the purpose of qualifying for the Allowance, it may refuse to make the grant until the property or its equivalent in value is reassigned or retransferred to the applicant.

Saskatchewan Trade Union Act

Rules for establishing Conciliation Boards under the Trade Union Act, 1944, were issued on April 24, 1945, and gazetted April 30. Either or both parties to a dispute may apply for a Board, but no strike or lockout may occur from the time of application to the Minister until three days after he receives the Board's report.

Within three days after receiving an application, the Minister, if satisfied that the dispute is a proper one for reference to a Conciliation Board, may require each party to nominate one member or if they agree on a joint nomination a one-man Conciliation Board may be set up. In default of nominations by either or both sides within seven days, the Minister may appoint representatives. When the two representatives have been appointed, they are to select a chairman within the next seven days. Each member of the Board may receive \$15 a day and travelling expenses.

The chairman has a casting vote, and the report, submitted within 14 days after the dispute has been referred to the Board, must be that of the majority. A supplementary report reconsidering or clarifying any part of the report at the Minister's request is to be issued in the seven days following the request. A copy of the report must be sent to each party to the dispute and must be made available to any interested person.

Saskatchewan Apprenticeship Act

Regulations governing the motor vehicle repair trade and the building trades were issued under the Saskatchewan Apprenticeship Act, 1944, in Orders in Council of June 29 and July 4, 1945, gazetted July 16.

The regulations dealing with the motor vehicle repair trade call for a ratio of one apprentice to three qualified mechanics in addition to one for the first qualified mechanic working for an employer. The minimum term of apprenticeship is 4,000 hours, including the probationary period of three months and credit is to be given for technical and vocational school training. Members of the Armed Forces may be given credit for training under an approved plan of rehabilitation. Apprentices must have from one to three months of technical instruction for each year of apprenticeship and are eligible for any living allowances being paid by the Government. Terms regarding examinations, registration and transfer, cancellation of certificates, reports, inspection and identification cards are also set out. Rates of wages are listed as percentages of mechanics' rates, and begin at 42 per cent for the first three months, increasing to 47 per cent for the next three months, with an increase of 5 per cent for

each succeeding six months period up to a 93 per cent rate for the last six months of the fifth year of apprenticeship. The weekly hours are set at 48.

The general regulations governing the building trades are the same as the above, but the number of apprentices permitted, the wage rates, and the hours of work differ slightly. The ratio in carpentry, painting and decorating, plumbing, and steamfitting is one apprentice to three journeymen, one to two in plastering and sheet metal work, and one to three in bricklaying and masonry with an additional one to three after the end of the second year. Rates in carpentry and sheet metal work begin at 50 per cent of a journeyman's rates and increase 5 per cent each six months until the rate is 95 per cent in the eighth and last six months' period. The rates in plastering and painting and decorating range from 50 per cent and 55 per cent respectively to 90 per cent in the sixth and last six months' period, while in plumbing and steamfitting the range is from 50 per cent to 95 per cent for ten six months, periods. The rates in bricklaying and masonry are 56c, 80c and \$1.00 per hour for the first, second, and third years respectively, and \$1.12 per hour for the fourth year if another year is found necessary. The weekly hours are set at 44.

Committee of Ontario Legislature to Study Labour Relations Legislation

On July 19 the Ontario Legislature approved a motion by the Premier, for appointment of a Select Committee of the Legislature

to inquire into and review all labour relations legislation of the Parliament of Canada and of the Legislatures of the respective Provinces of Canada and of other jurisdiction and all labour relations legislation of this Legislature with a view to the improvement of labour relations legislation which is in force in this Province, and to consider the means which might most advantageously be taken to provide labour relations legis-

lation on a national scale at the conclusion of the present war and to report thereon.

The Committee is to consist of twelve members, of whom eight will be named by the Minister of Labour, and four from the Opposition, two to be chosen by the Liberals and one each by the Co-operative Commonwealth Federation and the Labour-Progressives.

The Committee is to sit during the recess of the House and is given power to call for papers and for the attendance of persons and to examine witnesses under oath.

Unemployment Insurance Commission Completes Five Years of Service

IN the brief period of five years, a nationwide unemployment insurance organization, with Head Office in Ottawa and 223 branch offices in daily contact with thousands of employers and workers, has become a recognized part of the Canadian economy.

During four of these years, the period in which this organization has been functioning, a fund of nearly \$300,000,000 has been created, a progressive system of employment offices has been operated, and earned benefits have been paid.

Few people are fully aware of just what has been accomplished in bringing Unemployment Insurance into the life of the average Canadian. Even fewer have any conception of the machinery which functions in order that the will of Parliament, as embodied in the Unemployment Insurance Act, may be implemented. Undoubtedly, some of those workers who contribute to the growing fund have doubts respecting the value of the plan. When they become beneficiaries, their doubts are dissipated, particularly if they compare the amount of their benefit from week to week with their weekly contribution.

The general lines of the administrative organization which directs the machinery of unemployment insurance are laid down in the Unemployment Insurance Act of 1940. This Act received the Royal assent on August 7 of that year. It has been amended in certain particulars since it was passed, and amendments are found to be necessary from time to time as the operation of the plan develops the need for change in the law. The main features remain, however, insofar as the general setup of the administrative organization is concerned.

Composition of Commission

A Commission consisting of three members, a Chairman, one member appointed on the nomination of employee organizations, and one member appointed on nomination of employer organizations, administers the Act. For purposes of administration, Canada is divided into five Regions. The Maritime Region embraces the three Maritime Provinces. The Province of Quebec is a Region in itself. The Province of Ontario, as far west as a line drawn east of Fort William and running north to Hudson Bay, constitutes the

third Region. The Prairie Region takes in the remainder of Ontario, the Provinces of Manitoba, Saskatchewan, Alberta and a small part of northern British Columbia. The remainder of British Columbia comprises the fifth Region.

Under the Commission and reporting directly to it is an Executive Director. At the head of the administration of each Region is a Regional Superintendent. The Regional Superintendents report to the Executive Director in Ottawa. The Local Offices in each Region report to the Regional Superintendent of that Region. Thus, it will be seen that while Ottawa exercises a supervisory control over the whole of Canada, each Region operates more or less as a separate unit.

The Head Office organization may be roughly divided into two main branches. These deal with insurance and employment respectively. The Unemployment Insurance Act gave to the Commission control over the collection of unemployment insurance contributions and the payment of insurance benefits. But, equally important, the Commission was directed to operate a chain of Employment Offices across Canada which would serve, not only those persons employed in insurable occupations, but all Canadian employers and workers.

Employment Offices Essential

It will be readily seen that this chain of Employment Offices is a necessary and vital part of an Unemployment Insurance plan. Parliament recognized, just as in other countries where unemployment insurance is effective, that the first thing to try to do for a man or woman worker who has lost employment is to provide him or her with suitable work. Only if it is found impossible to provide suitable employment should benefit be payable. This principle is not only important to the employee who naturally receives appreciably higher wages than can possibly accrue from benefit, but it is also important to the fund which, if used indiscriminately, might before long become seriously depleted. It is the function of the Commission to administer the fund fairly and equitably, and machinery exists to see that justice is done in the payment of benefit.

Consequently, the Employment Service Division works closely with the Insurance Division not only at Ottawa but throughout the Service. When a man becomes unemployed and applies for benefit, he must wait while an effort is made to obtain for him suitable work. Not only is the locality where he makes application examined in order to find him a job, but through a system of clearance, records of opportunities throughout the Dominion are reviewed in order to find what he requires. The service is free, nationwide, and is organized so as to eliminate unnecessary delay.

In addition to the main Divisions of Employment and Insurance, the Commission has found it necessary to organize certain other branches at Head Office. The Commission's family in the field now numbers more than 4,000. Such a large number of employees requires the supervision of a Branch at Ottawa. Thus, a Division in charge of personnel is functioning constantly. It deals with appointments, resignations, dismissals, promotions, salaries, and all those other details which enter into the lives of the employees of a large organization. Another Division takes charge of staff training, reviews the organization of staff in the various offices and conducts a general inspection from time to time of the operations of the 200 odd offices across Canada. The organization of a Public Relations Division is in prospect, it being recognized by the Commission that the explanation and interpretation of unemployment insurance to the public is an important part of the work which should be done.

Organization of Insurance Division

The Insurance Division and also the Employment Division are divided into various sections. In the Insurance Division there are sections devoted to coverage, contributions, inspection, audit, payment of benefit, etc. The Employment Division includes general placement, special placements, including the placement of handicapped persons, placement of veterans, and the issuance of Labour Exit Permits. Speaking generally, all other employment activities are under its control.

This brief survey would be incomplete without reference to the machinery which has been provided to ensure that contributors under the Unemployment Insurance plan who claim benefit receive fair treatment. In the Unemployment Insurance Act, Parliament provided for the establishment of Courts of Referees to which an applicant for benefit may appeal if he feels that his claim has been unfairly dealt with by the officers of the

Commission. These Courts of Referees have been established throughout Canada and employers and employees are equally represented on them. Finally, if the decision of a Court of Referees does not satisfy a claimant, he can, under certain conditions, appeal to the Umpire. The decision of the Umpire is final in all cases. As required by the Act, the Umpire is appointed from amongst the Judges of the Exchequer Court of Canada or from the Superior Courts of the Provinces. The Umpire is Hon. Lucien Cannon, a judge of the Superior Court of Quebec. Deputy Umpires may be appointed if necessary.

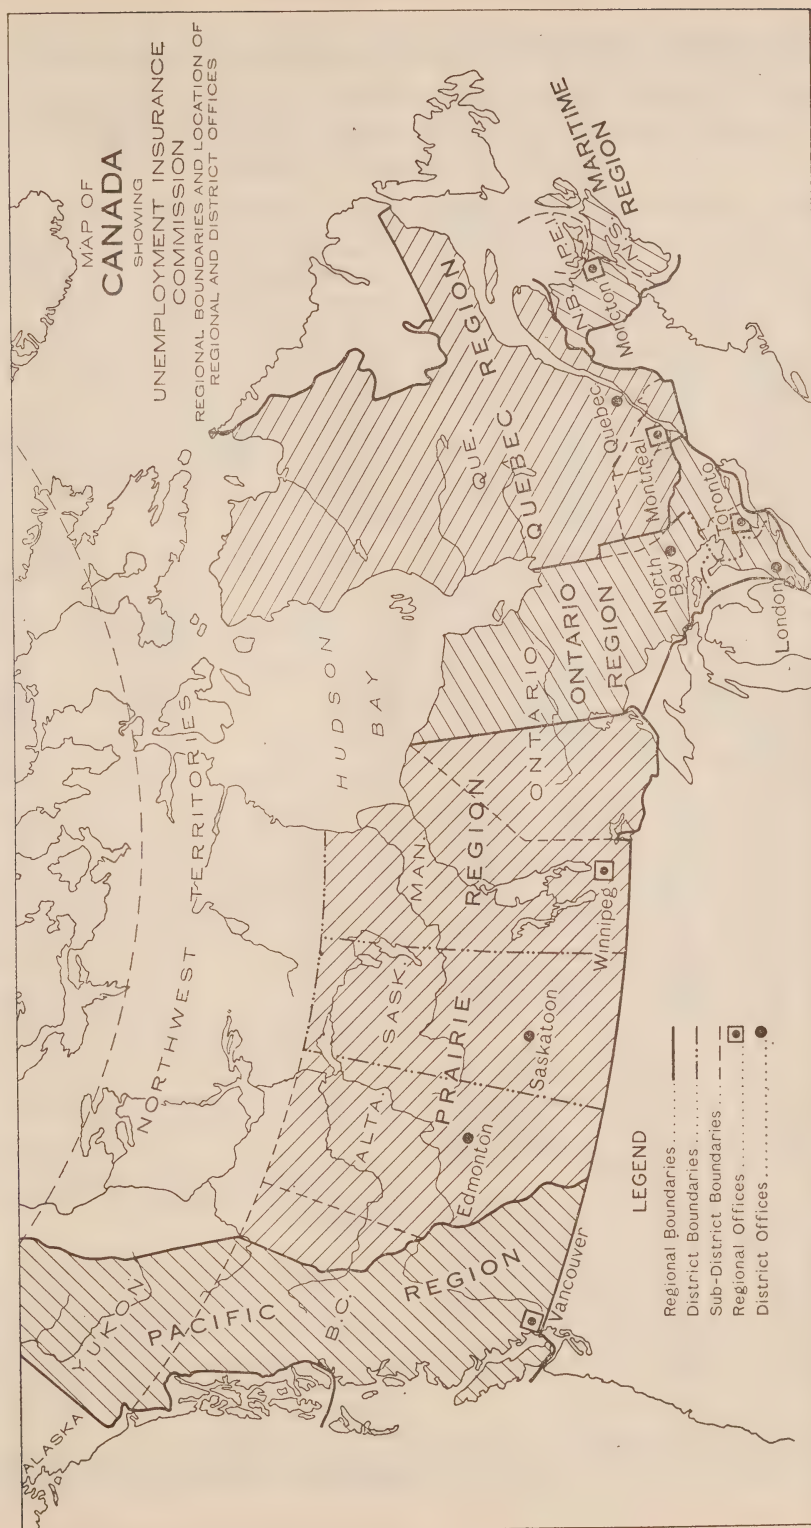

Work of Advisory Committees

The Commission has the benefit of advice from a number of bodies which have been established in different fields of its activities. In the field of employment, a National Employment Committee with Mr. R. J. Tallon as Chairman, has been established, as required by law, to advise the Commission on problems of National significance in the employment field. Regional Committees function in the Regions, and Local Committees advise Managers of Local Offices on problems of their particular section. There are now sixty Local Committees in Canada.

The Insurance Advisory Committee of which Dr. W. A. Mackintosh, Economic Adviser, Department of Finance, is Chairman, concerns itself with the level or fluctuations of the Unemployment Insurance Fund, reporting to the Government if it considers the Fund is imperilled in any way as a result of events, or if, on the other hand, it has become too large. This Committee suggests amendments to the Act, in its insurance features, and generally acts as a compass which can indicate to the Commission and to the Government the course which should be followed.

An Investment Committee headed by Mr. Graham F. Towers, Governor of the Bank of Canada, ensures that the sums collected from employers and employees, as well as the Government, shall be properly and advantageously invested.

(The above is the first article in a series dealing with the administration of unemployment insurance. From time to time other articles will appear in the LABOUR GAZETTE dealing with the activities of the different Divisions and Branches under the direction of the Unemployment Insurance Commission. The map of Canada appearing in association with this article indicates the Regional boundaries. It will be observed that the country is divided into five regions for the purpose of administering the Unemployment Insurance Act.)

*Activities of Unemployment Insurance Commission**

Statistical Analysis of Claims and Benefit—Insurance Registrations— Unemployment Insurance Fund—Training for Employment Service—Decisions of Umpire

A TOTAL of 10,857 claims for Unemployment Insurance benefit was recorded in Canada during June. This represents an increase over May when 8,825 claims were filed and a considerable increase over June, 1944, when claims totalled 3,226. These figures reflect to some extent the effects of continuing lay-offs from war industries following the cessation of hostilities in Europe. The normal seasonal fluctuation in employment at this time of year should result in successive monthly decreases in the number of applications for benefit. For example, the numbers of claims filed during the months of May and June, 1944, were, successively, 4,654 and 3,226.

A similar increase is noted in the number of persons signing the live unemployment register during the last week of June compared with the same period in May and in June, 1944. In all, 17,242 persons (9,230 males and 8,012 females) signed during the last six working days in June as against 16,645 (10,044 males and 6,601 females) in May and 4,707 persons (3,502 males and 1,205 females) in June, 1944.

Of the 11,085 claims adjudicated at insurance offices during June, 9,339 were considered entitled to benefit and 1,746 not entitled to benefit. The chief reasons for non-entitlement were: "Insufficient contributions while in insurable employment" (858 cases); "voluntarily left employment without just cause (536 cases); "discharged for misconduct" (132 cases) and "not capable of and not available for work" (123 cases).

During June, 16,921 persons received benefit payments totalling \$579,326 for 303,443 compensated unemployed days compared with 21,294 persons paid \$672,869 for 349,996 days in May and 7,983 persons paid \$247,891 for 128,922 days during June, 1944.

The average duration of compensated unemployment was, then, 17.9 days in June, 16.4 days in May and 16.1 days in June, 1944. The average amount of benefit paid per beneficiary was \$34.24 in June, \$31.60 in May and \$31.05 in June, 1944. The average amount of benefit paid per compensated day of unemployment was \$1.91 in June, \$1.92 in May and \$1.92 in June, 1944.

* Material in this section is provided by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at June 30, 1945, 2,459,686 employees were issued with insurance books and had made contributions to the fund at one time or another since April 1, 1945, an increase of 222,409 since May 31, 1945.

As at June 30, 1945, 143,202 employers were registered as having insurable employees, an increase of 1,906 from May 31, 1945.

Registration as at June 30, 1945, by regions follows:

TABLE 1—REGISTRATIONS AS AT JUNE 30, 1945

Region	Employers Registered (Live File)	Insured Persons Registered
Maritimes	11,351	176,163
Quebec	38,868	771,516
Ontario	53,047	984,157
Prairie	25,760	316,358
Pacific	14,176	211,492
Total for Canada..	143,202	2,459,686

Unemployment Insurance Fund

Total employer-employee contributions during June amounted to \$5,109,555.33. This figure shows very little difference from the corresponding figure for June, 1944, when the total employer-employee contributions were \$5,230,152.47.

Benefit payments in June this year amounted to \$578,133.26. While this represents a decrease of 13.9 per cent from the previous month, benefits paid in June this year were 135.4 per cent higher than benefits paid in June, 1944, when the figure was \$245,534.06.

Total revenue for June was \$6,478,536.40. After deducting benefit payments the net increase to the Fund during the month was \$5,900,403.14.

Training for Employment Service

The Staff Training program of the Employment Service and Unemployment Insurance Branch of the Department of Labour is now concentrated on employment practices and procedures in the local Employment and Selective Service offices.

It is recognized that foremost amongst the needs of the post-war era will be the necessity

for an efficient Employment Service. With this in mind a Training School was conducted in Ottawa from July 9 to 17. This School was attended by about 30 of the senior personnel from the five regional offices and the larger local offices. An Employment Manual has been

issued outlining the practices and procedures to be followed by local offices, and this was used as a basis for the intensive training in employment work.

Most of those trained at this School will, in turn, conduct area schools to be attended by

local office personnel engaged in employment work. In this way personnel all across the country will receive training to equip them to handle the employment problems as they meet them in the local employment offices.

Conference of Ontario Chapter, I.A.P.E.S.

Organized about a year ago, the Ontario Chapter of the International Association of

Public Employment Services held its first Annual Conference at Milford Haven, Muskoka, Ontario, June 22 to 24, 1945.

The organization of Chapters of the International Association is a development resulting from the widely extended membership which now numbers approximately 17,000 in the United States and Canada. The purposes of the organization as defined in the constitu-

Miscellaneous.....3,024.01
\$ 1,797,987 87

tion of the Ontario Chapter adopted at the meeting in June may be summarized as follows:—

(1) To improve and to assist in professionalizing the work of employment placement officers in Canada, the United States and other countries.

(2) To further the study of employment placement and unemployment insurance problems and procedure.

(3) To further develop and improve National Standards of Government officials engaged in the administration of employment placement and unemployment insurance offices.

About 200 officials of the Ontario offices of the Unemployment Insurance Commission

attended the conference in June. Addresses were given by several leading personnel and employment service experts of the United States and Canada. A delegation from the Detroit and Michigan Chapter were present and made a presentation of a large silk Union Jack to the Ontario Chapter.

The officers chosen for the current year are as follows: Past President, R. Pratt, Ottawa; President, C. S. Raper, Toronto; Vice-President, Miss M. McIrvine, Brantford; Secretary, T. A. Phillips, Toronto; Treasurer, P. G. Jones, Toronto.

The Ontario Region was divided into 11 districts, each of which will elect one member to the Executive.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions of appeals heard by the Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are an extension of the series commenced in the April issue of the *LABOUR GAZETTE*, page 534, and continued in the May issue, page 733, the June issue, page 883, and the July issue, page 1032. They are selected on the basis of their possible precedent value for the determination of questions which may, from time to time, confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

As announced in the earlier issues, the selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU—B 35

(April 26, 1945)

A claimant filed a claim for benefit at an office of the Commission, and then without approval of that office registered at another local office and made the usual declaration regarding days of unemployment; HELD: That under the Unemployment Insurance Benefit Regulations, prior approval of the original office is necessary, but in this particular case the Insurance Officer could not disqualify the claimant in view of the approval given by the other local office, and in view

of the fact that the office of origin had been informed that the claimant would report at another office and did not raise any objection.

The material facts of the case are as follow:—

The claimant, a single woman aged 28 years, was employed as a clerk in a government department. She became unemployed on August 12, 1944, and on making a claim for benefit was advised that she was to report at the Local Office on August 18. She left the city, however, shortly after she had made her claim for benefit and on the 18th of August reported to the Commission's Office at another point.

The Insurance Officer disallowed the claim on the ground that the claimant had failed to report at the Local Office of origin, as required by the Regulations, and as she was directed to do.

The claimant appealed from this decision to the Court of Referees which unanimously upheld the decision of the Insurance Officer.

From this decision the claimant appealed to the Umpire.

DECISION

The Umpire's decision was that the claim should be allowed and gave as his reasons:

Section six of the Unemployment Insurance Benefit Regulations contained the following provisions:

"6. (1) A claimant shall, as evidence of being unemployed, attend at the Local Office where he last claimed benefit or with the approval of the Commission at some other Local Office, on every working day or on such days as the Commission may direct, at such times as the Commission may direct, and if required to do so, shall there sign a register in such form as the Commission may from time to time provide.

“(2) The Commission may, in any case, dispense with the requirements of subsection (1) and in any such case, a Claimant shall furnish such written evidence of unemployment as the Commission may require.”

Notwithstanding these provisions of the Benefit Regulations the Local Office allowed her to sign the Unemployment Register in order to prove unemployment. This office communicated with the Local Office of origin and that office raised no objection at that time to the claimant continuing to report for the time being to the current Local Office.

There can be little doubt as to the purpose and meaning of subsection (1) of Section 6 of the Benefit Regulations. If the claimant wishes to register at some office other than that in the district where she became unemployed, the claimant is required first to obtain the approval of the Local Office of origin. This the claimant failed to do and if it were not for the action of both Local Offices in directing the claimant to register, the appeal would have been disallowed. The fact cannot be overlooked, however, that although it was contrary to the provisions of the Regulations the current Local Office did permit the claimant to register there and prove unemployment and no objection to this was raised by the Local Office of origin when the matter came to its attention. It is clear, therefore, that the Insurance Officer is estopped by the actions of those Local Offices from saying that the claimant did not attend at the Local Office in accordance with the Regulations.

CU—B 38

(May 21, 1945)

The claimant, a stenographer, who had been receiving benefit for five months, refused to apply for employment as a clerk and window decorator, notified to her by the Local Office of the Commission; HELD: That in the circumstances of this case, five months of unemployment constituted a reasonable lapse of time after which employment should not be deemed to be unsuitable by reason only that it is employment of a kind other than employment in the usual occupation of the claimant, as it allowed her adequate opportunity of obtaining employment which was in keeping with her training and experience. The claimant, therefore, has not shown good cause for failure to apply for the employment which was notified to her and which is considered to be suitable.

The material facts of the case are as follows:

The claimant, a married woman aged 27 years, was employed as a stenographer until July 22, 1944, when she was laid off due to shortage of work. Previously she had been

engaged elsewhere as a stenographer. Her rate of salary was \$85.00 per month. On May 31, she left her employment as a stenographer in order to be married. The claimant filed a claim for benefit on August 10, 1944, and since then she has been on benefit. She has been referred by the Local Office to three positions. In all three instances she applied for work as a stenographer and was not accepted. On January 25, 1945, the claimant was notified by the Local Office of a situation as window decorator and sales clerk for a chain notion store. The rate of salary was \$12.00 per week. The claimant refused to apply for the employment as she claimed she was trained for stenographic work and had no experience as a sales clerk. It appears that the employer did not require experienced girls for the employment offered.

The Insurance Officer, in consideration of the fact that the claimant had been on benefit for five months and that apparently there is little or no opportunity of employment for stenographers in the district, decided that the employment notified to the claimant was suitable within the meaning of the proviso to section 31 (b) (iii) of the Act and was of the opinion that the claimant had not shown good cause for refusing or failing to apply for the employment notified as required under section 43 (b) (i). The claimant was, therefore, disqualified for receipt of benefit for six weeks commencing January 25, 1945.

The claimant appealed from this decision to the Court of Referees, explaining that according to the “Employee’s Booklet” issued by the Commission, the position which had been offered to her was one for which she was not suited and that, therefore, she considered herself justified in refusing it.

The Court of Referees unanimously allowed the claim on the ground that where a claimant has had technical training and is experienced in a skilled trade such as stenography, it is not reasonable in the absence of special circumstances to insist on her making a complete change of occupation and sacrificing her training and experience. It was the opinion of the court that a skilled worker is entitled to adequate opportunities of obtaining employment which is in keeping with her training and experience before being required to make a complete change in occupation.

From this decision the Insurance Officer appealed to the Umpire.

DECISION

The Umpire’s decision was that the claim should be disallowed and the claimant disqualified for receipt of benefit for a period of six weeks commencing January 25, 1945, and gave as his reasons that:

Section 31 provides that an insured person shall not be deemed to have failed to fulfil the third statutory condition by reason only that he has declined an offer of employment of a kind other than employment in his usual occupation at wages lower, or on conditions less favourable than those which he might reasonably have expected to obtain, having regard to those which he habitually obtained in his usual occupation, or would have obtained had he continued to be so employed.

There is a proviso to the effect that after the lapse of such an interval from the date on which an insured person becomes unemployed as, in the circumstances of the case, is reasonable, employment shall not be deemed to be unsuitable by reason only that it is employment of a kind other than employment in the usual occupation of the insured person, if it is employment at wages not lower and on conditions not less favourable than those observed by agreement between employees and employers or, failing any such agreement, than those recognized by good employers.

It is considered that in the circumstances of this case five months constitutes a reasonable lapse of time, after which employment should not be deemed to be unsuitable by reason only that it is employment of a kind other than employment in the usual occupation of the claimant, as it allowed the claimant adequate opportunities of obtaining employment which was in keeping with her training and experience. The claimant has not shown good cause for failure to apply for the employment which was notified to her, and which is considered to be suitable.

CU—C 6

(April 12, 1944)

Dental assistants employed in dentists' offices and who had no special training at a recognized institution teaching nursing as a profession, and dental nurses who had no professional experience as a nurse in the ordinary meaning of that term, claimed that they were in excepted employment; HELD: Dental assistants and dental nurses who had no previous experience in nursing, who did not graduate from an accredited School of Nursing and who were not probationers undergoing training for employment as professional nurses for the sick, are not professional nurses for the sick, nor probationers undergoing training for employment as professional nurses for the sick, and are therefore insurable.

DECISION

This is a reference to the Umpire under Section 49 of the Act of a question submitted to the Commission for decision pursuant to Section 46 of the Act.

The applicant, Mrs. A, is employed by Dr. B, Dentist, of X, and she describes her duties as "constant assistance at the dental chair in all operations; sterilization and care of dental instruments; taking and developing of dental X-rays; and laboratory work". In addition to the duties outlined by the applicant, it is understood that dental nurses and assistants usually attend to telephone calls, look after accounts and assist in maintaining the tidiness of the dental office. It would appear that the applicant has had no professional experience as a nurse in the ordinary meaning of that term and no special training in a recognized institution teaching nursing as a profession, and officers of the Unemployment Insurance Commission expressed the opinion that the applicant was engaged in insurable employment within the meaning of the Act and required that contributions be made in respect of her employment by Dr. B.

The applicant was not satisfied with that opinion and formally submitted to the Commission, for decision, under Section 46 of the Act, the question whether her employment is such employment as to make her an insured person. Pursuant to Section 49 of the Act the Commission referred the question to me for decision.

Section 13 of the Act is in the following terms:

"Subject to the provisions of this Act, all persons who are employed in any of the employments specified in Part I of the First Schedule to this Act, not being employment specified as excepted employments in Part II of that Schedule shall be insured against unemployment in manner provided by this Act."

The first point to which attention must be directed is whether the employment is described by Paragraph (a) of Part I of the First Schedule and there seems to be no room for doubt that this is the case, and, the applicant raises no question in this regard.

The next point for determination is whether or not the employment is described in Part II of the First Schedule which lists the excepted employments. The relevant paragraph is Paragraph (h) which sets out as one of the excepted employments—

"Employment as a professional nurse for the sick or as a probationer undergoing training for employment as such nurse".

Each and every one of the words in this exception must be carefully weighed in order to appreciate the true meaning of the exception considered as a whole.

Briefly, then, the question I must decide is the following—Is the employment of the applicant "employment as a professional nurse for the sick" within the meaning of Paragraph (h) mentioned before?

The words "for the sick" necessarily limit the group of nurses covered by the exception and the word "Professional" necessarily removes practical nurses from the exception. The words "professional nurse for the sick" might not limit the field sufficiently were it not for the words which follow, i.e., "or as a probationer undergoing training for employment as such nurse". The word "probationer" in relation to nursing has acquired a fairly definite meaning and that is—a person who is training at an accredited school of nursing operated in conjunction with a hospital or some other recognized institution.

On carefully reviewing this exception in its context in relation to the purpose of the Act, I am satisfied that the exception contained in Paragraph (h) of Part II of the First Schedule means professional nurses working at their profession as such. To establish professional standing the applicant must be in a position to submit evidence of graduation from an accredited school of nursing operated in conjunction with

a hospital or some other equally conclusive evidence of professional status. Further, to come within the exception the applicant must show that she is engaged in the practice of her profession.

In this case I find that the applicant had no previous experience in nursing prior to her employment by Dr. B; she had not graduated from any accredited school of nursing; she had not been a probationer undergoing training for employment as a professional nurse, and, consequently, I find that her employment is not described by Paragraph (h) of Part I of the First Schedule and that her employment was "such employment as to make the person engaged therein an insured person" within the meaning of Section 13 of the Act and Paragraph (a) of Section 46 of the Act.

Ottawa, April 12, 1944.

(Sgd.) LUCIEN CANNON,
Umpire.

Industrial Accidents in Ontario

THE Industrial Accident Prevention Associations of Ontario have issued a statement showing accident and compensation figures for the first six months of 1945, compared with the same period in 1944.

The figures show a slight decline in the total number of injuries reported to the Workmen's Compensation Board, as compared with the previous year, but an increase in the number of fatal cases and in the total compensation paid.

The figures are as follows:—Total injuries reported, 1944, 61,245; 1945, 59,443. Fatal cases included in total, 1944, 175; 1945, 239. Total compensation and medical aid awarded, 1944, \$6,423,032.58; 1945, \$6,720,603.78. Medical aid costs in above figures, 1944, \$992,141.40; 1945, \$1,018,126.38.

In June, 1945, there were 9,717 accidents reported by industry to the Workmen's Compensation Board of Ontario, including 36 fatal cases. In that month the awards by the Board totalled \$1,225,254.23 of which \$184,583.62 were for medical aid.

Accident Prevention

The basic principles of education for safety were summed up in a recent issue of the Associations' monthly bulletin, as follows:—

1. Discover the basic causes of accidents by careful clinical investigation.
2. Make the program of safety education fit the individual.
3. Test the effectiveness of the educational program.
4. Make work conditions conducive to safety.
5. Provide a continuous safety program, giving all workers their places.
6. Give attention to group morale.
7. See that the proper introduction of the worker to the job is coupled with adequate training on the job.
8. Pay attention to the factors of age, inexperience, physical condition and suitability for the job.
9. Give attention to general work attitudes, to bad habits, and to unsafe practices, as well as emotional conditions.
10. The job is never done. You cannot afford to relax your efforts.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment across Canada.

The employment situation at the beginning of June, 1945, as reported by employers.—Industrial employment throughout the Dominion was in smaller volume at June 1 than at May 1. This recession at June 1, although slight was, according to the Dominion Bureau of Statistics, without parallel in the experience of the last 25 years.

The index number at May 1 was 175·5 and that of June 1 was 175·3. The index at June 1, 1944, was 180·5 and at June 1, 1943, it stood at 181·2.

The Bureau's report was tabulated from 15,328 firms with a combined working force of 1,790,072 men and women as compared with 1,791,799, or a decrease of 0·1 per cent from May 1.

Employment in manufacturing showed a fairly large contraction, the co-operation establishments releasing over 8,000 employees. Among the non-manufacturing industries, logging showed a contra-seasonal loss of nearly 1,400 workers, partly as a result of unfavourable weather conditions. Mining operations also declined, but no general change was shown in services and trade. Additions to staffs were reported in communications, transportation and storage, and construction and maintenance. In each case, these gains were seasonal in character.

The per capita earnings in the nine leading industries stood at \$32.16, as compared with \$32.58 at May 1, and \$31.83 at June 1, 1944.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased during June, the number being 10,857 as compared with 8,825 in May and 3,226 in June, 1944.

Report on employment conditions, July, 1945.—The sharp downward trend in the manpower needs of Canadian industries which was evident during the previous month continued throughout July. Employment Offices reported that the demand for workers totalled

127,742 at July 19; this was 8,231 less than the number required four weeks earlier. However, the supply of available workers, as indicated by the number of applicants registered at employment offices but not yet referred to specific jobs, continued to rise and at July 20 totalled 49,544, an increase of 3,609 during the month.

Applications for Employment; Vacancies, and Placements, June, 1945.—Reports received from the Employment Offices of the Unemployment Insurance Commission during the four-week period June 1 to June 28, 1945, showed a slight decrease in the daily average of placements in employment when compared with the preceding four weeks and a greater decline when compared with the four weeks June 2 to June 29, 1944. The most noteworthy changes under the first comparison were a gain in construction and a loss in forestry and logging. Under the second comparison small gains were recorded in construction, forestry and logging, and fishing, hunting and trapping, but all other industrial groups showed losses the most pronounced being in manufacturing, services and trade. During the period under review there were 189,782 vacancies reported, 191,749 applications for employment and 121,535 placements effected in regular and casual employment.

Unemployment in Trade Unions.—The percentage of unemployment among trade union members decreased slightly to 0·5 at the close of the quarter ended June 30. At the end of the previous quarter the percentage was 0·7 and at the end of June, 1944, was 0·3.

The June, 1945, figure was based on reports received from 2,238 local labour organizations, having a total membership of 414,150.

Total employment in Canada.—A preliminary estimate of Canada's total manpower distribution made by the Research and Statistics Branch of the Department of Labour indicates that at April 1, 1945, 4,296,000 persons 14 years of age and over were gainfully occupied, of whom 3,246,000 were in non-agricultural industry, including 901,000 in war industry. In addition there were 762,000 persons in the Armed Forces.

The Employment Situation at the Beginning of June, 1945, as Reported by Employers

INDUSTRIAL employment throughout the Dominion was in smaller volume at June 1 than at May 1. Although the decline was slight, involving the release of only 1,727 persons, it is particularly interesting for the reason that a recession at June 1 is without parallel in the experience of the last 25 years. The Dominion Bureau of Statistics tabulated information from 15,328 firms with a combined working force of 1,790,072 men and women; as compared with 1,791,799 in their last return, there was a decrease of 0.1 per cent, which lowered the index number, on the 1926 base, from 175.5 at May 1 to 175.3 at the date under review. The index at June 1, 1944, had been 180.5, and that at June 1, 1943, 181.2. With these exceptions, the latest index is higher than at any other June 1 of the record, exceeding by 55 per cent that of 113.1 at June 1, 1939. After correction for seasonal influences, the adjusted index at June 1 showed an important decline, falling from 182.2 at May 1 to 175.3 at the date under review; the latter figure coincides with the unadjusted index.

Employment in manufacturing showed a fairly large contraction, the co-operating establishments releasing over 8,000 employees. A minor falling-off had been indicated at the same date of last year, when employment in

this industrial group was at a much higher level. A decrease at June 1 is at variance with the usual seasonal movement in the early summer. Animal food, lumber and pulp and paper plants showed noteworthy improvement at the date under review, and there were smaller gains in certain other branches of manufacturing. On the other hand, curtailment in war production considerably reduced activity in non-ferrous metal, chemical and iron and steel factories.

Among the non-manufacturing industries, logging showed a contra-seasonal loss of nearly 1,400 workers, partly as a result of unfavourable weather conditions. Mining operations also declined. No general change was shown in services and trade, while additions to staffs were reported by firms in communications, transportation and storage, and construction and maintenance. In each case, these gains were seasonal in character; those in the last two divisions were on a scale decidedly below average, according to the experience of past years.

Payrolls

The firms co-operating in the monthly survey at the beginning of June disbursed the sum of \$57,461,926 in salaries and wages for

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

services rendered in the week preceding, which had contained Victoria Day, observed as a holiday in some centres. The latest aggregate was less by 1.5 per cent than that of \$58,315,367 reported in the eight leading industries at the first of May; the reduction was due in part to the loss of working time on the holiday, but the release of workers in the higher-paid industries, and the increased employment of those in the lower-paid divisions, were also contributing factors. The average earnings per employee fell from \$32.55 at May 1 to \$32.10 at June 1, as compared with \$31.80 at June 1, 1944, and \$30.93 at the same date in 1943. In the last 12 months, there has been a decline of 1.9 per cent in the index of aggregate payrolls, accompanying that of 2.9 per cent in the number in recorded employment.

When the figures of employment and payrolls in financial institutions are included, the

survey shows that the total number in recorded employment in the nine leading industries at June 1 was 1,856,871, as compared with 1,858,450 at the beginning of May. The weekly payroll fell from \$60,556,528 at that date, to \$59,709,558 at the beginning of June. The per capita earnings in the nine industries stood at \$32.16, as compared with \$32.58 at May 1, and \$31.83 at June 1, 1944.

In the four-year period for which payroll data are now available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 14.8 per cent, while the aggregate weekly earnings of those workers have risen by 43.3 per cent, and the average earnings, by 27.1 per cent. Including finance, the gain in employment from June 1, 1941, to June 1, 1944, amounted to 14.7 per cent, that in payrolls, to 42.7 per cent, and that in the per capita

June 1.....	114.8	143.3	32.10	124.4	157.4	32.89

figure, by 26.2 per cent. The explanation previously given for the much greater rise in the salaries and wages than in the numbers employed may again be stated: (1) the concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and, in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on

more than one occasion before their incorporation in the basic wage rates as from Feb. 15, 1944, (3) the progressive up-grading of employees gaining experience in their work, and (4) the payment of higher wage-rates in a large number of cases.

The effect of wartime demands upon industry has been shown in particularly marked expansion of employment and payrolls in factories, in which the rate of acceleration during the period of observation has been decidedly

¹ This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber musical instruments and clay, glass and stone products.

greater than that in the non-manufacturing industries generally; the index of employment in manufacturing has risen by 24.4 per cent in the last four years, and that of payrolls has advanced by 57.4 per cent, proportions decidedly exceeding those given in the preceding paragraph for the eight and the nine leading industries as a whole. The factors mentioned above as influencing the general trends have had an even greater influence in the case of manufacturing.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed

out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or over-time may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

¹ The relative weight shows the proportion of employees reported in the indicated industry to the total number of employees reported in Canada by the firms making returns at the date under review.

Report on Employment Conditions, July, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

MANPOWER requirements in Canadian industries continued to decline during July, although at a less accelerated rate than during the previous month. The demand for workers in all industries exclusive of agriculture totalled 127,742 (94,328 male and 33,414 female) at July 19; this was 8,231 less than the need for 135,973 workers at June 21, four weeks earlier. The overall labour situation is considerably easier now than at this time last year when at July 20, the corresponding reporting date in 1944, there was a need for 154,728 workers. In contrast to the trend during May and June, male labour requirements showed little change during the past month but the demand for women workers declined from 41,033 at June 21 to 33,414 at July 19. While labour requirements in manufacturing, transportation, and the trade, finance and service industry groups dropped sharply during the month, the extensive building program now well underway has greatly

increased the manpower needs of the logging and construction industries. Table 1 shows Net Labour Demand¹ by main industry group and by sex, as at July 19, with absolute and percentage change in total demand during the past month.

Although the supply of labour is still insufficient there has been an increase in the number of applicants registering in local Employment Offices during the past month. There were 48,872 Unreferred Applicants² at July 20, an increase of 3,691 compared with the number at June 22, four weeks earlier; the increase was largely due to the sharp rise in the number of male applicants. Workers released by the continuing lay-offs in war plants together with the increasing numbers of discharged Armed Forces personnel are largely responsible for this rise in the supply of available workers. Further increases in the number of applicants registering for employment may be expected as workers are transferred from war to civilian production.

1 Net Labour Demand is calculated by deducting unconfirmed referrals from unfilled vacancies. Unfilled Vacancies are the number of unfilled jobs on file in employment offices as at the date indicated. Unconfirmed Referrals are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

2 Applicants who have not been referred to specific jobs as at the date indicated.

Net Labour Demand in A and B Priority Industries

Sixty-three per cent of the overall labour requirements at July 19 was in high priority industries where there was a need for 80,879 workers; this was 1,966 less than the number required four weeks earlier. All regions showed a marked decline in manpower requirements except Quebec where demand rose from 22,795 at June 21 to 24,334 at July 19. The sharp rise in the need for construction workers in this region accounted for most of the increase.

Logging

With the summer cutting season well under way, the demand for loggers rose from 6,691 at June 21 to 8,277 at July 19. Ontario Region, with an increase of 1,553, accounted for most of the rise in demand. Many companies, presently operating with a minimum of staff, are showing concern over the usual loss of men during the hot weather. Some assistance is being provided by university and high school students, both in woods operations and in sawmills, but frequently a lack of

skill and physical strength limits their usefulness.

Mining and Primary Smelting

Manpower requirements of mining, primary smelting and refining industries totalled 6,033 at July 19 as compared with 6,312 one month earlier. However, while there was some slackening in demand in most of the industries in this group, there was a sharp rise in the demand for labour in gold mines; in Quebec demand increased from 88 to 273 in the four-week period. The shortage of skilled miners continues in all regions and in some areas has resulted in reduced output. Every effort is being made to induce experienced miners, discharged from the armed forces, to return to the mines as they constitute the only source of supply at the present time; in some regions their return has already effected slight improvement. The coal mines are still urgently in need of certificated miners, but practically no experienced workers are available.

TABLE I.—NET LABOUR DEMAND BY INDUSTRY AND BY SEX, AS AT JULY 19, 1945
(excluding Agriculture)

Industry	Male	Female	Total	Change from June 21, 1945

Total.....	89,605	34,390	123,995	31,544	17,328	48,872

Manufacturing

The labour situation in the high priority manufacturing industries continues to improve as workers released from war plants become available for employment in other hard-pressed industries. During the four-week period from June 21 to July 19, manpower requirements in the essential manufacturing group dropped from 35,308 to 33,163; a decrease in female labour demand accounted for most of this decline.

Food Processing.—Demand for workers in the highly seasonal food processing industries rose sharply during the month. Plants engaged in the canning and preserving of fruits, vegetables and seafoods are swinging into full production at this time. During the four-week period from June 21 to July 19, labour demand in this industry group rose from 1,355 to 1,710; the Ontario Region accounted for 70 per cent of this increase. Although the peak of production in the meat packing plants will not be reached until later in the Fall, the pre-harvest run of livestock, and the urgent need for meat and meat products for both home and overseas markets has caused a substantial rise in the demand for workers in these plants. Labour requirements in this industry totalled 1,265 at July 19, as compared with 895 four weeks earlier. The marked increase in the manpower requirements of meat packing houses in the Quebec and Prairie Regions was partially offset by a decline in the Ontario Region.

Textiles and Products.—Manpower requirements in the primary and secondary textile industries remain high although somewhat less than four weeks earlier. This slackening in demand is largely due to the holiday season, when many plants close down in order to give their employees an annual vacation. Female workers released from war plants are still showing some reluctance in accepting work in this industry although some placements are being made as applicants are coming to realize the value of stable employment. To relieve the acute shortage of skilled workers, especially in the Quebec Region, a textile training school has been opened at St. Hyacinthe, where students are being given practical instruction in the use of modern machinery and equipment. In the Ontario Region, officials of textile companies are considering a similar plan. At July 19, the overall demand for workers totalled 6,449, as compared with 6,901 at June 21, four weeks

earlier; the decrease was apparent in all regions. In the cotton textile industry labour demand showed little change during the month; at July 19, there was need for 1,161 and 1,019 workers in the Quebec and Ontario Regions respectively. Labour requirements were somewhat easier in the woollen and worsted, and knitting mills; demand was also slightly lower in establishments manufacturing men's and boys' clothing and women's and misses' outerwear. A continuing high demand is anticipated in the textile industries as requirements of the domestic market are heavy, and Canada has made large commitments to UNRRA in the way of material and clothing.

Construction

The acute shortage of construction labour is seriously handicapping the extensive building program being carried on this year. The demand for workers at July 19 was 7,171 which represents an increase of more than 2,000 in four weeks; this rise was entirely in the labour requirements for residential building, including Wartime Housing. Demand is heavy for all types of skilled as well as unskilled labour; there is an acute shortage of carpenters, bricklayers, plasterers, painters and plumbers and very few suitable applicants are available. Soldiers on furlough have been giving valuable assistance and high school and university students, acting as helpers, have relieved the situation in many localities. Experienced construction workers in the Armed Forces may now be released on the application of their previous employer to the Industrial Selection and Release Board.

Transportation

In spite of the fact that the movement of home-coming troops has placed an especially heavy burden on the transportation industry, particularly in the Maritime Region, labour demand in this industry dropped from 9,154 at June 21 to 8,091 at July 19. This decrease was largely due to a decline in the manpower requirements of steam railways; in general there has been a sufficient supply of labour for track maintenance although some areas are still in urgent need of extra gang labourers and section men.

Trade, Finance and Service

Labour requirements in the trade, finance and service industry group eased slightly during the four weeks prior to July 19 to stand at 16,457 at that date. The shortage of mechanics and repairmen continues, the

need for body and fender workers being most urgent. While hospitals report a decrease in the overall demand for workers many institutions are still seriously handicapped by the shortage of help, particularly kitchen workers and ward assistants. Hotels and restaurants as well as laundry and dry-cleaning plants are

still critically short of labour. High school students and teachers who have accepted employment in the service occupations during their summer vacation period have afforded some temporary relief but workers released from war plants are still reluctant to accept this type of employment.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended July 22, 1945.

Maritime Region

Agriculture—Haymaking, almost completed in the Saint John Valley, is still in full swing in other sections. The continuing call for helpers for this harvest has been met by the release of 200 soldiers for duty in New Brunswick, 50 in Prince Edward Island and 275 in Nova Scotia. Army personnel assisting when off duty, and a fair number of civilians from neighbouring centres, have rendered further assistance.

Logging—The exodus of bushworkers to help with the crops has greatly curtailed woods operations. While the majority of companies are short of labour the largest orders now being placed are for men to go to the bush in the Autumn.

Coal Mining—Collieries in the Cape Breton area are carrying on operations with a shortage of approximately 500 skilled miners which has resulted in greatly reduced output throughout the area. Although every effort is being made to induce ex-miners discharged from the armed services to return to the coal mines, many of those interviewed are unwilling to go back to employment at the working face.

Manufacturing—There has been no outstanding development in the labour situation. The most urgent demand for workers still comes from the shipyards, all busy on extensive repairs; in all, 495 vacancies for ship-building labour are listed throughout the Maritimes. While skilled machinists are the most pressing need in Halifax, helpers will also be placed. In Lunenburg, the award of a new contract for the refitting of a frigate ensures full employment until November, and at Liverpool, naval ship repairs are expected to provide work in the local yards for an indefinite period; consequently, recently can-

celled orders for skilled workmen have been renewed.

A dispute and work stoppage at the Trenton plant of the Eastern Car Company, which occurred early in July, was terminated on July 16; some 1,000 men affected are now back at work on the construction of railway cars for Russia. A shortage of material caused a temporary lay-off from the shell plant at Campbellton; employment for the 116 employees affected was found by the local office.

The most pressing seasonal labour shortage was reported from Digby, where local processing establishments have been unable to secure adequate labour to handle an exceptionally large catch of fish. There is also an acute shortage of brickyard workers in Fredericton, as well as a general scarcity of skilled, semi-skilled and heavy labour in Saint John. While the demand for skilled operators for the textile mills remains unsatisfied, the situation has eased somewhat during the holiday season.

Construction—An urgent need for skilled tradesmen of all types persists. In addition to the extensive program under the Veterans Land Act, labour is in demand for private home construction. The Halifax office reports a great increase in orders for workers since the explosion, especially for the restoration of schools which were badly damaged.

Transportation—The labour requirements of the railways are being well met. While there is little demand for workmen at the Port of Halifax, traffic through Saint John is heavy; the consequent call for freight handlers and longshoremen is being answered locally and through clearance orders.

Quebec Region

Agriculture—In most sections the supply of farm labour has been adequate to handle the hay crop, which has far exceeded earlier expectations. Although a shortage of workers is reported in more northerly parts where haymaking is still in progress, for the most part farmers are reasonably well supplied with labour.

Every available picker is being pressed into service to gather an exceptionally heavy crop of blueberries in the Lake St. John area. Industries in the district, already short about 100 workers, are being even more seriously hampered by the general exodus to the berry patches; the advisability of closing down all local establishments for several weeks is under consideration.

Logging.—For the most part river drives have been completed, and the majority of the men remaining in the bush are working on improvements of various sorts. Excessive heat has made loggers reluctant to accept employment in the woods at this season; proposed Summer cutting of lumber and pulpwood has suffered in consequence. In the vicinity of Dolbeau, operators will be unable to fill their labour requirements until the blueberry picking is over.

Mining.—Labour shortages persist in the base metal and gold fields. The lack of qualified machine men presents the most serious problem in the Rouyn area; no relief from this shortage is foreseen for some time to come. Some gold mines in the vicinity, having been granted an "A" labour priority for development work, are having greater success in meeting their manpower requirements, as miners prefer this work and the wages which it affords.

Manufacturing.—Mass lay-offs continue throughout the province. Staff reductions in war and allied plants are now affecting the staffs of sub-contractors also. In addition to 110 men released from the Quebec arsenals earlier in July, another 350 men and 50 women have been laid off during the past week; the majority of those affected are unskilled workmen, whom it will be difficult to place in other local establishments. The Aluminum Company of Canada continues to reduce its working staff; since July 8, about 175 employees have been released from the Arvida establishment. The local office at Three Rivers reports that between June 1 and July 15 upwards of 2,000 people have been laid off by various plants in the area, with no prospect of placing them locally except in casual or seasonal employment. As a result, some hundreds of unemployment insurance claims have been filed.

Montreal shipyards are calling urgently for welders; local car foundries, also operating to capacity, require many highly skilled riveters. One aircraft plant in the area has placed orders for 322 craftsmen, including both skilled artisans and beginners; orders for the technicians have been placed in clearance to

Ontario, in an endeavour to secure trained workmen recently released from the Victory Aircraft and De Havilland factories.

The seasonal needs of the food processing plants, most pressing at this time, are being met insofar as possible by the employment of students and agricultural labourers in their spare time. Flax factories are also shortstaffed on account of the haymaking. In spite of the many layoffs, there has been little improvement in the labour situation of the region's textile mills, clothing factories and kindred industries. Montreal tobacco plants, too, are short approximately 800 girls.

Construction.—Skilled building tradesmen are in extremely short supply everywhere. In addition to the Federal housing scheme for the erection of veterans' homes, which will utilize the services of a large number of tradesmen of all types, extensive private building programs are under way. About 200 men will be needed on the construction of the Joliette-St. Felix highway, recently begun; while unskilled labour will probably be secured by employing farmers along the route, it will be very difficult to find the trained artisans required.

Transportation.—Although a few additional maintenance men are needed on the railways, no serious shortage of such labour exists. Notwithstanding an all-time record for ship arrivals at the Port of Montreal during the first half of 1945, the manpower supply is reported as entirely adequate.

Ontario

Agriculture.—In all parts of the province much hay is still unharvested. In some instances, farmers are leaving their hay fields to work on wheat now ready for the binder; there will be a considerable demand for helpers in the harvesting of this exceptionally good crop, as well as for the hoeing of oats in Western Ontario. Many workers are still needed to supplement the labours of nearly 2,000 prairie harvesters now on Ontario farms; negotiations to obtain soldiers on leave and under the "farm duty plan" are under way. In the southwestern part of the province nearly 800 prisoners of war are being used daily.

As the flue-cured tobacco crop is two weeks behind schedule, harvesting will not be general before August 20. In the fruit belt, where work is slack prior to the peach picking, girls from Farm Service Camps and farm comandos from neighbouring cities have rendered invaluable aid.

Logging.—The termination of the river drive has brought operations practically to a stand-

still. Summer cutting has slowed down during the black fly season, and current activities are confined for the most part to camp and road building in preparation for Fall and Winter bushwork. In all, present demands for loggers for the coming season stand at 4,065 men.

Mining.—While labour shortage at Sudbury and Timmins remains unalleviated, some slight improvement is noted in the manpower situation of the Ontario gold mines, which are profiting by current lay-offs from war industries, as well as the discharge of members of the armed services.

Manufacturing.—There has been slight easing of the over-all shortage of heavy labour. The foundries are still the most insistent in their demands, and the most difficult to satisfy; in every part of the province there is an immediate need for more moulders and heavy labourers to maintain production schedules. Tanneries, rubber plants and general factories are also calling for physically fit men for heavy jobs. In St. Thomas, 100 of these labourers could be absorbed immediately.

The opening of the canning season has brought demands for workers of various sorts. The Whitby and Bowmanville canneries, although well supplied with female labour, have experienced difficulty in procuring men for their operations; there has also been a serious shortage of men to work on the pea pack at Port Hope. However, the Trenton office reports that food processing plants in that area are better supplied with labour than last year, and at Picton, airmen are helping during their regular leave.

In contrast to the persistent demand for heavy labour, mass lay-offs of semi-skilled and skilled workers are taking place or are pending at many war plants where production has been curtailed. More than 200 men were released from the D.I.L. plant at Nobel and many women from the factory at Ajax. Recent cutbacks in munitions production in Wallaceburg also have resulted in unemployment for 200 or more women, for whom no other work is available locally. A two-week strike affecting 330 employees of the International Malleable Iron Company in Guelph has been settled. Owing to a labour dispute at the Midland Steel Works in Detroit, approximately 1,400 employees of the Chrysler Corporation of Canada in Windsor were suspended on July 21 for an indefinite period.

Construction.—As the volume of building permits issued is increasing daily, demands for skilled tradesmen also increase in number and urgency. The extremely serious shortage of workmen, skilled and unskilled, required for work on impending building projects, is caus-

ing not only regional but national concern. The Toronto office reports that in addition to 2,100 vacancies for experienced tradesmen, 1,500 unskilled labourers are needed in the area; very few suitable applicants are available to meet this demand. Carpenters, bricklayers, painters, plumbers and roofers are eagerly sought by contractors engaged in the erection of hospitals, wartime houses and industrial buildings in various parts of the province.

Transportation.—A steady demand for railway maintenance men persists, in spite of the considerable number of students temporarily engaged on this work. The Sault Ste. Marie office reports that the Algoma Central Railway is urgently in need of husky labourers to complete its Summer works program.

Prairie Region

Agriculture.—Requests for assistance with the haymaking have increased steadily in many sections. In the Winnipeg area, fully qualified tractor men are almost impossible to locate; however, in the vicinity of Saskatoon, the demand for such experienced workers and also for power machine operators is being fairly well met by men from districts where little or no harvest is anticipated.

As there will be no further call for farm help in the Medicine Hat district until harvesting in the irrigated areas begins in September, men from this vicinity and around North Battleford will probably be transferred elsewhere or placed temporarily in other industries. The Lethbridge office advises that there has been little response to the urgent call for haymakers and experienced irrigators; at Calgary, too, the demand for agricultural labour is increasing.

Logging.—Operations in the Lakehead area continue on a greatly reduced scale; while pulpwood cutters are in continuing demand, it is unlikely that there will be many applicants until late Fall, when the agricultural and shipping seasons close. The most pressing need at present is occasioned by the shortage of the forestry products essential to the coal mining industry; contractors in the Blairmore area, engaged in the cutting and hauling of logs and props for the collieries, are seriously hampered by the lack of manpower.

Coal Mining.—There has been no abatement in labour demand during the past month. The annual two-week holiday has failed to ease the shortage in the Edson area, and all collieries in the vicinity of Drumheller, reopened after the vacation period, are urgent

in their call for certificated miners, on whom the employment of unskilled underground and surface labourers depends. The Lethbridge and Red Deer offices report a similar serious lack of skilled and heavy workers, unlikely to be remedied until after the harvest.

Base Metal Mining—All operations throughout the region are short of manpower. Extensive prospecting and development work in the Port Arthur and Kenora areas is creating a steadily increasing demand for miners of every sort. In the northern Kenora district some operators are employing Indians to advantage. The Winnipeg office reports that the only suitable applicants available are men discharged from the armed services, who are still accepting work of this kind in fairly substantial numbers.

Manufacturing—For the most part manpower requirements are limited to heavy labour, which is continuingly at a premium. The region's packinghouses and flour mills, creosote plants and foundries share in this shortage of husky labourers; no alleviation is anticipated until after the harvest.

The aircraft plant at Fort William and the shipyards at Port Arthur are still urgent in their call for skilled workmen. The district's paper mills, too, are very short of suitable labour. While curtailment of contracts has resulted in the cancellation of all manpower orders from Winnipeg shoe factories, the serious shortage of textile workers persists.

On June 30, the shell division of the Northern Engineering Company at Fort William completed a lay-off of 500 men, retaining only a skeleton staff of 50; the majority of those affected are gradually being placed elsewhere. Of the 495 employees released during June by the C. P. Munitions plant at Ogden, the Calgary office has made steady progress in placing those who have registered for other employment.

Construction—Activities throughout the Prairies have reached a wartime high, extensive private building has increased labour demands already heavy for Wartime Housing and Veterans Land Act projects. The supply of workers to meet rapidly mounting requirements is exceedingly small; lack of materials presents a further serious problem.

Transportation—The call for track maintenance workers has not diminished. Locomotive firemen are also needed by the C.N.R. at most main railway points. While there have been a fair number of placements for bridge and building work in the Calgary area, the local office has further orders for 203 labourers.

Pacific Region

Agriculture—In spite of a poor response to the appeal for local volunteers the Emergency Farm Labour Service has succeeded fairly well in its efforts to secure general farm labour on the lower mainland and Vancouver Island. Temporary shortages arising from the unusually rapid maturing of crops have for the most part been met by students on vacation. In the Fraser Valley loggers idle on account of the fire hazard, and R.C.A.F. personnel stationed nearby, helped with the haying and pea threshing; men discharged from the armed services are lightening the problem of dairy farmers in the area.

The sudden high temperature also brought a pressing call for berry pickers, which was met with some difficulty. Twice as many women as last year were brought from the Prairies to the Fraser Valley, in order to handle the picking on a new development at Yarrow. Farmers in the vicinity of Penticton are being asked to find temporary work for cherry pickers until other fruits are ready for harvesting. At Kamloops, Japanese are picking tomatoes and vegetables.

Logging—By order of the Provincial Government Forest Service, camps and sawmills in the Vancouver forest area were shut down completely early in July. This order, which brought enforced idleness to approximately 8,000 bushworkers, resulted in the suspension of all orders for logging labour. However, the fire ban has been lifted and an inter-regional clearance order for the recruiting of 300 loggers from the Prairies is once more effective; while this number, if procured, would afford some measure of relief, the shortage of bushmen will be continuingly acute until the completion of the harvest. In the interior of the province, where no easing in manpower requirements is noted, the call for pit-prop cutters to fill United Kingdom orders is aggravating an already serious shortage.

Sawmills—Except in the Kamloops and Kelowna areas, where only skilled workmen are needed, there is a persistingly heavy overall labour shortage unlikely to be alleviated until the Autumn. In the New Westminster area, not only are many skilled and semi-skilled workers needed immediately, but heavy unskilled labourers are at a premium. Lack of logs and labour has greatly reduced the output of shingle and sawmills in the Vancouver district, and similar conditions are hampering operations on Vancouver Island.

Coal Mining—There is no marked change in the manpower situation. The annual holiday season is accentuating the dearth of

underground labourers and miners at the Elk River and Michel collieries, as also in the Prince Rupert area.

Gold Mining.—Placer mines are in urgent need of additional workers; should these not be forthcoming before the end of July, operations will have to be deferred until 1946. All quartz operators, also, are exceedingly short of experienced underground labour.

Manufacturing.—Although the Vancouver shipyards are still in the midst of the holiday shutdown, many vacancies for skilled workers are reported, as well as extensive orders for heavy labour; skilled artisans are also in great demand for the Victoria and Prince Rupert yards, but the lack of applicants fitted for the work required is general. Foundries and engineering shops, as well as the pulp and paper mills, have placed orders for all types of skilled and unskilled workers. At Trail,

high school students and teachers are being used extensively to supplement shortstaffed maintenance crews in the smelters.

Construction.—The grave shortage of skilled tradesmen persists. While high priority projects are reasonably well supplied with workers, employers in the lower labour priority brackets are faring very poorly. Orders for terrazzo mechanics for the Vancouver military hospital are being given Dominion-wide clearance. In Victoria, skilled carpenters, plasterers and painters on furlough from the armed services are being quickly placed.

Transportation.—There is still a fairly heavy demand for extra gang and sectionmen. While the marine service, too, is continuingly short of all classes of worker for coastal and deep sea shipping, the lack of personnel is not critical.

Applications for Employment; Vacancies and Placements; June, 1945

REPORTS received from the Employment Offices of the Unemployment Insurance Commission for the four weeks June 1 to June 28, 1945, showed a decrease of 1.6 per cent in the daily average of placements effected when compared with the preceding four-week period May 4 to May 31, and a loss of 18.1 per cent in comparison with the four weeks June 2 to June 29, 1944. Under the first comparison the only noteworthy changes in industrial groups were a gain in construction and a loss in forestry and logging. When compared with the four weeks of June, last year, slight increases were noted in construction, fishing, hunting and trapping and forestry and logging but all other industrial divisions recorded losses, the most pronounced being in manufacturing, services and trade.

The accompanying chart shows the trend of employment since January, 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at the National Employment Service Offices throughout Canada. It will be seen from the graph that the trends of the curves of vacancies and placements in relation to applications took downward courses. The ratio of vacancies to each 100 applications was 98.9 during the four weeks ending June 28, 1945, in contrast with 109.5 during the previous four weeks, and 111.1 during the four-week period June 2 to June 29, 1944. The ratio of placements to each 100 applications during the period under review was 63.3 compared with 70.9 during

the four weeks May 4 to May 31, 1945, and 71.5 during the four weeks in June, last year.

The average number of vacancies reported daily by employers to the Employment Offices throughout Canada during the four weeks June 1 to June 28, 1945, was 7,908 in comparison with 7,953 in the preceding four-week period and 9,619 during the four weeks June 2 to June 29, a year ago. The average number of applications for employment received daily during the period under review was 7,990 compared with 7,261 in the previous period and 8,652 during the four weeks June 2 to June 29, 1944. The average number of placements made daily by the offices during the four weeks ending June 28, 1945, was 5,064, of which 4,896 were in regular employment and 168 in work of one week's duration or less, in comparison with a daily average of 5,151 during the previous four weeks. Placements during the four-week period ending June 29, 1944, averaged 6,187 daily, consisting of 6,045 in regular employment and 142 in casual work.

During the period June 1 to June 28, 1945, the offices referred 162,941 persons to employment and effected a total of 121,535 placements. Of these, the placements in regular employment numbered 117,494, of which 91,326 were of males and 26,168 females, while placements in casual work totalled 4,041. The number of vacancies reported by employers was 137,344 for males and 52,438 for females, a total of 189,782, while applications for work numbered 191,749, of which

142,348 were from males and 49,401 from females. Reports for the four weeks May 4 to May 31, 1945, showed 182,908 positions offered, 167,010 applications for employment and 118,483 placements effected, while in the four weeks ending June 29, 1944, there were reported 230,868 vacancies, 207,653 applications and 148,478 placements in regular and casual employment.

The following table gives the placements effected by the offices each year from January 1935, to date:

YEAR	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,236	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	809,983	85,638	895,621
1943.....	1,890,408	53,613	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945 (26 weeks).....	766,041	23,499	789,540

Nova Scotia and Prince Edward Island

During the four weeks ending June 28, 1945, the daily average of positions offered through Employment Offices in Nova Scotia

and Prince Edward Island was 293, compared with 266 in the previous period and 316 during the four weeks terminating June 29 last year. There was a daily average of 204 placements in comparison with 200 in the preceding four weeks and 266 during the period ending June 29, 1944. A fairly large reduction in manufacturing together with moderate losses in trade, construction and services accounted for the decline in placements when compared with the four weeks ending June 29 a year ago. A moderate increase was noted in public utilities operation, while the changes in other groups were nominal only. Placements by industrial divisions included: manufacturing 1,610; services 1,063; public utilities operation 774; trade 667; construction 497 and mining 175. There were 3,626 men and 1,144 women placed in regular employment.

New Brunswick

The demand for workers on a daily average as indicated by orders listed at Employment Offices in New Brunswick during the period under review, was 236 as compared with 185 in the preceding four weeks and 276 during the period June 2 to June 29, 1944. The average number of placements effected daily was 158, in comparison with 153 in the

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications———

Vacancies - - - - -

Placements ———

previous period and 199 during the four weeks ending June 29 last year. Reductions in placements from the corresponding period last year took place in manufacturing, forestry and logging, trade and services and gains in construction and public utilities operation, all of which were moderate in volume. Placements by industries included: manufacturing 1,137; public utilities operation 702; services 615; construction 531; trade 494, and forestry and logging 168. Regular placements numbered 2,898 of men and 846 of women.

Quebec

There was a decrease in the average number of positions available daily at Employment Offices in the Province of Quebec during the four weeks terminating June 28, 1945; there being 2,079 in contrast with 2,383 in the preceding period and 2,883 during the four weeks ending June 29 a year ago. Placements decreased under both comparisons, the daily average being 1,333 during the period under review, in comparison with 1,499 in the previous four weeks and 1,721 during the period terminating June 29 last year. A fairly heavy decrease in manufacturing supplemented by substantial losses in services, and public utilities operation and declines of much smaller proportions in trade, construction, finance and insurance, and mining were responsible for the reduction in placements from the four weeks ending June 29, 1944. The only improvement reported was a fairly substantial gain in forestry and logging. Industrial divisions in which most of the placements were effected were: manufacturing 12,693; forestry and logging 5,137; construction 4,091; services 4,048; public utilities operation 2,450; trade 2,371 and mining 782; placements in regular employment numbered 26,725 of men and 5,189 of women.

Ontario

Employment opportunities as indicated by orders received at Offices in Ontario during the period ending June 28, 1945, showed a daily average of 3,337 workers, compared with 2,913 in the previous four weeks and 3,984 during the period terminating June 29, 1944. Placements registered a daily average of 2,049 during the four weeks under review, in contrast with 1,838 in the preceding period and 2,570 during the four weeks ending June 29 a year ago. The reduction in placements from the corresponding period last year was chiefly attributable to a marked decrease in manufacturing augmented by substantial declines in services and trade. In addition, losses much smaller in volume were re-

corded in forestry and logging, finance and insurance, and public utilities operation, but these were largely offset by a substantial gain in construction. Placements by industrial groups numbered: manufacturing 19,810; services 9,622; trade 5,437; construction 5,413; public utilities operation 5,215; mining 1,139; forestry and logging 1,028; finance and insurance 818, and agriculture 610. There were 36,814 men and 11,436 women placed in regular employment.

Manitoba

Orders received at Employment Offices in Manitoba during the four weeks under review, called for an average of 351 workers daily compared with 405 in the preceding period and 476 during the four weeks ending June 29 last year. Placements were fewer under both comparisons, the daily average being 254 in contrast with 270 in the previous four weeks and 307 during the period terminating June 29, 1944. The decrease in placements from the four weeks ending June 29 last year was greatest in manufacturing. Losses smaller in volume were reported in trade and services but were partly offset by a moderate gain in construction. The majority of placements recorded during the period took place in the following industries: services 1,660; manufacturing 1,463; trade 1,021; public utilities operation 956; construction 668 and mining 126. Placements in regular employment numbered 3,586 of men and 1,406 of women.

Saskatchewan

Positions offered through Employment Offices in Saskatchewan during the period ending June 28, 1945, averaged 185 daily in contrast with 175 in the previous four weeks and 217 during the period terminating June 29 a year ago. There was a daily average of 137 placements compared with 132 in the preceding four weeks and 154 during the period ending June 29 last year. Moderate decreases in manufacturing, trade and services and a gain in construction were the only changes of importance in placements when compared with the corresponding four weeks of 1944. Placements by industrial divisions included: services 1,079; trade 627; public utilities operation 547; manufacturing 399; construction 387 and agriculture 157. Regular placements numbered 2,049 of men and 899 of women.

Alberta

Opportunities for employment at Employment Offices in Alberta during the four weeks terminating June 28, numbered 396 daily compared with 368 in the period ending May 31 and 425 during the four weeks June 2 to June 29, 1944. The average number of place-

ments registered daily was 250 during the period under review, in comparison with 246 in the previous four weeks and 255 during the period ending June 29 a year ago. When comparing placements by industrial groups with the four weeks terminating June 29 last year, none of the changes was large, the most significant being declines in manufacturing and services, and a gain in public utilities operation. Industries in which employment was found for more than 300 workers included: services 1,636; trade 1,016; manufacturing 1,005; public utilities operation 817; construction 803 and mining 342. Placements in regular employment numbered 3,801 of men and 1,639 of women.

British Columbia

Orders listed at Employment Offices in the Provinces of British Columbia during the

period ending June 28, 1945, were 1,030 in contrast with 927 during the preceding four weeks and 1,042 in the period terminating June 29, 1944. There was a daily average of 682 placements in comparison with 600 in the previous period and 714 during the four weeks ending June 29 last year. Reduced placements in manufacturing, services, agriculture, trade, construction, and finance and insurance accounted for the decrease in placements from the period ending June 29, a year ago, but these were offset in part by moderate gains in public utilities operation, and forestry and logging. Industrial divisions in which most of the placements were effected were: manufacturing 5,087; services 3,317; trade 1,910; public utilities operation 1,894; forestry and logging 1,801, and construction 1,600. There were 11,827 men and 3,609 women placed in regular employment.

Quarterly Report of the National Employment Service Offices, March 30 to June 28, 1945

EMPLOYMENT conditions, as indicated by the work of the Employment Service Offices of the Unemployment Insurance Commission during the second quarter of 1945, showed moderate decreases in both vacancies and placements when compared with those reported during the corresponding quarter of 1944. Fishing, hunting and trapping showed increases in both instances but all other industrial divisions recorded losses in vacancies and placements, the greatest reductions in vacancies being in manufacturing, services, trade, public utilities, forestry and logging and agriculture and the heaviest losses in placements in manufacturing, services, trade, agriculture and public utilities. Prince Edward Island recorded gains in vacancies and placements but all other provinces registered losses in both cases. The largest reductions in vacancies were registered for Ontario, Quebec, Alberta and Manitoba and in placements for Ontario, Quebec and Nova Scotia.

From the chart which accompanies the article on the work of the Employment Offices for the four-week period June 1 to June 28, 1945, it will be seen that the curves of vacancies and placements in relation to applications showed upward trends in April but decreases in May and June. During the thirteen-week period there was a ratio of 113.2 vacancies and 68.5 placements for each 100 applications for employment as compared with 121.3

vacancies and 71.9 placements during the corresponding period a year ago.

The average number of positions offered daily during the quarter under review was 8,742; of applicants registered 7,721; and of placements effected 5,290 in contrast with a daily average of 9,983 vacancies, 8,232 applications and 5,923 placements during the same quarter of 1944.

During the three months April to June, 1945, the offices reported that they had referred 541,432 persons to positions and had effected a total of 402,011 placements, of which 389,013 were in regular employment and 12,998 in casual work. Of the placements in regular employment 277,173 were of males and 111,840 of females. A comparison with the corresponding period of 1944, shows that 456,076 placements were then made, of which 444,445 were in regular employment and 11,631 in casual work. Applications for employment during the period under review were received from 412,956 males and 173,838 females, a total of 586,794 in contrast with the registration of 633,870 during the same period of last year. Employers notified the offices during the quarter April to June, 1945, of 664,412 vacancies of which 465,487 were for males and 198,925 for females, as compared with 768,692 opportunities for work offered during the corresponding period a year ago.

Unemployment in Trade Unions at the Close of the Quarter Ending June 30, 1945

THE percentage of unemployment among members of labour organizations decreased to 0.5 at the end of the June quarter from the percentage of 0.7 at March 31, 1945.

Unemployment in the following report has reference only to involuntary idleness due to economic causes. Persons who are without work on account of illness, a strike or a lock-out, or who are engaged in work outside their own trades are not considered as unemployed. As returns from unions making reports vary from quarter to quarter, with consequent variations in the membership upon which the percentage of unemployment is based, it should be understood that the figures quoted refer only to the organizations reporting.

For the close of the quarter ended June 30, returns from 2,238 local labour organizations were tabulated. These reported a total membership of 414,150 members of whom 2,266 or 0.5 per cent, were without work. In comparison at the end of March, 1945, 2,337 locals reported a membership of 421,779 persons of whom 2,998 or 0.7 per cent were unemployed.

At the end of June, 1944, the unemployed were 0.3 per cent of the total reported membership, and at the end of June, 1939, the percentage was 11.6.

Improvement in employment as compared with the previous quarter was recorded among union workers engaged in logging, construction, transportation (railways), pulp and paper mills, the manufacture of other wood products and in textiles, while employment opportunities for aluminum workers in the non-ferrous metal trades and for automobile workers were less favourable than in the previous quarter. Improvements were indicated by reports from locals of retail and wholesale clerks, and in fishing. Slight declines were registered in certain iron trades, chemical and allied products, communication, and telegraph operation.

The percentage of unemployment in each province is shown in Table I. In comparison with the previous quarter, employment conditions improved in Quebec, Manitoba, Alberta and British Columbia, but were slightly less favourable in Nova Scotia, Ontario, New Brunswick and Saskatchewan. All provinces except Nova Scotia, which advanced to 1.2, held below the 1 per cent level. In comparison with June of the previous year, somewhat improved conditions were indicated for New Brunswick; while lower employment levels prevailed in Nova Scotia, Quebec, Ontario, Saskatchewan, and Alberta; no change was noted for either Manitoba or British Columbia.

A separate compilation is made each month of unemployment among trade union members in the largest city in each province, with the exception of Prince Edward Island. At the end of June, the percentages ranged from no unemployment reported in Halifax and Saint John to 2.0 per cent in Regina. The percentage for Edmonton was 0.3, for Toronto 0.1; and for Montreal, Winnipeg and Vancouver 0.2 per cent in each case. In comparison with conditions at the end of the previous quarter, a marked employment recession was recorded only in Regina; the percentage of unemployed trade union members reported from Halifax decreased from 0.4 to full employment; in Saint John from 0.1 to full employment; in Montreal from 0.6 to 0.2; in Toronto from 0.2 to 0.1; in Winnipeg from 0.9 to 0.2; and in Edmonton from 0.8 to 0.3; Vancouver remained the same at 0.2.

Comparing the June, 1945, figures with those of June, 1944, improvement in employment was noted in Halifax, Saint John and Montreal. Vancouver, Winnipeg and Toronto were unchanged while recession was recorded in Edmonton and Regina. The most pronounced change was recorded for Regina where the percentage of unemployed trade unionists increased from 0.1 to 2.0.

Returns were tabulated for 794 local unions in the manufacturing industries. These reported a combined membership of 214,832 members of whom 1,602 or 0.7 per cent were reported as unemployed. In comparison 0.4 per cent of 218,124 members were unemployed at the end of the previous quarter, while in June, 1944, 0.1 per cent of 223,975 members were listed as unemployed. Among union members in pulp and paper, wood products, vegetable products, textiles and textile products, mineral products, and miscellaneous manufacturing industries, the employment situation was more favourable than at the end of March. The employment situation was less favourable for trade unionists in the animal products industries, iron and its products, and non-ferrous metals. Of 3,664 members reported in the aluminum industry, 360 or 9.8 per cent were reported unemployed at the period under review; this is a pronounced recession from the 0.2 per cent of 5,697 members recorded in the previous quarter. As compared with June, 1944, decreases in unemployment among trade union members were noted in vegetable products industries, pulp and paper products and garment workers. The percentage of unemployed trade unionists increased in the animal products industries, iron and its products, non-ferrous metals, mineral products, chemical and

allied products, and miscellaneous manufactures. The largest increase was recorded in the locals reporting for non-ferrous metal industries, namely from full employment to 5.7 per cent.

Reports were received from 854 locals in the transportation industries. These reported a combined membership of 91,629 of whom 264 or 0.3 per cent were without work on the reporting date. In comparison, 0.6 per cent of 92,663 members were reported unemployed at the end of March, 1945, and 0.3 per cent of 79,380 members at the end of June, 1944. Unemployment among union workers in navigation decreased to 0.7 per cent from 0.8 at the end of the previous quarter and 1.2 at the end of June in the previous year. A slight

125, or 0.4 per cent, were unemployed at the end of June. This compares favourably with 0.6 per cent of members without work at the quarter preceding, but is a slight increase compared with 0.3 per cent at the end of June in the previous year. Unemployment among coal miners improved from 0.3 to full employment for the period under review. Full employment in this industry was also reported in June, 1944. No unemployment was reported among metal miners for the quarter ended June 30, but 3.5 per cent of 3,564 union members engaged in non-metallic mining were without work at that date. Unions of non-metallic miners reported unemployment percentages of 3.4 and 2.1 for March, 1945, and June, 1944, respectively.

employment increase was registered in the steam railway group to 0.3 from 0.7 at the end of the previous quarter and 0.4 at the end of June, 1944. Unions whose members are engaged in local and highway transportation showed no change in employment as compared with the previous quarter. The 0.2 per cent reported was, however, an increase over the almost full employment recorded in June, 1944.

There were 69 unions of miners reporting a total membership of 30,754 persons, of whom

The Department received reports from 192 locals in the building and construction trades with a combined membership of 30,071 persons of whom 82 or 0.3 per cent were unemployed. In comparison 1.9 per cent were unemployed at the end of March, 1945, and 0.9 at June 30, 1944. Bridge and structural iron workers, electrical workers, and lathers continued to be fully employed, while improvement in employment was noted in all the other groups in this category particularly steam shovel and

dredgemen; bricklayers, masons and plasterers; carpenters; plumbers and steamfitters; and among hod carriers and miscellaneous building workers.

The 0.2 per cent unemployment in public and personal service is the same as was reported at the end of June, 1944, but is a slight improvement over the 0.3 per cent registered at March, 1945. Employment in the retail trades improved from 2.1 at March to full employment for the period under review. Full employment for this group was also noted at June 30 of the previous year.

Unemployment in the communications groups increased from 0.1 to 1.3 per cent of the total reported membership of 7,875. At the same date in the previous year, 1.5 per cent were unemployed.

One union of fishermen reported 10.9 per cent or 25 of its 230 members as unemployed. This sample is too small to be considered representative of the general conditions in the industry.

At the end of the quarter under review full employment was reported for lumber workers and loggers. The same situation prevailed at June of the previous year. Six point one per cent of 6,587 members were unemployed at March, 1945.

The accompanying chart illustrates the trend of unemployment from January, 1939, to date. Table I shows by provinces the average percentage of union members who were unemployed each year from 1933 to 1944 inclusive. Also indicated is the percentage of those without work for June of each year since 1932, for each month of 1943, and for each quarter of 1944. Table II indicates the percentage of unemployment in the various groups of industries at certain dates since 1932.

TABLE I.—PERCENTAGES OF UNEMPLOYMENT IN TRADE UNIONS BY PROVINCES

STRIKE activity in Canada during the month of July increased sharply as compared with June and was greater than in July, 1944. Preliminary figures show 28 strikes in existence during July, involving 11,884 workers and causing a time loss of 45,273 man-working days, as compared with 12 strikes in June, with 2,773 workers involved and a time loss of 4,688 days. In July, 1944, there were 23 strikes, involving 9,571 workers, with a time loss of 26,023 days.

Preliminary figures for the first seven months of this year show 108 strikes, involving 36,855 workers, with a time loss of 128,996 man-days, as compared with 135 strikes, with 57,423 workers involved and a time loss of 344,311 days, for the same period last year.

Of the 28 strikes recorded for July, 1945, two resulted in favour of the workers, four in favour of the employers, two were compromise

settlements and nine were indefinite in result, work being resumed pending final settlement. At the end of the month, therefore, 11 strikes were reported as untermiated, namely—tire factory workers, Kitchener, Ont., meat packing plant workers at Toronto, Ont., Peterborough, Ont., St. Boniface, Man., Edmonton, Alta., and Vancouver, B.C., compositors, pressmen, etc., at Quebec, P.Q., moulders at Moncton, N.B., metal factory workers at Vancouver, B.C., elevator mechanics and helpers at Montreal, P.Q. and plumbers at Windsor, Ont.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		

MANUFACTURING— Metal Products— Foundry workers, Guelph, Ont.	1	(a) 227	1,800	Commenced June 26; protest against Finding and direction of NWLB† disallowing most of wage increases approved by RWLB†; terminated July 11; return of workers pending further negotiations; indefinite.
	3	(b) 10	200	Commenced June 27; against dismissal of a worker allegedly for union activity; terminated July 25; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.

MINING— Coal miners, New Waterford, N.S.	1	984	3,500	Commenced July 3; re payment to loaders for extra coal loaded Saturdays; terminated July 7; return of workers; in favour of employer.
	3	1,500	2,250	Commenced July 9; against deductions from pay of miners for quitting work before end of shift; terminated July 10; return of workers; in favour of employer.
	2	800	2,400	Commenced July 9; for increased brushing in low long-wall areas; terminated July 12; conciliation, federal; in favour of workers.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1945*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During July, 1945—Continued				
MANUFACTURING—				
Rubber and Its Products—				
Tire factory workers, Kitchener, Ont.	1	322	400	Commenced July 28; for increased wages for maintenance men while on plant reconstruction work; untermi- nated.
Animal Foods—				
Meat packing plant workers, Toronto, Ont.	5	(c)1,498	10,450	Commenced July 17; for dismissal of a worker suspended from membership in union; untermi- nated.
Meat packing plant workers, Peterborough, Ont.	1	190	950	Commenced July 26; in sympathy with strikers at Toronto, July 17; untermi- nated.
Meat packing plant workers, St. Boniface, Man.	1	(d)1,346	5,384	Commenced July 27; in sympathy with strikers at Toronto, July 17; untermi- nated.
Meat packing plant workers, Edmonton, Alta.	1	(e) 571	1,142	Commenced July 30; in sympathy with strikers at Toronto, July 17; untermi- nated.
Meat packing plant workers, Vancouver, B.C.	1	130	260	Commenced July 30; in sympathy with strikers at Toronto, July 17; untermi- nated.
Boots and Shoes (Leather)—				
Shoe factory workers, Quebec, P.Q.	1	53	360	Commenced July 9; for payment of wage adjustments approved by RWLB; terminated July 16; conciliation, provincial, and reference to arbitration; in favour of workers.
Pulp, Paper and Paper Products—				
Pulp and paper mill workers, Clermont, P.Q.	1	278	556	Commenced July 20; inter-union dispute re employment of an out-of-town worker to fill a vacancy; terminated July 21; negotiations; compromise, trial to be given to worker having seniority.
Printing and Publishing—				
Compositors, pressmen, etc., Quebec, P.Q.	1	59	970	Commenced July 9; against transfer of a worker from one job to another; untermi- nated.
Miscellaneous Wood Products—				
Saw and planing mill workers, Matane, Priceville, Rimouski, P.Q.	3	1,400	5,600	Commenced July 16; for increased wages; terminated July 20; conciliation, provincial, and return of workers pending further reference to RWLB and NWLB; indefinite.
Metal Products—				
Foundry workers, Weston, Ont.	1	200	125	Commenced July 5; for check-off in new agreement under negotiations; terminated July 5; conciliation, federal, and return of workers pending settlement; indefinite.
Freight car factory workers, Trenton, N.S.	1	1,161	4,900	Commenced July 7; against dismissal of a rivet heater for alleged failure to do his work; terminated July 14; negotiations, return of workers and replacement; in favour of employer.
Moulders, Moncton, N.B.	1	(f) 19	250	Commenced July 16; protesting change in working conditions due to change-over from incentive bonus to piece-work rates; untermi- nated.

STRIKES AND LOCKOUTS IN CANADA DURING JULY, 1945*—*Concluded*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Establishments	Workers		
Strikes and Lockouts Commencing During July, 1945—Concluded				
Foundry workers, Orillia, Ont.	1	57	114	Commenced July 18; protesting appeal by the Company to NWLB against decision of RWLB re increased wages; terminated July 19; conciliation, provincial, and return of workers pending decision of NWLB; indefinite.
Metal factory workers, Vancouver, B.C.	1	446	1,600	Commenced July 27; for implementation of Minority Report of IDI; Board re union shop and check-off; untermminated.
Elevator mechanics and helpers, Montreal, P.Q.	3	9	9	Commenced July 31; against dismissal of a worker; untermminated.
Shipbuilding— Carpenters, Dartmouth, N.S.	1	30	48	Commenced July 9; against working with two members of another union; terminated July 11; negotiations and return of workers pending settlement; indefinite.
Ship repair workers, Sydney, N.S.	1	70	190	Commenced July 12; against dismissal of a worker for cause and protesting allotted vacations as listed; terminated July 17; conciliation, federal, and return of workers pending investigation re vacations; indefinite.
CONSTRUCTION— Buildings and Structures— Plumbers, Windsor, Ont.	16	(g) 75	1,050	Commenced July 12; against Finding and Direction of NWLB cancelling wage increase approved by RWLB; untermminated.
TRANSPORTATION AND PUBLIC UTILITIES— Electric Railways and Local Bus Lines— Electrical workers, Toronto, Ont.	1	(h) 97	75	Commenced July 5; for increased wages; terminated July 5; conciliation, civic, and return of workers pending reference to arbitration; compromise.
Water— Freight handlers, Port McNicoll, Ont.	1	(i) 136	375	Commenced July 5; for amendment of clauses in agreement affecting wages and working conditions; terminated July 7; return of workers pending further negotiations; indefinite.
TRADE— Coal handlers, Montreal, P.Q.	1	186	300	Commenced July 11; refusal of a worker to join the union; terminated July 12; conciliation, provincial; in favour of employer.
SERVICE— Business and Personal— Laundry workers, Brandon, Man.	1	30	15	Commenced July 30; for increased wages; terminated July 30; negotiations and return of workers pending joint application to RWLB; indefinite.

*Preliminary data based where possible on direct reports from parties involved, in some cases incomplete; subject to revision for the annual review.

†In this table the date of commencement is that on which time loss first occurred and the date of termination is the last day on which time was lost to an appreciable extent.

* Preliminary. † Strikes un-terminated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the *Labour Gazette* from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries." The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in May, 1945, was 176 and 14 were still in progress from the previous month, making a total of 190 during the month, in which

51,100 workers were involved and a time loss of 128,000 working days was caused.

Of the 176 stoppages which began during May, 11 arose out of demands for advances in wages, 73 on other wage questions; two on questions as to working hours; 20 on questions respecting the employment of particular classes or persons; 65 on other questions respecting working arrangements; and five on questions of trade union principle.

British India

Preliminary figures for February, 1945, show 42 work stoppages, involving 32,717 workers with a time loss of 406,171 man-days.

United States

Preliminary figures for June, 1945, show 485 strikes and lockouts beginning in the month, in which 292,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 1,725,000 days. Corresponding figures for May, 1945, are 425 strikes, involving 310,000 workers, with a time loss of 2,025,000 working days.

Prices

Prices, Retail and Wholesale, in Canada, July, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported by the Dominion Bureau of Statistics

THE official cost-of-living index rose 0·7 points to 120·3 between June 1 and July 3, 1945, reflecting seasonal increases in fresh vegetables and eggs, with a few meats also slightly higher. Oranges and raisins averaged lower. The food group index advanced 2·2 points to 135·6 between June 1 and July 2, while other group indexes showed homefurnishings and services up 0·3 points to 119·2, and clothing 0·1 higher at 122·2. Fuel and lighting declined 0·1 to 106·5, while rentals at 112·1 and miscellaneous items at 109·4, remained unchanged.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is

prepared each month by the Dominion Bureau of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in com-

COST OF LIVING AND WHOLESALE PRICES IN CANADA 1914-1922 AND 1939-1945

BASE: PRICES IN JULY, 1914 AND IN AUGUST, 1939 = 100

piling and printing a separate table for chain store prices were not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rentals figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, homefurnishings, etc., with their weights, was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Price Control in Canada*.

Wholesale Prices, June, 1945

The general wholesale price index for June 1945 moved up 0.2 to 103.2, due to increases in vegetable and animal products which over-balanced declines in non-metallic minerals. Vegetable products rose 1.0 to 98.0 due to higher quotations for potatoes, onions, rye, oats, hay, oranges, bananas and raw leaf tobacco. Among animal products, gains in livestock, lamb carcass, whitefish, sheepskin and eggs outweighed a decline in butter to move the index 0.3 higher to 107.5. Non-metallic minerals, the only other group to record a change in June, dropped a further 0.6 to 102.0 following reductions in imported American bituminous coal and British Columbia slack coal. Index levels for the other five groups remained as follows: fibres, textiles and textile products 91.7; wood, wood products and paper 117.6; iron and its products 115.3; non-ferrous metals 79.7, and chemicals and allied products 98.6.

Prices for Canadian farm products more than recovered their declines of the previous month to register an index gain of 1.1 points to 105.7 in June. Higher quotations for livestock, fowl, hides and skins and eggs were reflected in an increase of 1.3 to 122.4 in animal products while field products rose 1.0 to 95.8 due to gains in grains, potatoes, onions, hay and raw leaf tobacco.

(a) The basis of these figures is the record of rents collected in the 1941 census of housing. The movement since then has been determined from reports from real estate agents, the census averages being adjusted in accordance with the changes indicated by these reports.

(b) Rents marked (b) are for apartments or flats. Other rent figures are for single houses. Apartment or flat rents have been shown where this type of dwelling is more common than single houses.

Nova Scotia Royal Commission on Development and Rehabilitation

ON May 12, 1943, the Nova Scotia Government appointed a Royal Commission on Provincial Development and Rehabilitation. Professor R. MacGregor Dawson of the University of Toronto was chosen Commissioner. The terms of reference included investigation and reporting on

the natural resources and industries of the Province for the purpose of aiding in the rehabilitation of those discharged from the armed forces, those released from war industries, and all others who might seek employment, and also for the purpose of ascertaining the possibilities of general economic development with a view to the expansion of industries and markets and a resultant increase in general employment in Nova Scotia.

The Commission's report was completed towards the end of 1944 and was made public in the Spring of 1945. The two-volume report contains the results of a searching and exhaustive inquiry into all phases of the Nova Scotian economy and problems. Besides the Report of Transmission, there are monographs on Agriculture, Public Welfare Services, Education, Provincial Finance, Fisheries, Manufacturing Industries, Labour Relations, Housing, and other similar subjects.

Recommendations

Among the recommendations in the report are the raising of the school-leaving age from 14 (rural areas) and 16 (towns and cities) to 15 and 17 respectively, extension of the Minimum Wage Act to cover males as well as females, and workers outside towns and cities, review of wage orders after the war, changes in methods of enforcement, and co-ordination in the administration of the Industrial Standards and Minimum Wage Acts. A greater expenditure on Accident Prevention and more attention to rehabilitation of the disabled are recommended for the workmen's compensation system. The report also contains suggestions for training and apprenticeship, the settlement of industrial disputes, and better labour relations in the coal mining, iron and steel, shipbuilding and other industries.

The Report of Transmission stresses the fact that the preliminary step to any effort at reconstruction is a settlement of the functional and financial powers of the Dominion and the Provinces. Among the recommendations made are the establishment of a provincial Department of Reconstruction, and a Research and

Development Board. The Report points out that Nova Scotia has handicaps but also marked advantages in certain fields. It suggests that the province should emphasize and develop to the utmost those activities in which her advantages are unmistakable. On the other hand, disadvantages can be overcome by being more efficient than competitors.

The Report of Transmission concludes with a quotation from a brief submitted to the Commission. "Our greatest hope for success in a competitive civilization lies in developing a type of citizen more highly trained and better equipped than in the rest of Canada to grapple with economic, political, and social problems. Education is our most promising weapon."

Education

The report on Education stresses the importance of an adequate educational system in all proposals for future economic and cultural development. While the most urgent need of education in the province is money, the report points out that increased salaries and a revision of the pension system for teachers are essential. The study stresses the inadequacy of existing library facilities and the importance of extending vocational education which has been "greatly neglected". An important recommendation is the raising of the minimum school-leaving age from 14 (rural areas) and 16 (towns and cities) to 15 and 17 respectively. The report also urges that part-time school work be made compulsory in rural districts until 16 and in urban areas until 18.

Minimum Wages

Of special interest is the 80-page study of Labour Relations made by Professor H. A. Logan of the University of Toronto. The report strongly urges changes in the Minimum Wage Act to make it applicable to males as well as females and to extend coverage to workers outside cities and towns. After pointing out that rates in the Minimum Wage Orders have not kept pace with the increase in the cost of living, the dollar increase in 1941 amounting to only 8 or 9 per cent for experienced workers, Dr. Logan recommends a review of all the Orders after the war. Increased overtime rates, rather than the pro rata ones in force, are suggested.

Many features in the administration of the Minimum Wage Act are praised, but con-

siderable criticism, concerning enforcement is reported. As a remedy, Dr. Logan suggests co-ordination in the inspection staff of the Department of Labour, and recommends that the Board be given responsibility for prosecution of offenders and for recovery of arrears in wages.

The Industrial Standards Act is highly praised for both its purposes and results. The report suggests that the scope of the Act be extended to the whole province instead of applying as at present only to the building trades in Halifax and Dartmouth. Another important recommendation is that the administration of the Industrial Standards Act be co-ordinated with that of the Minimum Wage Act. The Chairman of the proposed 3-member board should be a full-time salaried officer, while the other members should represent workers and employers, enjoying their confidence.

Workmen's Compensation

The province is lauded for its progressive amendments of the Workmen's Compensation Act in 1943 and 1944. The only suggestions made in this field are a greater expenditure on accident prevention and more attention to rehabilitation of the disabled.

Training, Apprenticeship and Education

Dr. Logan has both praise and criticism of training, apprenticeship and education in the province. In regard to skilled tradesmen, a co-operative arrangement among three firms in Halifax has proved satisfactory. The report points out that a satisfactory apprenticeship system must provide machinery for consultation with labour unions, employers' associations, the Employment Service, Departments of Education, Industry and Labour, and Economics Departments in Universities. A special section on industrial training within the Department of Labour is recommended. The importance of preparing well-equipped industrial relations officers and trade union leaders is emphasized.

Settlement of Industrial Disputes

In discussing the settlement of industrial disputes, the survey suggests that the enforcement of collective bargaining under the provincial Act should be given to a special board as in the administration of the Dominion War-time Labour Relations Regulations (P.C. 1003). Dr. Logan also urges that in wage questions the Regional War Labour Board should adopt the principle of trying to ensure the same purchasing power, rather than the same wage rates, for Nova-Scotian workers as that in other provinces.

The report urges that "intelligent attention" should be given to reducing the cost of living in Nova Scotia. Another recommendation is the appointment of a Deputy Minister in order to strengthen the Department of Labour.

Coal Mining

After dealing with labour relations in a general way, Dr. Logan pays particular attention to the coal mining and iron and steel industries. Some of the recommendations for improvement in the coal fields are the finding of additional men for work at the face, the amendment of income tax regulations, the setting up of labour-management committees, technological changes, and improvement of life in the mining communities. The prospect for more stable labour relations in this industry is brighter, according to the report. The Government is urged to encourage the continuance of bargaining with the United Mine Workers of America, and the use of the machinery of the Dominion War-time Labour Relations Regulations (P.C. 1003) "to end the long delays in getting agreements signed" is advocated.

Iron and Steel Industry

Suggestions for the iron and steel industry include a "new approach" to labour-management co-operation, the elimination of delay in reaching collective agreement, and wage uniformity for companies and areas on a real rather than money wage basis.

Other Industries

The report also deals with conditions in the shipbuilding industry. Here as in the coal and iron and steel industries, the fear of insecurity creates an important problem. The survey concludes with statements on the fish, long-shore, textile, and pulp and paper industries. As regards wages in the textile industry, Dr. Logan states that apart for unionization the textile workers must rely chiefly on an amended Minimum Wage Act and Order.

In conclusion, the report makes it clear that permanent improvement is a matter than can come only through treating the fundamentals. Attention at this time should be directed therefore not so much toward disputes and stoppages as toward education, definition of economic purpose, and development of forms of organization calculated to encourage a more general participation and sense of social responsibility.

In accomplishing this, it must be realized in the first place, that counselling is an approach rather than a solution to the problem. Not only that, but counselling should awaken in the applicant a realization of his capacities,

opportunities and limitations, thus revealing what adjustments he will have to make.

Again, it is indicated that persons who are "occupationally maladjusted", if neglected, eventually become "occupational misfits." It is necessary, therefore, that the guidance counsellor "must be able to recognize symptoms of anxiety and emotional instability". It may be advisable to administer aptitude tests and to make personality inventories in order to apply proper remedies. Such objective tests were stated to be a great assistance to guidance counsellors.

Qualifications of Guidance Counsellors

The report suggests that the successful counsellor "should know and be able to understand people. He should be familiar with occupations" and possessed of an ample supply of practical common sense. These, combined with expert knowledge of the technique of occupational counselling, are essential qualifications for an efficient counsellor.

How Educational Authorities May Assist

The report enumerates several proposals presented to the Universities and to provincial Departments of Education as to the nature of their co-operation and assistance in a general scheme of vocational guidance. It was suggested that evening classes be instituted by the Universities for instruction in aptitude testing, personnel psychology, job analyses, statistical methods and counselling procedures,

etc., which would be open to placement officers in the Employment Services. The privilege of referring neuro-psychiatric and other nervous cases to specialists on the staffs of Universities was also sought. Assistance was asked in the preparation of psychological and aptitude tests and in conducting occupational surveys among the students and graduates of universities and colleges.

It was noted that in some provinces vocational counselling is included in the curricula of the secondary schools. While the maintenance of school records along the lines of those suggested is not general practice, assurances were given by officials of the Departments of Education that they soon would be. These will be made available to the Employment Offices with the proviso that they be requested only for employment personnel qualified to interpret the data. This information may also be made available to students upon their graduation in some, at least, of the provinces.

The report states that the proposals made to the Universities and to the provincial Departments of Education met with a gratifying response. At the same time, it was felt that the lack of authentic and adequate information with regard to occupations, retarded guidance programs in the schools. However, "all were agreed that the Employment Service is the logical agency to compile the necessary information in such form that it can be used in guidance work in the schools."

Fatal Industrial Accidents in Canada During the Second Quarter of 1945

DURING the second quarter of 1945 there were 274 fatal industrial accidents, including deaths from industrial diseases reported by workmen's compensation boards, etc. This compares with 286 fatal accidents during the second quarter of 1944. Of the 274 fatalities during the period under review, 82 occurred in April, 103 in May and 89 in June. Fatal accidents during each year are recorded by quarterly periods in the issues of the *LABOUR GAZETTE* for May, August and November of that year, and in February of the following year.

The supplementary lists of accidents not reported in time for inclusion in the reports covering the periods in which they occurred contain 22 fatalities for the first quarter of 1945 and 17 fatalities for 1944.

In this series of reports it is customary to record industrial accidents under the dates of their occurrence and fatal industrial diseases under the dates on which they prove fatal.

Information concerning accidents was received from the provincial Workmen's Compensation Boards, the Board of Transport Commissioners, certain other official sources as well as from the correspondents of the *LABOUR GAZETTE* and from newspaper reports.

Classified by groups of industries the fatalities occurring during the second quarter of 1945 were as follows: agriculture, 22; logging, 49; fishing and trapping, 8; mining, non-ferrous smelting and quarrying, 45; manufacturing, 49; construction, 22; central electric stations, 6; transportation and public utilities, 56; trade, 8; service, 9.

Of the mining accidents, 21 were in "metalliferous mining," 18 in "coal mining," and six in "non-metallic mineral mining and quarrying, n.e.s."

Of the accidents in manufacturing, two were in "vegetable foods, drink and tobacco," one in "animal foods," eight in "saw and planing mill products," six in "pulp, paper and paper products," one in "printing and publishing," 18 in "iron, steel and products," five in "non-metallic mineral products," four in "chemical and allied products," two in "shipbuilding," and two in "miscellaneous products."

In construction there were 13 fatalities in "buildings and structures," six in "highway and bridge," and three in "miscellaneous."

In transportation and public utilities, there were 25 fatalities in "steam railways," one in "street and electric railways," 16 in "water transportation," one in "air transportation," 11 in "local and highway transportation," and two in "storage."

In trade there were four fatalities in "wholesale," and four in "retail."

Of the fatalities in service, four were in "public administration," one in "laundering, dyeing and cleaning," three in "personal, domestic and business," and one in "professional."

There was no major disaster during the period under review. The most serious accident occurred at Luscar, Alberta, on May 13, where seven miners lost their lives when trapped in a coal mine following explosions. Five labourers were drowned when a boat capsized while working on a boom at St. Leonard, N.B., about April 5.

Other accidents involving the loss of two or more lives were as follows:

Two river drivers fell into a river and were drowned when a peavey slipped, near Blind River, Ontario, on May 21. Two labourers were drowned while breaking up a log jam, near Nelson, B.C., on May 31.

Two fishermen died from exposure after their boat was wrecked in a gale, off Queen Charlotte Islands, B.C., about June 10.

Two guides for an oil company were drowned while fording the Wapita River, Alberta, on June 5.

Two telephone linemen were killed when a train struck their truck, at Three Rivers, Quebec, on June 10.

When a tug sank following a collision with another tug, a tug operator and a deckhand were drowned, off Vancouver, on June 2.

Supplementary List of Accidents

A supplementary list of accidents occurring during the first quarter of 1945 has been compiled which contains 22 fatalities, of which three were in logging, one in mining, non-ferrous smelting and quarrying, seven in manufacturing, one in construction, one in central electric stations, seven in transportation and public utilities, and two in service. Three of these accidents occurred in January, three in February and 16 in March.

A further supplementary list of accidents occurring in 1944 has been made. This includes 17 fatalities, of which two were in mining, non-ferrous smelting and quarrying, seven in manufacturing, two in construction, three in transportation and public utilities, and three in service. One of these accidents occurred in January, two in May, one in June, two in October, seven in November, and four in December.

Labour and Industry in Ontario

Annual Report of Department of Labour, 1944

IN the twenty-fifth report of the Ontario Department of Labour for the fiscal year ending March 31, 1944, it is stated that the industrial expansion that characterized the earlier war years was continued on a smaller scale, "due to the drain of manpower for the armed forces and for industry, which had already taken place." The annual index number of employment in 1944 was 185.3, as compared with 182.8 in 1943, or an advance of 2.5 points. The advances in the index number since the beginning of the war were 5.2 points in 1940; 17.8 in 1941; 32.6 in 1942; 15.2 in 1943; and 2.5 in 1944.

Manufacturing as a whole, especially the lumber and iron and steel industries, showed increased activity, while gains were slighter in the pulp and paper industry, and the textile industry afforded considerably less employment. There were decided contractions in the mining and logging industries and losses on a smaller scale in construction, communications and trade. Considerable gains were reported in employment in services and transportation.

Industrial Disputes.—During the fiscal year, 1944, there were 90 strikes in Ontario in which 31,497 workers were involved in a time loss of 134,840 man-working days, as compared with 98 strikes involving 32,582 workers in a time loss of 171,178 man-working days in 1942.

Of these 90 strikes in 1944, 78 lasted less than five days; eight lasted more than five and less than fifteen days, and four lasted for 30 to 50 days. In 48 of the strikes less than 100 workers were involved and the two largest strikes involved 1,000 and 15,000 workers respectively.

The chief cause of strikes concerned wage increases, there being 28 for this cause and eleven others in which various phases of remuneration formed part of the demands of the workers. Twenty-six of the strikes were due to disputes over working conditions; fourteen were caused by demand for union recognition, closed shop agreements, new agreements, and against delay in negotiations, while eleven resulted from suspension, dismissal, or lay-off of workers. Of the 90 strikes, 21 were decided in favour of the employers; 26 in favour of the employees; 29 ended in some form of compromise and

14 were referred to the Regional War Labour Board, the Labour Court, or Boards of Conciliation.

Mediation, Conciliation and Arbitration.—During the fiscal year 48 Boards of Conciliation were appointed after investigation had been made by the conciliation officers in an effort to adjust matters in dispute. The conciliation officers undertook for the Regional War Labour Board 545 investigations in plants in all parts of the province, in order to obtain complete information regarding wage structures, not only in plants under review, but in other plants in similar industries in the same districts. They also acted as arbitrators in 14 cases involving 76 grievances and as returning officers in 92 plant elections.

Factory Inspection Branch.—The number of inspections made totalled 25,866 as compared with 25,511 in 1943. It is pointed out in the report that a large proportion of employers working under the pressure of wartime production favoured the shorter working week and a greater use of shift work. The records of hours of work indicate that in the groups of employees working up to 49 hours per week, which include those on eight-hour shifts, there was an increase of approximately 212,000, with a resulting decrease specially marked in the 50 to 53 hours and also among those working 58 hours and more per week.

The special committee within the Department of Labour having authority to grant concessions for night shifts for female workers on war production granted special authorities to approximately 400 firms, covering 66,000 female workers in the years 1942 to 1944 inclusive. Many of these authorities were for the duration of the wartime emergency.

During the fiscal year, 1944, 16,610 industrial accidents were reported to the Factory Inspection Branch, as compared with 14,521 in 1943. There were 68 fatalities in 1944 as compared with 66 the previous year. Cases of industrial diseases, which are included in the above figures, numbered 490 in 1944, as compared with 295 in 1943.

Amendments to the Factory, Shop and Office Building Act included several important changes for increased protection against accident and health hazards, the provision of welfare facilities and of greater protection against fire.

The Examiner of Reports and Designs approved 714 plans for new factory, shop or office buildings, or additions and alterations to such buildings, the cost of the construction of which amounted to \$20,394,800.

Boiler Inspection.—During the fiscal year, 1944, 373 designs and specifications were surveyed and registered, 2,048 new boilers and pressure vessels were inspected during construction, including inspections of pressure piping installations and 931 inspections were made of used boilers and pressure vessels. In addition, 6,209 annual inspections were carried out by inspectors of the Branch under the Factory, Shop and Building Act, and 6,198 certificates were issued.

Apprenticeship Branch.—At the request of the Federal Department of Pensions and National Health the Apprenticeship Branch co-operated in the proposed program for the re-establishment of returned members of the armed forces. A definite plan for training and placement was drafted by the Provincial Advisory Committee for the building trades and accepted by the Federal Department. A similar agreement for the motor vehicle repair trade had been prepared and awaited ratification.

During the fiscal year, 1944, 175 apprenticeships were registered in the building trades; 46 in the motor vehicle repair trade; 106 in hairdressing and one in barbering, a total of 328 as compared with 337 in the previous

year. In all trades, 73 contracts were cancelled during the year, 122 were completed and 1,282 apprentices were receiving training at the close of the fiscal year. In addition, 29 contracts of apprenticeship were registered by employers in trades other than designated trades.

Minimum Wage Branch.—The number of employers that reported to the Minimum Wage Branch in 1944 was 21,798 covering 578,442 employees, of whom 224,459 were females. As a result of the disclosure of underpayment in these returns, increases in wages were ordered for 74 females in 58 establishments. Arrears of wages amounting to \$206.71 were collected for nine employees in eight establishments. Rates of pay for homework submitted by 360 employers were approved. Permits for handicapped workers were issued to 53 employers, covering the employment of 84 workers. One employer was prosecuted and fined on a charge of failure to produce records.

Regional War Labour Board.—Since the inception of the Wartime Wages Control Order in October 1941, and to the end of March, 1944, approximately 16,000 cases were submitted to the Regional War Labour Board of Ontario. More than 40 per cent of these cases, representing more than one-half million workers, were dealt with by the Board during the fiscal year, 1944.

Guaranteed Employment and Annual-Wage Provisions in United States

VARIOUS methods of increasing job security for wage earners have been evolved in recent years and have become an important objective in many industrial-labour relationships, notably in the United States (L.G., 1944, p. 1466). The *Monthly Labor Review*, official publication of the United States Department of Labour, in its issue for April, 1945, supplies a lengthy analysis of the development of this trend in that country.

It is pointed out that Government concern and interest in guaranteed employment in the United States is reflected in unemployment compensation laws, public-works programs and sections of the Fair Labor Standards Act. A number of the State Compensation laws seek to encourage regularization by including merit-rating provisions by which the employer's unemployment tax decreases in proportion to the increase in employment stabilization. The Fair Labor Standards Act grants a partial exemption from the overtime pay requirements to those companies entering into agreements with unions which guarantee continuous employment for 52 weeks and limit hours to 2,080 per year.

But while a number of employers have made efforts toward regularizing employment within their plants, only a few have gone so far as to guarantee annual wages on employment to all, or substantial portions of their employees. Until a company has been able to regularize employment it has been found that it is usually not in a position to agree to guaranteed annual incomes. Some have tried to do so only to discontinue the plan after it had been in operation for a year or two. Labour unions, always anxious to secure regular and full employment, have in some instances, co-operated with employers in efforts to reduce seasonal unemployment, as well as in programs of expansion. They have agreed to share-the-work-plans, seniority rules, and dismissal pay for lay-offs. None of these palliatives however, provide security of income or employment. They only serve to share periods of unemployment or soften the blow from the loss of a job. As a result, to an increasing extent unions are seeking job security for their members through the inclusion of employment and wage guarantees in their contracts with employers. It is these agreements which the report discusses.

At the outset, the report enumerates briefly the gradations in employer-union agreements. It states that "very few of the agreements

currently in force contain a guarantee of employment and most of those which are in effect are limited in scope. Some restrict the guarantees to particular groups of workers; some provide less than a year's guaranteed employment; some permit the employer to cancel or reduce the guarantee under specified circumstances. None of them provides guarantees of employment for prolonged periods of time, since they are necessarily limited to the duration of contracts, most of which are in effect for only one year." Broadly speaking, such agreements are divided into two classes—those guaranteeing employment and those guaranteeing annual wages.

Extent of Plans

"Guaranteed employment or annual wages are assured to approximately 42,500 workers out of eight million workers covered by employer-union agreements" included in the report. Roughly 30,000 were employed in the service and distributive industries employing relatively small numbers of workers. There were a few notable examples in fairly large manufacturing companies, but the total number of these workers was "very small—about 12,500."

The plans, whether they guaranteed employment or annual wages, differed not only with respect to the proportion of a year's normal income or work which was guaranteed, but as to the inclusiveness of the labour force that benefited. For example, they might be restricted to key men or other small groups in a plant, who would be fairly regularly employed in any case. The most extended coverage in guaranteed plans included "regular" employees who had completed specified probationary periods, usually six months. The most restricted plans limited the coverage to a relatively few highly skilled craftsmen, foremen, or other special groups. Several agreements had clauses that specifically revoked the guarantee in case of bankruptcy or sale of the business and reserved the right to suspend them in the case of fire, flood, strikes, or other situations beyond the control of management. In a few instances "serious decline of business" gave the employer the right to reduce or cancel his obligation but usually in such cases, the permission of the Union had to be obtained, or the matter referred to arbitration. Frequently dismissal wages were provided in lieu of payment of the guaranteed wage.

Guarantee Plans in Manufacturing Industries.—Out of a total of 6,500 agreements analysed in manufacturing industries, covering over six million workers, 131 provided some form of guaranteed employment or annual-wage plan, covering the workers in 142 companies. Eighty-eight of these guaranteed a full year's employment or wages and the remainder provided guarantees for less than a year. In only a few instances were the guarantees unqualified and virtually all of them were in the meat packing, shoe, dairy, and leather goods industries. Limited groups of workers were covered by wage guarantees signed by companies in the textile, printing, finishing, dyeing, ladies' apparel, grain-milling and ice industries. Employment guarantees for both yearly and shorter periods, were provided by a varying number of agreements in the grain and cereal milling, dairy, syrup and preserves, electroplating, dress manufacturing, soap, textile refinishing and bleaching, fur designing and millinery industries.

Guarantee Plans in Non-Manufacturing Industries.—Approximately 30,000 workers in non-manufacturing industries, out of an estimated two million workers under this classification and included in the study, were covered by some form of employment or wage guarantee. Over ninety per cent of

these workers received year-round guarantees, while the others were assured employment or wages for less than a year. Most of these plans covered persons employed in the retail and wholesale trade, chiefly in New York City. Others covered workers in service industries such as cleaning and dyeing establishments, maintenance work in hotels, office buildings and railways, as well as public utility employees, press wireless operators and employees in social services, cemeteries and custom tailoring. Owing to the nature and type of the industries involved, the normal size of establishment which these agreements covered was small. In addition, the guarantee most frequently covered only a portion of the working staff—a "basic crew" agreed upon at the time the agreement was negotiated. However, with few exceptions, replacements of covered employees were included in the plans. Thus there was no reduction in the number of full-time guaranteed jobs.

The majority of the agreements which contained guarantees were to be in effect for two years and in one instance for three years. Most of them could be voided under certain conditions, such as liquidation or discontinuance of business, withdrawal of capital, "material decrease in revenue," "unforeseen catastrophes," etc.

Employment and social security plans proposed by Dominion Government

Elsewhere in this issue appears an article dealing with the Dominion-Provincial Conference which opened recently in Ottawa. Included in the Proposals of the Dominion Government which were laid before the Conference were a number of suggestions for legislation and other action in the fields of reconstruction, health and welfare and labour which will be of special interest to readers of the LABOUR GAZETTE.

These include: acceptance by the Dominion of complete responsibility for the employable unemployed, to be effected by a broadening of unemployment insurance coverage, supplemented by a scheme of unemployment assistance; Dominion-provincial co-operation in a public investment program; health insurance and national old age pension plans; and other matters.

A summary of the Dominion Government proposals appears on page 1280.

Statement by Minister of Labour on V-J Day

The Minister of Labour, Honourable Humphrey Mitchell, issued the following statement on August 16, the date of the acceptance of terms of surrender

by the Japanese:

With the acceptance of terms of surrender by the Japanese, the world's greatest and most devastating war has ended after nearly six years of struggle between the forces of freedom and oppression.

Canadian sailors, soldiers and airmen in common with the fighting forces, of the United Nations, have played a proud and noble part in the vanquishing of our enemies. To them we pay well-merited tribute.

In doing so we must not forget the magnificent contribution of our working men and women at home. In the war plants, on our farms, our railway systems, mines, forests and every other sphere of activity in which production was vital to the war effort, they all did grand jobs.

Our workers generally have exemplified a high degree of patriotism in the ready and uncomplaining way they accepted the necessary controls and discipline so that there could be full mobilization of the human resources of our country.

Now we look ahead to years of peace. Let us all co-operate to the end that we shall see a speedy return of the basic principles of freedom that, in the final analysis, underlay our victorious efforts in this war.

Department of Labour encourages return to normal working hours

The policy of the Dominion Department of Labour will be to encourage a reduction of working hours in war industries to the normal work week, rather than laying employees off

where there is any uncertainty about their being absorbed immediately into other work. This was announced on August 13 by Hon. Humphrey Mitchell, Minister of Labour, who said that instructions to Local Employment Offices directed the offices to follow this policy

upon employers reporting probable lay-offs, as required under National Selective Service Civilian Regulations.

"Local Employment Offices have been instructed to approve reduction in weekly working hours to the normal week, in preference to lay-offs, provided that the new work week is 40 hours or more", the Minister explained.

This policy was recommended to the Minister of Labour by the National Selective Service Advisory Board.

The Minister added that the policy had not been adopted for the purpose of meeting any existing situation, but rather for a guidance in the future to ease transition from war industry to peacetime arrangements.

**Continued
fractional rise
in cost of
living index**

The Dominion Bureau of Statistics cost-of-living index advanced fractionally from 120.3 on July 3 to 120.5 on August 1, 1945. As in the preceding three months,

foods accounted for the major part of the increase recorded. Although the prevailing movement in vegetable prices was downward, this was more than offset by substantial gains in egg prices, and small advances for butter and lamb. The food index increased from 135.6 for July to 136.2 for August. Home furnishings and services at 119.3 and miscellaneous items at 109.5 were 0.1 higher for August, while clothing at 122.1 was down 0.1. Rentals remained at 112.1 and fuel and light held at 106.5.

The wartime increase in the index is 19.5 per cent: from 100.8 to 120.5.

**Employment
and industrial
statistics**

The latest statistics available reflecting industrial conditions in Canada are shown in the table on page 1271.

A slight increase in industrial employment at July 1, was recorded by the index of employment calculated and published by the Dominion Bureau of Statistics. This is a continuation of the trend indicated at July 1, in 24 of the preceding years since 1920. The number added to the working force was, however, abnormally small. One factor responsible for this situation was a contra-seasonal recession in manufacturing, resulting from the curtailment in war production. Another factor was the less than usual increase in employment in the non-manufacturing industries at the beginning of July.

Comparative figures for the index at certain dates are 175.4 for July 1; 175.3 for June 1;

183.5 for July 1, 1944; 183.7 for July 1, 1943; and 115.8 for July 1, 1939. A decrease in the index had been recorded in each of the preceding six months.

The 15,683 firms co-operating with the Bureau showed a combined working force of 1,792,125 at the date under review. This represents a gain of 1,921 persons or 0.1 per cent over the 1,790,204 reported at June 1. The total payroll at July 1, was \$57,963,883. The average earnings were \$32.34 per week as compared with \$32.10 at June 1, \$31.72 at July 1, 1944, and \$30.97 at the same date in 1943.

Employment in manufacturing, the largest group included in the statistics, experienced a contraction for the fifth successive month; this was largely due to the decrease of activity in chemicals, iron and steel, and non-ferrous metals. A small seasonal contraction was noted in textiles; tobacco and leather were also slacker. On the other hand, a definite upward trend in employment was noted in animal and vegetable foods, lumber, pulp and paper, paper products, printing and publishing, beverages, electrical apparatus and petroleum products. Increased employment was also recorded in the services group.

Productive operations, as indicated by the index of the physical volume of business also calculated by the Bureau, were at a lower level in July than in June and were still lower than in July, 1944. This index reflects the trend in mineral production, manufacturing, construction, electric power output and the distribution of goods; it was 213.7 for July, 219.5 for June and 232.2 for July 1944. Each of the respective groups showed a decline from the previous month. In comparison with July 1944, only construction, electric power output and distribution showed improvement. Imports declined substantially while exports were slightly higher.

Information available for the first six months of 1945, as compared with the similar period in 1944, shows the business index to be 7.9 per cent lower, industrial production 11.3 per cent, mineral production 29.6 per cent and manufacturing 10.8 per cent lower. Imports and exports decreased in value 7.6 and 1.3 per cent respectively. Slaughterings of cattle were 26.1 per cent higher and of hogs 35.2 per cent lower. Production of creamery butter was 1.4 per cent lower than in the comparable six months in 1944, while the production of cheese increased 7.4 per cent. The value of construction contracts awarded increased 15.1 per cent, and the consumption of "firm power" decreased 9.1 per cent.

**Labour Day
Message of
Minister
of Labour**

On September 1, 1945, the Minister of Labour, Hon. Humphrey Mitchell, issued the following statement:

For the first time in seven years Labour Day of 1945 finds the world laying aside its arms, and thinking exclusively in terms of a peaceful future—with all that implies in regard to social betterment and human progress.

The fighting has ended but not all our problems are solved: in fact, some of them are just beginning. One cannot resist breathing a sigh of relief, nevertheless, in thinking that however grave the problems of the future, however serious their consequence to Canada, they will not be accompanied by the death of any more of our brave young men. Our task in a practical way is to show appreciation of the liberty and freedom the young men of the nation have purchased at such a heavy cost to themselves, by building a Canada of which they may be proud.

Problems of reconversion, of re-establishment and of rehabilitation are upon us. In many cases plans are now in effect: in other cases plans are at the point of being made effective; while in other directions we have much plotting and planning to do.

The members of our armed services and our civilian war workers deserve well enough of us that we must do for them all we can, to provided the opportunity for earning a steady and adequate livelihood.

Reconversion cannot be carried through without dislocations; I am sure no one expected it would be otherwise. Through unemployment insurance and other measures we are much better prepared to meet these dislocations than at any other time in our history.

The Federal Government will do its share in carrying our national responsibilities in the difficult days ahead. But the Government means the people, and it must have the co-operation of all sections of the community. Once again I would remind employers—leaders of business, controllers of our enterprises, that they have a very definite responsibility at this time to plan for a high level of employment. They owe it to the community to provide a maximum in the way of jobs. They must make use of every last ounce of energy and initiative to produce results.

At this time we should not allow ourselves to be victims either of undue optimism or unwarranted pessimism. Lay-offs of workers in war industries, which have of necessity terminated the manufacture of munitions and war supplies, should not be taken as evidence of widespread unemployment. But, we cannot assume that employment will remain at a satis-

factory level and must see to it that steps are taken to produce that result.

Labour Day is something in the nature of a birthday for the trade union movement. Over fifty years have passed since the Parliament of Canada first decreed this holiday, so that the workers might celebrate. Labour, through organization, has accomplished much in its own behalf, and has contributed greatly to the upbuilding of the Dominion. On Labour Day, when previous accomplishments of Canada's outstanding Labour leaders are recalled, and the future is discussed, I am sure that all sections of the community will realize that there cannot be general prosperity and contentment unless industrial workers have reason to feel that our economic system deals justly and fairly with their claims.

**Labour Day
Messages by
Labour Leaders**

Leaders of Canada's two largest labour organizations, President Percy R. Bengough of the Trades and Labour Congress of Canada and A. R. Mosher, President of the Canadian Congress of Labour, in Labour Day messages, stressed the need for social security and jobs for all.

Mr. Bengough said: "The stupendous efforts that were made by the people of the Allied Nations to defeat the Axis powers were a revelation of what can be done by human beings applying their scientific knowledge and skill to a common cause."

Mr. Mosher asserted that the war showed that production depends upon labour applied to raw materials; that by the efficient use of machinery and the practical abolition of industrial competition it was possible to obtain high production levels. "The deepest desire of Labour is to play its full part with industry and government in the establishment of a social order based on justice and economic security and with the fullest degree of freedom compatible with the attainment of these objectives," he said.

Both leaders saw significance in the election of the Labour Government in Great Britain, as demonstrating the people's desire for better social and economic conditions.

Mr. Bengough stated that first consideration should be given to personnel discharged from the Armed Forces. However, he declared, "the returned men and women don't want to get a job by bumping another off a job. They want, and are entitled to a job of their own. The solution is jobs for all and nothing short of that will be of use, either to those who have fought, or those who have worked." He concluded by declaring that "the workers of Canada on this Labour Day now pledge their

support to the establishment of a worthwhile peace—one that will guarantee jobs and security for all in Canada."

Mr. Mosher urged the need for a labour code under which it will be possible to maintain measures of union security and bring about the application to industry of democratic principles. He declared that Labour Day this year is another milestone, not only in the progress of the labour movement, but in the progress of mankind towards a new era in human relations and human welfare.

The President of the Canadian and Catholic Confederation of Labour, Alfred Charpentier, referring to the "gigantic" part that workers had played in winning the victory, stressed the value of training, and the moral value of working for an ideal. "To work," he said, "is to learn, to produce, and to serve."

He hoped that the threshold of peace would bring a new understanding between capital and labour. "May they both recognize," he said, "their impotence to produce without one another. For centuries to come may workers and employers carry engraved in their memory the lesson of these years of war: Union of intelligence and of wills in the service of the common good."

Canadian representation at World Trade Union Conference

nate delegate.

The Conference, which was scheduled to open in Paris on September 25, is for the purpose of forming a World Federation of Trade Unions.

The first Conference was held in London last February, following which an administrative committee met in California and prepared a draft constitution for the proposed new organization.

Extension in coverage of Reinstatement Act

United Nations, who were employed in Canada prior to September 9, 1939, was announced August 14 by Hon. Humphrey Mitchell, Minister of Labour.

The Act, administered by the Minister of Labour through the National Employment Service, previously covered those who had left jobs to join the Armed Services of the British Empire, or the Corps of Canadian Fire Fight-

Mr. Pat Conroy, Secretary-Treasurer of the Canadian Congress of Labour, is attending the second World Trade Union Conference as Canadian delegate. Mr. C. H. Millard is acting as alter-

Extension of the Reinstatement in Civil Employment Act to include those on active service in the present war in the naval, military or air forces of any of the

ers, and the Merchant Marine of Canada and the United Nations.

The Act requires employers to reinstate their employees who had a specified length of service, after discharge, under conditions not less favourable than they would have enjoyed had they remained in their employment instead of going into the Armed Services.

Those who have been on active service with the Forces of any of the United Nations may now apply for reinstatement in their former jobs upon the same terms and conditions as those who have been serving with the Canadian Forces. The addition in coverage is made by Order in Council, P.C. 5324, August 2, 1945.

"While the change now made in the legislation," stated the Minister, "will not affect very many cases, it rounds out the operations under the Act so that it will apply uniformly to all who have directly aided in the war effort, whether through service with the Armed Services of any of the United Nations or in the Merchant Marine of any of our Allies."

I.L.O. texts tabled in House of Commons

On September 7 the Hon. Humphrey Mitchell, Minister of Labour, tabled in the House of Commons the authentic text of draft Conventions and Recommendations adopted at the 25th and 26th sessions of the International Labour Conference, and also the text of Order in Council P.C. 3671 of May 24, 1945, dealing with the competence of Parliament and of the provincial legislatures respectively with regard to the subject matters of the draft Conventions and Recommendations (L.G., June, 1945, p. 800). The text of the draft conventions and recommendations, together with the Order in Council has been transmitted to the Lieutenant Governors of the several provinces, the Minister stated.

Applications for certification to Wartime Labour Relations Boards

Since it commenced operations on March 20, 1944, the Wartime Labour Relations Board, (National) has received 289 applications for certification. Certification was granted to 170 employees' organizations as collective bargaining representatives, while 34 applications were rejected. In addition, 24 applications were referred to Provincial Boards, 36 applications were withdrawn and 4 were dropped. At September 8, 1945, 15 applications were in the process of being investigated while decision of the Board was pending in 6 cases.

Fifty-two union representation votes have been taken on order of the Board.

Provincial Boards have received 2,509 applications for certification, of which 1,641 have been granted and 202 rejected. Union representation votes have been ordered in 162 cases.

For the current year, January 1 to September 8, 1945, the British Columbia Board has received the greatest number of applications, 457, of which 272 have been granted and 62 rejected. The Ontario Board has received 205 applications of which 160 have been granted and 23 rejected. Of the other provinces, Manitoba has received 87 applications, Nova Scotia 57, New Brunswick 27, Saskatchewan 23, and Quebec 14.

Applications for veterans' insurance

Figures released recently by the Honourable Ian A. Mackenzie, Minister of Veterans Affairs, on the operations of the Veterans Insurance branch of that Department, indicate that during the past six months a total of 1,317 applications for \$4,042,500 worth of insurance have been received. Of these, 1,164 applications, totalling \$3,515,000 have been approved and 95 applications, amounting to \$341,500, are still pending.

Of the applications approved 1,150 were from ex-service men, 8 from ex-service women and 6 from widows. A total of 382 of the applicants are using their re-establishment credit to pay the premiums, while 212 are paying them through deductions from their war disability pensions.

Veterans Insurance is available to any veteran without a medical examination, except in exceptional cases, in amounts of up to \$10,000. Widows of veterans who did not carry veterans insurance are also eligible. Premiums may be paid from veteran's re-establishment credit or deducted from disability pensions.

"Considering the relatively short period during which this Act has been in force and that general demobilization is not yet in full operation I regard these figures as extremely satisfactory", the Minister said.

Resignation of

Rene Harmegnies and Catholic Confederation from Labour of Labour on the Wartime Labour Relations Board (National) has resigned owing to ill health. His place has been taken by Mr. Gerard Picard, General Secretary of the Confederation.

The Board, in expressing its regret at the departure of Mr. Harmegnies paid tribute to his public service while a member of the Board and also expressed the hope for a rapid improvement in his health.

New director of Bureau of Technical Personnel

Hon. Humphrey Mitchell, Minister of Labour, announced on August 31 the promotion of J. M. Dymond of Toronto as Director of the Wartime Bureau of Technical Personnel, succeeding H. W. Lea who has been appointed Co-ordinator of Public Projects for the Department of Reconstruction.

Mr. Dymond, on loan from the Hydro Electric Power Commission of Ontario to the Department of Labour since December, 1941, was chief executive officer of the bureau from October, 1942, until his present promotion. By profession he is a mechanical engineer. In the last war he served with the Canadian Expeditionary Force from 1914 to 1919, and left the Service with the rank of Major.

The Wartime Bureau of Technical Personnel administers manpower controls over technical personnel, who include professional engineers and scientists. The Bureau is at present engaged in a survey of over 34,000 technical persons in civil occupations in Canada and in the Armed Forces, with a view to the utilization of their special qualifications in postwar reconstruction; and to assist the individual rehabilitation of those being discharged from the Services.

Committee on Education Overseas appointed

The Hon. Ian A. Mackenzie, Minister of Veterans Affairs, announced on August 17 that arrangements had been made for the setting up of a special "Committee on Education Overseas" under the chairmanship of the High Commissioner for Canada.

It is the duty of this committee to consider and deal with applications, received through the Services concerned, from service personnel for the privilege of undertaking courses of training after discharge but before repatriation to Canada, under the provisions of the Post-Discharge Re-establishment Order governing training outside Canada.

"The purpose of this Order in Council," said Mr. Mackenzie, "is to permit personnel, who interrupted training abroad or for whom facilities for all or part of the required training are not available in Canada, to obtain training which will directly assist their eventual civilian re-establishment in this country."

The Department of Veterans Affairs is authorized to pay the actual expenses of repatriation of such a person, after completion of the approved training, such expenses not to exceed the cost of the class of transportation and accommodation to which the veteran would have been entitled had he remained in service.

Minister of Labour in press interview forecasts industrial expansion in consumer goods

in order to forestall inflation."

"Remember that the worst inflation in the last war came after the war was over and that is the most dangerous period", he pointed out.

Indicative of what controls had accomplished in curbing inflation he instanced the fact that in Canada the cost of living had increased approximately 20 per cent as against 76.8 per cent in the last war.

The Minister was emphatic in his opposition to all forms of regimentation and declared that "the sooner we get back to a free economy and the free movement of labour the better".

Admitting that there would inevitably be temporary lay-offs in the change-over process from war to civilian production he envisaged a strong industrial expansion when plants got into the manufacture of consumer goods.

Mr. Mitchell stated that Canada was short 154,000 men right now, of which 96,000 were in A and B categories, and 58,000 in C and D. At present, too, are 12,000 German prisoners, soon to come out of active employment. They are mainly in the lumber camps. Ten thousand conscientious objectors are also still at work.

As to unemployment insurance, he said that 19,000 Canadians were receiving it now out of 2,500,000 Canadian workers. There was now nearly \$300,000,000 in the fund for unemployment insurance.

"Once we get the shifts in population over with, I think we'll be in a pretty sound position in Canada", he said.

Interviews show majority of veterans want immediate employment

The large majority of ex-servicemen and ex-service women returning to civilian life are interested principally in immediate employment, according to figures released on August 23 by the Honourable Ian Mackenzie, Minister of Veterans Affairs. The figures were based on 15,754 interviews conducted by officers of his Department in discharge centres of Army, Navy and Air Force during the month of June.

"Of this total of 15,754 who were interviewed, 3,573 or 22.7 per cent expect reinstatement in their old jobs," Mr. Mackenzie stated. "Another

2,114 or a total of 13.4 per cent have new jobs available, while 5,187 were hoping to go immediately into employment on their discharge. Another 830 were returning to their own businesses, while 524 planned to return to farms which they owned prior to their retirement.

"Among the total interviewed during the month of June," the Minister said, "1,088 wanted to take vocational training, while 841 planned to enter university. A total of 545 were interested in land settlement under the Veterans Land Act, with the large majority of these planning full time farming. A total of 1,052 had not made up their minds." The figures include both men and women from the services.

"While these figures are an indication, they should not be taken as final," Mr. Mackenzie stated. "We have found from experience that very often men and women who first express the intention of going into employment find that in the long run a course of training will greatly increase their earning power, and many of these people come back to us for training either on vocational or university level. Similarly a percentage who told us that they want to take vocational training find excellent opportunities for employment when they return to their home communities and as a result they go directly into jobs."

Growth of British retail co-operatives in 1944

Final figures relating to membership, capital and trade of co-operative retail societies in Great Britain in 1944 were published in the *Co-operative News* of August 25, 1945.

The membership for 1944 was 9,225,240, an increase of 143,022 over 1943. Sales amounted to £352,311,277 an increase of £20,737,154. Share capital totalled £222,302,324 an increase of £21,280,567. Loans and sundry funds increased by £7,511,003 to a total of £65,345,391. Reserve and insurance funds amounted to £18,668,959, an increase of £625,662.

Trade union membership in Australia

An increase in trade union membership since the outbreak of war is reported in the bulletin, *Australian Statistics* published by the Commonwealth Bureau of Census and Statistics.

Membership in 1939 totalled 915,470. By 1943 this total had risen to 1,204,863. Australia's population is 7,300,000.

Manpower

Further Relaxation of Manpower Controls

Employment "Freeze" Lifted—Restrictions on Advertising Modified— Farm Labour Controls to be Removed in November

IN accordance with Government policy of relaxing wartime controls as speedily as circumstances permit, the Hon. Humphrey Mitchell, Minister of Labour, on August 16 announced the abandonment of a number of manpower restrictions.

Most important of these was the manpower "freeze". Under this control, men employed in essential industry were not permitted to leave their jobs without the permission of a Selective Service Officer. Imposed on September 20, 1943 (L.G., 1943, p. 1333), this restriction was removed as of September 17, 1945.

Persons transferred to essential employment under compulsory direction were permitted to return to other employment, effective September 3. The compulsory transfer of workers under the seven Compulsory Transfer Orders had already been discontinued, on May 17 (L.G., June, 1945, p. 803).

The restriction on advertising for employees was modified, effective September 3, to permit employers to advertise freely providing they first register the vacancy with their Employment Office and providing that men responding to the advertisement are directed to apply to the Employment Officer rather than to the employer and are then sent by the Employment Office under permit to the employer.

Two controls on farm labour are to be abolished after the 1945 crop is harvested, probably on November 15. These are: the provision that men in agriculture are not allowed to leave their employment; and the power to direct men to agriculture.

This action eliminates every control, except (a) Requirement that a permit be obtained before accepting employment; (b) Requirement to give 7 days' notice on terminating employment; (c) Requirement that employers must list vacancies and those seeking work shall register; and (d) Requirement of a Labour Exit Permit.

In announcing the relaxation of manpower controls, the Minister released the text of a letter circulated to all unions in Canada and

to all employers having ten or more employees.

The Minister pointed out he had said many times that the regimentation of the Canadian working people would be abandoned just as soon as this action was possible in fairness to the various emergencies which the Government, through the agency of the Labour Department, was, of necessity, obligated to solve.

Letter to Trade Unions and Employers

The letter to trade unions and employers reads:—

DEPARTMENT OF LABOUR

Ottawa, August 17, 1945.

To Officials and Members of Unions:

To Employers:

Dear Sirs:

Regulations or controls under the general heading of Selective Service were imposed reluctantly because the circumstances of war made them necessary.

Canada has mobilized her human resources as never before. At the peak there were over 700,000 in the Armed Forces and nearly one million persons in industries directly or indirectly related to war. Nevertheless, agricultural production was nearly doubled, essential civilian goods produced and necessary services maintained.

All this was accomplished, not because of regulations, but because of the win-the-war-determination and co-operation of the Canadian people.

It is time to say "thanks", and to outline plans for the immediate future.

It has been stated repeatedly that there must be an orderly withdrawal of controls as quickly as circumstances permit, and the time has arrived to relinquish additional controls. This is subject only to avoidance of endangering vital industries—such as home building and those which may be absolutely necessary to bring about efficient re-establishment of returning veterans and transfer of war workers to ordinary occupations.

Already 13 specific controls have been removed and are a matter of history.

The principal controls which have been continued in effect up to this date are:—

- No. 1 The permit system. That is, a man may not accept a new job without a permit, with certain exceptions such as the agricultural and fishing industries.
- No. 2 Seven days' notice must be given by male and female workers or an employer wishing to terminate employment, except where shorter notice is provided for in the regulations or by an Employment Office.
- No. 3 Employers in industry and commerce must list all vacant positions, whether for men or for women, with the nearest Employment Office.
- No. 4 Men may not leave jobs in "designated establishments" without permission of an Employment Office.
- No. 5 Unemployed men are required to register at the nearest Employment Office if unemployed for a period of seven days.
- No. 6 Men already moved to employment under compulsory direction may not leave that employment without permission of an Employment Office.
- No. 7 Men may not leave employment in agriculture without permission of an Employment Office during the present busy season on the farm.
- No. 8 Employment Offices may still direct male persons from 16 to 65 years of age to work at agriculture, mining and a few other basic industries.
- No. 9 Labour Exit Permits are still required by anyone wishing to seek or enter employment outside Canada.
- No. 10 Employers may not advertise for male workers or male workers may not advertise for employment without permission of an Employment Office.

The objective is to change to a National Employment Service to which employers and employees alike will come of their own choice because it will give a service in employment matters not bettered anywhere in the world. To give this service a reporting system of vacancies and placements similar to that being presently followed in respect to women, will very soon take the place of all remaining controls.

The following important changes in the controls will be made effective on the date indicated in each case:

(The number set against each item below refers back to the complete listing of controls given earlier in this letter.)

- No. 4 "The freeze". That permission must be obtained to leave designated establishments—this will be cancelled September 17, 1945.
- No. 6 Those transferred under compulsory direction not allowed to return to other employment without permission. This will be eliminated on September 3, 1945.
- No. 7 Men in agriculture not allowed to leave. This will be eliminated after the 1945 crop is harvested. Tentative date November 15, 1945.
- No. 8 Power to direct men to agriculture. This will be eliminated as soon as the 1945 crop is harvested. Tentative date November 15, 1945.
- No. 10 Permit to advertise. Effective September 3, 1945, this control will be changed to permit employers to advertise freely providing they first register the vacancy with the Employment Office and providing that men responding to the advertisement are directed to apply to the Employment Officer rather than to the employer and are then sent by the Employment Office under permit to the employer.

This program will eliminate every control, except (a) Placement Permit, (b) Requirement to give notice, (c) Requirement that employers must list vacancies and those seeking work shall register, and (d) Requirement of a Labour Exit Permit.

Of these number (1) "Placement Permits" is necessary to safeguard some vital essentials such as housing, essential civilian supply and veterans' and war workers' placements: however, this control, too, will be dropped as soon as possible. The other three (requirement to give notice, Labour Exit Permits, and compulsory listing of vacancies, and registration if seeking work) will be continued for the present.

HUMPHREY MITCHELL, A. MACNAMARA,
Minister of Labour Deputy Minister of
Labour

Comments of Minister of Labour

In commenting, Mr. Mitchell said: "Canadians can well be proud, not only of accomplishments in battle and in production for

war and for the needs of our own and Allied civilians, but as well for the sane attitude pursued all throughout the war period, evidenced in the ready acceptance of some regimentation as a necessary evil in fighting the greater evil—the crazy idea of war.

“Good faith in carrying out promises in such things as priority in placement to veterans, in providing needed homes, in developing projects which will provide employment, producing lumber and building material for use at home and in Europe, and most important of all, food for millions who face starvation, demands that a minimum of control be retained for a further period. However, assurance is given that the situation will be under constant review and even this minimum will disappear without too much delay.”

In the meantime, the Minister added, he urges all workers who are doing a job which

adds to the sum total of Canada's tremendous reconstruction obligation, to stay on the job.

Proof of Compliance with Mobilization Regulations No Longer Required of Applicants for Unemployment Insurance Benefit.

An Order in Council of August 28 (P.C. 5758), revokes a previous wartime order which required male persons making application for benefit under the Unemployment Insurance Act to produce satisfactory evidence of compliance with the National Selective Service Mobilization Regulations. This requirement was established by P.C. 2222 of March 30, 1944, and was part of the nation-wide check-up on all civilian men of military age who were subject to the call-up. (L.G., 1944, p. 450). By reason of the end of hostilities it is not considered necessary to continue it.

Release of Men from Army for Civilian Employment

Arrangements for Speedy Release of Men Needed to Meet Manpower Shortages in Housing, Food Industries and Other Essential Employment

A new system of speedy release of men from the Army who are needed for civilian employment of national importance was announced by the Hon. Humphrey Mitchell, Minister of Labour, on August 28, as the result of arrangements which have been completed between the Department of Labour and the Army.

The new agreement is designed to facilitate the release of men from the Army to fill vacancies in various industrial fields where there is still a serious and acute shortage of manpower. Instructions have been issued to Officers Commanding the various Army establishments in Canada informing them of the industries in which need for men is urgent in the following terms: “Housebuilding, which is extremely important because of the shortage of homes, and in addition men for railway track maintenance, men for packing plants, work in the lumber production field, both in the woods and the mills, and in the textile industries”. Emphasis is placed on the paramount importance of food production and the need to release men for food canning factories and food processing plants, as well as harvesting.

The instructions urge these officers to see to it that every effort is made to discharge men who are eligible by reason of service, age, etc., and who are experienced or qualified in the building trades or other industries where there

is a shortage and where discharges will be useful, particularly in industries which have a potentiality in respect to expanding civilian employment. The instruction goes on to state that only under the most exceptional circumstances may “the exigencies of the Service” be permitted to interfere with discharge in such cases.

The earlier policy of “first in—first out” in regard to discharge is to be adhered to and where a man is not entitled to discharge under this policy, he is to be granted leave of absence without pay and allowances. In this way, the Minister pointed out, the men released will retain all they earn, so that the objection which was raised to the previous plan of directing men to industry will be overcome.

In the instructions which are being issued to military district officers special emphasis is placed on the need for release of building trade workers. It is pointed out there should be no hesitation in releasing men who are known to be experienced in construction work because they can be readily absorbed by the National Employment Service under the permit placement system in construction work of high priority, such as building veterans' homes and general construction work where the construction in hand will create employment.

In the case of groups of men for other occupations a close liaison will be maintained between the Deputy Minister of Labour, Mr. MacNamara, and the Adjutant-General's Branch of the National Defence Department. The technique will be for the Labour Department to specify in what occupations men are needed, and where they are needed, so that the Adjutant-General's Branch of the Department of National Defence (Army) will then ask for volunteers for this work to accept leave without pay and allowances.

The Minister also stated that it is anticipated that a similar plan will be developed in regard to the Royal Canadian Air Force.

Amendment in Procedure of Industrial Selection Committees

In announcing the plan for co-operation with the Army, the Minister pointed out that the plan would in no way interfere with the present release system, under which men important to industry may be released upon application being made to one of the eleven Industrial Selection and Release Committees located in strategic centres across Canada. Employers may ask for the release of any of their former employees under this plan providing it can be shown that the release in advance of the man's turn is in the national interest.

A change in the procedure of these District Committees and of the Industrial Selection and Release Board at Ottawa was announced on August 21.

In future the eleven District Committees will continue to deal with applications for the speedy release of men from the Armed Services, but where the Committee decides to recommend that a man be released from the Forces the Committee's recommendation will go direct to the Armed Services, and will not be forwarded to the Board at Ottawa for review. The Armed Forces will then arrange for the release of the man, subject to "the exigencies of the Service", and subject to the man himself agreeing.

The Ottawa Board in future will consider matters of policy and procedure, and regulate the procedures of the Committees, rather than reviewing Committee recommendations as has been the practice up to this time.

The Board and the Committees will now undertake a review of all applications for men as previously dealt with, which had not been approved on first consideration.

Commenting upon the new procedure, the Minister reiterated that the general release policy of the Armed Services "first in—first out", is being adhered to, "but it becomes increasingly important", he declared, "to secure the release immediately from the Armed

Forces of men whose return to civilian life, by reason of their skill and experience, will aid in reconversion, make possible the employment of others, notably veterans, or give very direct assistance in such vitally important projects as home building for veterans".

Committees have been advised, in a letter from the Deputy Minister, A. MacNamara, as follows:

"It is altogether desirable that during the next three months, when it is obvious that there will be great demand for men, several thousand men should be released from the Forces ahead of their turn. This will lessen the number for whom jobs need to be found later in the season when employment opportunities are not at their peak.

"The Committees should therefore recommend and the Forces are prepared to release men more freely, and particularly in the following categories:

- (1) Men whose individual qualifications constitute them key-men in the narrow sense of the word, namely that they alone can do a particular job which is important in reconversion or construction. (This of course is the group that P.C. 3683 was especially designed to cover, and is included here as a matter of emphasis, not as a new policy.) Applications may be considered either from former or new employers.
- (2) Men who it is shown would be of substantial use in A or B priority industry. (Labour priority rating can readily be ascertained from the local Employment Office.) Applications may be considered either from former or new employers.
- (3) Men stationed in Canada who are requested to fill an appointment in which they are entitled to reinstatement even though the industry has not a high labour priority rating. Applications will naturally be considered from former employers only. (The release of a man for a position to which he is entitled does not give him an advantage over the man overseas.)"

Applications Approved

In commenting upon the work of the Industrial Selection and Release Board at Ottawa, Mr. MacNamara stated at the end of August that the Board had approved applications for the release of over 6,200 men from the Armed Services, required by industry as key personnel. Most of the cases approved by the Ottawa Board had already been recommended upon favourably by one of the eleven Industrial Selection and Release Committees across Canada.

Dominion-Provincial Conference on Reconstruction

Broad Program of Social and Economic Legislation Proposed by Federal Government—Financial Aspects, and Division of Powers Considered

TO discuss the relationship between the Dominion and Provincial Governments in the light of the urgent problems of post-war reconstruction, the Prime Minister of Canada and the premiers of the provinces recently met in Conference in Ottawa.

The purpose of the Conference, as defined by the Prime Minister, Hon. W. L. Mackenzie King, was

to ensure the maximum of co-operation between the federal government and the governments of the provinces, in order that the Canadian people, working together may achieve the constructive goals of peace as effectively as they have carried on the essential, though inevitably destructive, tasks of war.

The necessity for the Conference arose from the division that exists between the peacetime legislative powers of the Dominion and provinces. As pointed out by the Prime Minister:

Under our federal system, the Dominion Government has power in wartime to take whatever action may be required to wage war successfully. In peace-time, the Dominion Government has more limited powers. The successful development of peacetime policies, the success of reconstruction, depend no less upon the policies of the provinces than upon those of the Dominion.

Accordingly the Conference was called upon to recommend the most effective allocation of responsibility between governments in Canada for carrying out policies generally agreed on as desirable, with particular attention to the financial and jurisdictional aspects.

The Conference opened on August 6, 1945, and continued until August 10, the nature of this first session being largely exploratory. The Dominion Government submitted a Memorandum of Proposals, which the provinces agreed to accept as a basis of discussion. Statements were also made by the premiers of the provinces. A number of Dominion-provincial sub-conferences were then set up, to consider the various sections of the proposals in detail, following which the main Conference was adjourned in order that the provincial governments might study the proposals.

On November 26 the meetings will be resumed.

Summary of Dominion Proposals

A brief summary of the Dominion Government proposals which are set forth in more detail elsewhere in this article, is as follows:

(1) Employment Policy.

To meet the objective of a high and stable level of employment, the Dominion seeks provincial co-operation in a public investment program to be ready for implementation when private employment is slack. The Dominion would offer financial assistance to provincial and municipal public works projects, conditional on their being timed in accordance with the federal program.

(2) Social Security

(a) A national health program is proposed, consisting of a health insurance scheme and a series of public health projects. This would be administered by the provinces with federal financial assistance.

(b) A national old age pensions scheme administered and financed by the Dominion and covering persons over 70 years of age, would be supplemented by a Dominion-provincial scheme for persons 65 to 69 years old.

(c) The Dominion would accept complete responsibility for care of the employable unemployed, by means of a broadened unemployment insurance scheme supplemented by unemployment assistance or those not eligible for benefits.

(3) Transition Measures

The Dominion will hasten the elimination of wartime economic controls and the return to provinces of matters within their jurisdiction; maintain its present comprehensive measures for re-establishment of veterans; expedite reconversion of industry; retain wage control and collective bargaining regulations for the transition period; and co-operate with the provinces in the field of housing.

(4) Financial Arrangements

Conditional on the withdrawal of the provinces from the field of taxes on incomes, corporations and estates, the Dominion would pay

higher subsidies to the provinces, based on a minimum of \$12 per capita and increasing in proportion with the value of Gross National Production per capita.

(5) Dominion-provincial co-operation would be effected by agreement and not by constitutional change. A minimum trial period for the proposals would be three years.

Opening Address by the Prime Minister

Opening the Conference with a cordial welcome to the delegations from the provinces, the Prime Minister, Rt. Hon. W. L. Mackenzie King, warned that decisions of international importance would be made within the next year or two, which would affect future trends in history.

"The voice of Canada," he declared, "must be strong and clear so that her interests will have their rightful place in the complex pattern of international affairs now emerging out of chaos of war.

"No country can live unto itself. That is the lesson we have learned in the bitterness and anguish of conflict. Hope for the world lies in the well-being of every nation. Unity of purpose and harmony of plan must be sought at home so that unity and harmony can be won abroad.

"At San Francisco, the nations of the world endeavoured, for the good of all, to set limits on their individual ambitions. They sought collective security through collective generosity. At this conference it is ours to pave the way for national progress. It is equally ours, by maintaining unity of purpose, to build not only security and prosperity at home, but also to contribute to security and prosperity abroad."

He said that the magnitude of Canada's war achievement had given Canadians a new vision of their own future. Paying tribute to Canada's fighting men he said: "They have assured our freedom. May we use that freedom to win the victories of peace; victories over distance, over climate, over nature; victories over depression, over unemployment, over insecurity and over want; victories over prejudice, over intolerance, and over disunity. To be worthy of Canada's wartime achievement, to be worthy, above all, of the sacrifice of human life, let us resolve to work together to make Canada a land of ever widening opportunities for all our people, regardless of origin, of class or of region, the best land on earth in which to work and to live. The finest of all memorials to the men who have gone forth from Canada never to return will be our striving to work together towards that ideal."

Meaning of Reconstruction

Announcing that the Conference would be known as the Dominion-Provincial Conference on Reconstruction he said, "By reconstruction,

none of us, I am sure, means a return to conditions as they were in the early nineteen-thirties. We must go forward to a better social order, a more reliable economic structure, than we have ever had before. To achieve this will not be easy. It would be a fatal mistake to under-estimate the seriousness of the task. Because the war has demonstrated an unexpectedly large productive capacity in this country is no reason to assume that automatically we shall be better off than we were before the war.

"Our productive capacity has been enlarged in response to an immense governmental demand for labour and materials arising out of the war. In order to continue to use Canada's productive capacity fully after the war, other and broader outlets must be found. To effect this, we need to achieve a much higher standard of living, a more rapid rate of capital development and substantial export markets."

Canada and International Reconstruction

Dealing with the international aspects of reconstruction, the Prime Minister declared that the difficulties and distress which immediate contact with the destruction of war had brought to a large part of the world affected Canadians deeply and directly. "We could not, even if we so desired, hold ourselves aloof from the plight of those who during these long and bitter years of war have shared our hopes and fears, have fought at our side," he said.

"No country, to-day, can cut itself off from the world. But even more than most countries, Canada is exposed to the impact of external conditions. We are one of the great trading nations of the world, and our economy is inextricably linked up with the economies of other countries. In a world which is prosperous and stable, we can hope to manage our affairs in such a way as to achieve, in this country, prosperity and a high standard of living. In a world which is depressed and disorganized, our task would be much more difficult."

He pointed out that Canada has participated in international organizations in the fields of food and agriculture, relief and rehabilitation, and monetary problems. Furthermore the San Francisco Conference had laid the basis for a world security system, which would

include provision for continuing economic collaboration among nations, and for a co-operative effort to attain higher standards of living, full employment, and economic and social progress throughout the world.

Dominion-Provincial Relations

Turning to domestic affairs, the Prime Minister pointed out that in peacetime the Dominion Government had more limited powers than in wartime, and that the work of reconstruction would depend no less upon the policies of the provinces than upon those of the Dominion. He said: "If all our governments, each in its own sphere, are able and willing to work together towards common objectives, it is obvious that our domestic policies will have much greater prospect of being successful. It is certainly true that discord or lack of co-operation will frustrate the efforts of all governments. There is something equally important. In this period of transition throughout the world, the effective co-operation of Dominion and provinces will be essential if Canada, in her own interest, is to make the contribution which it is vital our country should make to world reconstruction, world security and world prosperity. The greater the element of certainty and stability Canada can contribute to world affairs, the greater hope there will be for our own future and for the future of humanity."

He asserted that the aim of the federal government was not to weaken the provinces, to centralize all the functions of government, to subordinate one government to another or to expand one government at the expense of others. "Our aim is to place the Dominion and every province in a position to discharge effectively and independently its appropriate functions. In other words, we believe that the sure road of Dominion-provincial co-operation lies in the achievement in their own spheres of genuine autonomy for the provinces. By genuine autonomy, I mean effective financial independence, not only for the wealthier provinces but also for those less favourably situated.

"We believe that once the provinces have reasonable financial security, it will be much easier for them to co-operate with the Dominion in the furtherance of policies which neither can bring into effect successfully without the help of the other.

"To put it very briefly, we regard autonomy and co-operation as essential means of achieving satisfactory Dominion-provincial relations."

Objectives of Dominion Proposals

Summarizing the objectives of Dominion-provincial co-operation, he declared:

"The proposals which the Federal government is placing before the Conference are directed to attaining a progressive and secure standard of living based on remunerative employment for all who are able and willing to work, and expanding markets at home and abroad for efficient agricultural and other primary industries. Our proposals envisage co-operation in the intelligent and systematic conservation and development of our natural and other resources, and, to this end, the fullest application of scientific knowledge and research. The proposals seek to further the enlargement of opportunities for individual and community development and the fullest encouragement of enterprise whether, in its appropriate field, the enterprise is public or private. Without excluding action by the state, the reconstruction program of the federal government is deliberately designed to encourage and foster 'employment-creating' enterprise by individuals and corporations.

Employment and Income

"Above all, we aim at the maintenance of a high level of employment and income. In no field are the interests of Dominion and provinces more thoroughly one than in the maintenance at all times of a high level of employment. The fear of war is undoubtedly the worst of all fears in the minds of men to-day. But next to the fear of war, the greatest fear for most men is the fear of unemployment. There are men and women who almost dreaded the coming of victory because they feared that depression and unemployment might come in victory's train. That fear we must all seek, in close co-operation to remove.

"This is not the time to enter into academic or political arguments about the comparative merits of public and private ownership of productive undertakings. The practical fact is that, in present circumstances, the bulk of employment must be provided by private and corporate undertakings. If we are to maintain a high level of employment and income in the period of reconstruction, the action of government—and by government I mean all governments, provincial as well as federal—must be such as to increase, not to decrease, the opportunities for individual freedom and initiative. At the same time, freedom and initiative must not be directed to purely selfish ends. These great qualities must be harnessed in the service of the community. We are convinced that the people of Canada

expect governments—all governments—to accept responsibility for creating conditions which will ensure high and stable employment. To create such conditions, we believe it should be made possible, through reduction and simplification of taxes, and in other ways, for private enterprise to operate boldly and courageously. We believe the state—and by the state may I say again, I mean provinces as well as Dominion—should design programs of public development and conservation which can be readily expanded or contracted to help in balancing the rise and fall of other sources of employment. We also believe that, under modern industrial conditions the state has an inescapable responsibility to provide, through unemployment insurance and assistance, a minimum of livelihood to those who, through no fault of their own, find themselves without work.

Social Security

"Finally, our proposals are designed to make possible a comprehensive system of social insurance, partially federal and partially provincial, through which the community will

share with the individual in meeting the variations of income and expense to which the rise and fall of business activity, natural disasters, accident, ill health and old age render all of us liable. Improved standards of nutrition, housing, health and social amenities, for both urban and rural populations, are also objectives of our reconstruction policy. Of these housing is a most urgent need in the period of reconstruction.

"It will be impossible to achieve these most necessary and desirable results by action of the federal government alone. They can be achieved only by full co-operation among all the governments in the country. The basic fact which this Conference must face is that as Canadians we cannot have conditions which promote the most effective use of our resources, a high level of employment, an effective social security program, and steadily rising standards of living for all sections of the Canadian people, unless the Dominion and the provincial governments are able to agree on a well-considered constructive program for the future."

Proposals of the Government of Canada

"Our objectives are high and stable employment and income, and a greater sense of public responsibility for individual economic security and welfare," declares the Brief submitted to the Conference by the Government of Canada.

Pointing out that responsibility for the attainment of these objectives is shared by the federal and provincial governments, the Brief asserts:—

"To devise a working co-operative arrangement to a common end, in harmony with our federal system, is the aim and purpose of this Conference."

The Brief then presents the Dominion proposals in regard to

- (1) The maintenance of employment;
- (2) Social security provisions;
- (3) Policies for the transition period in regard to such matters as wartime controls, veterans' re-establishment, housing, industrial reconversion, agriculture, wage control and collective bargaining; and
- (4) Financial arrangements as between the Dominion and the provinces.

(1) *High Employment Policy*

The Government's primary approach to the problem of maintaining a high and stable level of employment and income is to encourage private enterprise.

However, as a supplementary measure the Government proposes to make full use of a public investment program in periods when private employment is slack. Thus the Government will deliberately plan for periods of declining business activity, and will have a shelf of employment projects ready for immediate execution when unemployment threatens. These projects, it is stressed, must be useful and efficient, and of such a nature as to "develop the nation's resources, add to its capital equipment, and raise its conditions of living."

The Brief points out, however, that the scope of this program is such that it cannot be carried out by the Dominion Government alone. A public investment program consists of activities and projects undertaken by provincial and municipal governments as well as by the federal government. Furthermore the division of responsibility for many of the activities has not up till now been satisfactorily defined.

The development of an effective and coherent program, therefore, depends upon the achievement of agreement and co-operation between the Dominion and the provinces (including their municipalities) as to the activities they will undertake in the public investment field.

A second matter on which agreement must be reached is the timing of projects. If the

public investment program is to be successful, projects must be timed to commence at the moment when they will be of greatest service in meeting the employment needs of the country, and this condition applies to provincial and municipal projects as well as to federal undertakings.

As to the first question, the division of responsibilities, the Brief suggests that public investment activities be classified under two headings:—

(a) Activities for which the Dominion is fully responsible or is prepared to consider assuming full responsibility by suitable arrangements with the provincial governments wherever necessary. (These are listed in detail and include, generally, projects which are a national responsibility or are inter-provincial in scope, and also surveys, mapping, demonstration projects, and basic preparatory and research work on a national scale for the conservation and development of natural resources); and

(b) Activities for which the provincial governments are responsible and which the Dominion is prepared to consider assisting provided specific agreements can be reached.

The Dominion will, of course, be able to time its own projects wherever possible in accordance with the employment situation. In regard to provincial and municipal projects, the Dominion will encourage the governments to accept similar timing policies, by offering assistance conditional on the provinces co-operating in the desired manner.

Federal help will consist of technical assistance and information; and also of financial grants covering part of the cost of projects which have been accepted and registered by the Dominion authority as fully planned projects, and which are executed in a period designated by the Dominion authority.

The Brief undertakes that in the timing of projects the Dominion would concern itself only with employment considerations, leaving to the provincial and municipal governments the direction of their own investments, subject to the Dominion having discretion to determine in any one year the total value of projects, if any, on which it would pay timing grants within any province. It would also of course authorize the grant for projects whose execution would extend over several years.

It is recognized also that there are a number of projects, both Dominion and provincial, on which work cannot be postponed, owing to immediate need.

(2) *Social Security*

Social security provisions proposed in the Brief are designed to supplement such existing measures as unemployment insurance, family allowances, and other health and

welfare measures already adopted by the federal and provincial governments. The new proposals are for:—

(1) A national health program, including health insurance;

(2) National old age pensions;

(3) Unemployment assistance benefits to cover contingencies not met by unemployment insurance.

The Brief asserts that a social security system can make a three-fold contribution to Canadian life. It provides a network of protection for the Canadian people that justifies itself on social and humanitarian grounds; by stabilizing consumer purchasing power it provides a powerful weapon with which to ward off general economic depression; and by expressing the common interest in the welfare of the individual in the face of economic hazards beyond his control it makes a contribution to Canadian unity.

National Health Program

In Canada, the Brief indicates, health services fall clearly within the jurisdiction of the provinces.

The Brief points out, however, that there are great inequalities in the quantity and quality of health care now available to different groups of Canadians, reflecting differences in personal incomes, differences between rural and urban areas, and differences between provinces.

The Dominion, therefore, proposes that these disparities be overcome by means of a program of health insurance for all and increased public health services, to be administered by the provinces with federal financial assistance.

The proposals are based on those which have already put forward by the Advisory Committee on Health Insurance, and which have been approved with modifications by the House of Commons Committee on Social Insurance, and which have been further modified as a result of a Dominion-Provincial Conference on Health Insurance held in Ottawa last year (L.G., 1943, p. 433; 1944, pp. 441, 818, 947).

The basic principles of the scheme are as follows:

(1) Any plan should have the ultimate aim of providing the highest quality of health care for all Canadians in all parts of Canada.

(2) While the scheme should be nationwide in scope, it should also be adaptable to meet the particular local conditions of the various provinces, and therefore should be under provincial administration.

(3) The plan should be flexible enough so that each province, in adapting it to local circumstances, may make use of provincial health services and facilities already in existence.

(4) The plan should be capable of being introduced in any province by several stages if that province so desires, in recognition of the fact that staff, equipment, and administrative experience may be lacking for carrying out an over-all scheme immediately.

(5) The plan should also be capable of coming into effect in separate areas if, in the opinion of the provincial authorities, such an approach is desirable in any particular province, but a time limit must be set for complete coverage of the whole province.

(6) While the national plan must outline the services which are to be provided, the provinces should be able to determine the particular methods by which these services will be made available, including any necessary arrangements with physicians, hospitals, nurses, specialists, manufacturers, druggists, and suppliers of equipment, all of which may be left to the decision of the various provincial administrations in accordance with their view of what is best in their province.

(7) As far as possible, the existing personal relationship between the doctor and patient should be maintained.

Specifically, the federal government makes four proposals, as follows—

- (a) Grant for Planning and Organization;
- (b) Health Insurance;
- (c) Health Grants;
- (d) Financial Assistance in the Construction of Hospitals.

It is believed that none of these proposals involves in itself any change in the constitutional jurisdiction or responsibility of federal or provincial governments under the British North America Act.

Planning and Organization Grant

The purpose of the first grant is to enable a provincial government which participates in the scheme to establish a full-time planning staff to prepare to administer health insurance.

This grant will be available as part of an agreement under which the provincial government undertakes to complete the preliminary preparations within 18 months, and, before the expiration of the time, to submit a provincial health insurance program to the federal government.

Health Insurance

In entering upon the health insurance scheme, a province may introduce the benefits by stages. However it would be agreed that the province would furnish general practitioner services, hospital care and visiting nursing services within two years of its entering upon the plan.

During later stages of the scheme, benefits to be provided would include consultant, specialist and surgical services; other nursing services, including private duty; dental care; drugs, serums and surgical appliances; and

laboratory services, including blood tests, X-rays, etc.

Of the cost, which is expected to total \$250,000,000 for the whole country, the Dominion will pay three-fifths, or \$150,000,000. In the early stages of the scheme, however, the Dominion will arrange its contribution to each province by making a basic payment of one-fifth the estimated cost of each benefit, supplemented by a payment of one-half the additional actual cost incurred up to the estimated maximum.

The accompanying tables indicate the cost of the various benefits to the federal government.

Health Grants

In addition to assistance in the field of health insurance, the Government also proposes to make available to the provinces various health grants, conditional on their being effectively utilized and on certain additional sums being paid by the provinces.

These grants, and their maximum cost to the federal government, are as follows:—

- (1) General public health grant, \$4,000,000;
- (2) Tuberculosis grant (to assist provinces in providing free treatment), \$3,000,000;
- (3) Mental health grant (for prevention and free treatment), \$4,000,000;
- (4) Venereal disease grant (for prevention and free treatment), \$500,000;
- (5) Crippled children grant (for prevention and treatment of crippling conditions in children), \$500,000;
- (6) Professional training (for professional training of personnel in the field of public health to assist the provincial governments in embarking upon an expanded program of public health services), \$250,000;
- (7) Public health research, \$100,000;
- (8) Civilian blind (to permit the pension age for blind persons to be lowered from 40 to 21 years of age and to provide for treatment of the blind and of persons suffering from conditions which might lead to blindness), \$1,250,000.

Construction of Hospitals

The Dominion proposes to provide to provinces entering health insurance agreements low interest loans for expansion of hospital facilities.

Other Health Proposals

The National Health Program also contemplates the construction of a National Laboratory as a post-war development project, the extension of health services to the Civil

Service, the application of proper health and sanitation standards for the federal government buildings, the development of the National Fitness program, the provision of consultative services for departments of the federal government, and a very great increase, wherever possible, in all fields of co-operation between the federal and provincial governments, so as to press forward the best possible health program for the people of Canada.

National Old Age Pensions

Under the present system of old age pensions, which is administered by the provinces with a federal contribution of 75 per cent of the net cost, pensions of \$25 a month are available to persons 70 years of age and over. The pension is paid only in case of need, and is reduced if the pensioner has a private income of more than \$125 a year. Some provinces have added small supplemental amounts, to which the Dominion does not contribute.

The Brief states that the proportion of the Canadian population whose age is over 70 is increasing. It comments that this indicates the importance of providing adequately for older persons, but points out also that it will increase the financial burden of the scheme.

The Dominion proposals are for a national old age pensions scheme, entirely financed and administered by the federal government, and paid at a uniform rate of \$30 a month as of right and regardless of means, to men and women aged 70 and over. The cost is estimated at \$200,000,000, but there would be a partial recovery from such persons over 70 as pay income tax.

The Dominion proposes also a further scheme for the assistance of needy persons between the ages of 65 and 69. This would be provincially administered, with the Dominion contributing 50 per cent of the cost. The maximum payment to which the Dominion would contribute would be \$30 a month, and payments would be subject to a means test.

Financing of Old Age Pensions and Health Insurance

The Brief has the following to say about the method by which the Dominion proposes to raise its share of the cost of health insurance and old age pensions:—

It is within the power of the Dominion to finance its share of the combined cost of health insurance and of old age pensions out of the Consolidated Revenue Fund with such modification of taxation as would be justified, in the opinion of Parliament, by the universal benefits of health insurance and old age pensions and by the other purposes of Dominion expenditure.

There are, however, some definite advantages, in terms of administrative efficiency, compliance, and popular understanding of the plans, in introducing features, more specifically contributory in nature and tied up more closely with the provisions of health insurance and old age pension legislation. These additional and desirable features would be helpful in the early and effective inauguration of the plans and the Dominion Government asks that they be provided for in specific agreements with the provincial governments.

Unemployment Assistance

The Dominion proposes to accept full responsibility for assistance to able-bodied unemployed persons.

In line with the already announced national objective of a high level of employment and income, the principle of Dominion policy will not be the provision of relief, but rather "the assurance of either a job or of a subsistence income in lieu of a job, if necessary for a substantial period of time, available to employable persons who are able and willing to obtain a job whenever possible."

Accordingly the Dominion proposes:—

(a) the extension as rapidly as possible of unemployment insurance to cover all employees, and

(b) in the period when such extension is being carried out, to institute a system of unemployment assistance to protect persons not at present covered under the insurance scheme.

The scope of the present Unemployment Insurance scheme does not extend to

- (i) those previously employed persons whose employments are not at present insured. The largest groups at present are farm employees, domestic servants, certain government employees, and office employees receiving \$2,400 or more;
- (ii) insured persons who do not qualify for or have exhausted their benefits in prolonged unemployment;
- (iii) young persons who have not been able to start employment;
- (iv) previously self-employed (farmers, tradesmen, trappers, etc.) who give up their enterprise and seek employment.

"As rapidly as possible" the Brief continues, "the Unemployment Insurance Act will be widened to embrace all employed persons. It is recognized, of course, that the Act cannot be immediately extended to the irregular employments, or to those in which as a general rule there are only one or two employees per employer; time is required to overcome the difficult administrative problems of collection of insurance contributions in such cases. However, the Act can and will be extended

promptly wherever possible. Consideration will be given to the advisability of including persons in government and municipal service and those monthly-rated employees now outside the Act because of having wages in excess of a stated maximum.

"As already stated the objective would be to bring into insurance in a relatively short time the whole employed population; when this had been accomplished the only employees who might require assistance, in contrast to insurance, would be those who had exhausted their insurance benefits or failed to qualify. By that time experience with the extended insurance scheme would enable a decision to be made whether to extend the duration of benefits and shorten the period of qualification for insurance."

In the meantime, the qualifications for unemployment assistance would be

(1) that the individual had been an employee for a minimum specified time, or being a young person could be expected to have been employed had it not been for employment conditions at the time when he entered the labour market;

(2) that he is available and fit for employment;

(3) that he is unemployed through no fault of his own; and

(4) that he is not entitled to benefits under the Unemployment Insurance Act.

It is proposed that some kind of a simple test would be adopted so that unemployment assistance would not be provided to those who are not dependent on their own employment for a livelihood or to those who have an adequate income independent of employment.

In the case of an insured person who has exhausted insurance benefits, or who lacks the full qualification for insurance benefits, the scale of assistance would be approximately 85 per cent of the insurance benefit to which such person's contribution class previously entitled him or would in due course entitle him. In the case of a person who is not insured but for whom there is a record of previous employment, the scale of assistance would be approximately 85 per cent of the benefit rate to which he would have been entitled if insured. In the case of persons who are not insured and who have no adequate record of previous employment, assistance would be provided at a flat rate which would not conflict with insurance benefits or wage rates for comparable employed persons.

It should be noted that family allowances will always be paid irrespective of employ-

ment, and no deduction would be made from either unemployment insurance benefits or unemployment assistance by reason of the fact that family allowances may also be received by the person concerned.

If it should be deemed necessary by any municipality for it to supplement rates of assistance available in any particular cases, the provision of such a supplement would remain a matter for the provincial government or the municipality concerned, and subject to whatever conditions they wish to apply for purposes of the supplement.

A person who ceases to be employable would not be eligible for unemployment assistance. In the absence of more specific evidence of unemployability, a person who has remained on assistance for a period of two years, without being able to obtain or keep employment other than of a casual nature, would be declared ineligible and transferred to the responsibility of the provincial government and municipality.

The scheme would not apply to self-employed persons, who, to the extent that they needed assistance, would be dependent on local action.

Payments for unemployment assistance would be made out of the Consolidated Revenue Fund and not out of the Unemployment Insurance Fund.

Extended Employment Services

Extension of unemployment insurance and the introduction of unemployment assistance would greatly increase the administrative responsibilities of the National Employment Service, the Brief points out.

In order to carry out its function of "assisting workers to obtain employment for which they are fitted and assisting employers to obtain workers most suitable to their needs," the Employment Service, it is indicated, will require the maintenance of certain of the wartime controls, although the greater part of these are being relaxed.

According to the Brief, "It is difficult to visualize an efficiently operated Employment Service that does not have a reasonably complete picture of all vacancies and the number of persons seeking employment, together with trends and prospects of labour supply and demand.

"This information is essential (a) to the planning of employment projects and even fiscal policy; (b) to assure that unemployment insurance benefit and unemployment assistance is paid only to those who cannot be referred to suitable employment; (c) to assist in the rehabilitation of ex-servicemen; and (d) to the effective carrying out of the Dominion

Government's policy of preference in referral to employment for veterans who have had overseas service or who are in receipt of a pension.

"Employment officers must be equipped with the information necessary to carry out their responsibilities. Briefly this means that while employers would be entirely free to select and hire the employees of their choice, it is desirable that they should be legally required to notify the Employment Service of all vacancies, engagements and separations, and that unemployed persons desiring employment should be required to register at the employment offices. The Employment Office would thus be essentially a referral agency, not an agency of final selection of a person for a job."

Dealing with employment and placement the Brief further proposes:—

An organized vocational guidance program;

Continuation of close Dominion-provincial co-operation with regard to the farm labour program;

A Dominion-provincial Occupational Rehabilitation Service, available to all disabled persons regardless of the cause of disability, administration of which would be closely co-ordinated with the Employment Service;

Vocational training projects which would include retaining of industrial workers, and Dominion assistance to vocational schools.

(3) *Transition Measures*

A section of the Brief deals with the Dominion Government's policies for the transition period.

Economic Controls

In instituting its system of wartime controls the Dominion Government in a number of instances entered the field of provincial jurisdiction. This it did reluctantly, the Brief declares, but was forced by its responsibilities in the war emergency.

The Brief points out that this emergency will not end when actual hostilities cease, that the extraordinary measures necessary during the war period cannot suddenly be revoked without serious dislocation of the national economy, and that reasonable time must be allowed for orderly decontrol.

However wartime controls will be removed "as speedily as decontrol can be safely undertaken".

The Dominion Government proposes:

(a) to remove wartime price and wage controls as soon as the danger of a war-generated inflation is past;

- (b) to discontinue as soon as possible all wartime regulations of the Dominion Government affecting the jurisdiction of provincial governments over minimum wages, hours of work and holidays with pay;
- (c) to eliminate wartime subsidies related to the stabilization policy when inflationary pressures begin to ease;
- (d) to remove wartime controls over the production and distribution of commodities and services and special wartime export and import controls as soon as supplies of materials and labour for continuing wartime requirements and for civilian production are reasonably adequate to permit civilian supply to satisfy civilian demand at reasonable prices and as soon as world shortages no longer require Canada to undertake commodity controls;
- (e) to remove rationing of civilian goods whenever supplies of rationed commodities which are made available for civilian use are sufficiently great (even though they may not be sufficient to meet civilian demands fully) to permit the elimination of rationed distribution;
- (f) to remove rental and occupancy controls as soon as available housing is reasonably adequate to meet existing housing demands without a sudden inflationary rise in rents;
- (g) to remove wartime selective service restrictions progressively as the supply of labour more nearly meets the demand;
- (h) following consultation with the provinces, management and labour, to make appropriate amendments to the War-time Labour Relations Regulations for their continued application for as long as deemed necessary in the emergency period and further to consult with the provinces, management and labour on appropriate measures to be provided for by Dominion and provincial legislation.

Veterans Re-establishment

The Brief outlines the comprehensive measures that have been taken for the rehabilitation of veterans, and comments that "the obvious implications of the necessary federal financial commitments for this purpose, as for other war and defence purposes, must be considered in determining the future of Dominion-provincial financial relations."

Emergency Housing

Describing the existing housing situation as "critical," the Brief calls for co-ordinated

action at all levels of government for the implementation of a comprehensive housing program.

Wartime Housing Limited, the Crown corporation which originally built houses for rent to workers in war factories, has more recently extended its activities to meet the needs of ex-servicemen and their families in congested urban centres. To make more effective use of existing shelter and to conserve scarce materials, large homes were leased by the Government and converted into multiple family dwellings. The Government has also offered to put various types of buildings at the disposal of the municipalities for use as temporary shelter. While not part of its housing program as such, houses are being erected on farms and small holdings on the outskirts of cities and towns for sale to veterans under the Veterans' Land Act.

These direct activities are essentially of an emergency character; and the main objective of Government policy will be to put a well integrated and permanent housing program into full operation with the least possible delay, the Brief states.

The main instrument of this policy is the National Housing Act, 1944, which empowers the Government to participate on a comprehensive scale in all phases of a national housing program. The Brief puts forward suggestions for consideration at the Conference relating to community planning, building by-laws, low rental housing projects, slum clearance, and training programs in the field of housing construction and community planning.

Community Planning

Community planning "lies entirely within the sphere of provincial jurisdiction." However the Dominion, under the terms of the Housing Act, is prepared to co-operate and give assistance, and in particular "to support in principle the establishment of a community planning institute for Canada, or some similar body, for the co-ordination of planning and action in this field on a continuing basis."

Stressing the advantages of community planning, the Brief points out also that more favourable terms are available for loans under the Housing Act in the case of individual houses and rental housing projects built in a community that has been adequately planned and zoned.

Training Programs

"The Dominion Government is prepared to discuss with the provinces how it may best assist in educational progress designed to provide trained personnel in the housing and community planning fields."

Building Codes and By-Laws

The Brief urges provincial governments to take action to provide minimum standards of construction and materials comparable to those imposed as a condition of Dominion Government finance.

Low Rental Housing Projects

In regard to low rental projects the Brief suggests three means by which provinces could reduce rental costs for low income families. These include rent reduction funds, reduction of land acquisition costs, and reduction of local taxes.

Slum Clearance

Although slum clearance projects are not considered appropriate during a period of acute housing shortage it is urged that provinces and municipalities proceed immediately with plans and preparations, to be put into effect at a suitable time. Under the Housing Act the Dominion may pay half the net cost of a slum clearance project.

Industrial Reconversion and Disposal of Surplus War Assets

Reconversion involves the quick settlement of war contracts and the clearing of plants. Machinery has been set up for the final renegotiation of war contracts and termination of war orders. Arrangements have also been developed whereby civilian production may be resumed by clearing from plants the government-owned equipment or materials which are not required for such production.

The Brief declares that industry itself must take the initiative in the development of post-war plans, and the role of the Department of Reconstruction will be that of providing all possible assistance.

The Department will also concern itself with long-term problems, such as the employment problems presented by seasonal industries.

War Assets Corporation, which is the sole disposal agency for Crown-owned surpluses, is operating under the following policy, according to the Brief:—

1. Today, when goods are scarce, to sell all saleable surpluses at existing market prices, but within ceilings set by the Wartime Prices and Trade Board.

2. Later, when the war ends, and surpluses become so great that they might constitute a danger to the transfer of industry from war to peacetime production and to the rapid employment of labour, to control the flow of such surpluses so that they will create the

least possible disturbance to the normal economy of the nation.

3. At all times, to make every effort to control the price to the public, and to reach the public by the shortest possible route.

4. To keep out of unfair competition with established business.

5. To seek expert advice from industry on price levels and marketing methods, but not to act on such advice at the expense of public interest.

6. To distribute sales uniformly across Canada.

7. To sell abroad, in harmony with the other governments who are faced with the same problem, everything that becomes available abroad and that can be sold there.

8. To keep out the speculator.

9. To recover for the taxpayers of the nation and the original investors in these goods, the largest cash return upon their investments possible without interfering with the eight points previously mentioned.

In regard to the disposal of Crown-owned plants and production equipment, the following points are to be considered:—

Will the proposed use of the property and equipment

- (i) increase the possibility of employment?
- (ii) provide for the manufacture in Canada of a new product, previously imported?
- (iii) substantially improve working conditions, as compared to existing operations?
- (iv) provide facilities which will permit of more economic operations, as compared to existing operations?
- (v) provide desirable manufacturing facilities to meet anticipated increases in the domestic or export markets?
- (vi) provide a desirable redistribution of industry and employment?

The Department of Reconstruction has established Regional Reconstruction Councils in each province, representative of the different economic interests therein. The co-operation of the provincial governments in the task of reconstruction can be effected through the establishment of close relationship with these Councils, as well as through the regular contacts between the Dominion and provincial governments. The councils also afford machinery for co-operation with municipalities and other bodies.

Agriculture

The Dominion Government proposes to co-operate with the provinces in providing for a greater degree of stability in farm income

and a greater measure of security than has prevailed in the past. While ultimately the maintenance of farm income will rest on the policy of continued exports and high employment at home, the farmer is expected to benefit by such measures as family allowance payments, old age pensions, health insurance, Prairie Farm Assistance payments, export credits, increasing attention to human nutrition standards, and Agricultural Prices Support legislation.

The Dominion proposes further to work out the best possible basis of co-operation with provincial governments in regard to expansion of developmental and protective services, marketing, grading and inspection, and conservation.

Wage Control

As an essential part of the general anti-inflation policy, wage control will be maintained during the transition period.

However as soon as conditions warrant, and after consultation with those directly interested, further steps for relaxation of wage controls will be taken.

The Brief continues:—

"Much has been said, at various times, about the desirability of uniformity throughout Canada of minimum wage standards, occupational coverage, maximum hours of work and minimum age of employment, consistent with justifiable local or regional variations in cost of living standards. The Dominion Government is most willing to discuss any proposals which might be made in these fields."

Collective Bargaining and Conciliation

The Brief outlines the legislative jurisdiction of Dominion and provinces under the Industrial Disputes Investigation Act and under its successor, the Wartime Labour Relations Regulations, P.C. 1003.

It points out that as wage control is relaxed, in a step-by-step process, matters relating to wage rates and working conditions will in increasing degree be returned for settlement between employers and employees by collective bargaining, and that this will throw a heavier load on the government conciliation services.

It asserts the need for the Dominion retaining its emergency powers into the transition period, and declares: "The Dominion should be able to revise the existing wartime regulations in the interim, as necessary or advisable in the light of its experience gained and to meet changing conditions in this transition period. Undoubtedly as the result of wartime experience, both Dominion and provincial

post-war legislation will differ considerably from the legislation in effect prior to February, 1944, when the Wartime Labour Regulations came into effect."

Labour-Management Production Committees

The federal government intends to continue its active sponsorship of these committees and invites the provincial governments to co-operate in such sponsorship.

Powers of Delegation

The Brief suggests that instances may arise where some provincial governments will want to transfer jurisdiction over some types of industrial relations activities to the Dominion or to have Dominion legislation apply thereto.

As legal doubt exists as to the authority of a provincial government to delegate any part of its jurisdiction to the Dominion, or vice versa, the Brief suggests that such transfer of jurisdiction be made through an amendment to the British North America Act.

"It is suggested that an amendment of this nature would be non-controversial and, if framed in general terms, would have useful application to many other matters of joint Dominion-provincial character. The amendment could be framed to confirm in like manner the Dominion authority to delegate powers to a provincial government. The Conference might appropriately consider the necessity and advisability of this suggestion."

(This is the only amendment to the B.N.A. Act suggested in the Brief.)

(4) Financial Arrangements

In presenting the Dominion's financial proposals, the Brief recalls some of the pre-war problems in the taxation field:

1. The combined tax system was "highly regressive and to an unusual degree consisted of taxes on costs"; it "hampered enterprise and restricted income and employment";

2. The world depression had forced on the provincial governments burdens which fell on them with great severity and with very unequal force;

3. The arrangement under which the provinces were dependent for large proportions of their revenue on uncertain federal grants determined annually made impossible the independence of provinces in their own sphere of responsibility.

To meet the financial requirements of total war, the provinces entered into tax agreements with the Dominion whereby they surrendered their taxation rights in the fields of personal incomes and business profits, receiving compensation from the Dominion and thus enabling the Dominion to impose uniform and greatly increased tax rates.

During the post-war years Dominion Government expenditures will remain high, the Brief points out. For provincial governments, on the other hand, the financial outlook is good provided they can be assured of stability and growth in their revenues and of no recurrence of heavy relief expenditures.

Post-war financial arrangements among the ten governments concerned, the Brief declares, must, in the interests of the Canadian people, meet four requirements:

- (1) They must be carefully designed to encourage rather than restrict enterprise, investment and employment. Reduction in taxes must be accomplished with this in view. The necessary adjustments "cannot be successfully made by competing jurisdictions nor can the maximum reductions be accomplished."

- (2) In line with its employment policy of instituting public works in times of threatening business depression, and thus incurring budget deficits at a time when expenditures are being increased, the Dominion must have the financial resources to finance such deficits with unquestionable credit.

- (3) An adequate minimum standard of services should be made possible in all provinces, while not denying to any province the advantages which its resources give to it nor the freedom to establish its own standards.

- (4) The Dominion - provincial financial arrangements must be such as to strengthen, not weaken, the federal system. Provinces must have a dependable financial basis on which to operate, thus assuring them of freedom to make the decisions for which they are responsible.

Dominion Tax Proposals

The Dominion Government proposes that after the war the provincial governments should by agreement forego the imposition of personal income taxes, corporation taxes and succession duties, leaving to the Dominion Government the full and exclusive access to these revenue sources. The Dominion Government further proposes that as a condition of such agreement the Dominion should substantially expand its present payments to the provincial governments under an agreement which would ensure stable revenues and provide for their growth in proportion to increases in population and per capita national production. Although any provincial government would have the right to withdraw from the arrangement at any time since it is not proposed to seek a constitutional amendment, the Dominion proposes an agreement under which the provincial governments would commit themselves not to withdraw before an initial trial period of say three years.

In support of these proposals the Brief points out that the nature of its post-war commitments will oblige the Government to make full use of its power to impose national taxes on personal incomes, corporations and estates. Duplication of these taxes by other governments "would seriously restrict enterprise and output and would jeopardize Canada's employment program."

The Brief further points out that if the provinces revert after the war to the pre-war tax base, provinces in which large corporations are centred will be able to tax incomes and wealth derived in part from other provinces. Other provinces will thus be forced to make higher levies on such income as they can tax, which would work to the detriment of business and make conditions within the province progressively worse.

Such pressure on less-favoured provinces "will certainly give rise to increasing interference with interprovincial trade" and "may well lead to ill-advised extension of government ownership and operation of business merely to obtain necessary government revenues." Such developments "would operate to prevent private enterprise from playing its full and necessary part in post-war reconstruction."

A single exception to the proposed exclusive jurisdiction of the Dominion Government would be in the case of taxes on profits from mining and logging operations. Here the Dominion recognizes that provincial charges are closely bound up with each provincial government's management of and expenditure on its forest and mineral resources. Hence, as in the case of the wartime tax agreements, there would be no restriction upon the right of provincial governments to tax profits from mining and logging operations.

Dealing with the precise nature of the proposed payments to provincial governments, the Brief continues:

"Although provincial budgets will receive substantial benefit from implementation of the Dominion's proposals in regard to unemployment assistance and old age pensions, and from its full employment program generally, the provincial governments clearly cannot cease to levy succession duties and continue to forego income and corporation taxes after the war unless assured of an adequate alternative revenue source. The Dominion Government therefore proposes, in lieu of present statutory subsidies and payments under the wartime tax agreements, and conditional upon provincial acceptance of its tax proposals, to

pay each provincial government the sum of \$12 per capita annually, increased or decreased in proportion to the value of Gross National Production per capita as compared with that of 1941. This proposed annual payment would however be subject to an irreducible minimum equal to \$12 per capita of 1941 population."

The irreducible minimum of payments would amount to \$138 million per year, as compared with the present high level of receipts from the Dominion Government and from succession duties of \$125 million. "But this is the irreducible minimum only. If the proposed agreement had been in operation in 1944, with increased population and national production per capita, the provincial governments would have received \$207 million from the Dominion."

The tax proposals, coupled with the Dominion's assumption of responsibility for unemployment assistance and for old age pensions from age 70 and other considerations, would assure each provincial government of a surplus, in some cases a large surplus, on current account under average post-war conditions, the Brief asserts. "Under prosperous conditions the surpluses would become very substantial indeed and would make it possible to pay off debt on a large scale. On the other hand, the provincial governments would be protected against any major deterioration when business was below normal." Provinces would thus be enabled to raise their standards of education and other provincial services, or to lower their tax rates, or to retain present tax rates in lieu of contributions required to finance the provincial share of such health insurance benefits as they might wish to undertake in co-operation with the Dominion.

Conclusion

Concluding with a summing-up of the various Dominion Government proposals, the Brief declares:

"These proposals are neither revolutionary nor disruptive; they are built on our best judgment to-day of the experience of the past, but they involve no irrevocable commitments for the future: they ask only for a genuine trial. They are directed to the practical solution of national and federal problems which are the vital concern of all.

"The Dominion Government asks careful and mature consideration of these proposals, which it is anxious to discuss fully and freely with the provincial governments. It asks that they be considered in the light of the responsibilities which each Government has to the people. Let no other advantage be considered than the advantage of the people of Canada."

Statements by Premiers of Provinces

The premiers of all the provinces spoke in response to the opening address by the Prime Minister and again following the reading of the proposals of the Dominion Government.

The following is a summary of their remarks on both occasions:

Hon. George Drew, Premier of Ontario

In replying to the Prime Minister's opening remarks, the Hon. George Drew, Premier of Ontario, declared that the Conference would be the most important gathering of government representatives in the history of Canada.

"Its success," he stated, "will depend upon the co-operation shown here, the full co-operation of partners upon a full, frank and complete partnership basis."

Referring to the wartime financial agreements under which the provinces, for the period of the war emergency, agreed to give up the right to tax incomes and business profits in return for increased federal subsidies, the Premier declared: "With the passing of the war emergency the agreements between the Dominion and provincial governments centralizing the control of our most important sources of taxation will automatically terminate. If that should happen before we have reached agreement as to the relationship between the Dominion and the provincial governments in several fields of taxation and administrative authority, chaotic conditions may prevail.

"It is not a question of whether we can reach an agreement on co-operation, we must reach agreement out of this Conference.

Mr. Drew expressed the view that the Conference need not be too rigidly bound by the "mere letter of the British North America Act." Dwelling on the question of whether legislative and administrative authority should be more greatly centralized, he considered that the strength of the provincial legislatures and their governments within their own clearly defined jurisdiction should be maintained.

He declared: "I believe that we should have a strong central government capable of dealing with all matters of national concern, free of any limiting restrictions which arise from constitutional difficulty or lack of clear definition of their powers. At the same time I think it is equally important—and I think the Prime Minister has expressed the same view from his remarks—that there be strong provincial governments which are free and adequately financed to deal with their own affairs with the utmost dispatch, and without restriction of any constitutional difficulties or lack of definition of their powers. The idea of

strong and vigorous provincial governments is in no way inconsistent with the thought of strengthening the federal government in the performance of all its constitutional responsibilities by the voluntary agreement of every province of Canada."

Continuing, he said: "If we accept the proposition that the provincial legislatures are to continue to exist as responsible bodies with full legislative powers over their own defined fields of legislation, then those legislatures must have real and not merely nominal powers.

"The right to raise and control its own financial requirements according to the decision of its members has long been regarded as the hallmark of a free legislative body. Any arrangement therefore which provided for a centralized collection of the greater part of the tax requirements of provincial governments and made them mere annuitants of the central government would place the provincial governments under the control of the central government to an extent that meetings of the members of the legislature would become almost meaningless because of the limitations within which they would be called upon to legislate. If the provincial legislatures are to continue as free and responsible legislative bodies within the conception of the British North America Act, then it would seem clear that the provincial governments must have authority over their own taxation within clearly defined fields.

"It is not merely a reallocation and redefinition of taxing powers which is required. It is equally necessary that there be a reallocation and redefinition of administrative obligations. That the Dominion Government has been called upon to assume enormously increased financial burdens goes without saying. But the obligations of the provincial governments have also been greatly increased. Just as the Dominion Government must have its position clarified so that it may be able to raise the necessary funds by taxation, so also must the taxing powers of the provincial governments be clearly established if they are to maintain their increasingly heavy burdens for social services, health, education and other matters of just as direct concern to our people as any of the subjects dealt with by the Dominion Government.

"Much has been said about the need for amendments to the British North America Act. I am inclined to believe that most, if not all, of the problems with which we are now confronted can be solved by agreement rather than by amendment to our Constitution. Even with all the statistical information avail-

able, it would be much more difficult to reach complete agreement in regard to amendments which would be binding upon succeeding governments than it would to give the proposals a test by definitive agreements which would achieve exactly the same results for the life of the agreements.

"There is one fundamental weakness in the British North America Act which lies at the root of many of our difficulties. While the legislative powers of the Dominion and provincial governments were defined with reasonable clarity, the division of taxing powers was left in a much less satisfactory position. The provinces were empowered to levy taxes in the field of direct taxation, as every one of us has so much reason to know, whereas the Dominion Government was authorized to raise money by any form of taxation. We therefore have the anomaly that, while the powers of the provincial governments have been extended by judicial interpretations of their statutory powers, the Dominion Government has found it necessary over the years to occupy more and more the only field of taxation which was made available to the provincial governments.

"We may wonder why it was left in that position. At the time that the British North America Act was drafted, any difficulty on this score probably did not even suggest itself. The budgets of the provincial governments, and for that matter of the Dominion Government, were relatively so small that the possibility of any serious difficulties arising from this overlapping of taxing powers apparently was not considered.

"It may well be contended that the Dominion Government has the legal right to extend the scale of Dominion taxation in any field. It would then be possible for the Dominion Government to levy direct taxes to an extent that would make it practically impossible for the provincial governments to raise the revenue necessary to perform their duties unless there were to be such duplication of taxation as would paralyze the economic life of the country.

"But while it might be legally possible for the Dominion Government to extend direct taxation to such a point that they could completely blanket the only field of taxation open to the provincial governments, it need not be argued that such a result was never intended and that the very existence of the provincial legislatures and their governments under the British North America Act carries with it the implicit understanding that the Dominion Government will leave the field of direct taxation open to the provinces to such an extent as will make it possible for them to fulfil their obligations to the people.

"I believe that if we approach this problem in a spirit of complete co-operation and good will, agreement can be reached defining and allocating the taxing powers of the Dominion and provincial governments on a workable basis."

As a means of maintaining co-operation for the future Mr. Drew suggested the establishment of a Dominion-Provincial Joint Planning Board. He pointed out that there would be an increasing number of public activities of various kinds in which the Dominion and the provinces would have a joint interest and a joint operative responsibility, and which could be dealt with by a continuing organization with a permanent secretariat located in Ottawa. In this connection the Ontario Government planned to establish an office in Ottawa which would be under the supervision of one of the cabinet ministers who would be responsible for Dominion-provincial relations and who would spend much of his time in Ottawa.

In conclusion, Mr. Drew declared:

"I want to close these remarks with an assurance to everyone here that the delegates from Ontario come here with open minds on every subject to be discussed. We have definite proposals to make, but we are anxious to exchange opinions and will co-operate to the very limit in establishing a sound basis for the social and economic welfare of the whole country. We are Canadians first, last and all the time. That is the spirit in which we will meet the tasks before us."

* * *

At a later stage, following the presentation of the Dominion Government Proposals, Mr. Drew said in part:

"We have before us the result of a great deal of work on the part of the secretariat which was appointed by the Dominion Government to prepare these proposals, proposals which really mean a new conception of Confederation, even if they do not mean a re-writing of Confederation. I want to compliment, and I do it most sincerely, those who have produced in excellent form the result of more than a year's steady work on what they thought would be a basis for discussion at whatever time this Conference should meet.

"Perhaps the very wording of these proposals is so carefully phrased that the wide import of some of them was not fully appreciated when they were first presented. I think everyone here, when he examines these as a whole, will find that these proposals are so sweeping that we should be assisting the solution of our difficulties in no way at all, if we sought to reach any hasty conclusion upon any single proposal.

"It is a complete picture of great magnitude and of profound importance for every Canadian. It cannot be dealt with piecemeal. Anyone who attempted to form an opinion about the ultimate effectiveness of any one of these proposals without rationalizing that particular proposal with all the rest might easily reach a very unsafe conclusion."

He stated that the four million people who made up the population of the Province of Ontario contributed approximately 50 per cent of all the moneys, federal or provincial, which would be paid for the ultimate carrying out of such conclusions as might be reached. Although he felt that the proposals should be considered as they affected Canadians in all provinces, nevertheless there was a special obligation on Ontario to study the consequence of the proposals before indicating either acquiescence or opposition, even in the slightest degree.

He continued: "We very gladly accept as a basis for discussion, study and of careful thought, these proposals now placed in printed form before us. There are subjects other than those specifically mentioned which we had thought might well be considered. However, the scope of the Dominion's proposals is so wide—may I say, Mr. Prime Minister, they are appropriately brought within the descriptive term of 'Conference on Reconstruction'—that our own subjects may well stand aside as matters of detail to be incorporated in the full discussion of all proposals at a time when we meet to consider them at a later date."

Hon. M. L. Duplessis, Premier of Quebec

In a brief speech in reply to the Opening Address, the Premier of Quebec, Hon. M. L. Duplessis, declared:

"I am not here as the leader of a party; I am not here to meet the leaders of provincial or federal authorities. I am here as a Canadian, first, last and always, as the representative of a province participating in a friendly gathering with the representatives of other provinces and with the members of the Federal government. Rest assured that the Province of Quebec sincerely wishes to collaborate and co-operate with all. There are many ways to co-operate and collaborate. Let us study and find out the best and agree to adopt the best.

"There can be no collaboration and no co-operation if there is absorption of power, if certain basic principles are discarded or put aside. It is the considered opinion of the Province of Quebec that the British North America Act is a compact having all the character of a contract and consequently cannot be modified or amended without the full consent of the contracting parties."

He gave it as his considered opinion that an accumulation of powers leads to autocracy. "Hitler," he said, "was the model of centralization. Centralization always leads to Hitlerism. We cannot centralize."

He considered that the provinces hold certain exclusive powers which they have a right to keep. "We think," he continued, "that provincial legislatures are essential to the well-being of Canada; we think they are essential to real Canadian unity. We think they are essential to the well-being of the population. Gentlemen, thinking that they are essential it goes without saying the legislative powers which were granted to the provincial legislatures cannot be exercised without financial authority. We need financial authority not only to solve the problems of to-day but the problems of to-morrow."

* * *

Following the reading of the Dominion Government Brief, Mr. Duplessis asserted that the proposals were so important that it would be most unwise to express immediately a definite opinion on them.

"Amongst the proposals of the federal government some seem to be good, and some others appear to be bad," he continued. "We are of the opinion that the proposals should be carefully perused and thoroughly studied."

He reaffirmed the intention of his government to collaborate and co-operate in accordance with the spirit and the letter of the British North America Act.

Hon. A. S. MacMillan, Premier of Nova Scotia

A declaration that the Province of Nova Scotia was prepared to co-operate "in every possible way with the other governments represented here in anything which it deems to be in the best interests of the people of Canada as a whole" was made by the Premier, Hon. A. S. MacMillan.

Speaking on centralization, Mr. MacMillan continued:

"I have noted the remarks made here this morning by the Premier of Quebec and the Premier of Ontario. They are definitely opposed to centralization. Their statements are very welcome, I am sure, to the Maritime Provinces because one of the grievances which the Maritime Provinces have to-day is that there is too much centralization. Only during the past year the Province of Nova Scotia has lost two very important industries which, evidently believing in centralization, have moved their plants to central Canada. But now that we have had these definite statements from the Premiers of the two great provinces of Ontario and Quebec we hope that we shall

have no more of this centralization of industries or that at least we shall be able to hold the industries we now have."

* * *

Following the presentation of the Dominion proposals Mr. MacMillan said that he was not yet in a position to express an opinion upon them.

He announced his intention of consulting with various bodies in his province, including the municipalities, organized labour, the transportation industry, farm organizations, and manufacturing interests, before his government came to a conclusion on the proposals.

He stated that provincial expenditures had increased during wartime, and that although revenues had also increased, these were likely to fall off at the war's end. Still greater revenues would be required to standardize services with those in some other provinces.

Hon. J. B. McNair, Premier of New Brunswick

A statement of New Brunswick's position in relation to the federal economy was made by the Premier of New Brunswick, Hon. J. B. McNair.

"For a variety of reasons," he said, "the provincial economy has for a long period of time been in a depressed state. The forces which have caused this condition are quite beyond the control of the province. Geography, national policy and monopolistic competition from other parts of Canada have been basic contributing factors.

"Except for a brief period during the late depression, when the Prairie sections were particularly hard hit, the per capita income of New Brunswick has been, with the exception of one province, the lowest in Canada. While our internal situation has improved during the war, there is nothing to indicate that our relative position within Confederation is any better. A more equitable share of the national income is for us a vital matter."

Furthermore the Premier quoted the views of the Royal Commission on Dominion-Provincial relations as being that:

The general effect of national policies has been to accelerate the natural shift of industry and finance, and of concentration of wealth and income, to Central Canada.

"The remedies for such conditions," Mr. McNair continued, "lie primarily with the federal authorities, which under the Constitution have exclusive jurisdiction in all matters of national importance, including such items as tariffs, freight rates, international and inter-provincial trade, credit, exchange and monetary policy. These are subject-matter of funda-

mental concern to the primary industries upon which the welfare of the people of New Brunswick chiefly depends."

Pointing out that New Brunswick was largely dependent on primary industries, such as forestry, farming, fishing and mining, and on the tourist industry, Mr. McNair declared that to raise the standard of living within the province, public spending would be effective. "The benefits which would result from better highways and other transportation facilities, forest motor roads, wider electric power services, land reclamation, flood control, the development of national parks and other tourist facilities would be reflected not alone in increased buying power but in economies for our producers, greater efficiency in production and improved methods and practices in the conservation and utilization of our natural resources. Such expenditures would also permit a fuller development of the tourist industry for which our province excels, and which may readily be made a business of major proportions."

The financing of such a program, and of improved standards of social and educational services, was, however, a cause for serious concern. It would require active and substantial assistance from the federal authorities. Such aid was justifiable because of "the chronic unbalance in the Canadian economy with the heavy concentration of industrial, commercial and financial power in certain favoured areas," which was "due to the play of forces under the control of the Dominion parliament and government, since Confederation."

* * *

Referring to the Dominion Government proposals, Mr. McNair accepted them as the basis of discussion, and did not feel in a position to present counter proposals for the time being.

Hon. Stuart S. Garson, Premier of Manitoba

Presenting a lengthy brief to the Conference, Hon. Stuart S. Garson, Premier of Manitoba, declared that his proposals were not in any sense counter proposals, but had been prepared before his government had any idea as to what the Dominion proposals were going to be.

"We have been making proposals for eight years," he said, pointing out that it was the financial predicament of the Province of Manitoba which was the immediate occasion of the recommendation made by the Bank of Canada for the appointment of the Sirois Commission.

Mr. Garson's proposals paralleled in important respects those outlined in the Dominion brief, and the Premier declared that the

presentation of the Dominion proposals was tremendously gratifying to the Province of Manitoba.

Dwelling upon the prime importance of full employment Mr. Garson said that a great increase in the standard of living of the masses of the people would be necessary in order to keep pace with the rapid growth in the productivity of industry. This would entail large increases in the purchasing power of the masses of the people.

"We believe," he said, "that it is the duty of governments in Canada to co-operate in creating an environment in which free enterprise can provide full employment. Beyond that, it is up to free enterprise. If it does not succeed, state action necessarily follows for no government to-day can face the financial consequences.

"To provide a proper environment for free enterprise we must take into account some of its fundamentals. The free enterpriser produces because he expects to make profits. People cannot buy his goods unless they have the money or other purchasing power. Thus the free enterpriser cannot make profits unless he can find buyers with money. He has no incentive to produce to meet the needs of those who have no money. It is therefore purchasing power which sets production in motion in a free economy. The free enterpriser therefore in his own interests must favour increasing the purchasing power of the masses of the people.

"The free enterprise system has now such a great productive capacity that unless it makes a generous provision for the underprivileged, this great capacity is in danger of becoming clogged with its own output. That is why free enterprise must be progressive in its attitude towards welfare measures and to improvements in the living standards of the people. These are of invaluable assistance in insuring that the huge productive capacity of the free enterprise system will be fully employed. Notwithstanding this great capacity our pre-war production was not enough to provide even a moderate average standard of living, and we had unemployment. One of the best ways of curing this unemployment is by getting purchasing power into the hands of those who have human needs to satisfy, and who are without the purchasing power with which to satisfy them."

Mr. Garson said that the Dominion-provincial financial relationship established in 1867 was prejudicial to the maintaining of employment in that it imperilled the solvency of provinces and restricted trade. At the time of Confederation, governmental action and expendi-

tures on a large scale in the fields of unemployment relief, social services, old age pensions and public health were not contemplated by the Fathers of Confederation at all, much less as the responsibility of the provinces. During the depression of the 1930's, when greatly increased expenditures were necessary, particularly for unemployment relief, provincial sources of revenue became obviously inadequate.

Terming unemployment relief a national responsibility Mr. Garson recommended that the Dominion take over the administration and financing of the relief of unemployables.

He also declared that the Dominion should take similar action in respect of pensions for the aged and the blind, and in respect of any social legislation providing for unconditional payments of money allowances, such as children's allowances, which do not involve local supervision, and which, as well as having a social welfare aspect, are involved in national fiscal policy in the sense of being important devices to stimulate consumption and thereby increase employment.

The Dominion, he recommended, should further provide:—

(1) A very substantial increase in the amount of the per capita subsidy paid by the Dominion to the provinces.

(2) A national adjustment grant to those provinces which could qualify for it on the basis of fiscal need (the amount of the grant being such as to enable each province, including its municipalities without resorting to heavier taxation than the Canadian average, to provide adequate social, educational and developmental services).

(3) An emergency grant to a province in which bad conditions prevailed. This would be made for a year at a time, reduced as soon as possible, and eliminated as soon as possible.

The provinces, he felt, should agree to assign to the Dominion Government the sole right to impose "what are universally recognized as the main instruments of taxation in a modern federal state," namely taxes upon the incomes of individuals and corporations and upon inheritances. This would effect a return to the spirit of the intentions of the Fathers of Confederation, he indicated, since they had planned in 1867 to assign to the Dominion the sole right to levy the chief taxes of the State, which in those days were customs and excise.

The provinces, however, could only retain their financial responsibility if a reasonable share of their expenditures were financed by themselves rather than by Dominion grants.

Mr. Garson therefore advocated that the Dominion provide the provinces with an adequate and appropriate tax base, to which they could resort to finance any unusual provincial expenditures. He declared that he would elaborate this point in committee.

He further recommended that the Dominion take over the relief debts owing to it by certain provinces, upon condition that the provinces so relieved in turn would relieve their municipalities of all relief debts owing by the municipalities to such provinces, and would make equitable adjustments with those municipalities which have already repaid their relief debts.

In addition, the Dominion should enter into such further fiscal arrangements with the provinces as would provide all provinces with a credit adequate to support their shares of capital expenditures involved in the carrying out of the national post-war program.

By these means, Mr. Garson concluded, "the financial capacity of all provinces to carry out their constitutional responsibilities will be restored and all provinces will be provided with a credit to carry out their part of the national post-war program to help provide employment and income for those who are returning from our defence. There is not one of us in a position of responsibility who wishes to reward the men and women in the Services with another depression. But this time we must do a better job of making the Canadian people prosperous than we did after the last war. To do so, we must realize that it is a mass need, plus mass purchasing power which creates mass consumption. It is mass consumption in turn which sets in motion large-scale mass production. Without mass production on a large scale we have mass unemployment.

"No one disputes that there is mass need. The key to the whole process by which mass unemployment is avoided is mass purchasing power. Yet by leaving to the provinces the sole field of direct taxation, we have virtually forced the Dominion government to get, and all throughout the depression it in fact did get, far too large a part of its tax revenues from harsh, regressive, indirect taxation which diminished mass purchasing power—the very thing upon which we depend to make our economic system work. If we had set out deliberately to sabotage the free enterprise system, there is hardly any step which we could have taken which would have been more effective for this purpose than to retain in the power-machinery age of 1945 the Dominion-Provincial financial set-up which

was created to meet the needs of the primitive Canadian economy in 1867.

"With the financial arrangement of 1867, we have no quarrel as it relates to the facts and conditions of 1867. But the facts and conditions have changed, and to these changed conditions we have failed to apply the principles of Confederation. The Fathers of Confederation intended that the Dominion government should have control over the main taxation instruments. When with changing conditions the Dominion lost effective control over the most important tax in the modern federal state, we have so far failed to restore that control, except temporarily, by the Tax Suspension agreements....

"What we seek as a reform is to restore the meaning and intentment of the British North America Act by applying the principles of Confederation to the facts of 1945. By co-operative action of the provinces and the Dominion we can do this without any amendment of the Constitution. Indeed, by so doing, we shall restore its meaning and spirit, rather than depart from it. And when we shall have done this, we shall find that we shall have solved our problems."

Hon. John Hart, Premier of British Columbia

Dealing in his remarks largely with the subject of employment, Hon. John Hart, Premier of British Columbia, declared, "Events, since the frustrating days of the last depression have greatly influenced opinions previously held on the proper role of government in the national economy. The success which has attended the management of Canada's war economy has, we believe, persuaded thoughtful citizens everywhere that much can be done in times of peace to control the effects of a disturbed business cycle; to banish the fear of unemployment and social insecurity; to maintain a high level of employment and income; and to achieve an ever-rising standard of living.

"We were gratified to note in the agenda, which was sent to us last year, that the underlying objective of this Conference was to devise the means by which we might attain these important goals."

Noting that in the past attempts to avoid the effects of depression had been "conspicuously unsuccessful," Mr. Hart said that his government had carefully considered the proposals for maintenance of a high level of employment and income contained in the White Paper issued by the Minister of Reconstruction, and that he was aware that the adoption of the proposed economic policy would

"impose new and grave responsibilities upon the federal system."

"Confident that these new responsibilities can be assumed, and satisfied that the Federal system is capable of the self-discipline necessary to provide effective co-ordination, the Government of British Columbia has come to this Conference prepared to give its fullest co-operation in that connection," he declared.

"In view of the restricted financial capacity of provincial governments," he continued, "any effective attempt to employ a method of timing public expenditures, or tax relief to avoid economic extremes, would have to be inaugurated by the Dominion Government. Whether we, in Canada, can successfully use the weapons of monetary and fiscal policy to combat our peace-time enemies of unemployment and depression, depends, we think, partly on international conditions largely beyond our control, and partly on the domestic arrangements which may be devised to co-ordinate governmental and private effort.

"The basic question, in our opinion, is how effective recognition can be given to the interdependence of all Canadian governments and, at the same time, preserve the constitutional privileges of the separate parts. We are inclined to think that no one answer to this question will be found wholly satisfactory. Perhaps only through experience can we evolve a practical method of dealing with it. In any case, since we shall be breaking into new and difficult ground, flexible arrangements and continuous Dominion-provincial collaboration are likely to be more appropriate than rigid, permanent adjustments in the initial stage. It may be that a Dominion-Provincial Co-ordinating Council would serve a useful purpose in this connection."

He considered that the use of taxation for social as well as for revenue purposes would entail the need for co-operative methods in some instances where previously independent Dominion and provincial methods of collection were feasible.

"It is possible," he said, "that the method of tax-sharing could be used to advantage in dealing with this question. In this respect, experience under the existing tax agreement has shown that the policy of a single agency for the collection of specified revenues commends itself highly."

Conditions approaching full employment would improve the revenue position of provincial governments, he thought, but the federal government should be in a position to extend assistance to any province which temporarily needed it.

Labour should be taken into the confidence of the governments "so that they may approach

the transition period with every assurance that there will be no serious unemployment."

Mr. Hart also suggested that the Conference deal with such problems as: improving the freight rate structure for Western Canada; municipal finance; the cost of education; housing; and other matters.

* * *

Referring to the Dominion Brief, Mr. Hart said that the proposals were "very far-reaching in their objectives," and that his government would "study them and give them every consideration," preparatory to another Dominion-provincial meeting.

Hon. J. Walter Jones, Premier of Prince Edward Island

The Hon. J. Walter Jones, Premier of Prince Edward Island, reviewed the position of his province in relation to other parts of Canada. He said that since Confederation the former prosperity of the island had gradually deteriorated.

Pointing out that his province was 62 per cent agricultural, and engaged in other primary industries to an extent of 12 or 15 per cent, Mr. Jones declared that wages in primary industries had increased far less in wartime than had wages in secondary industries. Wages in Prince Edward Island were much lower than in other provinces.

Prince Edward Island normally exported many of her agricultural products, but during the war "shipping ceased and harbours were allowed to decay." There was "practically no provision for transport to and from the mainland by trucks," while the transporting of railroad cars was not of use for carrying perishable products because of delays in transit or slowness of the service.

Agriculture was not adequately assisted; the Prairie Farm Rehabilitation Act or similar measures should have been applied to the Province. More encouragement was also needed for the fishing and farming industries, Mr. Jones stated.

Young persons left the province and took their educational and earning power with them, both of which were acquired at the province's expense.

The people of Prince Edward Island had no quarrel with corporations as such, but declared against a system which located them mostly in one area of Canada, and claimed the taxes paid by them belonged to the people as a whole.

As a rural province, Prince Edward Island could not without federal assistance provide an educational service equal to that in communities having varied resources and industries.

He declared: "I have spoken at length of our claims for equal treatment and especially emphasized the great disabilities of war-time. I have not yet stressed the necessity of a compensatory allowance for the post-war period. But I have shown that agricultural areas should receive treatment equal with other areas, and when goods are manufactured and purchased on Prince Edward Island providing labour outside the province, more goods should be delivered to the province on an adjustment. If farms on Prince Edward Island are to have electricity, they should be assisted federally. If we raise the health and welfare standards assistance again is indicated. Vocational training should be federally supported. Educational improvement could be achieved by a federal grant to each province without infringing on provincial right of control of the curriculum and school management. The Housing Act provisions should be extended to high schools and community centres.

"When grants-in-aid are given provinces they should not be given wholly on a population basis," he said. "The Technical Education grant of former years adopted the principle of first allocating a sum for management set-up and divided the remainder of the grant by population. An example of the unfairness of a population division is shown in the Physical Fitness grant where a division of \$250,000 gave Prince Edward Island just \$1,862 per year. Naturally no action could be taken with such a small amount."

He suggested that the Island might be used as an experimental area to try out new ideas in health, public welfare and education. "The Province would be pleased to co-operate also if the Island were used for experiment with superior types of animals and plants," he said.

He regretted the decline of shipping in the Maritimes since Confederation.

Turning to the Dominion Brief, he stated that acceptance of the financial proposals would result in a net loss to the province, compared with its present position, of \$110,000.

He concluded: "It is therefore quite obvious that the financial disadvantage to my province calls for a new proposal, or a modified proposal. We are ready now or later to consider the whole matter. We have our case prepared."

Hon. T. C. Douglas, Premier of Saskatchewan

Hon. T. C. Douglas stated that Saskatchewan was desirous of co-operating with the Dominion Government and the other provincial governments, and was prepared to do everything possible to ensure the success of the Conference.

"In our view," he continued, "the primary function of government is to satisfy human needs and to advance the economic welfare of the people who are governed. That is the criterion which we have set for ourselves. If the satisfying of human needs and the advancement of economic welfare means constitutional changes, then we are prepared to support constitutional changes. If the well-being of our people requires fiscal re-arrangements and re-allocations then we are prepared to support such changes. We believe that the function of government is not to be bound to any particular legislative authority. We do not consider any constitution to be sacrosanct. We believe our most sacred obligation is to care for the needs of the people whom we are privileged to represent. We believe that new occasions teach new duties and time makes ancient good uncouth. We are not arguing here that constitutional changes are necessary but we are saying to you and to other delegates, Mr. Prime Minister, that if constitutional changes are necessary we, as a government, are prepared to support them."

Mr. Douglas presented a brief outlining his government's proposals in the field of Dominion-provincial relations.

He agreed that the first purpose of the Conference should be to maintain full employment and a high national income.

Speaking of the Dominion Government's intention of encouraging private enterprise to play the dominant part in maintaining full employment, he said that his government was "very much in favour of encouraging private industry wherever such development is not detrimental to the public interest. We have never opposed free enterprise but we have expressed our regret that in our present economy there is such a lack of both freedom and enterprise. For thousands of small industrialists and businessmen a free market, as we have always understood it, is almost non-existent." In this connection he urged the elimination of monopolies and cartels.

He said that he supported the Dominion plan of making available a "shelf" of planned public projects ready to meet an unemployment crisis. However, there were a number of government projects which should be put into effect immediately, and this should be done even if it meant diverting labour from the production of "certain consumer goods of low or even doubtful social utility by private industry, to the building of basically sound projects of high social utility by government industry." He declared: "I could mention several projects that in my opinion should win out in a contest for labour and capital—for example, irrigation and power projects

on the prairies, or the construction of a satisfactory highway system across Canada are more important to the development of our nationhood than some gadget that fills little if any basic need." Other projects mentioned by Mr. Douglas in connection with his own province included the construction of hospitals, schools, recreational centres, a medical school, university buildings, agricultural schools, and also mental institutions and farm colonies for mental defectives.

He felt that Dominion-provincial co-operation in the undertaking of socially useful projects was desirable and that "such ventures should not be classified as stop-gaps waiting on the shelf for a depression to occur, but as part of a national plan designed to increase the national well-being." Referring to the physical fitness program and the venereal disease control program as "two typical attempts by the Dominion Government, in co-operation with provincial governments, to meet certain Dominion-wide needs," he said that in each case federal aid represented but a fraction of the actual cost. "Unless the Dominion Government realizes the dynamic nature of such programs, it is fruitless for it to launch them, and then expect the provincial governments to bear the increasingly heavy burden of perpetuating them," he declared.

He urged that agriculture be given a prominent place on the agenda of the Conference as one of the main industries to be considered. "Full employment," he said, "is not the only prerequisite to a high national income. The maintenance of the national income of Canada at a high level is in large part dependent upon keeping agriculture on a sound and remunerative basis. Stability of agricultural income requires that we minimize, in so far as it is humanly possible, violent fluctuations in production and in price levels." In this connection he advocated large-scale irrigation projects in areas affected by periodic drought, the establishment of floor prices, and attention to marketing problems, including the suggestion that the Canadian Wheat Board should function as the sole agency for the marketing of grain and that the speculative market should be abolished.

Mr. Douglas said that his government was prepared to agree to a plan whereby the provinces would surrender income, corporation and succession duty taxes in return for "such fiscal arrangements as will enable the provincial governments to discharge effectively their various responsibilities. We think that this is just and equitable. The Premier of Ontario mentioned this afternoon that fifty per cent of all taxes collected come from the Province

of Ontario, but we must also remember that money collected from taxes in one province may have been earned in another province. Only by pooling the proceeds of these taxes can each province receive its fair share and every person in Canada enjoy a minimum standard of social services, irrespective of where they may happen to reside."

"In surrendering these fields of taxation," he continued, "Saskatchewan would want assurance on the following points:—

"(1) The proposed fiscal arrangements must include safeguards which will ensure to each province sufficient funds to enable it to keep in step with the ever-expanding concept of social services.

"(2) Any tax agreement with the federal government must stipulate that the right of set-off shall not apply; otherwise provincial governments would lose their last vestige of independence and the very subsidies to be paid could be used to intimidate any province which did not do as it was told. Our own experience in this respect indicates the necessity for such safeguards."

Mr. Douglas stated the general principles to which his government subscribed as the basis for discussion at the Conference as follows:

"(1) We believe that social security measures should be raised to a minimum standard across Canada in order that no Canadian shall be penalized or discriminated against because of the geographical area in which he resides. That to us is fundamental.

"(2) The Government of Saskatchewan is prepared to surrender certain fields of taxation in return for fiscal arrangements which will enable it to meet effectively its social and constitutional obligations.

"(3) We believe that the Dominion Government should assume responsibility for social services which do not require extensive supervision, the provincial governments to be responsible for social services involving considerable supervision.

"(4) The Government of Saskatchewan believes that there should be a National Labour Code since at present every province which passes advanced labour legislation is thereby penalized. We are prepared to surrender jurisdiction over a substantial part of the labour field provided we have sufficient guarantee that the labour standards now enjoyed in our province will not be lowered or impaired.

"(5) We believe that no province should be discriminated against because of the political philosophy of the government which people have seen fit to elect.

"(6) We believe that constitutional changes must be effected to ensure effective control over marketing by designated governmental agencies. Without elaborating on so important a matter, it may be said that we believe that the control of marketing should include power to control prices as well as standards.

"(7) The Saskatchewan Government maintains that the Dominion Parliament should have power to implement international treaties or agreements of any nature entered into by the Dominion Government. In view of the fact that many trade agreements and international treaties are contemplated which affect labour, health and the suppression of the narcotic and white slave trade, it is essential that the Dominion Parliament have power to deal effectively with these problems.

"(8) We feel that the British North America Act should be amended to enable the provinces to delegate to the Dominion, legislative jurisdiction with respect to any subject matter within the exclusive jurisdiction of the provinces, and that the Dominion Government be endowed with reciprocal power in this regard.

"(9) The Saskatchewan Government will press for the following changes of the British North America Act:—

- (a) That the British North America Act should henceforth be amended in Canada rather than across the seas.
- (b) That the British North America Act should be revised placing certain fundamental religious, racial and civil liberties in a Bill of Rights, amendable only by the unanimous consent of the provincial legislatures concurrently with the Dominion Parliament.
- (c) That other portions of the Act should be capable of amendment in a simplified manner.
- (d) That all appeals to the Judicial Committee of the Privy Council from the courts of law in Canada should be discontinued.

"We feel that the adoption of these proposals would prevent social progress from being throttled by the dead hand of the past and would enable us to adjust our governmental framework to meet the needs of a new day while at the same time guaranteeing the rights of all minorities and protecting our people from ill-advised or ill-considered innovation."

He said that his government would urge the Conference to consider and adopt the following specific measures:

- (1) Cancellation by the Dominion of all provincial treasury bills held by them in re-

spect of relief and similar obligations. (He said that the fact that the Conference was coming to recognize that the care of employables was a Dominion responsibility should surely point to the necessity for eliminating these treasury bills that were incurred during the period of the depression.)

(2) Assumption by the Dominion of provincial debts, conditional on the provinces surrendering important fields of taxation.

(3) The reduction of tariffs and determined war against monopolies and cartels "as the most effective means of establishing a free market and thereby stimulating trade and industry."

(4) Downward revision and equalization of existing freight rates.

(5) Fullest possible use of the Hudson's Bay Railway as a means of reducing the cost of living in Western Canada and facilitating increased trade.

(6) Financial assistance to municipalities by the loaning of money at low rates of interest by the federal government through the Bank of Canada to assist in municipal reconstruction projects.

(7) Use of the facilities of the Bank of Canada to finance an adequate housing scheme as well as a program of socially-useful projects.

(8) Closer collaboration of the Department of Veterans Affairs with the Departments of Rehabilitation in various provinces.

(9) Grants by the Dominion to the provinces for the purpose of maintaining certain minimum standards of education across Canada.

(10) Decentralization of industry wherever practicable. Encouragement of co-operatives.

(11) Federal assistance in the construction of nationally and internationally important roads of a high standard and in the building of colonization and development roads.

(12) Assistance to agriculture, including adequate marketing facilities and price guarantees, together with technological research and assistance to the farming population.

Hon. E. C. Manning, Premier of Alberta

Asserting the necessity that the jurisdiction and the responsibilities of Dominion and provincial governments be "clearly defined and definitely established", Hon. E. C. Manning, Premier of Alberta, presented a Brief outlining his government's proposals.

He listed ten matters which he considered to be basic requisites to the attainment of harmonious Dominion-provincial relations leading to the establishment of a sound post-war Canadian economy in which it will be possible

for all to enjoy social and economic security with the maximum of individual opportunity.

These were as follows:

(1) Optimum production through the removal of artificial restrictions and by the progressive expansion of industrial and commercial development. "Production cannot be maintained and further expanded," he declared, "unless effective steps are taken to prevent artificial restriction by monopolies, combines and cartels, and unless relief is given from the present system of excessive taxation which depletes individual purchasing power, stifles capital investment, discourages industrial development, and retards economic expansion. Relieved of these restrictive forces and provided with adequate credit facilities, a stable price structure, and freedom from inflationary or deflationary fluctuations, Canada's production not only can be maintained but expanded progressively to provide a steadily increasing volume of goods to raise the standard of living together with the maximum of opportunities for gainful employment for the Canadian people.")

(2) A national income so distributed and sufficient in its aggregate to make possible:

- (a) a secure standard of living for every Canadian citizen;
- (b) the satisfactory distribution of Canada's total production or its equivalent when Canadian goods are exchanged for others through export and import trade.

(3) A practical program of rehabilitation for returned men, including immediate provision for satisfactory low cost homes, and adequate assistance to veterans to facilitate their re-establishment into civilian occupations.

(4) Provision for adequate social services measured in terms of human need and physical possibility rather than in terms of financial costs.

(5) A clear and definite understanding as to the respective fields of jurisdiction and responsibilities as between the Dominion and Provincial Governments.

(6) A fair and equitable adjustment of those factors which have a detrimental or discriminatory effect upon the economy of any part or parts of the Dominion. (Under this heading Mr. Manning included the existing freight rate structure, and selective tariffs which raised the prices of manufactured goods to the detriment of the predominantly agricultural provinces.)

(7) A satisfactory settlement of those major issues in which the provinces have an interest co-equal with the Dominion. (The major matters in this category were taxation and monetary policy, Mr. Manning said.)

(8) Provision to ensure adequate provincial and municipal revenues.

(9) The recognition and preservation of the basic principles of effective democracy. (Speaking on this point Mr. Manning stressed the advantages of decentralization in government in regard to matters not essentially national in scope. He declared: "Any program based on the premise that more power and authority should be centralized under the jurisdiction of the Dominion, is, in the light of experience, unsound in principle and a negation of the basic policy of decentralization which has marked the evolution of the British system of parliamentary government, and which is one of the secrets of unity and strength inherent in the British Commonwealth of Nations.")

(10) The elevation of Canadian public affairs to a new level of statesmanship where the good and welfare of the Canadian people as a whole will be the sole consideration of governments, and where the maximum measure of mutual co-operation and effort will be exercised to that end.

Tracing the course of Dominion-provincial relations since Confederation, Mr. Manning said that as governments were faced with the responsibility of providing more services, their expenditures had increased. Heavy public borrowing created debts which were intensified in the great depression in 1930. Debt incurred by the Dominion during the war was now supplemented by obligations for state insurance schemes, family allowances, subsidies, service pensions, etc., which in the aggregate ultimately may call for an annual expenditure in excess of its entire pre-war tax revenue. The provinces too were faced with the problem of maintaining greatly expanded services.

"Obviously," he said, "the present situation is absurd . . . The whole situation resolves itself down to the one indisputable fact that the major problem confronting all Governments today is primarily financial, and, in so far as provincial and municipal governments are concerned, it is absolutely impossible for them to discharge their post-war responsibilities within the confines of the Constitution and the laws of Canada unless the necessary additional revenue is made available to them.

"It is not a problem of scarcity of resources or of lack of machine power, manpower or ability to transform those resources into every conceivable form of goods necessary to meet the post-war requirements of the Canadian people. It is not a question of physical inability to train men and women in the post-war years to render efficiently every conceivable private and public service necessary to the good and welfare of mankind. History has demonstrated that in times of peace, under our present economy, the factor that limits both the individual's standard of living and the

measure of social and public services provided by the state is financial rather than physical. Until this absurd situation is corrected no amount of reshuffling of our responsibilities or of our inadequate revenues will solve our problems and ensure the people of Canada a post-war economy in which their standard of living and the measure of their social services will be limited only by the aggregate of their material resources and their combined ability to produce the goods and services they require....

"The effective solution to our problem," he declared, "obviously requires a policy that goes far beyond the mere adjustment of our respective responsibilities or the reallocation of our present inadequate sources of public revenue. It lies within the sovereign power of the Dominion Government, through the Bank of Canada, to monetize fully the real wealth of the nation as represented by our abundant national production, and to utilize

the financial credit representing the monetization of that real wealth to supplement the ordinary public revenues of the Dominion and of the Provincial Treasuries.

"Such a monetary policy, operated within adequate scientific safeguards against both inflation and deflation, would enable the Dominion Government to ensure to the provinces adequate revenues to discharge fully their constitutional responsibilities without jeopardizing its own financial position, and would, at the same time, remove the necessity for excessive taxation and the accumulation of further public debt. It would put the Dominion and the Provincial Governments in a financial position to implement adequate programs of post-war rehabilitation and reconstruction, which would raise progressively the standard of living of the Canadian people to the high level which the abundance of our resources and our steadily expanding productive capacity would make physically possible."

Procedure of Conference

During its 5-day opening session the Conference held four plenary meetings which were attended by full delegations and were open to the press and to the public.

The Conference opened with the Prime Minister's address of welcome, which was followed by the replies of the provincial premiers. The proposals of the Dominion Government were read by the cabinet ministers responsible for their preparation, including the Hon. L. S. St. Laurent, Minister of Justice, who acted as Deputy Chairman of the Conference in the absence of the Prime Minister; Hon. J. G. Gardiner, Minister of Agriculture; Hon. Humphrey Mitchell, Minister of Labour; Hon. C. D. Howe, Minister of Reconstruction; Hon. Brooke Claxton, Minister of National Health and Welfare; and Hon. J. L. Ilsley, Minister of Finance.

The provincial premiers then made their presentations, following which a Steering Committee was set up consisting of each of the premiers and of ministers representing the federal government.

The Steering Committee unanimously agreed on setting up a Continuing Co-ordinating Committee consisting of the Prime Minister of Canada and the nine provincial premiers. As explained by the Hon. Mr. St.

Laurent, the functions of this Committee are "to supervise and co-ordinate the work of all continuing committees to be established by the Conference and to recommend the establishment of additional committees as may be thought desirable. It is also charged with considering improved machinery for Dominion-provincial co-operation and to consider all matters not specifically provided for in terms of reference of other committees."

The Co-ordinating Committee decided to set up six sub-conferences to deal with the proposals that had been put forward, as follows:

- (1) Financial Arrangements
- (2) Public Investments
- (3) Social Security
- (4) Agriculture
- (5) Labour
- (6) Housing

It was agreed that the Co-ordinating Committee would meet again in Ottawa on November 26; and that in the meantime each provincial government would study the Dominion proposals and those of other governments, and that further details of the proposals of the respective governments, as they develop from study, would be circulated.

Closing Remarks by the Prime Minister

In adjourning the Conference the Prime Minister thanked the delegations from all the provinces for the spirit in which they had approached the work of the Conference.

"Our deliberations," he declared, "have been happily free of partisan or parochial attitudes;

the eyes of all have been lifted to the horizon. We have sought to examine and discuss the proposals and suggestions which have come before us with an overriding sense of the national interest, and of an interest much wider than the limits of our own country.

"The Dominion Government, I need scarcely say, has been pleased by the acceptance of its proposals as a basis of discussion. We have been anxious to avoid snap judgments or hasty decisions. So far as our proposals go we ask only for their consideration and examination on their merits. We intend to give the same full consideration to the proposals and suggestions of the provinces. We believe all proposals can be improved. It is our earnest hope that the arrangements made for continuing the work of the Conference through the period of adjournment will enable the Co-ordination Committee to re-assemble much closer to the establishment of a stable and an equitable basis of Dominion-provincial relations than Canada has ever had. When the full Conference re-assembles, it is my hope that we shall be in a position speedily to resolve any possible remaining differences, and to conclude agreements which will be of benefit to all. That hope, I know, will be increasingly shared by the people of all the provinces, as the months pass and the alternative to agreement becomes clearer to all.

"We have set our goal for the period of reconstruction and for the future. Our goal is the maintenance, in peace-time, of the high levels of employment and national income attained in war-time; and the use of the high productive capacity we have developed, to bring about a rapid advance in social security and in the standard of living of the people. With that goal all the provincial governments have expressed agreement. Full employment and a high national income in wartime are necessarily largely the result of the policies of the Dominion Government. There has been general agreement with the view that, in peacetime, the maintenance of employment and national income depend upon the policies of the provincial governments, as well as those of the Dominion. We all know, and have all declared, that full success in our aim depends upon co-operation.

"Co-operation towards the maintenance of high levels of employment and national in-

come must be extended far beyond the bounds of our own country. The prosperity and well-being of our country, of every province, and of every municipality depend, in large measure, upon the maintenance and expansion of Canada's international trade. The extent of international trade unfortunately does not lie wholly within our own control; it is affected by the policies of other nations as well. This, however, is true: the effectiveness of our co-operation with other nations in the promotion of trade, and in other ways, depends very largely upon the extent to which our own country is united, strong and prosperous. In other words, the maintenance of Canada's high place in the world, and the promotion of our national interests in world affairs depend upon a sound foundation at home. The cornerstone of that foundation is a harmonious relationship between the Dominion and the provinces.

"It has been said, over and over again, by the heads of all governments present, that nothing should be permitted to interfere with the success of the Conference; that it must not fail. If we should permit it to fail, the richest provinces, as well as the less favoured ones, will assuredly suffer. All the people will be poorer, and the country itself will be weaker. I know there is no need to appeal to all to maintain, throughout the duration of the Conference, the positive and constructive attitude which has so fortunately been in evidence in the preliminary stage of its proceedings.

"With continued harmony and co-operation between the Dominion and the Provinces in the pursuit of common ends, no country can provide greater happiness and welfare to its own people than ours. What is more, working together as one, no people and no country can make a greater contribution to the happiness and to the welfare of humanity than this fortunate land of Canada. I feel I may say on behalf of all, that to the accomplishment of these great aims, we who have the responsibility of government shall continue, as we have begun, to work together until our task has been successfully performed."

Labour Organization in Canada

TRADE union membership in Canada again increased substantially in 1944, although less than in 1943 and 1942. According to the thirty-fourth Annual Report on Labour Organization in Canada for the year ending December 31, 1944, which will soon be released, and may be obtained for 25 cents from the Department of Labour, there were 724,188 members at the end of 1944. This is an increase of 59,655 or 9 per cent over the 664,533 recorded in the previous year and more than twice the membership of 358,967 in 1939. Of an estimated 2,860,000 non-agricultural wage and salary workers, 14 years of age and over, approximately 25 per cent were members of trade unions in Canada at the end of 1944 as compared with 20 per cent in 1943.

The increase in the number of local union branches was 388, from 3,735 in 1943 to 4,123 in 1944. It is noteworthy that the increase in the number of local unions during the past two years is greater than the net increase during the period from 1928 to 1941. Newly organized locals rather than the growth of organizations already established were responsible for a considerable portion of the increased membership in 1944. By far the greatest increase in the number of new local branches was recorded in the services industrial grouping but the metals group also showed a marked increase.

The largest group remains the metal industries, with 26.7 per cent of the total membership, although the rapid war-time expansion of membership in this group was halted during the year. Total union membership in this group decreased 3.1 per cent from 199,487 in 1943 to 193,336 in 1944. The next largest group, steam railways, had 16.7 per cent of the total in all industries in 1944. The increase in this group during the year was 12.1 per cent.

The accompanying tables show the distribution of membership by industrial groupings in 1943 and 1944, the percentage increase (or decrease) in membership in each group during the year, and the 1944 membership classified according to affiliation.

The trend of increasing concentration of trade union membership in the industrialized provinces which have experienced the greatest expansion of factory employment appears to have been impeded during 1944. Membership figures by province and city, being based on reports from local branches, are not complete. The information available indicates, however,

that about 62 per cent of union membership was concentrated in the industrial Provinces of Quebec and Ontario; for 1943 the figure was 65 per cent; for 1942 it was 64 per cent. Of the 4,123 locals, known to be in existence in 1944, more than half, or 2,389 were in these two provinces.

A downward trend was noted in the concentration of union membership in the larger urban centres. This accompanies the contraction in employment resulting from the reduction of production schedules in large-scale war industries. Toronto and Montreal, the two leading centres of industry and population, together had 501 or 12 per cent of all local unions in Canada, representing 155,344 or 25 per cent of the members of local unions reported in 1944. Largest decreases in union members were 21,904 for Montreal; 8,056 for Toronto; 4,242 for Halifax; and 3,650 for Windsor.

The Report contains a brief historical statement and shows the membership, the names of the officers, and the affiliated unions of the Trades and Labour Congress of Canada, the Canadian Congress of Labour, and the Canadian and Catholic Confederation of Labour.

For each national and international union are shown the membership, the number and location of their branches and the name and address of the secretary. In the case of an international union, the names and addresses of the Canadian officers are given.

In addition, there are included lists of provincial federations, local labour councils, federations of unions in allied trades or industries, district union councils, and railroad brotherhood committees, with the names and addresses of their presidents and secretaries. Some notes are included concerning the nature, functions, and interrelationships of the constituent parts of the framework of labour organizations. A section of the Report deals with the labour press.

Also, the Report gives information concerning female membership; benefits paid by headquarters of national and international unions on behalf of Canadian members; teachers' associations; and other organizations of public employees, including those employed by the Dominion, provincial and municipal governments.

The accompanying chart shows the growth of trade union membership in Canada since 1911.

TRADE UNION MEMBERSHIP IN CANADA
1911 - 1944

**DISTRIBUTION OF TRADE UNION MEMBERSHIP BY MAIN INDUSTRIAL GROUPS 1943 AND 1944 AND

Unaffiliated Local Unions.....	59	11,211
Totals.....	4,123	724,188

(1) These comprise international unions affiliated with the A.F. of L. in the United States, the Canadian branches of which are not affiliated with the Trades and Labour Congress of Canada. The 40 local or federal unions with 7,115 members, which received their charters directly from the A.F. of L., have been included under the Trades and Labour Congress in the table as they are affiliated with that body.

(2) These comprise international unions affiliated with the C.I.O. in the United States, the Canadian branches of which are not affiliated with the Canadian Congress of Labour.

Decisions of National War Labour Board

DURING the month of August the National War Labour Board issued decisions in the following cases:—

V. Evan Gray, K.C., Toronto, Ontario.

Dominion Woollens and Worsteds, Limited, Toronto, Ontario.

Alberta Nitrogen Products Limited, Calgary, Alta., and International Union of Mine, Mill and Smelter Workers, Local 690.

Norman Laboratories Limited, Vancouver, B.C.

Moose Jaw Co-operative Society, Limited, and the Moose Jaw Wholesale and Retail Workers' Union.

Ford Motor Company of Canada, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 200.

Consolidated Optical Company, Limited, Belleville, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 426.

John T. Hepburn, Limited, Toronto, Ont., and United Steelworkers of America, Locals 3335 and 3358.

The McKinnon Industries Limited, St. Catharines, Ont., and United Automobile, Aircraft

and Agricultural Implement Workers of America, Local 199.

Fahralloy Canada Limited, Orillia, Ont., and United Electrical, Radio and Machine Workers of America, Local 511.

Canada Electric Castings Limited, Orillia, Ont., and United Electrical, Radio and Machine Workers of America, Local 511.

Campbell Soup Company, Limited, New Toronto, Ont.

Norton Company, Niagara Falls, Ont., and International Chemical Workers' Union, Local 154.

Canadian Automotive Trim, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195.

Canadian Automotive Trim, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America.

Kelsey Wheel Company, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195.

Chow Gooley, Prince Rupert, B.C.

Picard Candy (Saskatchewan) Limited, Regina, Sask., and Hotel and Restaurant Employees and Beverage Dispensers' Local 829.

Re: V. Evan Gray, K.C., Toronto, Ont.

Reasons for Decision

In this case the employer-appellant applied to the Regional War Labour Board for Ontario for permission to increase, for the year 1945, the wage rate of his stenographer-secretary, by an amount equal to ten per cent of the amount by which the gross income of the employer exceeds a certain figure for the year. The employer proposes that the increase to the employee shall not exceed \$500 for the year.

The Regional Board refused the application by decision dated May 4, 1945 on the ground that the proposed increase was a voluntary bonus and that the Board was precluded by Section 26 of the Wartime Wages Control Order, 1943, from approving the application. From that decision the employer now appeals.

With much respect, it is our view that what the employer is seeking in effect is permission to establish a rate to be calculated on the aforementioned basis in conjunction with the weekly time rate of \$30.60. The application therefore falls within 20 (1) (c) (v) of the said Order.

Clause (c) aforesaid imposes upon the Board the duty of ascertaining whether the proposal under consideration is fair and reasonable and is consistent with and will give effect to the purposes of the Order.

What is fair and reasonable in this case may only be determined from a study of the duties and responsibilities of the employee concerned. The statement of duties and responsibilities shows that the employee devotes considerable of her time to work

usually done by a junior solicitor or law clerk. She has assumed some of the duties formerly done by a Junior Solicitor now in the armed forces. In the circumstances it would appear to be fair and reasonable that the employee should receive additional remuneration to compensate her for the extra duties assumed.

The method by which the employee's wage rate is to be increased will not make it

necessary for the employer to increase the price of his services, consequently the principle of maintenance of stability in prices, the main purpose of the Order, will not be violated by an approval of the application.

The appeal should be allowed and the application authorized.

Finding and Direction will issue accordingly.

August 3, 1945.

Re: Dominion Woollens & Worsteds, Limited, Toronto, Ont.

Reasons for Decision

This is an appeal by the Company from a Finding and Direction of the Regional War Labour Board for Ontario, dated May 22, 1945.

By the said Finding and Direction, the Regional War Labour Board declined to approve salary increases proposed by the Company for its "Chief Accountant" and its "Senior Male Accountant". Leave to appeal to this Board was granted by the Regional Board.

The salary of the "Chief Accountant" is in excess of \$250 per month. Section 15 (1) of Wartime Wages Control Order, 1943, provides in effect that whenever a person is in receipt of a salary of \$250 or more per month, he shall be presumed to be above the rank of foreman or comparable rank, unless the nature of his duties and responsibilities and his relationship to other employees indicate

clearly that he is not above the said rank. We have always considered that the applicant, in any case such as this, must rebut or remove the presumption above referred to. We have come to the conclusion that the presumption has not been removed and, accordingly, it will be necessary to declare the "Chief Accountant" to be above the rank of foreman and subject to the Wartime Salaries Order, P.C. 1549.

In the case of the "Senior Male Accountant", the presumption above referred to does not arise and the incumbent falls within the Wartime Wages Control Order, 1943. We have come to the conclusion that the Company has succeeded in showing that its application for the increase to the "Senior Male Accountant" can be approved under Section 20 (1) (a) of the Order.

Finding and Direction will issue accordingly.

August 3, 1945.

Re: Alberta Nitrogen Products Limited, Calgary, Alta., and International Union of Mine, Mill and Smelter Workers, Local 690

Reasons for Decision

This is an appeal by the Union from a decision of the Regional War Labour Board for Alberta dated February 28, 1945, refusing its application for wage increases for five occupational classifications: labourers, janitors, warehousemen, truck drivers and caterpillar tractor operators.

The Union submits that the rates to these classifications should compare with the rates paid by chemical plants located at Trail, B.C. and Niagara Falls, Ontario, to similar classifications. As these classifications involve unskilled and semi-skilled labour which is not directly connected with the operating processes of the plant, we believe the Regional Board was justified in dealing with the application on the basis of local comparisons for such type of labour, having in mind the wage structure of the company.

The Union further submits that, considering distance from employment and hazards of occupation, the rates paid by the respondent to the classifications mentioned are lower than those paid by industries in the Calgary district.

There was a finding of the Regional Board that there was no "gross inequality or gross injustice in the wages presently being paid" and after careful perusal of the Union's well documented brief, we cannot but conclude that we are unable to reverse that finding. However, there does appear to be some doubt as to whether there is not established for labourers a range of rates of 63 to 68 cents and we believe that the question may be left for determination by the Regional Board, at the request of either party, under Section 28 (c) of P.C. 9384. Otherwise, the appeal must be dismissed.

August 8, 1945.

Re: Norman Laboratories Limited, Vancouver, B.C.

Reasons for Decision

This is an application for leave to appeal and an appeal from a decision of the Regional Board for British Columbia dated May 18, 1945 refusing an application for permission to increase the rate of salary of the Company's managing director from \$1,800 to \$3,600 per annum.

The incumbent of the classification is evidently above the rank of foreman, but his present salary being less than \$250 per month, he falls under the jurisdiction of the War Labour Board and P.C. 9384.

The Company began its operations in 1940 and has been expanding its volume of business

from year to year. We assume from a reading of the material filed that the managing director is devoting his entire time to the Company's affairs.

On the basis of the figures submitted, we are of opinion that a salary at the rate of \$250 per month (\$3,000 per annum) is justified and we allow the appeal to that extent.

The incumbent is also declared to be above the rank of foreman and will be governed henceforth by the Wartime Salaries Order, P.C. 9298.

Finding and Direction accordingly.

August 8, 1945.

Re: Moose Jaw Co-operative Society, Limited, and the Moose Jaw Wholesale and Retail Workers' Union

Reasons for Decision

This is an appeal, by the Society and the Union jointly, from a decision of the War Labour Board for Saskatchewan dated April 26, 1945 whereby that Board dealt with the following clause in a collective agreement:

Article 5 (2). All hours of work, other than those designated in clause one of this article (specifying the regular hours of work and the working days—totalling 42½ hours per week) shall be considered as overtime hours, and shall be paid for at the rate of one and one-half times the regular rate with the proviso that overtime shall not be payable until 6.10 p.m. on Wednesdays during weeks in which there is a statutory holiday.

The Regional Board refused approval of time and one-half for overtime but permitted payment on a pro-rata basis.

The Regional Board found that the majority of the employees affected were receiving weekly rates and were paid for statutory holidays not worked. It appears also in the material that the Regional Board, in considering other applications, has adhered to pro-rata rates for overtime work in retail and wholesale establishments.

Our opinion is that the Regional Board has exercised properly the discretion referred to in the concluding words of paragraph (c) of section 20 (1) of the Wartime Wages Control Order, 1943 (P.C. 9384) and the appeal must be dismissed.

August 10, 1945.

Re: Ford Motor Company of Canada, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 200

Reasons for Decision

This appeal is by the Union from a decision of the Regional Board for Ontario dated February 26, 1945 denying an application for reclassification and wage adjustments for factory clerks and foundry laboratory workers. Leave to appeal was granted by the Regional Board.

The effect of the application would be to increase the hourly rate for clerks by 5 and 10 cents and for laboratory workers by 10 cents and in a few instances by 25 cents.

The hourly wage structure of the Company was approved by the Regional Board on July 16, 1943 following an exhaustive study by a special tripartite wage review committee. Some of the clerks were included in the survey but

other factory clerical classifications not represented by the Union at that time, and the laboratory workers, were not included. But whether these employees were or were not included in the wage survey, it is important that the equilibrium established in the company's wage structure be preserved.

From the material it appears that it was on this basis and on the finding that there was no "gross inequality or gross injustice" in the current rates, that the Regional Board arrived at its decision.

After careful consideration of the evidence, this Board has come to the conclusion that the decision in appeal must be sustained and the appeal dismissed.

August 15, 1945.

Re: Consolidated Optical Company, Limited, Belleville, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 426

Reasons for Decision

This is an appeal by the Company from a decision of the Regional War Labour Board for Ontario, dated February 27, 1945, by which, on the application of the Union, the Company was directed to pay its hourly rated employees a night shift premium of 5 cents per hour effective from December 6, 1944. Leave to appeal was granted by the Regional Board on April 27, 1945.

It is established that a premium for night work was a condition of work forming part of the basic scale of wage rates paid on Novem-

ber 15, 1941. In view of the provisions of the present governing Order, P.C. 9384, and of its predecessor the Wartime Wages Control Order, P.C. 5963 (section 23 (1)) we are of the opinion that the decision of the Regional Board was correct and the appeal will, therefore, be dismissed.

The Finding and Direction will provide that the premium is to be paid for work performed between the hours of 6 p.m. and 5.30 a.m. and that it shall not be added to the regular rate when calculating overtime pay.

August 14, 1945.

Re: John T. Hepburn, Limited, Toronto, Ont., and United Steelworkers of America, Locals 3335 and 3358

Reasons for Decision

This is a joint appeal by the Union and the Company from a decision of the Regional War Labour Board for Ontario dated April 19, 1945 refusing their joint application for wage increases except in the case of one classification.

The appeal seeks to have this Board allow the increases on the ground of comparison with rates paid by certain other engineering

and steel fabrication industries located in Toronto.

The Regional Board, we assume, were familiar with this information and also with the type of work being done in the various plants.

We can find no basis upon which the decision of the Regional Board could be interfered with and we dismiss the appeal.

August 14, 1945.

Re: The McKinnon Industries Limited, St. Catharines, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 199

Reasons for Decision

This appeal is from an Ontario Board decision dated March 7, 1945, whereby the Union's application for wage increases to the foundry classifications was refused except as to machine and squeeze moulders, coremakers and core-setters who were awarded a 5 cents increase in their guaranteed rate.

The Union appeals requesting a direction implementing its application and the Company cross-appeals in respect of the increases awarded to the three classifications just mentioned.

The main contention in support of the appeal is that the rates in this foundry should be brought up to the level prevailing in some of the automotive foundries located in the Windsor area. We have dealt with similar

applications for equalization in many cases; it will suffice to refer to this Board's decision in the General Motors case (L.G., May 1945, p. 657) as expressive of our view of what is meant by the terms of the Order in Council (P.C. 9384) creating the war labour boards and placing upon them the duty of stabilizing the wage structure in Canada.

On the basis of local comparisons the Ontario Board could find no "gross inequality" and the rates themselves were not considered to be "grossly" unjust by that Board, except, presumably, as to the three classifications above mentioned. We can find no sound basis upon which to disturb the decision under appeal and there will be a finding and direction dismissing the appeal and the cross-appeal.

August 16, 1945.

Re: Fahralloy Canada Limited, Orillia, Ont., and United Electrical, Radio and Machine Workers of America, Local 511

Reasons for Decision

This is an appeal by the Union and a cross appeal by the Company from a Finding and Direction of the Ontario Regional Board dated March 21, 1945 which dismissed an application for a general wage increase, except in the case of common labour where a range from 49 to 54 cents was directed, and established overtime pay at time and one-half after 48 hours.

The Union submits that its application should have been allowed to the extent it was allowed in the Canada Electric Castings Limited case. It is obvious that the two decisions are inconsistent and that both cannot be upheld. The Regional Board found that this Company was paying rates which were in line with community rates in industry and in our opinion its decision in this case should not be disturbed.

On March 29, 1945 the Company wrote to the Regional Board as follows:

With regard to Wages for Common Labour, you direct a range of rates of 49c to 54c per hour, with any adjustments that are made being effective from the 6th day

of November, 1944. In order to meet this we intend to have a starting rate of Labour of 49c, with an automatic increase, after six months' Seniority, to 51c, and with a further increase to 54c, after twelve months' Seniority. These increases will be effective from the date on which the Worker obtains his Seniority, or November 6th, 1944, whichever is the later date.

Approval is now given to this suggestion for the upgrading within the range.

The Company cross-appeals with respect to overtime pay for watchmen and as to the effective date (March 1, 1945) of the decision establishing overtime pay. It contends that the effective date should not be earlier than the decision directing payment of a penalty rate for overtime work, because otherwise an unfair penalty is imposed upon an employer. Following our decision in the Ingersoll Machine and Tool Company case (L.G., April 1945, p. 470), that part of the finding and direction will be effective with the first pay period commencing on or after March 21, 1945. The cross-appeal is allowed to that extent.

Findings and Directions accordingly.

August 20, 1945.

Re: Canada Electric Castings Limited, Orillia, Ont., and United Electrical, Radio and Machine Workers of America, Local 511

Reasons for Decision

The Company applies for leave to appeal from a decision of the Regional War Labour Board for Ontario dated May 17, 1945 generally increasing rates in its steel castings foundry and, in particular, increasing the rate for common labour from 49 to 54 cents per hour.

On February 14, 1945 the Regional Board had rendered a decision to the same effect, but listing the occupational classifications somewhat differently. The Company, by letter dated March 5, 1945, requested an interview with the Board and indicated, perhaps without technical precision, an intention to reserve its right of appeal. The Regional Board received further submissions on the question of rates as well as on classifications and rendered the decision of May 17, 1945 varying its former decision with respect to classifications and also, though only slightly, in the matter of rates. It was fully and ably argued by the Union's representative that no appeal could be taken on the question of rates because of lapse of time since the deci-

sion of February 14, 1945. The Board takes the view that the decision of May 17, 1945 re-opened the entire case from the point of view of appeal and the application to this Board having been made in accordance with section 11 (1) (b) of P.C. 9384, we cannot give effect to the Union's objection and leave is granted.

As to the merits, we see no need to deal with the facts at any length, because we have come to the conclusion that the rates in this foundry should be kept in line with those paid the steel castings foundry of Fahralloy Canada Limited, also located in Orillia. By a decision issued concurrently this Board is sustaining the Ontario Board's decision in the Fahralloy case and as a consequence we shall allow this appeal, subject to the establishment of a range from 49 to 54 cents for common labour, effective from November 5, 1944 and subject to the conditions approved in the Fahralloy case.

Finding and Direction will issue accordingly.

August 20, 1945.

Re: Campbell Soup Company, Limited, New Toronto, Ont.**Reasons for Decision**

In this case the Company applied to the Regional War Labour Board for Ontario for authority to establish the occupational classification of "Foreman of Guards and Watchmen" and to pay the incumbent in that position within a range of from \$40 to \$60 a week. The Regional Board in its decision of April 5, 1945, authorized a range of from \$40 to \$45 per week with overtime at pro-rata rate after 55 hours per week. From that decision the Company now appeals, leave to appeal having been granted by the Regional Board.

The main argument on the appeal is that the maximum of the range authorized by the Regional Board does not permit the em-

ployer to establish a differential in rates between that of the employee in question and the employees being supervised. The evidence submitted supports such argument. Moreover, it is shown that the duties and responsibilities of the employee concerned include supervision over the Company's plant protection system, fire protective equipment, etc.

In order that the employer may establish a reasonable wage differential, and also compensate the employee for the added duties assigned to him, we are of the opinion that the range requested for the said occupational classification is justified and that the application should have been allowed. A Finding and Direction will issue accordingly.

August 20, 1945.

Re: Norton Company, Niagara Falls, Ont., and International Chemical Workers' Union, Local 154**Reasons for Decision**

This is a joint appeal by the Company and the Union from Finding and Direction of the Regional War Labour Board for Ontario dated June 15, 1945. The parties requested the Regional Board to authorize two weeks vacation with pay for those employees of the Company who had been in the continuous service of the Company for five years or longer. The Regional Board declined to approve the application but granted leave to appeal to this Board.

The Company's present vacation with pay plan provides employees with less than five years' service with one week's vacation with

pay, and for those employees with five years or more service, an additional day's pay for each year of service in excess of five. The maximum vacation with pay period under the present plan is two weeks after ten or more years of service.

A survey of the Niagara Falls district reveals that at least four other employers comparable to the appellant company herein have vacation with pay plans in the precise terms herein applied for.

The appeal should be allowed and the joint application should be authorized.

Finding and Direction will issue accordingly.

August 20, 1945.

Re: Canadian Automotive Trim, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195**Reasons for Decision**

An appeal by the Union from a decision of the Regional War Labour Board for Ontario dated March 19, 1945, refusing its application for a 5-cent increase in the rate of female employees in the sewing and assembling departments. Leave to appeal was granted by the Regional Board.

The basis for the application was restoration of rates (70 cents and 60 cents) paid by the Chrysler plant in 1938 when it discontinued the manufacture of interior trimming for automobiles and the work was undertaken

by the respondent company. In the war period, the company has been engaged in making various types of tarpaulin products.

We agree with the Regional Board that, under wage control, the rates paid by this Company are not to be governed by what the Chrysler plant paid in 1938.

There is no evidence of the existence of either a "gross inequality" or a "gross injustice" in the current rates and we shall confirm the decision of the Regional Board and dismiss the appeal.

August 23, 1945.

Re: Canadian Automotive Trim, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America

Reasons for Decision

An appeal by the Union from a decision of the Regional War Labour Board for Ontario dated April 10, 1945, refusing its application for a direction to pay overtime at time and one-half after 44 hours per week. Leave to appeal was granted by the Regional Board.

At present and for some time past the Company has been alternating its schedule of working hours per week from 40 hours to 48 hours, so that over a period of four weeks the average weekly hours worked is 44. This arrangement is stated by the Company to

have been arrived at following an understanding with its employees. There is no rule, however, established or provided by the collective labour agreement dated November 1, 1943, for the compensation of overtime work. The Company states that it will be forced to establish a continuous 44-hour week, if the application were granted.

The question presented by this appeal appears to us to be one for further collective bargaining.

We think the appeal should be dismissed.

August 23, 1945.

Re: Kelsey Wheel Company, Limited, Windsor, Ont., and United Automobile, Aircraft and Agricultural Implement Workers of America, Local 195

Reasons for Decision

This appeal is by the Union from a decision of the Ontario Regional Board dated April 10, 1945, dismissing its application for a direction to the Company to pay at the rate of time and one-half for all hours worked on Saturdays. Leave to appeal was granted by the Regional Board.

Under an arrangement made with the Union in 1937, the normal working hours are 9 per day and 45 per week. The overtime schedule provides for payment at time and one-half for all time over the said number of hours and for work on Sundays and statutory holidays. However, the agreement also provides that in the computation of the weekly hours for purposes of overtime pay, credit is not to be taken for hours not worked because

of the occurrence of a statutory holiday. It is this latter provision which the Union sought, in effect, to have deleted from the existing schedule.

The Regional Board disposed of the application upon the following basis:—

The Regional War Labour Board for Ontario has come to the conclusion that the Union has not satisfied the onus placed upon it as the applicant under the Wartime Wages Control Order that the current method of computing and paying a premium rate for overtime or for work performed on Sundays and Statutory Holidays is not fair and reasonable to the employees involved and therefore should be changed.

We are in agreement with the view taken by the Regional Board and the appeal must be dismissed.

August 23, 1945.

Re: Chow Gooley, Prince Rupert, B.C.

Reasons for Decision

The appellant operates as an independent contractor the Dry Dock and Staff House Commissaries at Prince Rupert, B.C. When he took over the operation of the establishment on August 16, 1944, he continued the services of the employees of his predecessor at the same rates of pay.

It was subsequently disclosed that some of the wage rates paid by the employer had not been authorized by the Regional War Labour Board for British Columbia. The employer then applied for authorization. The Regional Board found that the wage rates being paid by the employer could not be approved under Wartime Wages Control Order 1943, and accordingly, and with effect from August 23,

1945, directed wage rates which in the opinion of that Board were proper rates in the circumstances. On July 19, 1945, the Regional Board issued its Finding and Direction giving formal effect to its decision. The employer now applies for leave to appeal from that Finding and Direction, leave having been refused by the British Columbia Board.

In view of a prior decision of the British Columbia Board in the matter of rates for waitresses, we think leave to appeal must be granted. It is shown that on December 21, 1943, the Regional Board by Finding and Direction directed the appellant's predecessor to pay waitresses at the rate of \$110 per month plus the mandatory cost of living bonus. The Regional Board thereby established a rate for

waitresses in this establishment which the appellant should be authorized to pay. The rate for waitresses should therefore be \$114.10 per month.

The next occupational classification for consideration is the dishwasher. It is fairly well established that employees in this occupational classification should have a slightly higher rate than that provided for waitresses.

Accordingly a rate of \$124.10 per month should be authorized.

We are of the opinion that the rates which the Regional Board directed the employer to pay for all other occupational classifications mentioned in its Finding and Direction should be confirmed.

There will be a Finding and Direction accordingly.

August 22, 1945.

Re: Picardy Candy (Saskatchewan) Limited, Regina, Sask., and Hotel and Restaurant Employees and Beverage Dispensers' Local 829

Reasons for Decision

In this case the Union applied to the Regional War Labour Board for Saskatchewan for a direction that the employer increase wage rates, pay punitive rates for overtime, supply free meals and adjust the vacation with pay plan, for and to its retail store and lunch counter employees in Regina. On May 18, 1945 the Regional Board issued its decision directing the employer to make certain adjustments in wage rates but not to the extent requested by the Union. Later the Regional Board was asked to reconsider its previous decision and also to consider the request of the Union in respect of the working conditions. The decision of the Regional Board arising from its reconsideration of the case is dated June 1, 1945. By that later decision the Regional Board directed that the employer's previously existing vacation with pay plan and *prorata* basis of paying overtime after 48 hours should be continued.

From the said decisions the Union now appeals, leave having been granted by the Regional Board.

After reading the appellant's brief and rebuttal herein, we must come to the conclusion that there is not sufficient evidence that the Regional Board erred in its decision in the matter both of wage rates and of working conditions. The Saskatchewan Board felt that the higher rates requested would have a disruptive effect upon the rates paid by similar employers.

The Regional Board also found that it was not the established practice in this type of employment in the Regina area to pay punitive rates for overtime and here again the appellants failed to show that the Regional Board erred in its finding.

The employer's vacation with pay plan now in effect is more generous than any plan directed heretofore by a war labour board and the general run of such plans.

We can find no sound basis upon which to disturb the decision under appeal and there will be a Finding and Direction dismissing the appeal.

August 31, 1945.

Industrial Disputes and Conciliation

Introduction

THE *Industrial Disputes and Conciliation* section contains monthly articles dealing with proceedings under the National Wartime Labour Relations Regulations and with proceedings under the Conciliation and Labour Act and other legislation.

The articles on strikes and lockouts, formerly included in this section, may be found elsewhere in this issue.

Under the Wartime Labour Relations Regulations, P.C. 1003, the Government has extended its jurisdiction over employer-employee relations which are normally exclusively within the provincial field to the extent considered necessary to cover adequately employers and employees in industries "essential to the efficient prosecution of the war", but without attempting to include other industry which has not a direct bearing on war production. In so far as these latter industries are concerned, each province can make its own decision as to whether or not they shall be brought under the Regulations.

Agreements have been made under the Regulations between the Dominion and every province except Alberta and Prince Edward Island providing for the setting up of provincial agencies for the administration of the Regulations.

The work of the Wartime Labour Relations Board (National) is here described in two separate articles. The first deals with applications made by unions for certification and their disposition by the Board; the second describes conciliation proceedings under the Regulations and includes the reports of Boards of Conciliation.

Conciliation proceedings are also carried on by the Industrial Relations Branch of the Department of Labour under the provisions of the Conciliation and Labour Act which empowers the Minister to inquire into the causes and circumstances of a dispute, to take such steps as seem expedient for the purpose of bringing the parties together, and to appoint a conciliator or an arbitrator when requested by the parties concerned; and under P.C. 4020.

Applications for Certification under the Wartime Labour Relations Regulations

THE Wartime Labour Relations Board (National) met for one day during the month of August. During the month the Board received 11 applications, issued three certificates designating bargaining representatives, allowed the withdrawal of one application, ordered a representation vote and gave decisions in five appeal cases.

Certificates Issued

Following an investigation of the applications by Officers of the Board, bargaining representatives were certified in the under-noted cases.

- (1) Messrs. H. A. Chappell, F. Walmark, C. Henderson and the Canadian Brotherhood of Railway Employees and Other Transport Workers for bus-drivers, truck drivers, mechanics, office clerks and coach cleaners employed by the *Canadian National Transportation*

Limited (Lakehead Area) Port Arthur, Ontario.

- (2) Messrs. W. F. Mills, A. K. Took, C. R. Berry and the Canadian Airline Despatchers' Association for flight-control officers and flight-control assistants of *Trans-Canada Airlines*. Excluded from the scope of the bargaining unit were all flight-control supervisors together with flight-control personnel assigned to the Canadian Government Trans-Atlantic Air Service.

Following an investigation and the taking of a representation vote ordered by the Board, bargaining representatives were certified in the following case.

- (1) Messrs. G. Clifford and F. P. Donovan and the Brotherhood of Maintenance of Way Employees for carpenters employed as graindoor repairmen by the *Canadian National Railways at its Lakehead Terminal.*

Representation Vote Ordered

Following consideration of an application for certification of bargaining representatives submitted by Local 1432 of the International Brotherhood of Electrical Workers, the Board ordered that a representation vote be taken among the plant workers, meter readers and outside maintenance workers employed by the Maritime Electric Company Limited, Charlottetown, P.E.I., for the purpose of determining the agency through which the employees wish to bargain collectively with their employer. Excluded from the vote were office employees (other than meter readers), superintendents or foremen and outside casual construction workers.

Application Withdrawn

Amalgamated Association of Street Railway and Motor Coach Employees of America, District No. 1374 and Western Canadian Greyhound Lines Limited, Calgary, Alta. (operating in the four Western provinces) (L.G. August, 1945). Following rejection of an earlier application by the Board, the Association submitted a new application to the Wartime Labour Relations Board (National). Upon request from the Amalgamated Association of Street Railway and Motor Coach Employees of America, District No. 1374, this application has now been withdrawn.

Applications Under Investigation

1. International Union of Mine, Mill and Smelter Workers on behalf of Moulders and Coremakers employed by the Riverside Iron Works Limited, Calgary, Alberta.

2. American Communication Association, Local 11 on behalf of Linesmen employed by the Western Union Telegraph Company (Canadian Section, Lake Division, Ontario) New York, N.Y.

3. Brotherhood of Railroad Trainmen No. 613 on behalf of Switching Crews at Ogden Point Docks, Victoria, B.C.

4. Canadian Seamen's Union on behalf of the unlicensed personnel employed on S.S. "Cyclo Brave" of the S.S. Cyclo Brave Limited, Montreal, P.Q.

5. Canadian Seamen's Union on behalf of the unlicensed crew members in deck, engine room and stewards' departments on all vessels operated by the Marpole Towing Company Limited, Vancouver, B.C.

6. Canadian Seamen's Union on behalf of the unlicensed crew members in deck, engine room and stewards' departments on all vessels operated by the Pacific Coyle Navigation Company Limited, Vancouver, B.C.

7. Canadian Seamen's Union on behalf of the unlicensed personnel employed on S.S. "Britamoil" of Britamoil Limited, Halifax, N.S.

8. Canadian Seamen's Union on behalf of the unlicensed personnel employed on the S.S. "Britamette" of Britamette Limited, Halifax, N.S.

9. Canadian Seamen's Union on behalf of the unlicensed personnel employed on the S.S. "Britamoco" of Britamoco Limited, Halifax, N.S.

10. Canadian Seamen's Union on behalf of unlicensed personnel on S.S. "Britamlube" of Britamlube Limited, Halifax, N.S.

11. Canadian Seamen's Union on behalf of the unlicensed personnel employed on the S.S. "Britamlene" of Britamlene Limited, Halifax, N.S.

Decision of Board in Appeal Cases

(1) The Wartime Labour Relations Board (National) rendered its decision with respect to the appeal of General Motors of Canada Limited, Oshawa, Ontario, against a decision of the Ontario Labour Relations Board to include certain classifications of office employees in the bargaining unit for which Local 222. United Automobile Workers of America had applied.

The appeal was pursuant to an application for certification of bargaining representatives for office workers of General Motors of Canada Limited, Oshawa, Ontario, made by Local 222 U.A.W., to the Ontario Labour Relations Board. The Company appealed the Ontario Board's decision to the National Board disputing the inclusion of some 134 positions in the bargaining unit.

Following further investigation of the duties and responsibilities of the disputed classifications by an officer of the National Board, the Board decided to dismiss the appeal with respect to the following positions: secretaries to buyers in the purchasing department; supervisors in the accounting department; draughtsmen; tool designers; designers; specification men; telephone operators and mailing clerks. It allowed the appeal with respect to chief specification clerk in the purchasing department; assistant supervisor of girls in the purchasing department; secretaries to the general foremen in the truck and commercial shipping department; assistant supervisors of parts; secretary to parts billing supervisor; section supervisors and supervisors, assistant billing supervisors, factory pay supervisor and assistant section supervisor in the accounting department; supervisor of blue prints and

supervisor of blue print filing girls in the engineering department; assistant supervisors of records in the export department; production engineer; dynamometer test engineers; employees in the paymaster department; employees in the central ledger department and employees in the statistical foreign exchange department.

Reasons for judgment in this case were not issued by the Board.

(2) In the case of Sitka Spruce Lumber Workers' Union (A.U.C.) leave to appeal was not granted. The appeal was to the National Board from a ruling of the Minister of Labour for British Columbia of May 14, 1945. It was refused on the grounds that the appellant had not complied with the time limit contained in Section 7 of the Board's Regulations.

(3) The D. R. Clarke Engine Limited, Toronto, was refused leave to appeal to the National Board from a decision of the Ontario Labour Relations Boards of February 14, 1945. The reason given was that the appeal could not be entertained since it could not be made within the time limit provided in Section 7 of the Regulations of the Board.

The Board issued reasons for judgment in the following cases:

(4) Amalgamated Clothing Workers of America, Local 459, appellant, and the

Northern Shirt Company, the Royal Garment Manufacturing Company, the Canadian Garment Manufacturing Company and United Garment Workers of America, Local 35, respondent.

(5) Canadian Bakery Workers' Union, Local No. 1 (C.C.L.), appellant, and the Honey-suckle Bakeries Limited, Winnipeg, Manitoba.

The texts of the Board's reasons for judgment in the above two cases appear below:

Resignation of Mr. Rene Harmegnies

At the session of the Wartime Labour Relations Board held on August 14, Mr. A. H. Brown, Vice-Chairman and Acting Chairman, reported that Mr. Rene Harmegnies, representing the Canadian and Catholic Confederation of Labour, had tendered his resignation as a member of the Board because of ill health. The Board, in expressing its regret at the departure of Mr. Harmegnies, paid tribute to his public service while a member of the Board and also expressed the hope for a rapid improvement in his health. Mr. Gerard Picard, General Secretary of the Canadian and Catholic Confederation of Labour has been appointed to fill the vacancy occasioned by the resignation of Mr. Harmegnies.

Between: Amalgamated Clothing Workers of America, Local 459, Petitioner Appellant, and Northern Shirt Company, Ltd., Winnipeg, and Canadian Garment Mfg., Company, Ltd., Winnipeg, and Royal Garment Mfg., Company, Ltd., Winnipeg, Respondents, and United Garment Workers of America, Local 35 (Intervener) Respondent.

The Board consisted of the Vice-Chairman, Mr. A. H. Brown, Messrs. Best, Complin, D'Aoust, Harmegnies, Hills, Mosher and Taylor.

Reasons for Judgment

The judgment of the Board was delivered by the Vice-Chairman.

These are three appeals from decisions of the Manitoba Wartime Labour Relations Board rejecting applications of the appellant union for certification of bargaining representatives for employees of the Northern Shirt Company, Limited, Canadian Garment Manufacturing Company, Limited, and Royal Garment Manufacturing Company, Limited, of Winnipeg, Manitoba. All three appeals were argued together. In the case of each application, the Manitoba Board found that the appellant union had not—in making application for certification—acted with the authority of a majority of the affected employees as required by the Regulations.

The record of proceedings before the Manitoba Board clearly substantiates this finding and the finding was not seriously contested in the argument before this Board.

Under the usual practice followed under the Regulations, this finding would have been sufficient to dispose of the applications. However, due apparently to the circumstance that these applications were dealt with by the Manitoba Board at the same time as a considerable number of other applications by the appellant for certification of bargaining representatives covering employees of the great majority of employers in the garment industry in Winnipeg and as one part of a general understanding between the interested parties, the Manitoba Board states that the appellant union and the intervener union were permitted to campaign for further support among the employees affected by each application, up to April 18, 1945, and the Manitoba Board agreed to accept in the case of each application additional authorizations of employees

in favour of the appellant filed with the Board up to April 18, 1945, inclusive, as evidence of the authority of the appellant union to appoint bargaining representatives. The Manitoba Board found, however, that even with the additional authorizations so filed the appellant had not, in the case of any of the three applications, the support of the majority of the employees affected and that Board rejected the applications accordingly. The record of the proceedings before the Manitoba Board substantiates this finding.

The appellant contends, however, that the understanding referred to above was not as stated by the Manitoba Board and that in fact the arrangement made permitted the rival unions to campaign for support for a week after April 18, 1945, that the effect thereof was that the earlier applications should be treated as new applications after the filing of the further authorizations obtained during such extended period and that consequent thereon the Manitoba Board should have received and taken into consideration the authorizations in favour of the appellant obtained during such extended period and up to the date of the final disposition of the applications by that Board.

The respondents contend that the action of the Manitoba Board in refusing to consider authorizations filed with the Board after April 18, was in accordance with the understanding between the interested parties as accepted by the Board.

Evidently to the extent that the appellant was allowed to improve its position and file evidence thereof after the date of the filing of the applications for certification with the Manitoba Board this arrangement, which in our opinion is not contemplated by the Regulations, was made possible only by leave of the Manitoba Board following upon the concurrence of the interested parties. In these circumstances, apart from the discrepancy of opinion between the parties as to the exact terms of the arrangement, we are of opinion that we should accept the ruling made by the Manitoba Board not to receive further evidence of support submitted by the appellant after April 18, 1945.

In view of the above, the appeals taken from the decision of the Manitoba Board rejecting the applications for certification of bargaining representatives filed by the appellant on behalf of the employees of each of the Northern Shirt Company Ltd., the Canadian Garment Mfg., Co., Ltd., and the Royal Garment Mfg., Co., Ltd., are *Dismissed*.

The appellant further appeals against the decision of the Manitoba Board in respect of

each application imposing certain restrictions in point of time on the further appointment of bargaining representatives on behalf of the employees affected by the present applications and on the filing of further applications with the Manitoba Board by the appellant union or any other person seeking certification of bargaining representatives on behalf of such employees.

The decision of this Board in the Wright Hargreaves and Sylvanite Case (D.L.S. 7-542) was cited by the Manitoba Board as authority for the issue of these directions.

In the Wright Hargreaves and Sylvanite case cited above, this Board is outlining certain rules of procedure which it proposed to follow in dealing with applications for certification, said that where such procedure as had been outlined therein was followed and the application had been rejected, a further application for certification by the same union should not be entertained until a period of six months thereafter had elapsed. This Board did not suggest therein, however, any restriction in point of time should be placed on the election of bargaining representatives by employees as such election is governed by the provisions of sections 5 and 9 of the Wartime Labour Relations Regulations. Neither was it suggested therein that such proposed restriction on the consideration of a further application would apply save with respect to a further application by the same union. Moreover, although the rule as worded therein is possibly susceptible of a wider construction, this Board had in view at the time the rule was laid down that it should apply where the application was rejected after the taking of a vote rather than in all cases where the application was rejected irrespective of whether or not a vote had been taken. Due to the variety of circumstances which may be involved in the rejection of an application for certification prior to the taking of a vote, this Board has refrained from extending the application of the six months' rule to all cases where the application has been rejected.

In view of the misunderstanding by the Manitoba Board as to the scope of the procedure included in the Reasons for Judgment in the Wright Hargreaves and Sylvanite case, which is not applicable to the facts in this case, we are of the opinion that the orders of that Board made in respect of each of the three applications involved in these appeals should be varied by striking out therefrom the directions placing restrictions in point of time upon the election of new bargaining representatives on behalf of the employees affected by the present applications and upon

the filing of new applications for certification of bargaining representatives on behalf of such employees by the appellant or any other person and so order.

(Sgd.) A. H. BROWN,
for the Wartime Labour Relations Board
(National)

**Between: Canadian Bakery Workers' Union, Local No. 1 (C.C.L.)
(Petitioner), Appellant and Honeysuckle Bakeries Limited,
Winnipeg, Man., Respondent.**

The Board consisted of the Vice-Chairman, Mr. A. H. Brown, and Messrs. Best, Complin, D'Aoust, Hills, Harmegnies, Mosher and Taylor.

Reasons for Judgment

Leave having been granted, this is an appeal from a decision of the Manitoba Wartime Labour Relations Board rejecting the application for certification of the appellant. The Manitoba Board determined that there were 39 persons affected by the application, including one person on sick leave with pay for a considerable period and one unnaturalized Japanese, and rejected the application because it did not have the support of a majority of the employees affected. The investigation of the application made by the Manitoba Board revealed that 19 persons (approximately 50 per cent of the unit) supported by the application.

If a very narrow view of the purpose of the Wartime Labour Relations Regulations, P.C. 1003, is taken, it can be argued that the decision of the Manitoba Board was a proper one in accordance with Section 5 of the Regulations. However, there are present in this case, in our opinion, very good reasons why the decision of the Manitoba Board should be set aside and clearer evidence obtained as to the support given to the application by the employees affected.

The Order which this Board administers is for the purpose of certifying bargaining representatives, and any reasonable doubt that may exist, following the making of and the investigation of an application, should not act so as to circumvent or stultify the intent of the Regulations. This Board has acted on this principle many times in the past in refusing to certify without a vote applicants possessing *prima facie* evidence of the support of as much as 70 per cent of the employees affected. This action has been taken where other evidence revealed that a doubt existed as to the majority enjoyed by the applicant. In the case under Judgment, the appellant has the support of approximately 50 per cent of the employees and in addition, alleges that the

J. L. Cohen, Esq., K.C., Joseph Nelson, Esq., Sol. Spivak, Esq., for Petitioner Appellant; M. J. Finkelstein, Esq., K.C., for Respondents; Emily Ross, J. A. Sullivan, Esq., A. E. Heming, Esq., for Intervener Respondent.

Dated at Ottawa, August 14, 1945.

employer has practised discrimination to discourage union activity and organization of the employees.

We are of the opinion that, in order to properly fulfil the intent of the Regulations, a vote of the employees should be taken whenever there is any reasonable doubt as to the wishes of the employees as regards bargaining representatives or as to discrimination being practised. Therefore, it is our decision in this case that a vote should be taken of the employees, on the basis of the bargaining unit determined by the Manitoba Board, to clarify the doubt regarding the support given by the employees to the application.

The appeal is therefore allowed.

(Sgd.) A. R. MOSHER,
(Sgd.) J. A. D'Aoust,
(Sgd.) WM. L. BEST,
(Sgd.) R. HARMEGNIES,

Dated at Ottawa, August 9, 1945.

Reasons for Dissenting Opinion

The applicant's appeal was based on two grounds, namely,

- (a) that the number of employees established by the Manitoba Board as the bargaining unit included employees which the Union contended should have been excluded from consideration.
- (b) that there had been unfair interference on the part of the employer.

We believe that the Manitoba Board correctly established the number of employees in the bargaining unit, and in this we understood our associates on this Board concur. Consequently, under normal circumstances, an appeal based only on this ground should fail. As to (b), in our opinion such ground has validity, in cases where a majority support of employees has not been secured, only when it can be definitely proven that an act or acts of the employer adversely affected the support given to the union to the extent that majority support would have accrued had such act or acts not taken place.

The applicant did not provide proof that the support of employees was adversely affected by the circulation of a petition opposing representation by the applicant; nor did it provide proof that statements allegedly made by the employer to two named employees who had been prominent in union organization (one had been duly elected as a representative) had been made or constituted interference. On the contrary, the employer filed with this Board sworn affidavits from the two employees in which each of these employees denied that the statements attributed to the employer by the applicant had in fact been made.

Such a body as the Wartime Labour Relations Board must be governed by sworn statements, by whomever made, as opposed to allegations and opinions. To depart from this principle would be at variance with the rules of evidence and would stultify a Board's ability to arrive at the facts. We cannot find any circumstances in this case which justify this Board ordering that a vote be taken.

(Sgd.) E. R. COMPLIN,

(Sgd.) A. J. HILLS,

(Sgd.) H. TAYLOR.

Dated at Ottawa, August 9, 1945.

Conciliation Proceedings Under The Wartime Labour Relations Regulations

THE Wartime Labour Relations Regulations provide for conciliation machinery to attempt settlements of disputes where negotiations for an agreement following certification of bargaining representatives, or negotiations for the renewal of an existing agreement, have been unsuccessfully continued for thirty days. Disputes of this nature are referred to the Minister of Labour by the Wartime Labour Relations Board (National) or by the Provincial Boards in their respective jurisdictions. A Conciliation Officer is then appointed to confer with the parties and endeavours to effect an agreement. If the Conciliation Officer is unable to bring about settlement of the matters in dispute and reports that in his view an agreement might be facilitated by the appointment of a Board of Conciliation, a Board is established by the Minister of Labour forthwith. The duty of such a Board is to endeavour to effect an agreement between the parties on the matters in dispute and to report its findings and recommendations to the Minister.

Board Reports Received

During August reports were received from six Boards of Conciliation:—

Concerning Canadian Rogers Sheet Metal and Roofing Limited, Winnipeg, Manitoba, and Local 3228, United Steelworkers of America.

Concerning Frost and Wood Company Limited, Plant No. 1, Smiths Falls, Ontario, and United Steelworkers of America, Local 3140.

Concerning Guelph Stove Company, Guelph, Ontario, and Local 3305, United Steelworkers of America.

Concerning John Inglis Company Limited (Ordnance Division) Toronto, Ontario, and Local 2900, United Steelworkers of America.

Concerning York Knitting Mills Limited (Knitting Division) Toronto, Ontario, and National Union of Textile Workers, Local No. 4.

Concerning Joseph Stokes Rubber Co., Ltd., Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America.

The texts of these board reports will be found at the conclusion of this article.

Boards Fully Constituted

During August seven Boards of Conciliation were fully constituted:—

Aluminum Company of Canada Limited, Shawinigan Falls, Quebec.—The Board of Conciliation established to deal with a dispute between the Aluminum Company of Canada Limited, Shawinigan Falls, P.Q. and the Syndicat National des Employes de L'Aluminium Incorporated, was fully constituted on August 13 with the appointment of Honourable Judge O. L. Boulanger, Quebec, P.Q. as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation of the other two members of the Board. Mr. Walter A. Merrill, K.C., Montreal, P.Q. and Mr. Alex Bastien, Shawinigan Falls, P.Q., were appointed on the nomination of the employer and employees respectively.

Canadian Car & Foundry Company Limited (Aircraft Division) Fort William, Ontario.—The Board of Conciliation established to deal with a dispute between the Canadian Car & Foundry Company Limited (Aircraft Division) Fort William, Ontario, and International Association of Machinists, Aircraft Lodge No. 719, was fully constituted on August 9 with the appointment of Judge A. H. Dowler, Port

Arthur, Ontario as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation of the other two members of the Board. Mr. O. M. Gunderson, Port Arthur, Ontario and Mr. Alex Anderson, Fort William, Ontario, were appointed on the nomination of the employer and employees respectively.

Fahralloy Corporation Canada Limited, Orillia, Ontario.—The Board of Conciliation established to deal with a dispute between the Fahralloy Corporation Canada Limited, Orillia, Ontario, and the United Electrical Radio & Machine Workers of America, Local 511, was fully constituted on August 29 with the appointment of Dr. Alexander Brady, Toronto, Ontario, as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Mr. William Sefton, Toronto, Ontario, and Mr. D. Q. Patmore, Orillia, Ontario, were appointed on the nomination of employer and employees respectively.

Fairfield & Son Limited, Winnipeg, Manitoba.—The Board of Conciliation established to deal with a dispute between Fairfield & Son Limited, Winnipeg, Manitoba, and the Amalgamated Clothing Workers of America, Local 459, was fully constituted on August 24, with the appointment of Mr. E. Dawson, General Manager, Burns & Company, Toronto, as Chairman of the Board on the joint recommendation of the two members of the Board. Mr. S. E. Mclean, Winnipeg, Manitoba, and Mrs. Carrie Gray, Winnipeg, Manitoba, were appointed on the nomination of employer and employees respectively.

Pioneer Gold Mines of British Columbia Limited, Pioneer, B.C.—The Board of Conciliation established to deal with a dispute between the Pioneer Gold Mines of British Columbia Limited, Pioneer, B.C., and Pioneer Miners' Union, Local 693, was fully constituted on August 28, with the appointment of Mr. J. N. Finlayson, Vancouver, B.C. as Chairman of the Board, who was appointed by the Minister of Labour in the absence of joint recommendation of the two other members of the Board. Messrs. R. L. Norman and Malcolm MacLeod both of Vancouver, B.C. were appointed on the nomination of the employer and employees respectively.

Nineteen Retail Stores, Winnipeg, Manitoba.—The Board of Conciliation established to deal with a dispute between the Nineteen Retail Stores, Winnipeg, Manitoba (Oretzski's Dept. Store, Wolch's Dept. Store, Adrienne Styles, Atkinson's Limited, Claires Limited,

Clifford's Ladies Wear, Co'Ed Ladies Wear, Dales Ladies Ready to Wear, Delmar's Ladies Ready to Wear, Helene's Ladies Apparel, Grayson's, Nu-Mode Dress Shoppe, Lido Ladies Apparel, John Pollock, Toronto Ladies Ready to Wear, State Shoe Store, Stroller Shoe Store, Surprise Shoe Store. Varsity Shoppe, Winnipeg, Manitoba) and Retail Clerks' International Protective Association was fully constituted on August 25 with the appointment of Honourable Judge J. A. K. Dysart, Winnipeg, Manitoba, as Chairman of the Board on the joint recommendation of the other two members of the Board. Messrs. R. C. McCuthan and A. Bricker both of Winnipeg were appointed on the nomination of employer and employees respectively.

Thermoid Mould & Tool Works, Limited, Welland, Ontario.—The Board of Conciliation established to deal with a dispute between Thermoid Mould & Tool Works, Limited, Welland, Ontario, and Local 523, United Electrical, Radio and Machine Workers of America was fully constituted on August 22, with the appointment of Dr. Alexander Brady, Toronto, Ontario, as Chairman of the Board on the joint recommendation of the other two members of the Board. Mr. Murton A. Seymour, St. Catharines, Ontario, and Dr. Harvey G. Forster, Welland, Ontario, were appointed on the nomination of employer and employees respectively.

Atkins Stage Lines Limited, Chilliwack, B.C.—The Board of Conciliation established to deal with a dispute between Atkins Stage Lines Limited, Chilliwack, B.C., and Division 101, Amalgamated Association of Street, Electric Railway and Motor Coach Employees of America was fully constituted on August 29 with the appointment of Mr. J. Howard Harman, Victoria, B.C. as Chairman of the Board who was appointed by the Minister of Labour in the absence of a joint recommendation from the other two members of the Board. Messrs. Alan M. Russell and John Ross both of Vancouver, were appointed on the nomination of the employer and employees respectively. (Mr. John Ross is replacing Mr. R. K. Gervin who was not able to proceed as employees' nominee.)

Boards Established

During August three Boards of Conciliation were established but not fully constituted:—

Concerning Perfect Circle Company Limited, Leaside, Ontario, and United Steelworkers of America, Local 2729.

Concerning Sunshine Waterloo Company, Limited, Waterloo, Ontario and United Steelworkers of America, Local 3292.

Concerning Auto Specialty Manufacturing Company (Canada), Limited, Windsor, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America.

Agreements Facilitated by Conciliation Officers

In the following cases reports were received from Conciliation Officers indicating the successful conclusion of negotiations and signing of an agreement:—

Concerning Anglo-Canadian Wire Rope Company, Limited, Montreal, P.Q., and International Association of Machinists, Lodge 1288—R. Trepanier, Conciliation Officer.

Concerning Canadian Carborundum Company, Niagara Falls, Ontario, and Local 819, International Union, Mines, Mill and Smelter Workers—J. P. Nicol, Conciliation Officer.

Concerning Canadian Top & Body Corporation, Tilbury, Ontario, and International Union, United Automobile, Aircraft and Agricultural Implement Workers of America (UAW-CIO)—J. P. Nicol, Conciliation Officer.

Concerning Falconbridge Nickel Mines, Falconbridge, Ontario, and Sudbury Mine, Mill and Smelter Workers Union, Local 598—William Dunn, Conciliation Officer.

Assignment of Conciliation Officers

Conciliation Officers have been assigned to confer with the parties in an attempt to effect an agreement in the following cases:—

Concerning Brown's Bread Limited, Toronto, Ontario, and Factory Bakers Union, Local 264—F. J. Ainsborough, Conciliation Officer.

Concerning Brown's Bread Limited, Toronto, Ontario, and Bakery Wagon Drivers Union, Local 847—F. J. Ainsborough, Conciliation Officer.

Concerning Canadian Pacific Railway Company (Island Coal Dock) Fort William, Ontario, and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express & Station Employees—H. S. Johnstone, Conciliation Officer.

Concerning Carrier & Freres, Limited, Shawinigan Falls, P.Q., and National Syndicate

of Transport & Other Workers—R. Trepanier, Conciliation Officer.

Concerning Consumers' Co-operative Refineries Limited, Regina, Saskatchewan, and Oil Workers Industrial Union, Local No. 1—H. S. Johnstone, Conciliation Officer.

Concerning Messrs. John T. Harrison & Sons Company, Limited, Owen Sound, and National Union of Furniture Workers, Local No. 1—Joseph Hutcheon, Conciliation Officer.

Concerning Keenan Woodenware Limited, Owen Sound, Ontario, and National Union of Woodworkers, Local No. 5—F. J. Ainsborough, Conciliation Officer.

Concerning Marvens Limited, Moncton, N.B., and United Packinghouse Workers of America, Local No. 302—H. R. Pettigrove, Conciliation Officer.

Concerning Mic-Mac Mines Limited, Noranda, P.Q., and Malartic Mine & Mill Worker's Union, Local No. 696—L. Pepin, Conciliation Officer.

Concerning National Harbours Board (Cold Storage), Montreal, P.Q., and Brotherhood of Railway and Steamship Clerks, Freight Handlers, Express and Station Employees—B. Wilson, Conciliation Officer.

Concerning Park Steamships Limited, Montreal, P.Q., and Division 159, Commercial Telegraphers' Union—R. Trepanier, Conciliation Officer.

Concerning Benedict Proctor Manufacturing Company, Trenton, Ontario, and International Jewellery Workers' Union, Local No. 44—H. Perkins, Conciliation Officer.

Concerning Onward Manufacturing Company, Kitchener, Ontario, and International Association of Machinists, Local 1719—H. Perkins, Conciliation Officer.

Concerning Seven Retail Stores, Glace Bay, N.S., Local No. 1, Wholesale, Retail and Distribution Workers' Union—H. R. Pettigrove, Conciliation Officer.

Concerning Robson Leather Company, Limited, Oshawa, Ontario, and International Fur and Leather Workers' Union, Local 205—H. Perkins, Conciliation Officer.

Concerning Sunshine Waterloo Company, Limited, Waterloo, Ontario, and International Association of Machinists, Local 1719—H. Perkins, Conciliation Officer.

Report of Board in Dispute Between Canadian Rogers Sheet Metal and Roofing, Limited, Winnipeg, Man., and Local 3228, United Steelworkers of America

On August 16 the Minister of Labour received the Reports of the Board of Conciliation in the above case, a report being received from each of the three members.

The personnel of the Board was as follows: His Honour Judge A. R. Macdonell, Chairman, appointed on the joint recommendation of the other two members of the Board,

Messrs. L. J. Reyeraft, K.C., and George Stapleton, appointed on the nomination of the employer and employees respectively.

The text of the Board's reports was as follows:—

Report of Board

In the matter of Wartime Labour Regulations P.C. 1003 and of a dispute between Canadian Rogers Sheet Metal & Roofing Ltd. and United Steel Workers of America, Local 3228.

HON. HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa.

SIR:

The Board of Conciliation appointed by you has investigated the above dispute and now has the honour of submitting its report.

Upon convening in Winnipeg, the Board found a preliminary objection raised by the employer, viz., one of lack of jurisdiction on the part of the Board to deal with the matters in dispute between the parties. This preliminary objection was strenuously opposed by the employees as being without foundation. Written arguments were filed at the same time on other actual points in dispute, viz.,

- (1) Union shop;
- (2) Voluntary maintenance of membership;
- (3) Voluntary check off; and subsequently rebuttals were also filed.

In regard to the objection as to the jurisdiction, the Board unanimously feels that it has the authority and jurisdiction to hear these disputes for the reasons as set out more particularly in the LABOUR GAZETTE of January, 1944, p. 51, *re* Goodyear Tire & Rubber dispute on p. 52. The provisions of the Act briefly are, the Minister may establish a Board if satisfied the provisions of the Act apply, and the Board once being established is deemed to be authorized by and to be in accordance with the provisions of the Act. This Board, having been so established, it is not for us to enquire into or to dispute the discretion of the Minister.

The actual points in dispute are:—

(1) and (2) The Union shop and the voluntary maintenance of membership clauses. These two were dealt with very fully by both employer and employee but no particularly new argument was developed on either side. One point among others brought out by the Company was the fact this was a new union and that the employees who had worked for them for many years would be forced to join this union or be discharged. I feel without going unnecessarily further into the arguments on both sides, that the time has not yet arrived or that relationships have developed

to such an extent that these clauses should be included in the present agreement.

(3) The question of voluntary check-off was also dealt with. The Union feels that this would be of assistance in allowing more time for the betterment of conditions and improvement of relationship generally between all parties.

While not expressing any particular preference for closed or union shop or maintenance of membership, voluntary or otherwise, considering all the facts laid before me, I believe that it is in the best interests of both employer and employee, under the circumstances, to have a voluntary check-off clause in the agreement. It is appreciated, of course, that any recommendation by the Board is not binding upon either party.

The Company has been in business for years. It would seem to have a reasonably good labour record but is naturally suspicious of anything which may appear to interfere with the management of its business, but at the same time, seems willing to meet the Union half way. The Union itself, being newly formed, is also not quite sure of its position and is in much the same position as the Company.

Any agreement which is being completed now is good for one year. During that year the Company will be in a position to observe the workings of the Union, and vice versa, and with actual good will and a reasonable amount of give and take, the present suspicions on the part of both should evaporate, leaving relationships such that no dispute of any importance need arise during the coming years.

I suggest the form of voluntary check-off clause should be approximately as follows:

"I,, being an employee of at and a member of local..... of the of America, hereby authorize and direct..... to deduct monthly on the first payday of each calendar month from any earnings accumulated to my credit the sum of \$..... this being the amount of my monthly dues to Local..... of the..... of America.

I further authorize..... to pay the amounts so deducted to the Financial Secretary of the Union, whose receipt therefor shall constitute a good and sufficient discharge to..... for the amounts so deducted from my earnings.

I reserve the right to cancel this authorization at any time on 15 days' notice to..... and agree that if it is so cancelled it may not be again renewed until after the expiration of a further 15-day period."

All of which is respectfully submitted.

(Sgd.) A. R. MACDONELL,
Chairman Conciliation Board.

Winnipeg, Manitoba.
August 7, 1945.

Report of George Stapleton, Member

In the matter of Wartime Labour Regulations P.C. 1003 and of a dispute between Canadian Rogers Sheet Metal & Roofing Ltd. and United Steel Workers of America, Local 3228.

HON. HUMPHREY MITCHELL, M.P.,
Minister of Labour,
Ottawa.

SIR:

The Board of Conciliation appointed by you has investigated the above dispute and now has the honour of submitting its report.

Upon convening in Winnipeg, the Board found a preliminary objection raised by the employer, viz., one of lack of jurisdiction on the part of the Board to deal with the matters in dispute between the parties. This preliminary objection was strenuously opposed by the employees as being without foundation. Written arguments were filed at the same time on other actual points in dispute, viz.,

- (1) Union shop;
- (2) Voluntary maintenance of membership;
- (3) Voluntary check-off; and subsequently rebuttals were also filed.

In regard to the objection as to the jurisdiction, the Board unanimously feels that it had the authority and jurisdiction to hear these disputes, and acted accordingly.

These were dealt with very fully by both employer and employee and I disagree with other Board members that new argument was not developed on the above matters.

The employer based his argument that this was a new Union and that the employees who had worked for them for many years would be forced to join this Union or be discharged. This is the same position taken by the Board members. I cannot see this argument because—the Union presented evidence that it has been in existence prior to April 24, 1944 and was certified on June 7, 1944. This establishes that the Union has been in existence and functioning for a period of a year or more.

The employer did not present any evidence to the effect that the Union has worked any hardship on the Company or was irresponsible Union during that time.

As to the employees of long standing who would be forced to join the Union or be discharged, the employer presented no facts or records of how many if any were involved, and I am of the firm opinion that all trusted old employees are members of the Union if not the employer would have presented a much stronger case.

Exhibit B evidence filed with the Board established the fact that the employer at one stage of negotiations submitted to the Union a maintenance of union membership in a proposed employer agreement, and for no apparent reason in later negotiations this was withdrawn. This singular act by the employer to offer a union shop clause to the Union establishes the fact that the Union was a responsible body and that the employer had some confidence in it and is contrary to argument later presented.

Furthermore it is my firm conviction that the other Board members have not brought in a recommendation in line with the evidence presented by both parties. My position is that the Union be granted a union shop and check-off and that the employer immediately recognize the fact that the workers are entitled to such under our present Labour Code.

Respectfully submitted.

(Sgd.) GEORGE STAPLETON,
Member of Conciliation Board.

Report of L. J. Reyecraft, Member

In the matter of the Canadian Rogers Sheet Metal and Roofing Company, Limited, and Local 3228 United Steelworkers of America and the Wartime Labour Relations Regulations.

In this submission The Canadian Rogers Sheet Metal and Roofing Company, Limited, shall be referred to as "The Company" and the Local Union 3228 United Steelworkers of America shall be referred to as "The Union."

What this Board is asked to pass upon is confined to three items. Agreement, I understand, has been reached between the parties covering Rates of Wages, Conditions of Employment, etc.

The Union asks that there be included in the Agreement with the Company clauses providing for a "Union Shop," "Maintenance of Membership" and for a "Voluntary Check-off."

There is but little difference between a "Closed Shop" and a "Union Shop." A closed shop agreement is an agreement where the Employer agrees to hire *only* persons who *are* members of a Union, and requires them to maintain their Union membership as a condition of employment. A Union Shop Agreement is an agreement where the Employer agrees that all persons who are employed must within a specified time, after being employed, become Union members and must remain members as a condition of employment. In a Closed Shop the employee must be a Union member before he is employed. In a Union

Shop he may be employed although he is not a Union member but he must become a member of a Union within some specified time after being employed. Thirty days is the time usually named within which the Employee must become a Union member.

The Company in the case under consideration by this Board has been in business in Winnipeg for about 30 years. It employs approximately 58 men of whom about 31 will be affected by the matter under consideration. There are two or three other firms engaged in business similar to that of The Canadian Rogers Sheet Metal and Roofing Company that do a large amount of business and there are a great many small firms which have a small outturn. Until a short time ago the Company had no Union Wage Agreement. More recently, however, (I believe within the present year) an Agreement has been negotiated. An account of these negotiations is given in the brief submitted by Mr. March on behalf of the Union.

It is submitted by the Union that the Company should agree to sign an agreement in which there would be "Union Shop", "Maintenance of Membership" and "Voluntary Check-off" provisions because it is contended that the inclusion of such provisions would assist the Union to obtain a guarantee of security as to its continued existence and to insure regularity of income.

In my judgment it may be fairly contended that the inclusion of these provisions might assist the Union in the ways suggested. I am not convinced, however, that that is any sound argument or reason why those provisions should be included. To include such provisions in a wage agreement gives a very free hand and very great control to Union officials. It may be of some advantage to the Union officials to have these provisions inserted but it would be a decided disadvantage to the Company. If the Union is a good thing, if its affairs are efficiently and reasonably managed, it should and will have a continued existence and if its finances are wisely and economically administered, a regularity of income may reasonably be expected. Should the Company be asked to agree to conditions which deal with the inner affairs of the Union, that have to do with its continuance and finances, even though it may be to its disadvantage and possibly even to the disadvantage of the Employees themselves? I repeat, if the Union is a good thing and if its affairs are well handled, it will continue. It should not, however, be walled about by this and that condition to enable it to continue even though it proved to be a hindrance and a mistake. The Company should not be compelled to assist the Union in its work and endeavours and to contribute to the expense of the Union's operations.

The second reason advanced by Mr. March is twofold. The provisions asked for should be included in the Wage Agreement because,

- (a) it is alleged that it would eliminate friction and discord between Union and non-Union employees.
- (b) it would compel employees receiving the benefits of collective bargaining carried on by the Union to pay their proper share of the costs for benefits received.

These contentions, if examined, in a large measure defeat themselves. The manner in which it is suggested friction could be eliminated and discord banished is to compel those who do not agree to either agree or get out. This is not an effective, wise, fair or democratic way to deal with matters of this kind.

The second part of clause 2 in the Union's contention is to the effect that all persons should be compelled to join the Union because they may receive some benefits by so doing, and that if they receive some benefits they should be compelled to pay for same. The same idea of compulsion comes into this contention. In my judgment, to compel the Company to agree to "Union Shop", "Maintenance of Membership" and/or "Voluntary Check-off" clauses would be an attempt to remedy an alleged defect by creating a far greater one.

The Union seeks the membership of its employees to strengthen its position so that its objective may be successfully reached. It differs from other Associations of a similar nature in that it seeks to compel all those who may in some slight way be benefited to join. In addition it now seeks the Company's active assistance in its program of coercion. The Union should be the guardian of its own security and the watch-dog of its own treasury. It is no secret what the purpose of the Union is in its unceasing endeavours to get these so-called Union Security clauses in these agreements. These clauses, with the others included in what are called Union Security provisions, place in the hands of Union officials a very great deal of power. They make the position of the Unions almost invulnerable.

The Closed Shop does not create productive efficiency. In my judgment the statement said to be made by a prominent Union Official that the inclusion of these provisions makes the position of the Unions invulnerable is true.

It is further contended by the Union that the Company should be compelled to sign an agreement containing these clauses because it is alleged that it would permit the Union to devote its full time, energy and resources to fundamental problems of employer-employee relations by saving time spent on the collection of dues and maintaining membership and

also by allaying the feeling of members of the Union, that until the Company recognizes Union membership as a condition of employment, the Union must still struggle for existence, which feeling has in some cases led to periodic, and frequently unnecessary, demands upon employer in order to prove a Union's strength to non-members.

The Union has abundance of time, energy and resources to give to what is called fundamental problems of Employer-Employee relations. It is contended that time would be saved by having someone else go to the trouble, expense and use of his time to do the Union's work of collection of dues. If it is in the interests of anybody to maintain membership, I assume it is in the interests of the Unions; membership should not be obtained by compulsion. If membership should be maintained by the Union, it should be maintained by continuing to prove its worth and only then. It is not or will not be in the interests of either party to have membership maintained on any other basis.

There may be some members of the Union who, unless the club of compulsion is handed to them, fear their Union will struggle for existence. In all probability there are others, in addition to very many of the public, who are equally anxious that none of the provisions requested should be granted. I cannot accept this contention at its face value. Surely we all know the purpose of the application to have these clauses included in this Wage Agreement.

It is further contended that the introduction of "Union Shop", "Maintenance of Membership" and "Voluntary Check-off" provisions would assure employees that the Company is impartial as between Union and non-Union men. In my judgment, it would do no such thing. The man who is in favour with his employer is the man who is efficient and interested in his work. The question of whether he is a Union or non-Union man is not a factor.

The Company feels that it is entitled to assure itself that, if it is necessary for it to deal with its employees through a union local, such union is responsible and led by men of integrity, experience and ability. Normally this situation can only develop over a period of time to the extent that it is necessary to establish a feeling of confidence in the union. This right will be lost if the "Check-off" followed by the Union Shop is forced upon the Company. A combination of the "Check-off" and "Maintenance of Membership" and/or the Union Shop leads to union self-perpetuation. Once the leaders have established that set-up they may continue to control industry, no matter how unreasonable or harmful such leadership may become. The employer has no

means whatever of remedying the situation, and it along with other employers is faced with a complete domination of industrial relations by the union which achieves its ultimate objective in the way of "Union Security."

Under our existing laws the unions have no financial responsibility nor corporate existence, and it would be comparatively easy for an irresponsible union to cause irreparable damage to an employer without any possibility of recourse from the union. The Company feels that power without responsibility is too dangerous to justify the placing in the hands of a union such a potent weapon as the "Union Shop", "Check-off" and "Maintenance of Membership" provisions. We are informed that in no case is any competitor of the Company in Greater Winnipeg operating under an agreement containing the "Union Shop", "Check-off" and/or "Maintenance of Membership" provisions. There are a number of men who have worked for the Company for many years; some are opposed to the suggested Union Shop; some feel strongly about the matter. They are most valuable men; they could resign and find employment in their line elsewhere. The Company would be inconvenienced and suffer loss thereby.

The only conclusion at which I can arrive is that the Company should not in any way be compelled to insert in an agreement with its employees or their representatives the terms or provisions known as "Union Shop", "Check-off" and/or "Maintenance of Membership" provisions. I will put my reasons for so deciding (even if there is some repetition in doing so) briefly and consecutively.

(a) The Union has made no submission that in my judgment forms any sound reason why its request should be granted.

(b) It would be a mistake for the Union, for the Company, and for the nation generally to force the inclusion of the suggested conditions in any agreement between the Company and the Union or between the Company and its Employees. Labour Organizations should be strong and should carry on their business in an efficient manner. This should be done without forcing unwilling members into Unions. The Hon. Humphrey Mitchell has said as follows: "I do not believe in compulsory co-operation. This is fundamental and I cannot change my ground on that."

(c) Labour Organizations must prove their worth. To compel any employee to join a Union, whether it is efficient or not, is wrong in principle and in practice. It would be just as fair and logical to compel men to join some church and contribute to its support. Membership in a church it may well be contended is good for the member and for the community. The Union should be willing to be judged by its accomplishments and not seek to further its ends by coercion.

(d) An industry or a business under "Union Shop", "Maintenance of Membership" and/or "Check-off" agreement is a law unto itself. The Employer cannot dismiss an Employee without

cause. The Union can discharge a man from the Union to which he may belong for many reasons which have no relation to the employer or to his business. In such a case the one time employee is out of work and unless he can find some non-union firm that can give him employment he is without work and without hope of getting work.

(e) Friction and discord are not eliminated by coercion or by subversive measures. It is absolutely necessary that there should be the opportunity for criticism and for suggestions. The Union is seeking to destroy this opportunity.

(f) There is no other shop manufacturing the same or similar products in Greater Winnipeg which is operating under a "Union Shop", "Maintenance of Membership" and/or "Check-off" agreement.

(g) Every employee should have liberty of choice in his Union affiliations, if any, without compulsion from anyone.

(h) I am convinced that Union or Closed Shops have not contributed to harmony in local industries.

(i) Union Shops do not increase plant efficiency or increase production, but the contrary is the case.

(j) The argument of the Union that the will of the majority should rule implies under their proposal that the rights of the minority should be eliminated.

It has been contended by Mr. Laidlaw, on behalf of the Company, that this Board has no jurisdiction to make any recommendations on the issues of Union Shop, Maintenance of Membership and Check-off provisions. He contends that these matters do not come within the meaning of the words "other working conditions" and refers to section 2 (1) (d) of The Wartime Labour Relations Regulations and contends that the words "other working conditions" are not broad enough to include matters which do not relate wholly and exclusively to the relationship of employer and employee.

I have considered the contention as fully as I can and am of the opinion that were it

not for the decision of the Goodyear Tire and Rubber Company of Canada, Limited (LABOUR GAZETTE of January 1944, page 52) and the reasons given therein, I would be inclined to give effect to Mr. Laidlaw's contention. The Minister of Labour is satisfied that the provisions of the Act apply. The Board is therefore the creature of the Minister and we should not attempt to review his decision.

I have had the advantage of seeing the draft report of the Chairman of the Board. It indicates that he is of the opinion that the Union's demand or application for a "Union Shop" and for "Maintenance of Membership" conditions or provisions in the Agreement being negotiated by or on behalf of the Employer and Employees should not be granted. He however is of the opinion that the "Check-off" provision asked for by the Employees or the Union should be granted and made a provision of the Agreement between the parties.

For the reasons given by the Chairman in his report and for other reasons which I have mentioned, I agree with the Chairman's conclusions so far as the "Union Shop" and "Maintenance of Membership" provisions are concerned.

With great respect, however, I am unable to agree with him in the conclusion at which he has arrived so far as the "Check-off" provision is concerned, and submit it should not be forced on the Company.

Respectfully submitted,

(Sgd.) L. J. REYCRAFT,

Member of Conciliation Board.

Winnipeg, Manitoba.

7th August, 1945.

Report of Board in Dispute between Frost and Wood Co., Ltd., Plant No. 1, Smiths Falls, Ont., and Local 3140, United Steelworkers of America

On August 9 the Minister of Labour received the report of the Board of Conciliation which dealt with the above matter.

The personnel of the Board was as follows: Mr. L. W. Brockington, K.C., appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. D. P. Cruikshank and Henry L. Cartwright, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the Matter of the Wartime Labour Relations Regulations, P.C. 1003, and in the Matter of a Dispute Between Frost & Wood Co., Ltd., Plant No. 1, Smiths Falls, Ontario (Employer) and United Steelworkers of America, Local 3140, (Employees).

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa.

The undersigned, being the members of the Board of Conciliation established on the 7th

day of July, 1945, have the honour to report as follows:—

On the 24th day of March, 1944, the Frost & Wood Co., Ltd., which in peacetime manufactures farm implements and in wartime has extended its manufacturing activities in accordance with the country's needs, entered into an agreement with United Steelworkers of America, C.I.O., Local 3140. The Company has for over one hundred years been engaged in business in Smiths Falls, Ontario. The agreement referred to above represents its first relationship with any union, national or international.

In the plant covered by the said agreement, there are approximately 608 employees, of whom 566 are covered by the agreement. Of the 566 so covered, approximately 425 are members of the Union in good standing.

It is the opinion of the Board that although there may have been some minor infractions of the agreement and some slight asperities arising from its enforcement, the relations between the Company and the Union have hitherto reflected credit upon them both.

The disagreement, with which the Board was asked to deal, dealt with the refusal of the employees' request for a Union Shop and a Check-off for Union dues. Apart from these two items in dispute, it is understood that the other clauses of the existing agreement have worked satisfactorily and that both parties wish their continuance.

After hearing arguments on both sides, the Board is unanimously of the opinion that the request for the Union Shop should not be granted. The Chairman and the nominee of the employees on the Board are of the opinion that, after further experience in mutual relationship between the Company and the Union, and provided that a very substantial majority of the employees seek and maintain Union membership, the matter deserves further consideration at some future time. This expression of opinion in no way binds the nominee of the employer on the Board.

With reference to the Check-off, the Union had offered to pay all costs of the procedure provided that the Company was willing to deduct and pay to the Union all Union dues, certified by the Union secretary. After discussion, the Company generously agreed to allow the Check-off and to bear the cost itself. It did express anxiety, however, that the employee might still retain his right of revoking the authorization by withdrawing from Union membership if he so desired. It is this Union's practice to allow withdrawal of membership within the period of any agreement. The Union has agreed to the Company's stipulation

by covenanting to notify the Company management immediately upon the communication to it by any Union member of his or her desire to withdraw from membership in the Union. This will operate as a revocation of Check-off. The Check-off provisions should fix a date, presumably the fifteenth of the month, and should provide that the authorization shall not continue beyond the termination of any contract, or termination of employment, or upon promotion or transfer of the employee into a job not covered by the terms of any existing agreement, or in the event of resignation or expulsion from the Union, of which the Union covenants to advise the employer.

The Board therefore recommends that the existing agreement be amended by the addition of a clause providing for a Check-off for Union dues in the broad terms outlined above.

One other clause in the existing agreement came up for discussion. By Clause 2 of Article 1, the present agreement provides as follows:—

The Company recognizes and will not interfere with the right of its employees to become members of the Union, and will not discriminate against, interfere with, restrain, or coerce employees because of membership in the Union. The Union agrees not to intimidate or coerce employees into membership and also not to solicit membership on Company's premises or collect dues on Company time.

It was admitted by the Union that there had been some breach by it of the obligation contained in the last sentence of this clause. It was agreed between the parties to the dispute that in the future the Union should have a right to solicit membership on the Company's premises during meal hours, etc., but not on Company time. The clause will now read as follows:—

The Company recognizes and will not interfere with the right of its employees to become members of the Union, and will not discriminate against, interfere with, restrain, or coerce employees because of membership in the Union. The Union agrees not to intimidate or coerce employees into membership and also not to solicit membership or collect dues on Company time.

As an indication of goodwill, the Company also spontaneously agreed to refund to the Union, their agreed share of the cost of training one of the employees for special work in which both had been interested.

The Board was advised that the above recommendations and findings were acceptable to the Company and would be recommended by the men's representatives to their Union.

The Board wished to conclude by recording its appreciation of the admirable spirit in which the representatives of the men and the Company met together and its belief that both parties will continue in cordiality and mutual respect to observe the agreement which will govern their future relationship.

Respectfully submitted this 31st day of July, 1945.

Report of Board in Dispute between Guelph Stove Co., Ltd., Guelph, Ont., and Local 3305, United Steelworkers of America

On August 14 the Minister of Labour received the Report of the Board of Conciliation in the above case. A minority report was submitted by Mr. E. Macaulay Dillon.

The personnel of the Board was as follows: His Honour Judge Ian M. Macdonell, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. E. Macaulay Dillon and Fred Dowling, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the minority report was as follows:—

Report of Board

Re: Wartime Labour Relations Regulations P.C. 1003, and Guelph Stove Company, Guelph, Ont. and Local 3305, United Steelworkers of America.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ont.

Sir:

The Board of Conciliation appointed by you to deal with the above dispute has completed its sittings and now submits its report.

The Union was represented at the various sittings by Mr. W. Sefton and Mr. C. H. Pinson, International Representatives; Mr. W. F. C. Kidd, Research Director; Mr. M. Fox, President of the Local and Mr. J. Jeffery, a member of the Local. The Company representatives were Mr. J. C. Adams, K.C., Counsel; Mr. F. A. Simpson, Manager, and Mr. R. H. Glendennan, Supervisor.

Only one question was dealt with in the representations made to the Board, namely, the request of the Union for a security clause providing for maintenance of membership and a check-off clause, which were not acceptable to the Company.

The Board regrets to report that efforts to conciliate the dispute did not prove successful. Unfortunately these efforts, in the opinion of the majority of the Board, were not furthered by the attitude of Mr. Macaulay Dillon, the employer's nominee on the Board, who stated

frankly at the outset that he would under no circumstances join in any recommendation unless it were acceptable to the Company. We do not doubt that this attitude was well understood by the Company officials, who throughout maintained an attitude that could only be described as uncompromising, refusing to consider any form of union security, however slight. Mr. Dillon having persisted in his attitude, it is left for the remainder of the Board to deal with the matter in dispute.

The principal reason given by the Company for their attitude was that they had had most satisfactory relations over many years with the International Moulders and Foundry Workers Union, which is affiliated with the American Federation of Labour. The Company admitted that this Union had 100 per cent membership of its foundry workers, who constitute a separate group of employees. The Company felt itself unable to grant privileges not sought after by this Union to the United Steelworkers of America.

To this the Union replied that, at least in effect, the Moulders Union have a Union Shop and do not need any further security. They also pointed out that in a recent representative vote 185 votes were cast for the Steelworkers, against 27 for the Moulders, who had agreed to admit all workers in the plant into their ranks.

In view of the overwhelming majority obtained by the Steelworkers in their group, the Board does not feel that the objections of the Moulders should influence the Company in its dealings with the Steelworkers, who, as a matter of fact, represent a much larger group of employees, who have a right to choose their own bargaining agent.

Mr. Dowling, a Member of the Boards, feels that the Union has made out a good case for a maintenance of membership clause. The Chairman agrees that some form of security should in all fairness be granted, but feels that regard should be had for the fact that the Union has been active in the plant a comparatively short time and is negotiating its first agreement with the Company. However, in the interest of unanimity, and in the sincere hope that it may be acceptable, the

Board recommends that the following clause be inserted in the agreement:

Upon presentation of proper authorization from the employee, the Company agrees to deduct \$1.00 each month from his earnings as Union dues during the duration of this agreement, such monies to be remitted monthly to the Financial Secretary of the Local Union.

All of which is respectfully submitted.

Dated at Toronto this 11th day of August, 1945.

(Sgd.) IAN M. MACDONELL,
Chairman.

(Sgd.) F. W. DOWLING,
Employees' Nominee.

Minority Report

Re: Wartime Labour Regulations, P.C. 1003, and Guelph Stove Co. Guelph, Ont., and Local 3305, United Steel Workers of America.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Toronto, August 9th, 1945.

Sir:

This is a Minority Report.

The dispute was referred to this Board of Conciliation consisting of the undersigned as nominee of the employer, Mr. Fred Dowling as nominee of the Union and His Honour Judge Ian M. Macdonell as Chairman. When the Board was convened, it appeared from the report of the Conciliation Officer, Mr. H. Perkins, that the matters at issue between the parties were maintenance of membership and a dues check-off. However, during the course of the proceedings both Mr. Sefton and Mr. Pinson, (who represented the Union on different occasions) intimated that the Union would be satisfied with a dues check-off only. The Company, on the other hand, made it perfectly clear that they neither could nor would agree to a check-off, for reasons which were to my mind quite adequate, and which I will deal with hereunder.

At the conclusion of the hearings with the parties, the Board continued in session and I was then informed by the Chairman, that unless I could agree to "some mild form of check-off", there would be no possibility of a unanimous report being made by this Board,

and that the remaining members of the Board would formulate their report, and make such recommendations in respect to the matters at issue, as they might subsequently agree upon. As a consequence, I am unaware at the moment of writing how far the majority recommendations go nor have I any knowledge of the precise verbiage employed.

The Company already has a collective bargaining agreement with the International Moulders and Foundry Workers Union representing approximately 100 of its employees engaged in foundry and polishing operations and who are excluded from the bargaining unit represented by the Steelworkers Union. This latter Union represents the remaining 200 or so employees and has done so only since December, 1944. The Company's relations with the Moulders Union have extended over a period of 40 years, and the Company has never granted check-off, or maintenance of membership, or any other element of the so called Union Security to the Moulders Union. The Company's current agreement with the Moulders Union is signed and in operation, and relations thereunder are harmonious and satisfactory to both parties.

The present negotiations with the Steelworkers Union are preliminary to the first agreement with that Union with which the Company has had no previous experience. The Company is extremely anxious not to do anything which would tend to cause friction in its plant between the two Unions, and urged most strongly on the Board, that to grant a check-off or maintenance of membership to the new Union after refusing it to the old one would not only be unfair, but would in all probability promote industrial unrest rather than peace. These are two very cogent reasons against the granting of maintenance of membership or a check-off in this particular case. They lead me to the inevitable conclusion, apart from other reasons put forward by the Company, that no provisions whatever in respect to these two matters should be recommended by this Board.

The agreement is ready to be signed (but for these two matters) and it includes all the provisions as to wages, hours and conditions of employment, on which the parties are agreed. It was presented to the Union for signature on April 23, 1944. Accordingly I recommend that the parties sign this agreement forthwith.

All of which is respectfully submitted.

(Sgd) E. MACAULAY DILLON,
Member of the Board.

Report of Board in Dispute between John Inglis Co., Ltd. (Ordnance Division), Toronto, and Local 2900, United Steelworkers of America

On August 21 the Minister of Labour received the Report of the Board of Conciliation which dealt with the above matter.

The personnel of the Board was as follows: Hon. Mr. Justice W. D. Roach, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. E. Macaulay Dillon and Herbert Orlicke, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

In the matter of The Wartime Labour Relations Regulations, P.C. 1003 and a dispute between John Inglis Company Limited (Ordnance) Toronto, Ontario, (Employer), and Local 2900 United Steel Workers of America, (Employees).

To: The Honourable
THE MINISTER OF LABOUR,
Ottawa, Ontario.

The undersigned Chairman and Members of the Board of Conciliation established by you in this matter report as follows:

The Board having first held a preliminary meeting subsequently met with the parties on August 10.

The Company was represented by Mr. Clifford Adams, counsel, and Mr. W. H. Dickie, Industrial Relations Manager. The employees were represented by Mr. W. Sefton, International Representative; Mr. H. McMullen, Financial Secretary of the Local Union; Mr. John Brodie, President of the Local Union and Mr. W. Crawford, member of the Negotiating Committee.

There were two matters in dispute between the parties, namely request by the Union for a union shop clause and a similar request for a check-off of union dues.

After some discussion with the parties in which it appeared hopeful that an agreement could be reached on these two matters the meeting adjourned to enable the parties to further discuss them.

Your Board is happy to report that it has now been advised by both parties that these matters have been satisfactorily settled.

Dated August 20, 1945.

(Sgd.) W. D. ROACH,
Chairman.

(Sgd.) E. MACAULAY DILLON,
Member.

(Sgd.) HERBERT ORLIFKE,
Member.

Report of Board in Dispute between York Knitting Mills, Ltd. (Knitting Divn.), Toronto, and Local No. 4, National Union of Textile Workers.

On August 7 the Minister of Labour received the report of the Board of Conciliation which was established to deal with the above matter.

The personnel of the Board was as follows: Dr. Alexander Brady, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members; Messrs. E. Macaulay Dillon, K.C., and Lawrence Sefton, appointed on the nomination of the employer and employees respectively.

The text of the Board's report was as follows:—

Report of Board

Re: Wartime Labour Relations Regulations, P.C. 1003, and York Knitting Mills, Ltd. (Knitting Division), Toronto and National Union of Textile Workers, Local No. 4.

To The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir:—

The Board of Conciliation appointed by you to deal with the above dispute first met the

parties on July 18, 1945. The Company was there represented by Messrs. R. Presgrave and E. A. Black. The Union was represented by Mr. Arthur Williams and R. Hinde, J. Bellis, U. Nichols, M. Mitchell and W. Smith. An agreement was signed between the Company and the Union in September, 1942, and ran to June, 1943, when it was renewed and remained in operation till June, 1944. The Union in 1944 sought some alterations in the terms of the agreement, and negotiations continued to the present. In these negotiations agreement was reached on all matters except the claim of the Union for a union shop or maintenance of membership clause and a union dues check-off. These were, therefore, the issues before the present Board of Conciliation.

The representatives of the Union presented argument before the Board that the absence of union security provisions in the agreement led to a small minority of members leaving the Union and to friction between them and Union members. It was emphasized, however,

that the relations between the Union and the Company were excellent. The Company on its part was interested in removing friction between its employees, but was unwilling to use compulsion in making employees remain members of the Union. The Board discussed these issues with the parties, and in these discussions the representatives of the Company agreed that the Company would accept a voluntary type of check-off, but remained opposed to any type of compulsory maintenance of membership. Some attempt was made to obtain agreement on a maintenance of membership clause that would leave out the usual compulsory features, while it emphasized the moral obligation of Union members to retain membership, but difficulty was encountered in framing such a clause agreeable to both parties.

The Board has carefully considered the disagreement between the parties, and it believes that the clause likely to win most agreement would be one that required a voluntary check-off of union dues for the duration of the collective bargaining contract. Such a clause

would not merely guarantee the check-off, but would also provide some security for the Union, although it would not provide complete union security. Where such a clause is operative, members of the union are not compelled to remain members as a condition of their employment, but, as long as they are members and once they have given permission to the company, their union dues are deducted and paid to the union secretary for the duration of the agreement. The Board is convinced that such a clause provides the most workable compromise and embraces the largest area of agreement. The Board has been impressed by the sincerity and good will revealed on both sides in these negotiations, and recommends that the parties sign an agreement at an early date on the lines suggested above.

All of which is respectfully submitted.

Dated at Toronto, this 4th day of August, 1945.

(Sgd.) ALEXANDER BRADY

(Sgd.) E. MACAULAY DILLON,

(Sgd.) L. SEFTON.

Report of Board in Dispute between the Joseph Stokes Rubber Co., Ltd., Welland, Ont., and Local 523, United Electrical, Radio and Machine Workers of America

During the month of July the Minister of Labour received the Supplementary Reports of the Board of Conciliation in the above matter, a Supplementary Minority Report being submitted by Mr. Murton Seymour.

The personnel of the Board was as follows: Dr. Alexander Brady, Chairman, appointed by the Minister in the absence of a joint recommendation from the other two members of the Board, Messrs. Murton A. Seymour, K.C., and Harvey G. Forster, appointed on the nomination of the employer and employees respectively.

The text of the Board's report and of the supplementary minority report was as follows:

Supplementary Report

Re: Wartime Labour Relations Regulations, P.C. 1003, and Joseph Stokes Rubber Company, Welland, Ontario, and the Electrical Radio and Machine Workers of America, Local 523.

To:

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

Sir,

This is the second report of the Board of Conciliation in this case. It is presented be-

cause of a former misunderstanding that the two parties in their bargaining had reached agreement on the question of the top seniority of shop stewards within their departments. But they are not in agreement on this matter. The union asks for essentially the clause that was in the former agreement between the Stokes Rubber Company and the union, signed on May 22, 1943. The pertinent clause in that agreement read: "Shop stewards as designated by the union upon an agreement with the Company as to number and plant section or department, shall be recognized as possessing top seniority in their particular department or section for the term of their office".

The Company is opposed to the re-inclusion of such a clause on the ground that it means a form of discrimination in favour of some employees against others and that discrimination in favour of union members runs counter to P.C. 1003.

The Board of Conciliation met the parties and sought to obtain agreement on a suitable provision, but was unsuccessful in doing so. It, therefore, recommends that the clause in the former agreement quoted above be retained in the new agreement. Preferential seniority for shop stewards is reasonable in view of the important role that they play in implementing the terms of the agreement, particularly in regard to the grievances of em-

ployees. The steward usually has the responsibility of taking up grievances first with the foreman. Top or preferential seniority is a compensation for the responsibility carried. Also it is much in the interest of the Company as well as the union that men with this responsibility should have a fair security of employment within their respective departments.

All of which is respectfully submitted.

Dated in Toronto on this 29th day of June, 1945.

(Sgd.) ALEXANDER BRADY,

(Sgd.) HARVEY G. FORSTER.

Supplementary Minority Report

St. Catharines, Ontario,
25th July, 1945.

Re: Wartime Labour Relations Regulations, P.C. 1003, and Joseph Stokes Rubber Company Limited, Welland, Ontario, and the Electrical Radio and Machine Workers of America, Local 523.

The Honourable HUMPHREY MITCHELL,
Minister of Labour,
Ottawa, Ontario.

DEAR SIR:

I have received a copy of the second report of the Board of Conciliation filed by the Chairman, Professor Alexander Brady, and

Dr. G. Harvey Forster, from which I dissent.

The Company is opposed to the re-inclusion of a clause providing for top seniority of shop stewards within their Departments not only on the ground that it means a form of discrimination in favour of some employees as against others, but also on the ground that the Company is a custom manufacturer and the number of employees in each of the Departments varies directly with the orders the Company receives for the particular type of product manufactured in each Department, so that while a Department may be fairly largely staffed at any one time, within a short period it might have but a small number of employees because of lack of orders for that particular Department.

I am of the opinion that the question of union security, as reflected in the Union's demand for top seniority for shop stewards, is not a matter which is within the competence of a Board of Conciliation under P.C. 1003, and I therefore find it necessary to dissent from the majority of the Board on both grounds, namely, because of the objections of the Company, which, in the circumstances of this Company, I consider sound and reasonable, and secondly, because I do not think the Board has the jurisdiction to make any finding whatsoever on a matter of purely union security.

Yours truly,

(Sgd.) M. A. SEYMOUR.

Conciliation Work of the Industrial Relations Branch During August, 1945

Activities Under the Conciliation and Labour Act and Other Legislation

OFFICERS of the Industrial Relations Branch dealt with 16 industrial disputes during the month of August, involving 8,728 work-people employed in 50 separate establishments. Of these, twelve were new disputes which originated during the month and 4 were situations which had been untermiated as of July 31 and received further attention in August. These disputes were dealt with under the provisions of the Conciliation and Labour Act and under Order in Council P.C. 4020. They were thus distinct from and in addition to the conciliation proceedings described on previous pages, which developed under the Wartime Labour Relations Regulations.

Industrial Relations Officers of the Department of Labour are stationed at Vancouver, Winnipeg, Toronto, Ottawa, Montreal, Fred-

ericton, N.B., and Glace Bay, N.S. The territory of the two officers resident in Vancouver comprises British Columbia and Alberta; two officers stationed in Winnipeg cover the provinces of Saskatchewan and Manitoba and Northwestern Ontario; four officers resident in Toronto confine their activities to Ontario and work in close collaboration with the Provincial Conciliation service; two officers in Montreal are assigned to the Province of Quebec and two officers resident in Fredericton, N.B., and Glace Bay, N.S., represent the Department in the Maritime Provinces. The headquarters of the Industrial Relations Branch and the Director of the Industrial Relations and staff are situated in Ottawa.

Collective Agreements and Wage Schedules

Recent Collective Agreements

COLLECTIVE agreements received in the Department are outlined in the LABOUR GAZETTE from month to month. It is not possible because of limitation of space to include all agreements received. The agreements are in most cases signed by representatives of the employers and workers, but schedules of rates of wages, hours of labour and other conditions of employment drawn up and verbally agreed to by representatives of the employers and workers are also included. Verbally accepted agreements are so indicated.

Agreements made obligatory under the Collective Agreement Act in Quebec are summarized in a separate article following this.

Mining, Non-Ferrous Smelting and Quarrying: Metal Mining

FLIN FLON, MANITOBA.—HUDSON BAY MINING AND SMELTING CO. AND THE FLIN FLON BASE METAL WORKERS' FEDERAL UNION No. 172, INTERNATIONAL ASSOCIATION OF MACHINISTS, LOCAL 1848, INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS, LOCAL B-1405, INTERNATIONAL BROTHERHOOD OF BOILERMAKERS, IRON SHIPBUILDERS AND HELPERS, LOCAL 451, UNITED BROTHERHOOD OF CARPENTERS AND JOINERS, LOCAL 1614, AND THE BROTHERHOOD OF PAINTERS, DECORATORS AND PAPER HANGERS, LOCAL 1497.

Agreement to be in effect from April 19, 1945, to April 18, 1946. Parties to meet re renewal or change. The company recognizes the unions as the exclusive representative for collective bargaining for the employees. The unions agree not to use any measures to compel a man to join their particular union that might cause friction. There shall be no discrimination against any employee because of union membership or activity. Check-off: Company will deduct and pay over to the union the union dues of employees who authorize them.

Hours: 8-hour day, 6-day week. Overtime and all work on legal holidays is payable at time and one-half. Wages: The company, subject to the decisions of the National War Labour Board, agrees to continue the present established wage schedule. Provision is made for seniority rights and grievance procedure.

Manufacturing: Vegetable Foods

CHATHAM, ONTARIO.—LIBBY, MCNEILL AND LIBBY OF CANADA LTD. AND INTERNATIONAL UNION, UNITED AUTOMOBILE, AIRCRAFT AND AGRICULTURAL IMPLEMENT WORKERS OF AMERICA, LOCAL 127.

Agreement to be in effect from March 1, 1945, to February 28, 1946, and thereafter subject to 2 months' notice. The company recognizes the union as the sole collective bargaining agency for all hourly paid employees of its Chatham canning plant. All employees who, fifteen days after the execution of this agreement, are members of the union and those who may thereafter become members shall, as a condition of employment, remain members. Check-off: the company will deduct a specified amount each month from the pay of all union members and pay it to the union. Hours and overtime provisions are subject to approval of the War Labour Board.

Hours and overtime: except for necessary work, the normal weekly hours will as far as possible be completed in 5 days. Time and one-half for all hours in excess of 10 hours in any one day or 48 hours in any one week, and for all work on Sunday except for regular shift operations. A 4-week period for the canning of peas and a 6-week period for tomatoes and corn shall be unrestricted as to hours and no overtime rates will be paid. If new seasonal products are added, they also may be exempt for a period to be mutually agreed upon. Time and one-half for work on seven specified holidays.

Minimum hourly wage rates: for regular employees—men 50 cents for first 30 days, 52½ cents for second 30 days and 55 cents thereafter; women 35 cents for first 30 days, 37½ cents for second thirty days and 40 cents thereafter; for seasonal employees—men 50 cents, women 35 cents. For night shift a premium of 3 cents per hour for all hours between 6 p.m. and 6 a.m. Vacation for employees in continuous service: one week per year after one year and less than five years' service; two weeks thereafter until female employees have completed 15 years' service and male employees 20 years' service; three weeks thereafter. Provision is made for seniority rights and for the settlement of disputes.

Manufacturing: Miscellaneous Wood Products

LONGUEUIL (NEAR MONTREAL), QUEBEC.—FAIRCRAFT INDUSTRIES LTD. AND INTERNATIONAL ASSOCIATION OF MACHINISTS, DISTRICT 82.

Agreement, covering hourly paid employees in the manufacture of prefabricated houses, is to be in effect from July 1, 1945, to June 30, 1946,

and thereafter from year to year, subject to notice. The company recognizes the duly elected shop committee of the union as the sole bargaining agency as long as the union represents a majority of employees. No discrimination on account of union activities which are not carried on during working hours except as specifically permitted.

Hours: daily hours are to be mutually arranged, but the standard working week is 48 hours. If the plant is placed on a 3-shift operating schedule, the first and second shifts will be 8 hours and the third shift 6½ hours and a lunch period of ½ hour allowed on each shift. Overtime is payable at time and one-half after standard working hours until 12 hours have been worked, after which double time will be paid; double time for all work on Sundays and eight specified holidays unless employee takes another day off in the same pay week.

Hourly wage rates (subject to the approval of the Regional War Labour Board): lumber scaler 90 cents to \$1.10, journeymen sheet metal worker, electrician and carpenter 90 cents to \$1, journeymen plumber 95 cents to \$1.05, wood mill operators 65 to 85 cents, inspectors 65 to 88 cents, paint sprayer 70 to 77 cents; assembly workers—pipe 70 to 77 cents, wood 60 to 77 cents, metal 60 to 69 cents, unskilled labourers 55 to 59 cents, helpers 50 to 54 cents. All employees working on shifts other than the regular day shift to be paid 5 cents per hour extra. Leading hands are paid 5 cents per hour extra. Vacation: vacations with pay are granted, the plan to be agreed upon between the management and the shop committee. Provision is made for seniority rights and for the settlement of grievances.

Transportation and Public Utilities: Electric Railways and Local Bus Lines

BRITISH COLUMBIA.—BRITISH COLUMBIA ELECTRIC RAILWAY CO., LTD. AND AMALGAMATED ASSOCIATION OF STREET, ELECTRIC RAILWAY AND MOTOR COACH EMPLOYEES OF AMERICA, LOCALS 101 (VANCOUVER), 134 (NEW WESTMINSTER) AND 109 (VICTORIA).

General

Agreement to be in effect from March 1, 1945, to February 28, 1946, and thereafter subject to two months' notice. The company recognizes the union and will not discriminate against any employee because of his connection with it. All employees affected by this agreement shall within one month of hiring, become and remain members of the union. Vacation: 2 weeks with pay to employees with one year's service or more. Concessions: employees to have free transportation on lines of the company and a limited number of passes for their dependents, as well as reduced prices for gas and electric light service. Holidays: there are eight recognized holidays. Promotions are governed by proficiency and seniority.

City and Suburban Lines: Motormen, Conductors, One Man Car and Bus Operators

Hours: 8 hours to constitute a day's work, as far as possible, but overtime is payable only after 8½ hours. As far as possible runs are to

be completed within the following periods: 50 per cent of runs within 9 hours, an additional 10 per cent within 9½ hours, 20 per cent within 10 hours, 10 per cent within 11 hours and the remaining 10 per cent within 12 hours. On all runs not completed within 10 hours, 20 cents per hour extra will be paid after 10 hours from commencement of first shift. Overtime on day runs after scheduled time, at time and one-half to 12 midnight on day runs, 2 a.m. on night runs, 11 hours on others, and double time thereafter. Those on regular runs to be allowed every sixth day off and if called to work on their sixth day, will be paid at time and one half. Work on Sundays at time and one-quarter; work on holidays at time and one-half. New running sheets shall be posted and signed up every two months, the union representatives to co-operate in making up these sheets. Uniforms: the company to pay one-half the cost of the required uniforms.

Hourly wage rates: motormen and conductors, 73½ cents during first six months, 76½ cents during second six months and 79 cents thereafter; one man car operators and motorbus operators 85 cents; motormen and conductors in work train service, 2 cents per hour extra.

Interurban Lines

Running sheets for passenger and freight service will be posted every two months, and men will sign for runs they desire in order of seniority. The minimum crew for each type of train is specified. Hours: 8 hours is a basic day, with overtime payable after 8½ hours; 5 days off per month. Overtime at time and one-half up to 16 hours and double time thereafter; work on "day off" at time and one-half. Work on Sundays at time and one-quarter; work on holidays at time and one-half.

Hourly wage rates: passenger motormen and conductors from 74½ cents during first six months to 81 cents after one year; freight motormen and conductors from 77 cents during first six months to 83½ cents after one year; passenger brakemen from 72½ cents during first six months to 78 cents after one year; freight brakemen 79 cents, trolleyman 77 cents.

Shop and Barn Departments

Hours for shop and barn employees and freight car repair department: 8 per day, 4 on Saturdays, a 44-hour week; for night men, 8-hour shifts with ½ hour off for lunch, 6 nights per week. Overtime is payable at time and one-half for first 5 hours and double time thereafter; time and one-half for work on Sundays, holidays and Saturday afternoon. Apprentices to serve four years.

Hourly wage rates for shop and barn: motor car repairers 76½ cents to 85½ cents; helpers (blacksmiths', carpenters', machinists', armature winders'), sawyers, 72 cents to 77½ cents; barn janitors and car cleaners 68 cents, freight car inspectors 87½ cents, freight car repairers' helpers 72 cents, painters 92 cents, freight car painters 75 cents, brush hands 72 cents, carpenters 92 cents, freight car carpenters 82 cents, machinists 94½ cents, fendermen 88½ cents, bab-bitter 87½ cents, trolley retriever repairer 88 cents, blacksmiths 94½ cents, car wiremen 89½ cents, air brake fitters 89½ cents, armature winders 87½ to 94½ cents; leading hands 3 cents per hour extra. Apprentices from 48 cents in first year to 63 cents in fourth year.

Track Maintenance

Hours: 8 per day, 4 on Saturday, a 44-hour week. Overtime at time and one-half for first five hours and double time thereafter; time and one-half for all work on Saturday afternoons, Sundays and holidays.

Hourly wage rates: for track maintenance men, 69½ cents on interurban lines, 73½ cents on city lines, regular gang foremen \$163.42 per month, extra gang foremen \$172.42 per month; track welders 88 cents, track welders' helpers 75 cents; Vancouver city yards—yard men 68½ cents, compressor men 80 cents, blacksmith 92½ cents, blacksmith's helper 76 cents.

Freight Office, Shed and Baggage Room Division

Hours: 8 per day. Overtime is payable at time and one-half to 10 p.m., and double time thereafter. All work on Sundays and holidays, at double time. Baggage room men to have every second Sunday off.

Wage rates for freight office and shed division: checkers 73 cents, truckers 70½ cents, auto drivers \$158.92 per month, rate and chief clerk \$181.77, cashier \$177.27, accountant \$172.77; switching clerk, abstract clerk and outside inspector clerk \$159.27, billing clerk \$150.27, shedmen (Chilliwack) \$154.77. Wage rates for baggage room men: \$159.27 per month in Vancouver, \$154.77 in New Westminster.

Station Agencies and Ticket Clerks

Hours: for station agencies, regular hours to be designated for each employee to enable them to attend to regular scheduled trains. One day off per week. Overtime: for work outside regular assigned hours, time and one-half to be paid. Ticket clerks to have one day off in six, with time and one-half if required to work on that day.

Monthly wage rates: auto drivers \$158.92, interlocking tower men \$150.92, depot masters (interurban lines) \$159.27, ticket clerks (terminal office) \$159.77, train dispatchers \$233.12, bridge tenders \$128.88; station agencies \$160.77 to \$178.77, with dwelling house, fuel and light free; assistant agents \$156.27 (1 at \$120.27).

Bridge and Building Section

Bridge and building master's renewals and maintenance gang to be included for hours of work and overtime rates with shop and barn men for those carpenters, painters, pipefitters and helpers employed on renewals, alterations and maintenance. Hourly wage rates: carpenters, painters and pipefitters, regularly employed, 90 cents; bridgemen (rough carpenters) 77 cents.

Garagemen

Garagemen are employed at company garages at Vancouver (Point Grey), Victoria and New Westminster. Hours: 8 per day, 48 per week. Overtime at time and one-half. Hourly wage rates: mechanics 82½ and 91½ cents, service and general utility men at New Westminster 72 cents, service men at Victoria 75 cents, washers at Victoria 68 cents, helper at Vancouver \$147.87 per month.

Transportation and Public Utilities Water Transportation

VICTORIA, B.C.—THE CANADA STEVEDORING COMPANY, LTD., THE EMPIRE STEVEDORING COMPANY, LTD., AND THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, LOCAL 162.

Agreement covers the loading and unloading of deepsea vessels at Victoria, and is to be in effect from April 17, 1945, to April 17, 1947, and year to year thereafter subject to 60 days' notice. Employers agree to employ men dispatched by the local union only.

Hours: straight time prevails from 8 a.m. to 5 p.m. Monday to Friday, and 8 a.m. to 1 p.m. on Saturday. Work at all other times and on statutory holidays is at overtime rates. Hourly wage rates: all labour unless otherwise provided for \$1.10 per hour on ship, \$1.06 on dock, hatchtenders \$1.20. Overtime and work during meal hours: all labour unless otherwise provided for \$1.65 per hour on ship, \$1.59 on dock; hatchtender \$1.75. 10 cents per hour above basic rates is payable to cranemen, donkey drivers, side runners (loading only), hold men and winch drivers working on lumber, logs and piling out of the water, creosoted products, iron clinker and whiting, ballast, coal, ore, sulphur, bulk grain, fertilizer (all kinds), bone dust, lime, cement in bags, nitrate, etc. when in lots of 25 tons or over, for working in refrigerators; 20 cents per hour above basic wage rate will be paid boom men and sling men working on lumber, logs and piling out of the water; special rates are payable to workers on high explosives and damaged cargo.

Provision is made for payment for "stand by" time, waiting time, etc. and grievance procedure.

Transportation and Public Utilities: Air Transportation

CANADA.—TRANS-CANADA AIR LINES AND THE CANADIAN AIR LINE PILOTS ASSOCIATION.

Agreement to be in effect from July 1, 1945, to June 30, 1946, and thereafter subject to 60 days' notice. The company recognizes the association as representing the air line pilots.

Mountainous terrain is the division between Lethbridge and Victoria and any other comparable terrain which may be mutually agreed on.

Hours: No pilot shall be allowed to fly more than 225 air hours on mountainous terrain operations or 255 hours on flat terrain operations in any three calendar months' period; this does not include training flights, familiarization flights or monthly instrument practice and local flight checks.

Monthly salaries: mountainous terrain—captains (first year) \$419.93 and \$569.93, first officers \$269.93 and \$319.93; captains (second year) \$569.93 and \$669.93, first officers \$369.93; captains (third year) \$669.93 and \$769.93, first officers \$369.93. Monthly salaries for flat terrain operations—captains (first year) \$419.93 and \$519.93, first officers \$269.93 and \$319.93; captains (second year) \$519.93 and \$619.93, first officers \$369.93; captains (third year) \$619.93 and \$719.93, first officers \$369.93. Vacation: fourteen days with pay after one year's service. Pilots with less than one year's service will be

granted one day for each month's service up till March 31. Provisions are made for seniority rights, travelling expenses and moving expenses. Pilots to carry a minimum life insurance cover-

age of \$5,000, the company to be obligated to pay only the flight risk portion of such insurance. A joint adjustment board is provided for the settlement of disputes.

Collective Agreement Act, Quebec

IN Quebec, the Collective Agreement Act provides that where a collective agreement has been entered into by an organization of employees and one or more employers or associations of employers, either side may apply to the provincial Minister of Labour to have the terms of the agreement which concern wages, hours of labour, apprenticeship and certain other conditions made binding throughout the province or within a certain district on all employers and employees in the trade or industry covered by the agreement. Notice of such application is published and thirty days allowed for the filing of objections, after which an Order in Council may be passed granting the application, with or without changes as considered advisable by the Minister. The Order in Council may be amended or revoked in the same manner. Each agreement is administered and enforced by a joint committee of the parties. Further information concerning this legislation is given in the *LABOUR GAZETTE*, January, 1943, p. 86. Proceedings under this Act and earlier legislation have been noted in the *LABOUR GAZETTE* monthly since June, 1934.

Recent proceedings under the Act include the extension of one new agreement and the amendment of four others, all of which are noted below. Two corrections of previous Orders in Council are published. A request for a new agreement for the cloak and suit industry for the province was gazetted July 28. Two requests for the amendment of the wholesale fur industry agreement for Montreal were also gazetted July 28. Requests for new agreements for retail merchants at Megantic and St. Jean were gazetted August 4. A request for the amendment of the agreement for retail stores at St. Hyacinthe was published in the *Quebec Official Gazette*, Aug. 11. A request for the amendment of the dairy employees' agreement at Quebec was gazetted August 18.

An Order in Council was also published approving the constitution and by-laws of a certain joint committee.

Manufacturing: Vegetable Foods

BAKERS, QUEBEC

An Order in Council dated July 19, and gazetted July 28, with corrections gazetted August 4, amends the previous Orders in Council for this industry (L.G., June, 1941,

p. 703; Sept., 1943, p. 1253; Sept., 1944, p. 1140). Hours for inside bakery employees and delivery department; for bread bakeries, 57 hours in Zone I, 67 in Zone II.

Minimum rates in bread bakeries: foreman \$28 in Zone I and \$25 in Zone II, journeymen \$25 in Zone I and \$22 in Zone II, helpers \$18 in Zone I and \$15 in Zone II, apprentices \$12 in Zone I and \$10 in Zone II. Minimum wage rates in cake, pastry and biscuit bakeries: of the workers of both sexes who are foremen, assistant foremen, journeymen, helpers and apprentices—40 per cent to be paid at least \$20 per week (minimum for foremen is \$28, assistant foremen \$25), a further 40 per cent at least \$15, and the remaining 20 per cent at least \$9; of the workers of both sexes employed as packers, wrappers, orders and sample clerks and all other employees including those employed in a wholesale or retail store pertaining to this industry—40 per cent to be paid at least \$13, another 40 per cent at least \$11, and the remaining 20 per cent at least \$9.50. Minimum weekly wage rates in delivery department: salesman \$19 in Zone I, \$17.40 in Zone II (\$35 in Zone I and \$30 in Zone II, if he furnishes his own vehicle), salesman-helper \$10 in Zone I, \$9 in Zone II, deliverer \$16 in Zone I, \$14.60 in Zone II, (\$35 in Zone I, \$30 in Zone II, if he furnishes his own vehicle). Vacation: one week with pay after twelve months' continuous service.

Manufacturing: Metal Products

SHEET METAL MANUFACTURING INDUSTRY, MONTREAL

An Order in Council, dated July 19, and gazetted July 28, amends the previous Orders in Council for this industry (L.G., Mar., 1943, p. 340, Oct., p. 1381, Jan., 1944, p. 70, April, p. 496) by stating that this decree does not cover the manufacturing or fabrication of stoves and furnaces.

RAILWAY CAR AND BUS MANUFACTURING, MONTREAL

An Order in Council, dated July 19, and gazetted August 4, amends the previous Order in Council for this industry (L.G., July, 1945, p. 995) by making some changes in wage rates: Tureot Works, electrical department electrician 80 to 95 cents instead of 80 to 90 cents, electrician leader \$1; pipe fitting department—improver 75 cents; tinsmith department—tinsmith 75 to 90 cents instead of 75 to 85 cents. Other amendments do not affect the summary already given.

Construction

BUILDING TRADES, MONTREAL

An Order in Council, dated July 19, and gazetted July 28, amends the previous Orders in Council for this industry (*LABOUR GAZETTE*, Mar., 1944, p. 359, July, p. 868, Nov., p. 1369, Dec., p. 1515; Jan., 1945, p. 71, May, p. 721, Aug., p. 1198) by providing that sheet metal

workers may work a 9-hour day, Monday to Thursday, 8 on Friday, a 44-hour week during the period from May 1 to October 1, 1945.

Service: Public Administration

MUNICIPAL EMPLOYEES, SHERBROOKE

An Order in Council, dated July 19, and gazetted July 28, and later corrected in the August 4 issue of the *Quebec Official Gazette*, makes obligatory the terms of a new agreement between The Municipal Corporation of the City of Sherbrooke and Le Syndicat des employés municipaux de la Cité de Sherbrooke. Agreement to be in effect from July 28, 1945, to May 1, 1946, and thereafter from year to year until 60 days' notice. Professional jurisdiction applies to permanent employees working on roads, aqueducts, parks and hygiene.

Hours: 8-hour day. Overtime is payable at time and one quarter, double time on Sundays.

Hourly wage rates: labourers 50 cents;

specialized labourers 55 cents; firemen, engine-man, steam-shovel 70 cents; boiler fireman 55 and 60 cents; fireman and engineman in asphalt plant 55 cents, asphalt roller operator 60 cents; ordinary roller operator 58 cents; skating rinks maintenance man \$31 per week; blacksmith 55 and 65 cents; blaster (dynamite), horse-driver 55 cents; truck driver 55 and 60 cents; watering truck driver with no help 63 cents; tractor and compressor operator 55 cents, bulldozer operator 72 cents; grader operator 63 cents; garage mechanics 50 to 75 cents; joiners 55 and 60 cents; asphalt workers, 55 and 57 cents; heating and plumbing employees 75 cents; harness-maker 55 cents; gardeners 55 and 65 cents; park watchman 50 cents; assistant superintendent aqueduct 85 cents; meter and tool repairman, aqueduct 65 cents; scavengers 50 and 52 cents; stone and granite block layer 55 cents; pump house operator (59 hour week) \$26. Vacation: one week with pay for stable watchman and pump house operators.

Canadian Vocational Training

CANADIAN Vocational Training provides the following types of training:—

- (1) Pre-employment classes in vocational schools for men and women about to enter war industry;
- (2) Part-time classes, principally for the up-grading of persons already employed;
- (3) Training plant schools;
- (4) Special classes for foremen and supervisors;
- (5) Training of enlisted men as tradesmen for the Navy, Army and R.C.A.F.;
- (6) Rehabilitation training for persons discharged from the Armed Forces in the present war and referred for training by the Department of Veterans Affairs;
- (7) Assistance to certain categories of university students whose services are needed in connection with the war effort.

Canadian Vocational Training is carried on under agreements made by the Dominion Government with each province. The administration is decentralized with a Regional Director in each province. Training is given in technical schools, special training centres and in industrial plants. The provinces and municipalities supply the shop facilities of the technical schools to the Program, free of charge. Provincial Governments also pay certain administrative costs and share with the Dominion in the cost of machinery and equipment purchases. All other costs are paid by the Dominion with funds from the War Appropriation.

From its inception up to July 31, 1945, the gross enrolment under Canadian Vocational Training has been as follows:

Training in Industry.....	276,618
Army Tradesmen	49,161
Navy Tradesmen	9,054
R.C.A.F. Tradesmen	65,212
Rehabilitation (discharged persons from the Forces).....	13,327
Students	7,649
<hr/> Total	<hr/> 421,021

Rehabilitation Training

The total number of discharged members of the Forces enrolled on July 31 was 5,243, an increase of 625 during the month. A number of qualified discharged members from the Forces have been appointed to field and supervisory staff positions during the month, which has considerably facilitated the handling of the Program.

A number of buildings surplus to service requirements have been made available to us during the month of August. The R.C.A.F. Training Centre at North Sydney, Nova Scotia and the municipal Airport at Saint John, New Brunswick which the Air Force used all during the war, as well as a large building in Windsor, Ontario, released to us in co-operation with the Army, have been acquired by us for training purposes. There is also increased hope that the flow of equipment, through War Assets Corporation, will increase sufficiently to be of value in setting up adequate accommodation in most of the standard trades.

Supervisory Training

On July 19 and 20 a conference was held in Ottawa, attended by representatives of all Regional Offices from Toronto east, and with the Assistant Director of Canadian Vocational Training in the chair.

The following delegates were present: D. Macneill—Halifax; I. Gould—Fredericton; H. Filiatrault, G. Maurice, C. Roy, F. Roch, G. Montminy—Montreal; H. W. Temple, H. Howard—Toronto; and J. H. Doige (Chairman), G. K. Smith, and G. M. Carty from Headquarters at Ottawa.

Much valuable discussion on promotional techniques, follow-up methods, interpretation of manuals and other subjects of vital interest to trainers took place. As a result of these discussions, several important decisions were reached, including the adoption of standard follow-up methods.

Labour Law

Recent Regulations under Dominion and Provincial Legislation

MERCHANT seamen, or their dependents, are now entitled under the War Measures Act to compensation in case of the death or injury of the seamen as a result of accident in the course of duty. For the loss of personal effects, Canadian merchant seamen formerly in ships of other than Canadian registry and personnel of ships of Canadian registry who were made prisoners of war must be paid compensation according to the maximum amounts payable at the time of their release from enemy camps. The Reinstatement in Civil Employment Act has been extended to persons on active service in any of the United

Nations who were previously employed in Canada.

Alberta has made general regulations governing apprenticeship and also rules for certain trades. Manitoba has issued regulations governing the barbering trade under the Barbers Act and the Fair Wage Act. The period of emergency training for coal miners in Nova Scotia has been extended from four to six months. Quebec has incorporated four additional apprenticeship commissions; for the automobile, printing, lithographic and shoe trades.

Dominion

Workmen's Compensation for Seamen

Regulations under the War Measures Act providing workmen's compensation for merchant seamen were made by Order in Council (P.C. 4755) of July 17, 1945, which was gazetted July 30 and effective August 1. A three-member Merchant Seamen Compensation Board to administer the Regulations has been appointed by the Minister of Transport and will serve without remuneration. The Board is to have exclusive jurisdiction over all matters pertaining to the Regulations, and its decisions are declared to be final and not open to review by any court. The Board, however, may review and alter or rescind any decision.

No compensation is payable under the Regulations to seamen or their dependents who are entitled to claim compensation under the Government Employees' Compensation Act or under any provincial Workmen's Compensation Act, or to seamen covered by the Order in Council (P.C. 104/3546) of April 30, 1942, (L.G. 1942, p. 691), and other Orders which provide benefits for seamen engaged in essential war activity or in other hazardous occupations. All other persons except pilots, apprenticed pilots and fishermen, employed on a ship registered in Canada or chartered by demise to a person resident or having his principal place of business in Canada, and engaged in home-trade or foreign trade, are eligible for compensation.

Seamen entitled also to claim compensation under the law of any foreign country must elect whether to claim compensation under such law or under the Regulations, and if they choose the latter, must waive their claim to compensation under the foreign law.

The system established is one of individual liability of the employer in case of death or injury to the seaman by accident in the course of employment. All costs of administration are to be charged against the employers on a basis to be decided by the Board. Except with the approval of the Board, no deduction from or abatement of the amount of compensation payable may be made unless money has been advanced by the employer on account of the injury. Neither may compensation be assigned or attached for payment of debts except with the Board's approval. A seaman may not waive his right to benefits under the Regulations.

The right to compensation is in lieu of all rights of action against the employer for compensation for an accident. But an action may be brought against any person other than the seaman's fellow employees, his employer, the servants of his employer or another employer subject to the Regulations. If a seaman or his dependents are entitled to bring such action, a choice must be made between instituting the action and claiming compensation under the Regulations. Where less is recovered by such action than would

have been received under the Regulations, the difference will be paid to the seaman or to his dependents. If the seaman elects to claim compensation, his right of action passes to the Board.

Notice of an accident must be given by the employer to the Board within 60 days. Compensation is not payable unless notice is given by the seaman as soon as practicable, and unless the compensation is claimed within six months from the date of the accident or, in a fatal case, within six months after the death of the seaman. However, failure of the seaman to give notice will not bar the right to compensation if the employer was not prejudiced by such failure.

Compensation

The Regulations provide compensation and medical aid similar to that provided by the provincial Workmen's Compensation Acts. No compensation is payable for an injury which does not disable a seaman for at least seven days, but if disability lasts seven days or more, compensation is payable from the date of the disability. An injury attributable solely to the serious and wilful misconduct of the seaman is not compensatable unless death or serious disablement results.

The scale of compensation is roughly similar to that under most provincial laws. Burial expenses up to \$125 may be paid and \$125 for the cost of transporting the body to the place of interment. Where burial expenses are paid by the employer under the Canada Shipping Act, they are to be deducted from the above amounts. A widow or invalid widower will receive a lump sum of \$100 and a monthly payment of \$45 together with \$10 for each child under 18. The payment for orphans will be \$20 monthly for each child under 18. A foster-mother looking after orphaned children will receive the same amount as a widowed parent. Total payments, exclusive of burial expenses and the lump sum of \$100, are not to exceed $\frac{2}{3}$ of the seaman's average earnings. However, it is provided that the minimum monthly payment to the surviving consort is to be \$45 or, if the seaman's average earnings are less than \$45, then the amount of the average earnings will be paid. Where the survivors are a widow or invalid widower and one child the minimum monthly payment is \$55 irrespective of the amount of earnings. An additional \$10 is payable for each additional child but where the seaman's average earnings were less than the amount of compensation payable at this rate, the compensation is to be the average earnings or \$55, whichever is the greater.

For purposes of calculating compensation, the maximum earnings that may be used as a basis are \$2,500 per annum.

For an invalid child compensation is to continue as long as the board considers it probable the seaman would have continued to support the child. Dependents other than a widow, invalid widower, or children, may be compensated by a sum reasonable and proportionate to the pecuniary loss suffered, the amount to be determined by the Board.

Payment for permanent total disability will be equal to $\frac{2}{3}$ of the seaman's average weekly earnings during the previous 12 months or in any shorter period during which he was employed. Permanent partial disability will be compensated by a payment of $\frac{2}{3}$ of the difference in earnings before and after the accident. A lump sum instead of weekly payments may be paid if impairment of earning capacity is not more than 10 per cent. Temporary total disability will be compensated by a payment of $\frac{2}{3}$ of the seaman's average earnings for the duration of the disability. The minimum payment will be \$12.50 weekly or earnings if less. Compensation for temporary partial disability will be equal to $\frac{2}{3}$ of the difference in earnings before and after the accident, and the minimum payment will be \$12.50 weekly or earnings if less, in proportion to the disability. As in fatal cases, average earnings which will be reckoned are \$2,500 per annum but a war service bonus will not be included in the calculation of the seaman's earnings.

The Board may change the mode of compensation payment, and may divert compensation from a widow who is living immorally or from a seaman who is not supporting his wife and children.

Medical Aid

Where compensation is claimed or is payable, a seaman, if so required by the employer, must be examined by a qualified medical practitioner provided by the employer. The Board may in turn require the seaman to be examined by a medical referee, the cost again being paid by the employer. The medical aid provided under the Regulations is similar to that furnished under provincial laws. It includes free medical, surgical and dental aid, hospital and skilled nursing services and the supply and upkeep of artificial members and dental appliances, all of which are to be paid for by the seaman's employer. Transport to a hospital, or to a physician, or to the seaman's home is also to be provided and paid for by his employer. No medical aid will be given to a seaman who is entitled to medical

aid under Part IV or Part V of the Canada Shipping Act or under other Acts, during the period and to the extent that medical aid is furnished under these Acts.

Compensation for Seamen's Loss of Effects

Seamen who have become prisoners of war are to be paid compensation for the loss of their personal effects in accordance with the maximum amounts payable at the time of their release from enemy prison camps. An Order in Council (P.C. 148/5045) of July 18, 1945, gazetted July 23, amends to this effect the Compensation to Seamen (War Damage to Effects) Regulations (L.G. 1944, p. 235), with respect to seamen who were employed on ships of Canadian registry or who, being Canadian merchant seamen, were formerly on certified ships of other registry.

Unemployment Insurance

Order in Council (P.C. 5758) of August 28, 1945, gazetted September 3, revokes P.C. 2222 (L.G. 1944, p. 450) which required every applicant for unemployment insurance benefits to produce satisfactory evidence of compliance with National Selective Service Mobilization Regulations.

Reinstatement Act Applies to Canadians in United Nations Forces

Order in Council (P.C. 5324) made August 2 and gazetted August 13, 1945, extends to persons on active service in the present war in the naval, military or air forces of any of the United Nations the provisions of the Reinstatement in Civil Employment Act (L.G. 1942, p. 920), provided such persons were employed in Canada before September 9, 1939.

Provincial

Alberta Apprenticeship Act

Provincial Advisory Committees have been appointed by Order 1 made July 4, gazetted July 31, 1945, for the following trades: carpentry, bricklaying, masonry, tile-setting and terrazzo working; plumbing, steam-fitting, gasfitting, sheet-metal working, painting, paper hanging, decorating, electrical trade, and plastering. Committees must consist of not less than five members and must include an equal number of employers and employees, and an official of the Department of Trade and Industry.

General regulations under this Act and regulations for specific trades were made August 9, 1945, gazetted and effective August 15.

Application for registration of an apprenticeship agreement must be made on the form provided by the Apprenticeship Board and forwarded to the Director of Apprenticeship. A minor must have the written consent of his parent or guardian. Each apprentice must produce a certificate of physical fitness for the job. An agreement made in triplicate, must make provision for the termination of the contract during the three months probationary period at the wish of either the apprentice or employer.

If an apprentice fails to attend the prescribed classes, he forfeits his allowance for the period of non-attendance unless reasons satisfactory to the director are produced. Training under a person other than the employer, and other changes in the training program may be arranged with the approval of the board. If an employer fails to provide an apprentice with at least 1,800 hours' work during any 12 consecutive months, in-

cluding time spent at day-classes, the prescribed hours must be completed before the next 12 months' period of apprenticeship is begun. If there is unsatisfactory progress, the period may be extended until the Board is satisfied.

Each apprentice must avoid damage and waste of tools and goods, give satisfactory reasons for any absence from employment, and notify the director immediately he stops working for the employer to whom he is apprenticed.

Every employer must be registered by the director after his trade becomes a designated trade, notify the director when employing an apprentice, provide adequate training for each apprentice, keep him employed as long as work is available, pay the rates of wages set out in the agreement, co-operate with the director in the transfer of an apprentice, submit an annual report to the board regarding the progress of each apprentice, and notify the director when he intends to suspend or terminate an agreement.

The director must furnish each apprentice with an identification card. A temporary transfer of employment may be arranged by the Trade Advisory Committee or the director, but each transfer must be approved by the board.

Where a dispute arises between the employer and apprentice, either one may report it in writing to the director who will notify the Trade Advisory Committee, which may negotiate a settlement of the dispute. If the committee fails, the Board has power to decide the matter.

Both employers' and workers' representatives on a Trade Advisory Committee are to represent their particular trade. Each Committee may make rules regarding the age and educational qualifications of apprentices, the apprenticeship period, ratio of apprentices to journeymen, technical school curriculum, schedule of training, trade tests and examinations, hours of employment and rates of wages, and other related matters. The Board, after consultation with the Minister of Education, may arrange for technical school and other educational classes to be taken by apprentices. A certificate of qualification must be issued to each apprentice after he has successfully completed training and examinations.

Trade regulations have been made for the following: bricklaying and masonry, the electrical industry, carpentry, plumbing and steamfitting, sheet-metal industry, plastering, painting and decorating.

Any person between 16 and 21, except in bricklaying and masonry where the maximum age is 20, may become an apprentice in these trades. On the recommendation of the Trade Advisory Committee, the Apprenticeship Board may declare eligible any person over the maximum age, or any person who has served in the armed forces since September 1, 1939.

The extent of schooling required for apprenticeship in the trades varies as follows:

Bricklaying and masonry, carpentry, plumbing and steamfitting—Grade 8 or its equivalent.

Electrical industry—Grade 10 or its equivalent.

Sheet-metal industry, plastering, painting and decorating—Grade 9 or its equivalent.

The apprenticeship term is five years in plumbing and steamfitting and the sheet-metal industry, four years in bricklaying and masonry, the electrical industry, carpentry, and plastering, and three and one-half years in painting and decorating. The period in each case includes three months' probation. Where a person produces a certificate from a technical or vocational school approved by the Board, or has had experience in the trade, the period of apprenticeship may be reduced by the Board.

The number of apprentices who can be employed varies in each trade with the number of journeymen employed. In determining the number that may be employed, "Apprentice" does not include one temporarily employed by arrangement with the director to learn a branch of the trade not carried on by the employer to whom he is apprenticed. In bricklaying one apprentice may be employed for every three journeymen. In the other trades, one apprentice may be employed if one jour-

neyman is engaged and thereafter in the electrical industry one apprentice for every two journeymen; in carpentry, plumbing and steamfitting one for every five journeymen; in sheet-metal work one for every three journeymen; in painting and decorating one apprentice for every four journeymen; and in plastering one apprentice may be engaged for every journeyman.

Each apprentice must attend educational classes between November 1 and April 30 at a technical school for the full annual period prescribed by the Board and the Department of Education. Technical classes must include instruction in skills set forth in the regulations.

During apprenticeship an employer must give every apprentice practical instruction and training in all branches of the trade necessary to develop a practical and skilled journeyman, including the preparation of material for installation. Details regarding work process are laid out in the regulations. Before the apprentice is granted an annual certificate of progress or a final certificate of qualification as a journeyman, he must pass trade tests and examinations prescribed by the Board on the advice of the Trade Advisory Committee.

The work-day and work-week of an apprentice must be the same as those for journeymen. Apprentices must be paid wages which are a percentage of the journeyman's prevailing wage; the minimum percentage for each period and for each trade are set out in the regulations. All increases, except the first, must be subject to annual certificates of progress, or the receipt of satisfactory reports from the employer or the training school. Failure on the part of the employer to submit an annual report is evidence of satisfactory progress on the part of the apprentice.

British Columbia Shops Regulation and Weekly Half-Holiday Act

Motor-vehicle "shops" in Prince Rupert have been granted exemption from certain weekly half-holiday provisions of this Act by an Order of July 17, 1945, gazetted July 26. Previously, shops in Vancouver, Victoria and suburbs, New Westminster, Nanaimo and within a 10-mile radius, had been granted such exemption (L.G., 1942, p. 797). Such exemption means that motor-vehicle shops in these places are not required to observe the weekly half-holiday fixed by municipal by-law; they must, however, observe a half-holiday on Saturdays, closing at 1 p.m. and not reopening until Monday morning. No

employee may remain later than 1:30 on Saturday except for emergency repairs.

Automobile service stations, which are governed by a 1931 Order (L.G., 1931, p. 1285) exempting them from the provisions of the Weekly Half-Holiday Act are declared not to include motor-vehicle shops by a related Order also gazetted on July 26, 1945.

Manitoba Barbers' Act

Regulations under the Act gazetted July 28, 1945, repeal all earlier regulations. They provide for a licensing system for master barbers, journeymen, and improvers in order to insure a proper standard of workmanship and to protect public health. The Regulations apply to certain cities and towns and are administered by the Minister of Labour.

A master barber's licence authorizes the holder to carry on business as a master barber employing journeymen barbers and barbering improvers, or as the proprietor of a business either alone or in partnership, providing that only one improver may be employed for every three journeymen in any one shop. Where two or more persons are in partnership, at least one must hold a master barber's licence, and all others must hold a journeyman's or improver's licence.

The proprietor of a shop who holds a barber's licence and whose shop is equipped with two or more chairs, may employ one learner, with the approval of the Minister. Application to employ such a learner must be made to the Department of Labour accompanied by the proposed schedule of wages.

A journeyman's licence may be issued to any person who has completed 18 months as an improver in a licensed shop and who has passed the prescribed examination.

A person is eligible for an improver's licence only after he has completed at least 1,000 hours of training in a barber school operating under the Trade-Schools Act, and has completed, in addition, at least 2,000 hours of training in a barber shop under licensed supervision. After passing this examination, the candidate may then be employed as an improver for 18 months after which he must try an examination for a journeyman's licence.

Inspectors of the Department of Labour are to be inspectors under the Act. If an inspector reports to the Minister that condi-

tions are unsatisfactory, the Minister may require the master barber to appear before the board to plead against the suspension of his licence. A master's licence may be revoked, cancelled or suspended if any person employed by him as a barber is found not to hold a valid subsisting licence. Any licence may be suspended for failure to comply with the regulations.

These regulations apply to the Greater Winnipeg Water District, the cities of Brandon and Portage la Prairie, the towns of Beausejour, Birtle, Boissevain, Carberry, Carman, Deloraine, Emerson, Flin Flon, Gladstone, Grandview, Hartney, Killarney, Melita, Minnedosa, Morden, Morris, Neepawa, Oak Lake, Rapid City, Rivers, Russell, Souris, Stonewall, Swan River, The Pas, Virden and Winnipeg Beach.

Nova Scotia Coal Mines Regulations (Wartime Emergency) Act

The period of instruction of apprentices under the coal mining apprenticeship scheme was extended from four to six months by an Order in Council of July 7, 1945, gazetted July 11 (L.G., 1944, p. 527). Upon completing the course and being at least 18 years old, an apprentice will be granted a temporary first-class miner's certificate.

Quebec Apprenticeship Assistance Act

Four additional apprenticeship commissions have been incorporated under the Act: the automotive trades in Montreal and district; the lithographic industry in the province; printing in the Montreal district; and the shoe industry in the province.

Quebec Public Building Safety Act

An Order in Council (3212) of August 17, 1945, gazetted August 25, substituted new regulations under the Act for those trades in 1939 concerning "safety measures respecting apparatus under steam pressure", and the section under "cinematographic halls" dealing with defective wiring. Among the new provisions is the stipulation that the inspector must require the production of certificates showing that the Pressure Vessels Act and the Electricians and Electrical Installations Act are being complied with.

Conference of Canadian Institute on Public Affairs*

CANADA'S growing status as a world power, and, consequently her increased responsibility for assisting in solving world problems, was offered as justification for selecting the subjects discussed at the Conference of the Canadian Institute on Public Affairs held at Geneva Park, Lake Couchiching, Ontario, August 18 to 25.

The general theme considered by the Institute was "Canada and the United Nations". "The Promise of San Francisco" was reviewed by such well-known Canadians as M. J. Coldwell, M.P., Gordon Graydon, M.P. (members of the Canadian Parliamentary Delegation to San Francisco) and Hon. Paul Martin, Secretary of State. In addition, Miss Elizabeth Armstrong, of the State Department at Washington, who had "a ring-side seat at San Francisco", commented upon the administrative machinery provided by the United Nations Charter and the need for urgency in completing its organization because of the unexpectedly sudden collapse of Japan.

Other speakers and their subjects were: Frank Munk, Director of Training for UNRRA, "The Political and Economic Reconstruction of Europe"; Prof. G. B. Watson, Columbia University, "Human Nature and Enduring Peace"; Prof. Gwen. M. Carter, Smith College, "Some Aspects of Canadian-American Relations"; F. A. Brewin and D. R. Michener, M.P.P., "Britain's Role in the Post-War World"; R. S. Cavell, Vice-President, Automatic-Electric, Limited, Toronto, "The New World Order and the Far East"; L. K. Rosinger, Foreign Policy Association, New York, "The Future of Japan" and "Soviet Policy in the Far East"; Prof. H. M. Cassidy, University of Toronto, "Toward More Adequate Social Security"; Stuart Armour, Toronto, "Canada's Postwar Employment Problem"; Mason Wade, American author and journalist, "A View of French Canada"; Prof. J. A. Corry, Queen's University, "The Constitution and the Problems of Peace".

Question and answer periods followed each of the addresses and round-table studies were undertaken each day of the Conference on (1) "Post-war International Organization", (2) "Dominion-Provincial Relations", (3) "Psychology of Social Change" and (4) "Canadian-American Relations". The National Film Board of Canada provided a series of documentary films visualizing certain phases of social and economic reconstruction in Europe and America. About 250 men and women, most of them from Ontario, with smaller numbers from Quebec and the United States attended the Conference.

"The Promise of San Francisco"

Dealing with the proposals made by the Conference at San Francisco, Mr. M. J. Coldwell said that nations must develop a willingness to replace their assertions of "individual sovereignty" by a concept of world co-operation, and to forego their prejudices, suspicions and claims of race superiority for a mutual respect for each other. While admitting that, in his opinion, the San Francisco Charter was not perfect, it embodied an earnest attempt by the United Nations to provide for the peaceful adjustment of international disputes that otherwise might lead to war. The Charter provides for a general assembly comprised of representatives from each of the signatory nations; the World Security Council; the Social and Economic Council (in the character of which Canada played a noteworthy part); the International Court of Justice; the Secretariat; and the Trustee Council.

While the General Assembly was the largest and most representative body to be set up, it would be mainly a forum for the discussion of world problems and for making recommendations for their solution, Mr. Coldwell pointed out. The Security Council, on the other hand, would be empowered to take definite and prompt action to prevent war and to curb aggressor nations. This Council would consist of eleven members, one delegate from each of the "Big Five" nations, who would have permanent seats and six chosen from nations making notable contributions to international peace and security, but having due regard to equitable geographical distribution. The Council will be empowered to set up a general military staff and to give direction to military

*The Canadian Institute on Public Affairs was established by the National Council of the Y. M. C. A. in 1932 to provide a broader instructional course for their secretaries in training. From the first, however, business and professional men and women were invited to attend the Annual Conference at Geneva Park. The average attendance at the 15 Conferences has been about 250. A strong committee of business and professional men plan and supervise the meetings. Three chairmen have given leadership since 1932, the late Dr. W. L. Grant, the late Sir Robert Falconer, and the present chairman, Dr. M. W. Wallace, former Principal of University College, Toronto.

action that may be deemed necessary to prevent acts of aggression. Member nations will not necessarily be called upon to provide armed assistance. Canada, for example, might be asked to supply food or military equipment.

Continuing, Mr. Coldwell asserted, "We must remove the causes of war. . . . Two out of three of the world's population never had enough to eat." Something must be done to correct such basic causes of strife if only as a matter of self interest, he concluded.

Mr. Gordon Graydon asserted that, "No nation in the world has less to gain by war than Canada and more to gain by peace." Isolationism, therefore, "will not fit into our plans for future peace and security" and San Francisco "must mean that Canada is ready and willing to pull her weight in world affairs." He declared that "the Economic and Social Council holds out some ray of hope that the nations of the world will yet beat their swords into ploughshares. . . ." The inclusion of the Economic and Social Council as one of the principal organs "reflected the stress and importance placed upon the preventive side of war, as opposed to the curative or punitive side of it." He commended highly the work of the Canadian economic experts, especially those who were advisers to the committee that dealt with social and economic problems.

Hon. Paul Martin spoke approvingly of the democratic approach made by the United Nations in their efforts to create machinery for the prevention of future wars. This, he pointed out, was in contrast to the methods followed in establishing the League of Nations.

After enumerating the principles that actuated the sponsoring powers in calling the San Francisco Conference, and defining the purposes of the organization, Mr. Martin emphasized the importance to Canada of the Social and Economic Council provided by the Charter. A notable objective, he claimed, "is social and economic security for all. . . . If there is poverty abroad, it can only lead to mass unemployment in other countries. . . . The United Nations organization will seek to promote higher living standards and high and stable levels of employment." As an illustration of what could be accomplished, he commended the work of the I.L.O. which, he said, "for a quarter of a century has stood like a beacon in international affairs," and which has expressed its desire officially to be associated with the new organization. Mr. Martin referred to the tripartite organization of the I.L.O. "by virtue of which employers' and workers' representatives enjoy equal status with the representatives of governments." He continued, "the success of the Social and

Economic Council will depend upon the desire of the member nations to see it succeed." But he was of the opinion that "if it finally resolves itself into an Advisory Board, whose advice goes unheeded, or merely a fact-finding organization, it will be an impotent influence upon world economic affairs." "Canada", he said, "is determined to give her full support in future negotiations to the establishment of satisfactory relationships between the United Nations and the I.L.O. . . ."

Problems Confronting UNRRA in Europe

UNRRA will not take part in reconstruction in Europe, but will confine its efforts to providing immediate relief. Even in this delimited field, its task is rendered difficult by differences in political and economic conditions in the several countries that had been overrun by the Germans, asserted Mr. Frank Munk, Director of Personnel Training for UNRRA. He asserted that "next winter will be the worst Europe has ever known, not excluding the years of German occupation. . . . Never has destruction of productive activities and productive organization been so widespread". This year's harvests will be much below normal, the production of coal will fall short of urgent requirements, overland transportation is in a chaotic condition and there is "absolutely no agreement among the great powers" in the matter of providing speedy relief, Mr. Munk said. He described in some detail the effect of varying political organizations in the matter of getting relief to the centres where it was urgently needed and expressed concern at the delay in the setting up of the International bank and in providing staffs for other security organizations.

Canadian-American Relations in the Pacific

In the past Canada has been slow to recognize the implications of her geographical position as a Pacific power, in spite of her trade and cultural contacts with trans-Pacific nations, asserted Prof. Gwen. Carter of Smith College.

Wartime developments have demonstrated clearly the necessity for co-operation with the United States in the formation of an integrated plan for the defence of the northwest Pacific. Similarly, relationships with the two Dominions in the South Pacific should not be overlooked. She contended that these "impinge upon American interests and hence become a part of Canadian-American relationships". She urged the development of educational exchanges, better planned trans-Pacific trade and communications and an understanding with Russia for air transport to Asia by the northern

route. Further, she suggested that Canada should be willing to co-operate in a joint industrial development of her great northwest and the Yukon and to take some responsibility for the harmonious relationships of Great Britain, Australia, New Zealand and the United States in the South Pacific.

Canada's Dependence on World Trade

Mr. Stuart Armour, Economic Consultant, of Toronto, detailed some of the economic and industrial problems confronting Canada in the postwar era. Her dependence on export trade created difficulties in the world impoverished by war. Britain, her best pre-war customer, was no longer a creditor nation and was planning to reduce her imports, while coincidentally increasing her exports of manufactured goods, he said. Mr. Armour suggested as remedial measures for Canada, prompt and bold action, greatly increased industrial research, the development of new industries to process more and more of her raw materials and new markets in which to dispose of them, plus the proposals made in the Government's White paper.

Other Subjects Debated by Conference

The addresses given by Captain R. G. Cavell, Toronto business man, and L. K. Rosinger, of the Foreign Policy Association of New

York, on phases of the Far Eastern problem evoked much interest at the Conference. Captain Cavell spent 22 years in Japan, China and India and both he and Mr. Rosinger have long been painstaking students of Eastern politics and customs.

Prof. G. B. Watson's address on the psychological causes of war was a somewhat unique presentation of an old problem and, in the main, centred on the need for checking the development of racial prejudices and "devil complexes" in the minds of youth.

Mason Wade, Harvard Research scholar, author and journalist, who has spent long periods in Quebec and the New England States, presented an objective analysis of French Canada as related to the remainder of the Dominion.

F. A. Brewin and D. R. Michener, K.C., Toronto lawyers, gave brief reviews based on their personal observations in Britain of the role she is likely to play in the Post-war world.

Professors Cassidy and Corry outlined the present social security situation in Canada, and the bearing of the Canadian Constitution on the problems of peace, respectively.

Digests of all the addresses given at the Conference will be published in book form by the National Council of the Y.M.C.A. later in the year.

*Activities of Unemployment Insurance Commission**

Analysis of Claims and Benefit—Insurance Registrations—The Fund— Proposals Laid Before Dominion - Provincial Conference — Amendment to Contribution Regulations — Decisions of Umpire

DURING July a total of 10,886 claims for Unemployment Insurance benefit were filed in local offices throughout Canada. This is almost identical with the number filed in June (10,857) but represents a considerable increase over the 3,106 claims registered during July, 1944.

The number of persons who signed the live unemployment register during the last six working days of July shows a slight increase over June, being 19,224 (10,737 males and 8,487 females) compared with 17,242 (9,230 males and 8,012 females). During the same period in July, 1944, a total of 4,488 persons (3,308 males and 1,180 females) signed the live unemployment register.

Claims adjudicated at Insurance offices during July totalled 10,053 of which 8,528 were considered entitled to benefit and 1,525 not entitled to benefit. The chief reasons for non-entitlement were: "voluntarily left employment without just cause" (626 cases), "insufficient contributions while in insurable employment" (565 cases) and "discharged for misconduct" (166 cases).

A total of 18,257 persons received one or more benefit payments during July, compared with 16,921 in June and 4,753 in July, 1944. These persons were paid a total of \$602,003 for 317,628 days in July, \$579,326 for 303,443 days in June and \$135,256 for 71,035 days in July of last year.

The average duration of the unemployment compensated was, then, 17.4 days in July, 17.9 days in June and 14.9 days in July, 1944. The average amount paid per beneficiary was \$32.97 in July, \$34.24 in June and \$28.46 in July last year. The average amount paid per compensated day of unemployment was \$1.90 in July, \$1.91 in June and \$1.90 in July, 1944.

Unemployment Insurance Fund

Total employer-employee contributions during July amounted to \$5,094,565.65. This represents a decrease of 4.5 per cent from July

last year when total employer-employee contributions were \$5,334,680.55.

Benefit payments in July this year amounted to \$601,135.66, as compared with \$134,432.41 in the corresponding month last year, representing an increase of 347.2 per cent.

Total revenue for July was \$6,326,823.78. After deducting benefit payments the net increase to the Fund during the month was \$5,725,688.12.

Insurance Registrations

Reports received from Local Offices of the Unemployment Insurance Commission showed that as at July 31, 1945, 2,588,434 employees were issued with Insurance books and had made contributions to the fund at one time or another since April 1, 1945, an increase of 128,748 since June 30, 1945.

As at July 31, 1945, 144,733 employers were registered as having insurable employees, an increase of 1,531 from June 30, 1945.

Registration as at July 31, 1945, by regions follows:—

TABLE 1—REGISTRATIONS AS AT JULY 31, 1945

Region	Employers Registered (Live File)	Insured Persons Registered
Maritimes	11,437	190,499
Quebec	39,172	809,674
Ontario	53,658	1,022,482
Prairie	26,085	341,591
Pacific	14,381	224,188
Total for Canada.	144,733	2,588,434

Compliance With Mobilization Regulations No Longer Essential for Benefit

By virtue of a recent Order in Council (P.C. 5758, August 28), male applicants for unemployment insurance benefit may no longer be required to produce evidence of compliance with the National Selective Service Mobilization Regulations. The new order revokes P.C. 2222 of March 30, 1944 (L.G., 1944, p. 502).

*Material in this section is provided by the Unemployment Insurance Commission and the Dominion Bureau of Statistics.

Proposals Laid Before Dominion-Provincial Conference

Elsewhere in this issue (p. 1280) appears a summary of the Dominion proposals laid before the Dominion-Provincial Conference on Reconstruction at its opening session.

The Dominion brief contains proposals for important changes in coverage under the Unemployment Insurance Act, and for a comprehensive supplementary scheme of Unemployment Assistance.

The changes in the Act would extend coverage to all employees in Canada as rapidly as possible; while the Unemployment Assistance scheme would in the meantime provide immediate protection for all able-bodied unemployed who are at present not covered or who have exhausted their benefit rights.

The effect of the proposals would be that the Dominion Government would undertake to provide the assurance of either a job or of a subsistence income in lieu of a job for all who are able and willing to work.

The Brief also proposes extensions in the services provided by the National Employment Service, including organized vocational guidance, and specialized work in the rehabilitation and placement of handicapped workers.

Change in Contribution Regulations

Section 10 of the Unemployment Insurance Contribution Regulations has been revoked by Order in Council P.C. 5562 dated August 21, effective September 8, 1945. In order to express the intent of the Act at greater length and to re-arrange and clarify some of the sub-sections, particularly in connection with contributable holidays, the following has been substituted therefor.

10. (1) Where the pay period is monthly or semi-monthly and a person is employed on each working day in the pay period, contributions shall be paid for.

- (a) twenty-six or thirteen days respectively in each pay period; or
- (b) the actual number of working days in a particular pay period and any day or

days in that pay period, as recognized as a holiday, for the employed person, by the employer or by statute or custom, but an employer may pay contributions in respect of a particular employed person only as provided in paragraph (a) or (b) of this subsection.

(2) Where the pay period is other than monthly or semi-monthly and a person is employed on each working day in the pay period, contributions shall be paid for each working day during the pay period and for each day or days in that pay period, recognized as a holiday, for the employed person, by the employer or by statute or custom.

(3) Where a person is not employed on each working day in a pay period, contributions shall be paid for each day on which work is done by him, or for which remuneration is payable to him whichever number of days is greater, subject to the provisions of sections eleven and twelve of these Regulations.

(4) In any case not coming within the provisions of sub-section one, two, three or five of this section, the employer shall submit to the Commission for approval a proposal for a method of determining the number of daily contributions payable, and any method proposed by an employer and approved by the Commission shall have effect as if it were specifically provided for in these Regulations and the Commission may, from time to time, rescind such approval.

(5) Where in any week, a person is employed on each of the working days or shifts which constitute the full week's work for any grade or class or shift in an occupation, or at a factory, workshop or other premises of an employer, contributions shall be paid for six days, notwithstanding the provisions of subsections one, two and three of this section.

(6) Subject to the provisions of paragraph (a) of subsection one of this section, in no case shall contributions be payable in respect of any pay period, for more than the number of days for which provision is made in the insurance book for such period.

Digest of Selected Decisions of the Umpire Under the Unemployment Insurance Act, 1940

THE Unemployment Insurance Commission submits the following digest of selected decisions of appeals heard by the Canadian Umpire under the provisions of the Unemployment Insurance Act, 1940, and its amendments. These cases are a continuation of the series commenced in the April issue of the *LABOUR GAZETTE*, page 534, and continued

in the May issue, page 773, the June issue, page 883, July issue, page 1032, and the August issue, page 1216. They are selected on the basis of their possible precedent value for the determination of questions which may from time to time confront Insurance Officers and Courts of Referees. In addition, they provide a medium for presenting to employ-

ers and employees alike, brief statements of the principles upon which insurance against unemployment operates in Canada and of actual facts in specific cases coming before the Umpire on appeal.

As announced in the earlier issues, the selected decisions are being published in two series: (1) Benefit cases, designated CU-B and (2) Coverage cases, CU-C.

CU-C.7.

(July 26, 1945)

HELD: Persons employed as office clerks, janitors, handymen and carpenters by the owner of several houses and apartment houses leased to tenants, are not employed in domestic service within the meaning of paragraph (f) of Part II of the First Schedule to the Unemployment Insurance Act, 1940.

TEXT OF DECISION

Dr. X of the City of Y employs a number of persons in various capacities in and about five apartment buildings and sixty or sixty-five houses in the City of Y which he owns or in which he is interested as trustee of an estate. In 1943 Auditors of the Commission called at the office from which these properties are managed and learned that Unemployment Insurance contributions were not being made.

During the next several months considerable correspondence was exchanged and further visits made by the Auditors. Dr. X refused to pay contributions under the Unemployment Insurance Act contending that he was not engaged in business and that the employees were engaged in domestic service, an excepted employment.

The matter was finally brought to a head in April, 1944, when the Commission gave its consent, pursuant to Section 70 of the Act, to the institution of summary conviction proceedings. An Information was laid and the case set down for hearing in June, 1944. After a number of adjournments, the case was argued before the Magistrate in November, 1944. During the course of the hearing, Counsel for Dr. X argued that the employment of Dr. X's employees was employment described by paragraph (f) of Part II of the First Schedule to the Act and thus excepted from the operation of Part II of the Act—or in other words—that the employment was not insurable and consequently that contributions were not required. Counsel argued that the employees were engaged in domestic service, an excepted employment, and that Dr. X's activities in connection with the management of the properties was not a "business" within

the meaning of paragraph (f) of the Schedule.

Counsel for the Commission argued that in view of the provisions of Section 46 of the Act, the Commission alone, subject to an appeal or reference to the Umpire, has authority to determine a question as to coverage under the Act and that the proper procedure would be to adjourn the case pending determination by the Commission of the question whether the employees were engaged in insurable employment. The Magistrate then adjourned the proceedings.

In accordance with Section 49 of the Act, the Commission referred to me for decision, the question whether during the relevant period, that is the period beginning July 1, 1941, and ending May 31, 1943, the employees of Dr. X were engaged in such employment as to make them insured persons.

Section 13 of the Unemployment Insurance Act is in the following terms:

Subject to the provisions of this Act, all persons who are employed in any of the employments specified in Part I of the First Schedule to this Act, not being employment specified as excepted employment in Part II of that Schedule shall be insured against unemployment in manner provided by this Act.

The first question is whether the employment is specified in Part I of the First Schedule of the Act. During the course of the hearing, it was admitted that the persons involved are employed under a contract of service and there was no argument on the point. In any event I think there can be no doubt that they are so employed.

Under Section 13 the next question to be determined is whether the employment is specified as an excepted employment in Part II of that Schedule, and that question revolves about the correct interpretation of Paragraph (f) of that Part of the Schedule which lists as an excepted employment—

- (f) Employment in domestic service, except where the employed person is employed in a club or in any trade or business carried on for the purpose of gain.

It is necessary to determine whether the employment is "employment in domestic service". If the answer to that question is in the negative then no further question arises and the employees are engaged in insurable employment, but if the answer is in the affirmative, it then becomes necessary to determine whether Dr. X is engaged in a trade or business carried on for the purpose of gain. In other words if it were found that the employees were engaged in domestic service, the employment would still be insurable employment if it were then decided that the activities in connection with the management

of these properties is a trade or business carried on for purpose of gain. The following is a list of the persons involved.

A	D	G	K
B	E	H	L
C	F	J	

The facts are quite clear. Dr. X is engaged in the management, and presumably profitable management, of a very considerable number of apartment blocks and houses. In order to carry on this rather large undertaking, he operates a small business office in one of the properties where the books are kept, payment of rentals is supervised and generally those things done which are necessary for the upkeep and management of the properties. The office is supervised or managed by a Mr. Z who is not one of the employees to which this reference refers. Z is assisted by H who is one of the employees affected. His duties as a general assistant seem to relate principally to bookkeeping, banking, buying, looking after supplies, and the performance of odd jobs as required. J is engaged on duties generally corresponding with those of H.

Then the next group of employees necessary for the successful operation of the properties includes A, B, E and G and to some extent C. These people are engaged in performing janitor services in the apartment blocks. They look after the fires, empty the ashes, remove garbage, mow the lawns and generally do the things normally expected of a janitor in an apartment block.

Then the third group includes D, K, and again to some extent C, also mentioned in the previous group. During the hearing those in this group were referred to as handymen, and I think the description quite apt. These men work about the various properties, doing carpentry, decorating, repairs, snow shovelling, and generally whatever is necessary to keep the properties in a proper state of repair.

There are two persons in the list of employees given above who are not included in the three groups, namely, L and F. The Commission during the course of the proceedings abandoned any claim in respect of L as it appears that he is not an employee and perhaps falls in the category of an independent contractor. Similarly it was shown quite clearly that F is engaged almost exclusively in the personal services of Dr. X and attends to his personal requirements, and quite clearly he comes within the term "domestic service", whether it be given a narrow or wide interpretation. The difference between the service rendered by F and the other employees is worth noting and will be mentioned again.

Turning then to a consideration of the nature of the duties and services performed by the three groups, that is the office staff, the janitors and the handymen, certain factors are common to all groups. While on occasion any of them may perform some personal service for Dr. X at his own residence or elsewhere, that is not the general nature of the work. In all cases the work in these various categories has to do with the management and up-keep of the numerous properties leased to the tenants of the owner. While copies of the standard lease in use in rental of the houses or apartments were not put in evidence, it is clear that the owner or trustee, Dr. X, leases the properties to tenants subject to the usual conditions. The landlord keeps the houses and apartments in an habitable condition, and in respect to the apartments, undertakes in addition, as is customary, to provide the usual janitor services and for these purposes he engages the staff already described. There is no direct relationship between Dr. X's employees and his tenants, the employees all being responsible only to Dr. X, the employer, for the satisfactory performance of their duties.

The employees do not ordinarily render any personal service to the employer and are not resident in or part of his domestic establishment, although some of them are his tenants. Does this employment come within the meaning of "employment in domestic service" as that term is used in paragraph (f) of Part II of the First Schedule to the Act? Counsel for Dr. X cited a number of interesting English and Irish authorities in which a similar term in the Unemployment Insurance Act of Great Britain was under discussion as well as some other cases where a more or less similar problem arose. Those authorities are useful and due regard must be had to the decisions where the conditions are analogous. Considerable stress was laid on the fact that the terminology of the British Act and of the Canadian Act is almost identical, but we must not lose sight of the fact that the term in question is one appearing in the Canadian Act, and the Act must be interpreted in light of Canadian conditions.

The Act itself does not expressly provide an answer. The term is not included in the interpretation section and no special or technical meaning is ascribed to it. The term "domestic service" must therefore be given its usual meaning under the conditions which exist in this country. For such light as they may throw on the question, I shall refer briefly to some of the cases cited by Counsel for Dr. X. Undoubtedly the leading case to which my attention was directed is *in re Junior Carlton Club* (1922) 1 K.B. 166, and

it does contain a good statement of the essential characteristics of domestic service which in large part is applicable to the conditions existing in this country. Roche J. put it this way "But if I had, in my own words, to describe what are the characteristics of such a servant I should express it, and do express it for present purposes, in the way that I sought to express it in the course of the argument in this case—namely, that domestic servants are servants, whose main or general function it is to be about their employers' persons or establishments, residential or quasi-residential, for the purpose of ministering to their employers' needs or wants, or to the needs or wants of those who are members of such establishments, or of those resorting to such establishments, including guests".

In that case Roche J. had to decide whether servants of a club were engaged in domestic service within the meaning of that term as used in the British Unemployment Insurance Act, and after stating his opinion as to the characteristics of such a servant, went on to find that the club servants were engaged in domestic service. I have some doubt that the British "club" is in all respects comparable with the majority of "clubs" in this country but in any event the statement of Roche J. is not so broad as to include the employees of Dr. X. The essential elements required by Roche J. are entirely lacking in this case. Here there is no element of personal service and the service was not rendered at the employer's "establishment". True the services were rendered in and about the premises owned by the employer but in no other sense were these premises the residential or quasi-residential establishments of Dr. X. Rather they were the residences of Dr. X's tenants and there was no contractual relationship whatever between Dr. X's employees and the tenants.

My attention was also directed to *in re Vellacott* (1922) 1 K.B. 466, *Cameron v. Royal Ophthalmic Hospital* (1940) 4 A.E.R. 439 and *Pile v. Minister of Industry and Commerce* (1942) I.R. 1932, but these cases add nothing to the principle so clearly enunciated in *in re Junior Carlton Club*. As a matter of fact the *Pile* case while purporting to follow the principles stated by Roche J. in the *Carlton* case seems to have lost sight of those essential elements of personal service to the employer or to those resorting to the employer's residential or quasi-residential establishment. In that case, as in the case before me, the establishment was the "establishment" of the employer only in the sense that he was the owner and that clearly was not the sense in which Roche J. used the term in *in re Junior Carlton Club*.

In the case before me I find that both of the essential factors necessary to establish that the employment was employment in domestic service are entirely lacking. It is amply clear that the employees were not engaged in ministering to their employer's needs or wants or to the needs or wants of those resorting to the residential or quasi-residential establishment of the employer and it is equally clear that the various houses and apartments were not the residential or quasi-residential establishments of the employer.

I therefore find that during the period beginning July 1, 1941, and ending May 31, 1943, Messrs. A, B, C, D, E, H, J, K, and Mrs. G were not engaged in "domestic service" within the meaning of that term as used in paragraph (f) of Part II of the First Schedule to the Unemployment Insurance Act, 1940, and that consequently the employees mentioned were not employed in an excepted employment and that they were engaged in employment specified in Part I of the First Schedule of the Act and that they were insured against unemployment as provided by Section 13 of the Act.

(Sgd.) LUCIEN CANNON,
Umpire.

CU-B.7

(October 9, 1943)

A claimant, who was laid off temporarily for three weeks due to lack of work, made a claim for benefit, but stated that she would not be available for three weeks because she intended to wait until the firm where she was working resumed operation,—HELD: the claimant is not available for work within the meaning of Section 28 (iii) of the Unemployment Insurance Act, 1940.

The material facts of the case are as follows:—

The claimant, a single woman aged 49 years, was employed continuously as a milliner by a hat shop from February, 1936 to July 17, 1943. She was laid off temporarily for three weeks due to lack of work.

Upon making her claim at a local office, the claimant signed the following statement: "Regarding my claim for insurance benefits I declare that I am not available for work, for three weeks from this date, because I intend to wait until the place where I was working before will open again."

The Insurance Officer disallowed her claim on the grounds that she was not available for work (Section 28 (iii)). There was no question of any offer of suitable employment, temporary or otherwise.

The claimant appealed from this decision to the Court of Referees.

The Court of Referees did not uphold the Insurance Officer's decision and allowed the claim in a majority decision, the Chairman dissenting. The Court held that the claimant had just cause for refusing temporary employment elsewhere. The Chairman held, however, that the claimant was not available for work as she preferred to wait to re-enter her old employment after the period of slackness was over.

The Insurance Officer appealed to the Umpire from the decision of the Court of Referees.

DECISION

The Umpire's decision was that the claim should be disallowed and gave as his reasons that:—

Section 28 (iii) of the Unemployment Insurance Act, 1940, must govern the case. A Claimant, in order to receive benefit, must be capable of and available for work but unable to obtain suitable employment; the claimant was not available for work, upon her own written admission.

*Administration of Insurance Branch, Unemployment Insurance Commission**

THE Insurance Branch of the Unemployment Insurance Commission is engaged specifically in administering those provisions of the Act which are intended to apply insurance principles and techniques to the uncertainties of unemployment. The duties involved in this task fall very readily into the following four groups, which operate as separate divisions under the direction of the Chief Insurance Officer. Under the administrative procedure adopted by the Commission, whereby all operations are conducted through five regional offices, the Insurance divisions at the Head Office maintain parallel contact with the equivalent divisions of the branch in the regional offices, for the purpose of supervising the duties allotted to them in connection with the insurance features of the plan.

1. Coverage Division

The scope of the Unemployment Insurance scheme is defined by a series of limiting conditions, specifically enumerated in the Act, which have to be fulfilled either by the persons or by the employment which it is intended to include within the plan. The Head Office Coverage Division is responsible for conducting the necessary research work to provide the background for the administrative rulings which are issued from time to time by the Commission relative to the scope of the Act. These rulings are handed down in the nature of opinions arrived at on the basis of the information supplied when inquiries are received on a matter of coverage. At the regional level, only those questions are dealt with which can be clearly answered in the light of the decisions already given by the Com-

mission and all such replies are subsequently reviewed at the Head Office division. This strict control over the issuing of coverage opinions is necessary in order to maintain a high standard of accuracy and consistency in coverage rulings throughout the Dominion. If the inquirer is not satisfied with the opinion which has been given in any particular case, he is entitled to ask for a formal decision by the Commission, which thereupon orders the Coverage Division to make a special investigation of all aspects of the problem. Persons aggrieved by the formal decision of the Commission may appeal to the Umpire for a decision. The decision of the Umpire is final.

Since the Governor in Council, on the recommendation of the Commission, is empowered to extend coverage under the Act, chiefly by withdrawing the exceptions granted in Part II of the First Schedule to certain persons and types of employment, the Coverage Division, both at Head Office and in the regional offices, is called on from time to time to supervise the carrying out of field surveys in certain areas or in certain industries in order that the Commission may be in a position to consider the advisability of providing protection against the hazards of unemployment to a larger field of employees.

The Commission is at all times anxious to keep abreast of the social thinking throughout the world. To achieve this object the Coverage Division undertakes a constant study of the various social security systems adopted in other countries. Apart from the up-to-date social information which is thus made available, this aspect of the division's work is particularly important in view of the fact that the Commission may at times deem it advisable to recommend to the Dominion Government that an agreement be entered

*The above is the second article in the series dealing with the Administration of Unemployment Insurance in Canada. The first article was published in the August issue of the Labour Gazette.

into with the Government of some other country to establish reciprocal arrangements on questions relating to unemployment insurance.

2. Contribution Division

The Act requires that the Insurance Fund shall be built up both from monies provided by Parliament and by contributions received partly from employed persons and partly from the employers of those persons. The Head Office Contribution Division of the Insurance Branch is responsible for supervising the operation of the techniques which have been authorized for the collection of these contributions—viz: insurance stamps, meter impressions and cash paid in direct to the fund through a bulk-payment plan. The Commission has issued regulations governing the manner, time and conditions under which contributions are to be made and it is the duty of the Contribution Division to see that these regulations are reduced to clear and concise instructions for the direction of the employer. The Commission has, by regulation, provided for the refunding of contributions which have been made in error. As this step affects not only the financial rights of the employer but also the status of the employee as an insured person, the Contribution Division is called on to make a thorough examination of all claims for refund before recommending them to the Commission for payment.

In the regional offices, the division, in addition to being responsible for the registration of employers and employees and for the issue, custody and replacement of insurance books, is also closely associated with the detailed procedure which is necessary before a claim can be approved for payment. In order that unemployed persons may receive benefit payment at the local offices without any undue delay, the Regional Contribution Division must be so organized and conducted that the rate and duration of benefit may be computed quickly and accurately according to the ratio rule laid down in the Act. After the insurance books have been renewed at the end of each fiscal year, they are forwarded to the Contribution Division at the regional office where they are filed by insurance numbers before being "processed"—i.e., the number of days of insurable employment and the amount of the employee's daily contribution, as shown by the stamps or meter impressions in each book, are transferred to an individual record card for handy reference whenever a claim for benefit is filed.

3. Audit Division

The Audit Division is entrusted with the task of ensuring that unemployment insurance

contributions are properly made in respect of all insurable employees in the Dominion. Unless contributions are made by all employers of insurable employees, the actuarial foundation of the insurance plan may be seriously jeopardized. On the other hand although the employee is entitled to examine his insurance book periodically in order to determine that contributions have been made on his behalf, it is not expected that this right will be generally exercised. Moreover, since contributions are the bases of benefit claims, irregularities result in subsequent incorrect benefit payments and may occasion serious adjustment problems. Accordingly the field staff of auditors is engaged in making regular periodical examinations of the books and records of all employees subject to the legislation with the two-fold objective of protecting the Insurance Fund and safe-guarding the employees' benefit rights.

In addition to their regular audit duties, this field staff are frequently requested to conduct special investigations concerning wage scales and working conditions in certain areas and also to carry out, in close co-operation with the Coverage Division, special surveys which have been recommended by the Commission in connection with specific aspects of the scope of the Insurance plan.

From their close relations with the employers, the members of the Audit Division are in a position not only to create good-will towards the plan but also to promote the work of the employment service, (which is the main-spring of the whole scheme), by pointing out generally how the employers' interests may be served by the facilities made available by the Commission. It is with good reasons, therefore, that the Audit Division has been called "the eyes and ears of the Commission".

4. Claims Division

Insured workers who are unemployed and have fulfilled the conditions laid down in the Act are entitled to benefit—that is, a weekly cash payment for a specific number of weeks. The Claims Division supervise these payments and are responsible for seeing that each claimant is assured his statutory rights under the plan. However, since three groups contribute to the Insurance Fund, all three have an interest in its proper administration. Therefore, in dealing with an individual claim, the rights not only of the employee but also of the other contributors must be considered. It is the duty of the Claims Division to see that this proper balance is maintained by instituting procedures whereby justice is done to the claimants without any danger of unwarranted claims being paid from the Fund.

This division functions mainly through the net-work of claims offices which are located at strategic employment points throughout the Dominion. Benefit claims are accepted at these offices and forwarded to the Regional Claims Division for adjudication. At this level a thorough examination is made of the conditions which surrounded the employee's separation from his employment before the claim is approved for payment. Detailed instructions explanatory of those sections of the Act and Regulations which govern the payment of claims are given to each regional

claims office by the Head Office Claims Division in order to insure that no element of bias may creep into the interpretation of the law and also, since the claimant may be dependent on his benefit payment in order to meet ordinary expenses, that settlements are made in a prompt and efficient manner. When a claim for benefit is disallowed by the Claims Division, the claimant has a right to appeal to a court of referees. However, in certain cases a claimant may appeal the decision of a court of referees to the Umpire, whose decision is final.

Employment and Unemployment

Summary

REPORTS received in the Department of Labour during the past month gave the following information concerning employment and unemployment in Canada.

The employment situation at the beginning of July, 1945, as reported by employers.—There was an increase in industrial activity at the beginning of July. The number then added to the working forces, however, was abnormally small, being less than one-tenth of the average gain at July 1 in the period, 1921 to 1944, according to reports received by the Dominion Bureau of Statistics.

The index number of employment stood at 175.4 as compared with 175.3 at June 1, and 183.5 at July 1, 1944. In 1943, the July index was 183.7, while that in 1942 was 175.7. With these exceptions, the latest index is the highest for July in the years since 1920.

The Bureau's report was tabulated from reports received from 15,683 firms having a combined working force of 1,792,125 men and women, as compared with 1,790,204 at June 1, a gain of 0.1 per cent. This was accompanied by a rise of 0.9 per cent in weekly payrolls.

The weekly average per capita earnings was \$32.34 at July 1, as compared with \$32.10 at June 1 and \$31.72 at July 1, 1944.

Unemployment as reported by the Unemployment Insurance Commission.—Claims for unemployment insurance benefit increased slightly during July, the number being 10,886, as compared with 10,857 in June, 1945 and 3,106 in July, 1944.

Report on employment conditions, August, 1945.—At August 23 Canada's manpower needs, exclusive of agriculture, totalled 128,321 (89,679 men and 38,642 women). An increase of 579 was evident in the five weeks since July 19, when requirements totalled 127,742. The decline in the labour demands for war production following V-J Day was offset by sharp increases in the manpower

needs of civilian industries. The supply of available labour, as indicated by the number of applicants registered at employment offices but not yet referred to jobs showed a considerable increase, and at August 24 totalled 52,998 (35,344 men and 17,654 women) due largely to a marked rise in the number of male applicants required.

Applications for Employment; Vacancies, and Placements, July, 1945.—Reports received from National Employment Offices of the Unemployment Insurance Commission during the five-week period June 29 to August 2, 1945, showed a decline in business transacted both when compared with the previous four weeks and with the four weeks June 30 to July 27, 1944, this computation being based on the average number of placements recorded daily. Manufacturing was mainly responsible for the decrease under the first comparison and manufacturing, services and trade under the second. Construction and agriculture showed increases under both comparisons. Vacancies during the five weeks under review numbered 228,890, applications 215,073 and placements in regular and casual employment 137,510.

Unemployment in Trade Unions.—The percentage of unemployment among trade union members decreased slightly to 0.5 at the close of the quarter ended June 30. At the end of the previous quarter the percentage was 0.7 and at the end of June, 1944, was 0.3.

The June, 1945, figure was based on reports received from 2,238 local labour organizations, having a total membership of 414,150.

Total employment in Canada.—A preliminary estimate of Canada's total manpower distribution made by the Research and Statistics Branch of the Department of Labour indicates that at April 1, 1945, 4,296,000 persons 14 years of age and over were gainfully occupied, of whom 3,246,000 were in non-agricultural industry, including 901,000 in war industry. In addition there were 762,000 persons in the Armed Forces.

The Employment Situation at the Beginning of July, 1945, as Reported by Employers

IN accordance with the trend indicated at July 1 in 24 of the preceding years since 1920, there was an increase in industrial activity at the beginning of July, 1945; the number then added to the working forces, however, was abnormally small, being less than one-tenth of the average gain at July 1 in the period, 1921-1944. This was due in part to an important contra-seasonal recession in manufacturing as a result of curtailment in war production, and in part, to the fact that employment generally in the non-manufacturing industries, for various reasons, showed advances that were decidedly less-than-usual at the beginning of July.

The 15,683 co-operating employers reported a staff of 1,792,125 men and women; as compared with 1,790,204 at June 1, there was

July in the years since 1920. Since the advance at the date under review was below-average for the early summer, there was a decline in the seasonally-corrected index, which fell from 175.3 at June 1, to 172.1 at the beginning of July. This is the sixth successive reduction in the adjusted index.

A brief review of the results of the most recent survey of employment and payrolls shows that there was moderate improvement in all provinces except New Brunswick and Quebec, in both of which substantial declines of a seasonal character took place in logging. Industrially, there was in the Dominion as a whole a marked contraction in manufacturing and logging, while heightened activity was indicated in mining, communications, transportation and storage, construction and main-

EMPLOYMENT IN CANADA AS REPORTED BY EMPLOYERS

NOTE.—The curve is based on the number of employees at work on the first day of the month as indicated by the firms reporting, in comparison with the average number of employees they reported during the calendar year 1926 as 100.

a gain of 1,921 persons, or 0.1 per cent, which was accompanied by a rise of 0.9 per cent in the weekly payrolls. Based on the 1926 average as 100, the index number of employment stood at 175.4, as compared with 175.3 in the preceding report, and 183.5 at July 1, 1944. In 1943, the July 1 index was 183.7, while that in 1942 was 175.7. With these exceptions, the latest index is the highest for

tenance, services and trade; financial institutions also reported increased employment. The largest gain was that of some 12,200 workers in construction; as a result of the prevailing shortages of labour and materials, this was considerably less-than-usual for July 1 in the experience of the last 25 years. This was also the case in transportation, in which activity nevertheless reached a new maximum.

On the other hand, the advances in mining and communications were unusually great.

Within the manufacturing division, the most pronounced shrinkage was again indicated in the production of durable manufactured goods, from which some 6,450 men and women were released. In the iron and steel-using division, the number laid off by the co-operating establishments approximated 6,000, and a reduction of over 4,000 was reported by non-ferrous metal plants. The lumber industry showed considerable seasonal improvement, however, and there was a smaller gain in electrical apparatus manufacturing. In the non-durable goods category, employment in chemical works was decidedly curtailed, there being a loss of about 9,600 employees, due to a cancellation of war orders. There was a small reduction in textiles, in which the decrease was decidedly less than usual for July 1; tobacco and leather

factories were also rather slacker. Most of the remaining divisions of manufacturing reported expansion, partly seasonal in character. The largest increases on the whole, were in food, lumber, pulp and paper, electrical apparatus and petroleum plants, and in central electric stations.

The statistics of the present report depict conditions existing about midway between V-E and V-J Days. In a recent reconstruction of the monthly survey which had been made at September 1, 1939 (embodying revisions and industrial reclassifications in the data originally furnished, and including material, since obtained, for firms who did not report at the time), it was ascertained that the establishments whose employees numbered 1,792,125 at the date under review, had employed 1,229,255 men and women at the outbreak of war. Between September 1,

¹This classification comprises the following:—iron and steel, non-ferrous metals, electrical apparatus, lumber, musical instruments and clay, glass and stone products.

represents a rise of 76.7 per cent during the period between September 1, 1939, and July 1, 1945; in the non-manufacturing divisions taken as a whole, the gain amounts to some 91,300 persons, or 14.9 per cent. The only important decline among the major industries in the period between September 1, 1939, and July 1, 1945, was that of approximately 46,000 workers, or 24.3 per cent in construction, and of some 11,500, or 14.3 per cent in mining.

Payrolls

As already stated, the minor advance in industrial employment at the first of July as compared with June 1 was accompanied by a rise in the weekly salaries and wages distributed in the eight leading industries; these rose from \$57,458,150 in the last report, to \$57,963,883 at the date under review, or by 0.9 per cent. The relatively larger increase in the payrolls than in the personnel was partly due to the fact that the June 1 figures had in many cases been lowered by the loss of working time on Victoria Day, observed in some centres as a holiday. On the other hand, the fairly general observance of St. Jean Baptiste Day as a holiday in Quebec

affected the earnings reported at the beginning of July. The weekly average per employee was \$32.34, 24 cents higher than that of \$32.10 at the first of June; the per capita figures at July 1 in earlier years of the record were as follows:— 1944, \$31.72; 1943, \$30.97; 1942, \$28.49 and 1941, \$25.49. In the last four years, there has thus been an increase of 26.9 per cent in the average weekly earnings of the persons in recorded employment. The latest average was exceeded by those at March 1 and May 1 of the present year, and April 1 and October 1, 1944, but is otherwise the highest in the record.

Table II summarizes the July 1 statistics of employment and payrolls for the leading industrial groups, the provinces and economic areas, and the leading cities, and gives comparisons with June 1, 1945, and July 1, 1944 and 1943, where available. Table I gives a monthly record for the eight leading industries as a whole, and for manufacturing, showing the movements of employment and payrolls in the period for which the payrolls statistics are on record. The index numbers of payrolls are based on the amounts disbursed by the co-operating firms at June 1, 1941, as 100; to facilitate comparisons of the

trends of employment and payrolls, the indexes of employment have been converted from their original base, 1926=100, to June 1, 1941, as 100.

Table I indicates that in the period for which payroll data are available, the number of persons in recorded employment in the eight leading industrial groups has shown an increase of 14.9 per cent, while the aggregate weekly earnings of those workers are higher by 44.5 per cent. Including finance, the gain in employment from June 1, 1941, to July 1, 1945, amounted to 14.8 per cent, and that in payrolls, to 43.9 per cent. The explanation previously given for the greater rise in the salaries and wages than in the numbers employed may again be stated:— (1) the war-time concentration of workers in the heavy manufacturing industries, where rates of pay are above the average and in addition, there has been a considerable amount of overtime work, (2) the payment of cost-of-living bonuses to the majority of workers; the rates at which these allowances were calculated were increased on more than one occasion before their incorporation in the basic wage-rates as from February 15, 1944, (3) the progressive upgrading of employees as they gain experience in their work and (4) the payment of higher wage-rates in an important number of cases.

As has previously been pointed out, the influence of the war has resulted in particu-

larly marked expansion in employment and payrolls in factories, in which the rate of acceleration during the period of observation has been decidedly greater than in the non-manufacturing industries. Thus in spite of recent cut-backs, the index of employment in manufacturing at July 1 was 23.2 per cent higher than at June 1, 1941, while the payrolls in the same period have advanced by 56.3 per cent, proportions decidedly exceeding those given above for the eight leading industries. The factors already stated as influencing the general trends have had an even greater effect in the case of manufacturing.

In regard to the marked variations in the average earnings of workers in the different industrial classes, it must again be pointed out that the sex distribution of such persons is an important factor, frequently associated with variations in the age groups. In general, the female workers tend to belong to the younger age classes, in which the earnings are naturally lower than among those of greater experience. The matter of short-time or overtime may also considerably influence the reported aggregates and averages, which likewise reflect variations in the extent to which casual labour is used; the degree of skill generally required of workers in the industry is of course also an extremely important factor.

Report on Employment Conditions, August, 1945

The following report covering the employment situation for the past month has been prepared by the Research and Statistics Branch, Department of Labour, in co-operation with the Employment Service, Unemployment Insurance Commission. The first section of the report deals with the Canadian labour market by industry groups, while the second section gives a more detailed analysis of employment conditions by regions.

WHILE the overall manpower needs of Canadian industries showed little change during August, the sharp decline in the labour needs of war plants following V-J Day was largely offset by a marked rise in the requirements of the long under-staffed civilian industries. The demand for workers in all industries exclusive of agriculture totalled 128,321 (89,679 male and 38,642 female) at August 23, only slightly more than the 127,742 workers required at July 19, five weeks earlier. However, the labour situation is considerably easier than at August 24, 1944, the corres-

ponding reporting date last year, when there was a need for 150,356 workers. During the month male labour requirements showed a decrease of more than 4,600, but this decline was more than offset by a corresponding rise in female labour demand. Although the need for workers in the mining, transportation, and trade, finance and service industry groups dropped sharply, the extensive housing program and the urgent demand for building materials have greatly increased the manpower requirements of the construction and logging industries. A marked seasonal rise in the labour needs of the food processing industry increased the Net Labour Demand ¹ in the manufacturing group, in spite of the declining requirements of war industries. Table I shows

¹ *Net Labour Demand* is calculated by deducting unconfirmed referrals from unfilled vacancies. *Unfilled Vacancies* are the number of unfilled jobs on file in employment offices as at the date indicated. *Unconfirmed Referrals* are applicants who have been referred to a specific job by an employment office and notification has not been received from the employer as to whether the person has been placed or rejected.

Net Labour Demand, by main industry group and by sex, as at August 23, with absolute and percentage change in total demand during the past month.

The supply of available labour totalled 52,998 (35,344 men and 17,654 women) at August 24, as compared with 48,872 five weeks earlier. The immediate effects of layoffs from war plants are evident in the sharp rise in labour supply during the week August 17 to August 24; in that period the number of male applicants showed an increase of 3,836 while the supply of female labour rose by 654. It is significant that skilled and semiskilled workers accounted for two-thirds of the increase in male applicants. Some of the women workers released from war jobs are withdrawing from the labour market permanently, while others intend to take extended vacations before seeking new employment. The supply of unrefereed applicants², both male and female, will continue at a high level during the transition to peacetime production, as workers released from war plants, together with discharged service personnel, are seeking employment in which their acquired skills can be utilized. Table II shows labour demand and supply by main occupational groups and by sex, as at August 24, 1945.

Net Labour Demand in A and B Priority Industries

Sixty-two per cent of the total labour demand at August 23 was in high priority industries, where 79,082 workers were needed; this was almost 1,800 less than the number required at July 19. Decreases were reported by all regions except the Prairies, where demand rose slightly due to the increased manpower requirements of the meat packing houses. While male labour demand decreased by more than 4,000, this decline was partially offset by an increase in the demand for female workers.

Logging

The demand for loggers, although showing a slight decrease in the five weeks under review, remains high, with 7,602 men required at August 23. The difficulty of maintaining adequate bush crews, together with the need for extra workers to prepare roads and camps for the winter cutting, keeps demand at a high level. Both skilled and unskilled workers are needed, with sawmills reporting an acute shortage of experienced sawyers. At the end of the harvest season agricultural workers are expected to provide some relief, but on the other hand the reopening of schools in Sep-

tember will mean the loss of many students who have been giving valuable assistance.

Mining and Primary Smelting

The labour situation in the mining, primary smelting and refining industries eased considerably in the period from July 19 to August 23, when requirements dropped from 6,033 to 4,422. A sharp decrease in the manpower requirements of the nickel industry, an immediate result of cancellations and cutbacks in war contracts, accounted for most of this decline. Demand for coal miners, on the other hand, increased slightly during the month, totalling 1,801 at August 23. In the Maritime Region many miners have had to be released on account of poor health, and returned servicemen constitute the only potential source of supply. Demand for miners of all types is increasing in the Prairie Region, as farmers and students employed for the summer months return to their former activities.

Manufacturing

In spite of the mass layoffs which have taken place in war plants since the end of the war in the Pacific, the overall manpower needs of essential manufacturing industries have shown a slight rise as other hard-pressed industries increase their demands. During the five weeks from July 19 to August 23 labour requirements in this group rose from 33,163 to 34,788.

War Industries—Substantial cutbacks and cancellations in war contracts following the cessation of hostilities are reflected in a diminishing labour demand in the four industries engaged exclusively in the manufacture of war supplies (aircraft and parts, shipbuilding and repairs, guns and ammunition, and mechanical transport and armoured fighting vehicles). From July 19 to August 23 manpower requirements of these industries decreased by almost 40 per cent, and more extensive decreases will be apparent as contracts are completed.

Food Processing.—Labour requirements in the food processing industries totalled 7,818 at August 23, as compared with 4,768 at July 19. The canning and preserving of fruits, vegetables, and sea foods is now in full swing, with demand for workers becoming increasingly urgent. During the five weeks from July 19 to August 23 the labour needs of this industry more than doubled, totalling 3,483 at the latter date; the Ontario Region, where 2,572 workers were required, accounted for 92 per cent of this increase. Meat packing plants urgently require additional help to

² Applicants who have not been referred to specific jobs as at the date indicated.

handle the heavy livestock run which is now in progress. In the five weeks under review there was a substantial increase in the labour requirements of meat packing houses; demand rose from 1,265 at July 19 to 2,446 at August 23, the largest increases being reported by the Quebec and Prairie Regions.

Textiles and Products.—The end of the Pacific war brought little relief to the textile and clothing industries, as decreases in the requirements for military uniforms and equipment will be in keeping with the demobilization of the Armed Forces. In addition there is the tremendous task of providing clothing for discharged service personnel, of meeting our export requirements, and of satisfying the considerable backlog of orders for civilian goods which have been in short supply. If these commitments are to be met, the capacity of Canada's textile mills will be taxed to the utmost during the next few months, with the already urgent need for workers becoming more serious. The demand for workers in the textile and clothing industries increased substantially during the past month; at August 23 a total of 7,784 workers were needed, as compared with 6,449 at July 19. The manpower needs of the rayon and silk textile mills, greater by 496, totalled 902 at August 23. Knitting mills also increased their labour requirements during the month, with a demand of 1,452; smaller increases were evident in the manpower needs of other textile industries.

Construction

The acute shortage of construction labour, together with the scarcity of materials, is hampering the extensive building program now well under way. At August 23 there were 8,544 workers required for high priority construction projects, as compared with 7,171 at July 19; this increase was due mainly to mounting requirements for residential building, including Wartime Housing. All regions report shortages of such skilled workmen as carpenters, bricklayers, plasterers and plumbers, as well as unskilled labour. The registration of all construction workers (August 6-11) has resulted in no material

improvement in the labour situation, as practically all those reporting are presently engaged in other essential work such as the production of building materials. However, the accelerated demobilization of Armed Service personnel and impending layoffs from war plants should effect considerable improvement in the near future.

Transportation

While transportation facilities continue to be severely taxed by heavy passenger traffic, labour requirements in this industry have fallen off sharply to total 6,602 at August 23. Demand for track maintenance men and extra gang labourers for railways is considerably easier, but some areas still report shortages of this type of worker. Labour requirements for steam railways decreased sharply from 5,362 at July 19 to 3,914 at August 23; however, there was a noticeable increase in the needs of highway passenger transportation companies, following the lifting of gasoline rationing.

Trade, Finance and Service

The labour situation in the trade, finance and service industry group eased slightly during the past month, with a total of 15,791 workers needed at August 23. Although many areas report a shortage of physically fit warehousemen, manpower requirements in retail and wholesale establishments remain substantially unchanged. The demand for service workers continues, with skilled mechanics, tune-up men, body and fender workers in especially short supply. Labour requirements in hospitals have fallen off slightly, but many institutions are still handicapped by the shortage of workers, particularly kitchen help, ward maids and orderlies. The labour situation in hotels and restaurants has been eased somewhat by teachers and students during the summer months. However, serious shortages are anticipated with the reopening of schools, and employers, foreseeing this, are already placing additional orders. Workers formerly engaged in war plants, wishing to make use of their wartime skills, are still unwilling to accept this type of work.

Regional Analysis

The Regional analysis which follows is based on semi-monthly reports received from Local Employment and Selective Service Offices across Canada. The report covers employment conditions during the month ended August 22, 1945.

Maritime Region

Agriculture—Dry weather and the assistance of a considerable number of service personnel have contributed to the successful harvesting of one of the largest hay crops ever cut in the Maritimes. The grain crop

now being gathered is not nearly as large, and in Nova Scotia the apple crop has been a partial failure. Arrangements have been almost completed for the picking of an exceptionally heavy acreage of potatoes in New Brunswick and Prince Edward Island. It is estimated that about 150 members of the armed forces will be needed on "The Island", as well as 500 in New Brunswick.

Logging—Woods operations have been less seriously curtailed than in previous summers; although some camps and sawmills closed down for the harvesting, it was not found necessary to request this co-operation of the lumbering industry in general. With an easier labour market, a very large cut is anticipated for the 1945-46 season.

Coal Mining—The gradual but persistent drop in average production has been accentuated by the V-J holiday and the annual week's vacation with pay. In every section, but especially in the Cape Breton area, the collieries are suffering from serious labour shortages.

Manufacturing—The inevitable result of the cessation of hostilities has been a series of mass lay-offs from war plants. The continuing staff reductions at the Canadian Car and Foundry's aircraft shop in Amherst will bring activities to a close in mid-September. The shut-down of the ammunition department at the Robb Engineering Works, also in Amherst, has released 103 men and one woman in addition to approximately 15 inspectors; most of those affected will shortly return to their former occupations on the land and in the logging camps.

While the foundry and machine shops of the Foundation Maritime Limited are operating full time in New Glasgow, approximately 100 men have been released from the company's shell department. Most of the 125 unskilled men let out of the Campbellton ammunition plant are experienced loggers and farmers, who should be readily placed.

At the height of the fishing season, the labour shortage in Maritime processing plants is unabated. The fertilizer plants in Saint John are similarly handicapped. The lack of an adequate number of unskilled female workers for the Nova Scotia textile plants is one of the most pressing problems at present. Local offices at Yarmouth, Truro, Fredericton, Saint John and St. Stephen are unanimous in their report that the demand for labour in the textile plants and kindred industries operating in their districts cannot be satisfied.

Construction—As activity increases, urban centres throughout the region share in the lack of bricklayers, carpenters, plumbers and

general labourers. In Halifax, where labour requirements are particularly heavy, there will be a greatly increased demand for carpenters when military hospital construction passes the foundation stage.

Transportation—While there is some shortage of labour for ballasting operations on the railways, the needs of the industry have been reasonably well met on the whole. Water-front work at Saint John and Halifax, which has been slack for a time, is expected to accelerate shortly.

Quebec Region

Agriculture—No serious labour shortage is reported from any part of the province. While the grain crop was excellent, potatoes and tobacco, as well as dairy products, suffered from the excessive dryness and heat during August. Blueberry harvesting is almost at an end, and it is expected that the pickers will soon register for other employment; in the Lake St. John district 25,000 men, women and children were engaged in gathering the unusually plentiful berries, and a further 100 persons have been busy processing and dehydrating the fruit.

Arrangements have been completed for 1,600 men and women from the province to assist in the potato digging in the adjoining state of Maine. No difficulty is anticipated in procuring the several hundred workers required to help in the Western harvest; the movement to the Prairies is just beginning.

Logging—Preparations are going forward for more extensive woods operations than were possible during the war years. While cutting on a large scale has not yet commenced, heavy orders for bushworkers are already being filed with local offices throughout the region. It is estimated that 1,500 loggers will be needed for Fall and Winter operations in the vicinity of Rouyn. The quota of woodsmen required for the American camps is being filled without difficulty.

Base Metal Mining—There is slight sign of any improvement in the manpower situation, nor is any relief anticipated until after the harvesting. The gold mines in northern Quebec are in similar plight; the call for men to engage in development work mounts steadily.

Manufacturing—Shipyards, aircraft shops and heavy ammunition plants are in the midst of mass lay-offs; these staff reductions have also affected the companies' numerous subcontractors. It is estimated that, after some rehiring is done, the personnel of the province's aircraft establishments will have been

decreased by approximately 10,000, and that of the shipyards by about 4,000. Cancellations of contracts and cut-backs in production have already affected more than 30,000 workers.

While a large proportion of the staff of United Shipyards Limited and a few employees of Canadian Vickers in Montreal have been laid off, the latter company is retaining most of its staff to complete its shipbuilding contracts. In Valleyfield, the complete shut-down of the D.I.L. plant, affecting 1,200 employees, will not only relieve the pressure in local textile mills, but should also make it possible to fill orders in clearance from outside points. The Quebec arsenals continue their reduction of staff; 554 men and 143 women have been laid off during the past fortnight. In Levis, the Davie Shipbuilding and Repair Company is releasing some 2,000 workers and the George T. Davie Company, 100 men.

Despite the considerable increase in the available labour force, packing plants are experiencing continuing difficulty in retaining their workers. The foundries, however, have profited by the mass lay-offs. There has been a sharp upward trend in the already heavy labour demands of textile mills and kindred industries.

Construction—While recent industrial lay-offs of heavy labour have alleviated the shortage of building tradesmen somewhat, there is an over-all scarcity of skilled and unskilled workmen. Bricklayers, plasterers, plumbers and highly qualified carpenters are in extremely short supply, and more artisans in every classification (except electricians) could be utilized. While highway construction is also making heavy demands on the province's labour force, this call is being met without great difficulty.

Transportation—Although passenger traffic is still heavy, there has been a slight falling off in freight transportation on the railways. There is no lack of labour to handle grain and other cargoes in the busy river ports. The difficulty in securing maintenance men for the civilian air services has somewhat lessened; a fair number of discharged airmen are accepting jobs on these lines.

Ontario Region

Agriculture—Harvesting and threshing, finished in some areas, are continuing in most parts of the province. Some 2,000 Western farmers and 900 prisoners of war, as well as 550 soldiers released under the Farm Duty Plan, or on farm or individual leave, have rendered invaluable assistance to overworked

Ontario farmers; while the need for such help is lessening, it is feared that there will be a serious shortage of labour when the picking of the main peach crop begins in a few days' time. Except for curers, who are in short supply, it is expected that sufficient assistance will be forthcoming for the handling of the flue-cured tobacco harvest, now in full swing.

The majority of the Western farmers have returned home for their own harvest. The reciprocal excursion of men from Ontario and Quebec is in its initial stages, and interest in the excursion is general throughout the province.

Canneries—The canning plants, now approaching their peak season, will shortly require substantial labour reinforcements, both male and female. One large establishment in New Toronto is asking for 1,000 men and women for full-time work on the tomato pack, as well as 500 part-time female workers. Canneries within a 25-mile radius of Belleville require 1,300 women and 425 men, for the tomato processing and the heavy corn pack to follow. Orders are on file for 175 workers at the Dunnville canning factory, while in the Niagara district up to 300 persons, mostly women, will be needed at the end of August. St. Catharines, too, will require almost 500 women, and about 60 men, for the processing of peaches and tomatoes.

Logging—Woods operations just getting under way are handicapped by a general manpower shortage, attributed to the fact that all companies are placing their orders at the same time. The Kapuskasing office reports that men are entering the bush at the rate of about 150 weekly; with unfilled vacancies at the lowest point for some time past and the prospect of an easier situation after the harvest, operators are well satisfied with the labour supply.

Mining—Although orders on file for miners have decreased by 1,000 during recent weeks, there has been no apparent improvement in the manpower situation. A survey recently completed in the Timmins area shows that 650 men are needed immediately, and possibly 3,500 within the next year, to bring production back to normal.

Manufacturing—The cancellation of war contracts has not only reduced the number of vacancies throughout the province, but actual lay-offs have released an estimated 5,000 male and female workers since the cessation of hostilities. In the New Toronto area, Small Arms Limited will have only a staff of 150 after releasing 450 men and the same number of women; the closing of the Goodyear Tire and Rubber Company's fuel tank department

affected 125 girls, and the Aluminum Company of Canada reduced its staff by 50 men and 35 women. The Department of Transport released 100 workers at Prescott. Lay-offs at the Chrysler Corporation and its feeder plants in Chatham will affect some 250 workers; approximately 100 men and girls have been laid off by the Ingersoll Machine and Tool Company. A staff reduction at the Dominion Arsenal in Lindsay is expected to provide the women needed by a local knitting mill, and the many construction workers included in a staff reduction of 300 employees of the Algoma Steel Corporation at Sault Ste. Marie will be readily placed.

The London office reports that current lay-offs have as yet afforded little relief to undermanned local industries. In the Oshawa area most of the men who have been released from war plants are unfitted for the heavy work available; no alternative work is obtainable for the women affected. Approximately 1,400 persons are at present drawing unemployment insurance benefits in the Oshawa district.

In spite of the cessation of war production, Ontario foundries are still in great need of heavy labour. The textile mills and kindred industries are also persistent in their call for reinforcements, asking not only for skilled and unskilled workers, but for trainees as well.

Construction—Building throughout the province is proceeding as quickly as the available supply of labour and materials permits. With no construction workers idle, the lack of skilled tradesmen of all kinds is hampering projects in every section. The Department of Veterans Affairs has set the number of houses to be erected in Ontario at slightly over the 1,100 mark; the demand for plasterers and carpenters for this enterprise is extremely heavy. Skilled tradesmen are also in very short supply to carry out the Government's military hospital program.

Transportation—While the call for railway maintenance labour has subsided somewhat, there is still a fair demand for extra gangs and sectionmen. Welland and Kitchener are also pressing in their call for bus and auto mechanics for transport companies and garages.

Prairie Region

Agriculture—Haymaking is finished in the grain and mixed farming areas, and the harvest will shortly be in full swing; while crop conditions vary through the three provinces, Manitoba is the only part with a heavy growth of grain. In poor crop areas, not only is the demand for agricultural workers being met locally, but some farmers are moving

elsewhere to help with the harvesting. The first group of Easterners is expected shortly; in the meantime, the demand for farm labour is exceedingly heavy throughout the greater part of the region.

Logging—While woods operations are in full swing in the Lakehead area, they are practically at a standstill in Manitoba and Saskatchewan. In all, 1,900 bushmen are needed in the vicinity of Port Arthur, where some companies report that they have more prisoners of war on their payrolls at present than civilians. It is anticipated that current lay-offs will bring an influx of men to the lumber camps; should sufficient manpower be available, all operators expect that the cut for the coming season will approach normal pre-war level. In the vicinity of Blairmore, loggers and prop-cutters are in demand. Some bushmen have been sent from Alberta to the coast, but owing to recent lay-offs from British Columbia war plants further movement of loggers has been cancelled.

Fishing—Commercial fishing has been resumed in Manitoba waters. The fleet leaves shortly, but with an inadequate supply of experienced men to seine on the nets; a smaller catch for export is foreseen as a result.

Coal Mining—Although a number of the many vacancies have been filled by ex-service-men and soldiers on furlough, the call for colliery labour mounts steadily. The shortage is general in all mines, where both certificated miners and experienced underground labour will be in even greater demand as Winter approaches.

Base Metal Mining—The manpower situation in this industry has not improved; vacancies are continuingly numerous, with few available applicants suited to the heavy type of labour. An acute shortage of hard rock miners and mine labourers for surface work in the Red Lake mines is reported. At Fort Frances, too, many orders remain unfilled. With gold reserves in the Port Arthur area considerably below the desired level, orders have been placed for 226 underground labourers who will be very difficult to secure.

Manufacturing—The exodus of farmers for the harvest season is seriously hampering the packing plants of the region at the height of their season. Skilled and unskilled workers are urgently needed in the packinghouses at Winnipeg, Brandon, Regina, Moose Jaw, Calgary and Edmonton; to meet the seasonal rush, several companies are endeavouring to secure sufficient workers for night shifts. To meet a temporary emergency in Calgary, the Alberta Department of Agriculture has consented to farmers remaining at this work.

As a result of the cessation of hostilities, the Canadian Car and Foundry's aircraft plant at Fort William was shut down; 1,665 men and 1,313 women were laid off, and an additional 500 have since been given notice. The closing of the aircraft department of the Port Arthur Shipbuilding Company led to 155 employees receiving seven days' pay in lieu of notice; the company's shipyard, however, is still busy.

Construction—Building activities are brisk in all parts of the region. While lay-offs have somewhat relieved the shortage of workmen in Fort William, elsewhere there has been no betterment of the situation. Projects in Port Arthur, Red Rock and Marathon could absorb 335 capable labourers, 151 carpenters and a number of bricklayers. In Regina 100 unfilled orders include every type of worker except rough carpenters; in Edmonton, where 1,000 homes are under construction, the shortage is most acute.

Transportation—Maintenance of way labourers are needed at practically every central railway point throughout the Prairies. Yardmen, switchmen and trainmen are also required at Calgary, and qualified brakemen and machinists at Winnipeg.

Pacific Region

Agriculture—In all sections, the labour requirements of dairy farmers have been much more adequately met than for some time past. In the early part of the month, the strike of the American Can Company of Vancouver enforced idleness on 500 farm labourers and cannery workers; however, berry picking in the Fraser Valley has been successfully terminated, and it is believed that local assistance will be sufficient to handle the potato picking, commencing in mid-September.

While outside assistance will be needed for the heavy peach crop in the southern Okanagan, the much smaller apple harvest can probably be handled by local workers. Kelowna is opening a hostel on September 12, to accommodate 50 girls who will be needed in the orchards at that time, and approximately 50 apple pickers will be required in the Kamloops area.

Logging—Owing to the fire hazard resultant upon dry weather, camps in the Vancouver Forest area (including the lower mainland and Vancouver Island) were closed during the early part of the month; those which have re-opened are operating only in the early morning. The general manpower shortage continues to be acute, and will be accentuated by the exodus of students. Men who have been released from war plants are slow in

returning to the industry, nor has there been any material assistance derived from service personnel or from clearance orders to the Prairies, which have recently been cancelled. The Nelson Forest Area is still closed.

Sawmills—With log deliveries reported as generally satisfactory, mills in all parts of the region are now in operation. A critical shortage of labour is hampering production, especially in the city of New Westminster, where the largest west coast sawmills are situated; the exodus of students, and the lifting of the "freeze" order are expected to accentuate this situation. However, ex-servicemen are being referred in daily increasing numbers.

Coal Mining—Throughout the region, the manpower situation is steadily deteriorating. Miners and underground labourers are in increasingly short supply in all the collieries, and it has been necessary to lay off one shift from the Courtenay operation owing to the lack of certificated men.

Base Metal Mining—Although the return of miners from the armed forces is steadily increasing, the manpower shortage persists. A fairly large number of those reporting for reinstatement go on holidays before starting to work.

Gold Mining—The relief anticipated from the re-engagement of service personnel has not as yet reached helpful proportions. In every mining district the situation is more serious than at any time during the war years.

Manufacturing—British Columbia shipyards, in particular, have been seriously affected by the lay-offs in progress since V-J Day. In the Vancouver area some 4,000 workers have been released; many of these will have opportunities to fill vacancies in basic industries long understaffed. Many of the 100 employees laid off by the Star Shipyard at New Westminster are experienced building tradesmen, who will be quickly placed in construction projects. Of the almost 800 workers now being laid off by the Yarrows yard in Victoria, a number are being transferred to another local yard engaged on ship repairs and the building of vessels for the China coast.

Pulp and paper mills in the vicinity of Vancouver are hoping to round out their depleted staffs with ex-servicemen and others now being released from war plants. Shipyard workers are expected to ease a serious shortage of labour in the engineering shops. Aircraft factories, whose manpower demands have been limited for some time, are now included in the mass lay-off list; already 2,000 employees, of whom 40 per cent are

women, have been released, and further staff reductions are to follow. The foundries, too, are laying off some of their workers.

Construction—There is still a definite shortage of building labour throughout the province. While such high priority projects as Veterans' housing have had their orders fairly well filled, the call of small contractors, for

both materials and labour, is more difficult to satisfy.

Transportation—Requests for workers have lessened in the northern section of the region, but there are few applicants available to meet the insistent call for railway sectionmen. Men are also required for the coastwise and manning pool marine services.

Applications for Employment; Vacancies and Placements; July, 1945

BUSINESS transacted by Employment Offices of the Unemployment Insurance Commission during the five-week period June 29 to August 2, 1945, as indicated by the average daily placements effected, showed a decline of 6.3 per cent when compared with the previous four weeks June 1 to June 28, and a loss of 22.3 per cent in comparison with the four weeks June 30 to July 27, 1944. Under the first comparison, there was recorded a moderate gain in agriculture and a minor increase in construction but, except for mining which remained unchanged, all other industrial groups showed decreases, the most pronounced being in manufacturing. In comparison with the four weeks ending July 27 last year, apart from moderate increases in construction and agriculture, all industrial

divisions recorded losses the greatest being in manufacturing, services and trade.

The accompanying chart shows the trend of employment since January 1942, as represented by the ratios of vacancies notified and of placements effected for each 100 applications for work registered at Employment Offices throughout Canada. In viewing the graph it will be seen that the trend of the curve of vacancies in relation to applications took an upward trend while that of placements remained about the same. The ratio of vacancies to each 100 applications was 106.4 during the five weeks ending August 2, 1945, in contrast with 98.9 during the previous four weeks and 107.1 during the four weeks June 30 to July 27, 1944. The ratio of placements to each 100 applications was 63.9 as

VACANCIES NOTIFIED AND PLACEMENTS EFFECTED FOR EACH ONE HUNDRED APPLICATIONS FOR EMPLOYMENT

Applications——— Vacancies - - - - - Placements=====

compared with 63.3 in the preceding period and 72.8 during the four weeks ending July 27, last year.

The average number of vacancies reported daily by employers to the offices of the Commission throughout Canada during the five-week period June 29 to August 2, 1945, was 7,893, as compared with 7,908 during the previous four weeks and with 8,984 during the four-week period ending July 27, 1944. The average number of applications for employment received daily by the Offices during the period under review was 7,416 in comparison with 7,990 during the preceding four weeks and 8,385 during the four weeks ending July 27, a year ago. The average number of placements made daily by the offices during the five weeks ending August 2, 1945, was 4,742 of which 4,592 were in regular employment and 150 in work of one week's duration or less, as compared with a total daily average of 5,064 during the previous four weeks. Placements in the four weeks June 30 to July 27, 1944, averaged 6,109 daily, consisting of 5,956 placements in regular and 153 in casual employment.

During the period June 29 to August 2, 1945, the offices of the Commission referred 184,020 persons to vacancies and effected a total of 137,510 placements. Of these, the placements in regular employment were 133,165, of which 108,267 were of males and 24,898 of females, while placements in casual work totalled 4,345. The number of vacancies reported by employers was 174,550 for males and 54,340 for females, a total of 228,890, and applications for work numbered 215,073, of which 164,391 were from males and 50,682 from females. Reports for the four weeks June 1 to June 28, 1945, showed 189,782 positions available, 191,749 applications made and 121,535 placements effected, while in the four-week period June 30 to July 27, 1944, there were recorded 206,635 vacancies, 192,847 applications made and 140,507 placements in regular and casual employment.

The following table gives the placements effected by employment offices, each year, from January, 1935, to date:—

Year	PLACEMENTS		
	Regular	Casual	Totals
1935.....	226,345	127,457	353,802
1936.....	217,931	113,519	331,450
1937.....	275,300	114,326	389,536
1938.....	256,134	126,161	382,295
1939.....	242,962	141,920	384,882
1940.....	320,090	155,016	475,106
1941.....	316,168	191,595	507,763
1942.....	309,983	85,638	395,621
1943.....	1,890,408	53,618	1,944,026
1944.....	1,693,119	46,798	1,739,917
1945 (31 weeks).....	899,206	27,844	927,050

Nova Scotia and Prince Edward Island

Employment opportunities as indicated by orders received at Employment Offices in Nova Scotia and Prince Edward Island during the five weeks ending August 2, 1945, showed a daily average of 290, compared with 293 in the preceding period and 319 during the four weeks ending July 28, 1944. Placements registered a daily average of 206 during the period under review, in contrast with 204 in the previous four weeks and 254 during the period terminating July 28 a year ago. A fairly large decrease in manufacturing and smaller losses in services and trade accounted for the reduction in the daily average of placements from the four weeks ending July 28 last year. A moderate improvement was noted in public utilities operation while the changes in remaining groups were small. Placements by industrial divisions numbered: manufacturing 1,797; services 1,116; public utilities operation 991; construction 840; trade 793; mining 169 and agriculture 151. There were 4,778 men and 1,081 women placed in regular employment.

New Brunswick

Orders listed at Employment Offices in New Brunswick during the period under review was 217 in comparison with 236 during the four weeks ending June 28, and 214 in the period terminating July 28 last year. There was a daily average of 147 placements in contrast with 158 in the preceding four weeks and 188 during the period ending July 28, 1944. When comparing placements by industrial groups with the four weeks terminating July 28 a year ago, the most significant changes were declines in manufacturing, services, trade, agriculture and forestry and logging, and a gain in public utilities operation. Placements by industries included: manufacturing 1,233; public utilities operation 797; services 688; trade 611; construction 548 and forestry and logging 163. Regular placements numbered 3,346 of men and 887 of women.

Quebec

The demand for workers on a daily average as indicated by orders listed at Employment Offices in the Province of Quebec during the five weeks terminating August 2, 1945, was 2,195 as compared with 2,079 in the previous period and 2,577 during the four weeks ending July 28 a year ago. The average number of placements effected daily was 1,191 during the period under review, in comparison with 1,333 in the preceding four weeks and 1,676 during the period ending July 28, 1944. A heavy

reduction in placements in manufacturing augmented by substantial declines in services, public utilities operation, trade and losses of much smaller proportions in forestry and logging, and finance and insurance accounted for the decrease in placements from the period terminating July 28 last year. Of the changes in all other groups, a moderate gain in mining was the most important. Industrial divisions in which most of the placements were effected were: manufacturing 13,068; construction 5,186; forestry and logging 4,914; services 4,613; public utilities operation 2,732; trade 2,380 and mining 1,142. Placements in regular employment numbered 29,305 of men and 5,073 of women.

Ontario

There was a decrease in the average number of positions available daily at Employment Offices in Ontario during the period ending August 2, 1945, there being 3,255 in contrast with 3,337 in the four weeks terminating June 28, and 3,603 during the period ending July 28, 1944. Placements decreased under both comparisons, the daily average being 1,879 during the five weeks under review, in comparison with 2,049 in the previous period and 2,423 during the four weeks ending July 28 last year. The most marked reduction in placements from the period terminating July 28 a year ago occurred in manufacturing. Fairly substantial losses were reported in services and trade, and declines of more moderate proportions in public utilities operation, finance and insurance, and forestry and logging but these reductions were somewhat modified by an appreciable gain in construction and a much smaller increase in agriculture. Placements by industrial divisions included: manufacturing 20,674; services 11,042; construction 6,500; trade 5,878; public utilities operation 5,585; agriculture 1,832 and mining 1,143. There were 43,165 men and 10,259 women placed in regular employment.

Manitoba

Positions offered through Employment Offices in Manitoba during the five weeks ending August 2, called for a daily average of 371 workers, in contrast with 351 in the preceding period and 440 during the four weeks ending July 28 a year ago. There was a daily average of 236 placements compared with 254 in the previous period and 277 during the four weeks terminating July 28, 1944. The decrease in the daily average of placements from the four weeks ending July 28 last year was greatest in services. Losses smaller in volume were reported in manufacturing and trade but these were partly offset by moderate gains in

construction and public utilities operation. Placements by industries included: manufacturing 1,773; services 1,607; trade 1,275; public utilities operation 1,034; construction 728 and mining 178. Regular placements numbered 4,158 of men and 1,581 of women.

Saskatchewan

Opportunities for employment at Employment Offices in Saskatchewan for the period ending August 2, 1945, averaged 186 daily compared with 185 in the previous four weeks and 242 during the period terminating July 28 last year. The average number of placements recorded daily was 131, in comparison with 137 in the preceding four weeks and 170 during the period terminating July 28, 1944. With the exception of a moderate gain in construction and a nominal increase in forestry and logging all industrial groups showed declines in placements from the four weeks ending July 28 a year ago, the largest reduction being reported in services followed by smaller losses in trade, manufacturing and public utilities operation. Industries in which employment was found for more than 100 workers included: services 1,139; trade 783; public utilities operation 586; manufacturing 532; construction 477 and agriculture 194. Placements in regular employment numbered 2,575 of men and 909 of women.

Alberta

Orders received at Employment Offices in Alberta during the five weeks under review called for an average of 408 workers daily compared with 396 during the period ending June 28, and 519 in the four weeks terminating July 28 last year. There was a daily average of 291 placements in comparison with 250 during the preceding four weeks and 353 in the period ending July 28, 1944. Reductions in placements from the four weeks terminating July 28 a year ago took place in services, trade, manufacturing, construction and mining, and a gain in agriculture, all of which were moderate in volume. Placements by industrial groups included: services 2,246; manufacturing 1,510; trade 1,374; construction 1,143; public utilities operation 1,137 and mining 474. There were 5,901 men and 1,886 women placed in regular employment.

British Columbia

There was a decrease in the average number of positions available daily at Employment Offices in the Province of British Columbia during the five weeks ending August 2, 1945, there being 971 in contrast with 1,030 during

the previous period and 1,069 in the four weeks ending July 28, 1944. Placements were fewer under both comparisons, the daily average being 660 during the period under review, in comparison with 682 in the preceding four weeks and 768 during the period terminating July 28 last year. There were fairly large decreases in placements under trade, services and manufacturing when compared with the four weeks ending July 28 a year ago, and moderate losses in mining and

finance and insurance. All other industrial divisions showed increases, the most important being moderate gains in public utilities operation and forestry and logging. The majority of placements recorded during the period took place in the following industries: manufacturing 5,636; services 3,373; public utilities operation 2,543; forestry and logging 2,498; trade 2,172; construction 1,886 and mining 440. There were 15,039 men and 3,222 women placed in regular employment.

STRIKE activity in Canada during the month of August continued at about the same level as in the previous month and was not much changed as compared with August, 1944, with the exception of the time loss, which showed about a third the number of man-days lost due to strike idleness recorded a year ago. Preliminary figures show 31 strikes in existence during August, involving 13,159 workers and causing a time loss of 41,297 man-working days, as compared with 28 strikes in July, 1945, with 11,884 workers involved and a time loss of 45,273 days. In August, 1944, there were 26 strikes recorded, involving 12,585 workers, with a time loss of 120,283 days.

Preliminary figures for the first eight months of this year show 128 strikes, involving 44,349 workers, with a time loss of 170,293 man-days, as compared with 157 strikes, with 66,509

workers involved and a time loss of 464,594 days for the same period last year.

Of the 31 strikes recorded for August, 1945, three resulted in favour of the workers, seven in favour of the employers, six were compromise settlements and 13 were indefinite in result, work being resumed pending final settlement. At the end of the month, therefore, there were two strikes recorded as untermin-ated, namely wire factory workers at Guelph, Ont., and road construction workers at Sydney, N. S.

The record does not include minor strikes such as are defined in another paragraph nor does it include strikes as to which information has been received indicating that employment conditions are no longer affected but which the unions concerned have not declared terminated.

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Estab-lishments	Workers		

MANUFACTURING—				
<i>Rubber and Its Products—</i>				
Tire factory workers, Kitchener, Ont.	1	1,306	12,140	Commenced July 28; for increased wages for maintenance men while on plant reconstruction work; terminated August 16; conciliation, provincial, and return of workers pending reference to a referee; indefinite.
<i>Animal Foods—</i>				
Meat packing plant workers, Toronto, Ont.	5	(a)1,498	3,750	Commenced July 17; for dismissal of a worker suspended from membership in union; terminated August 3; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
Meat packing plant workers, Peterborough, Ont.	1	190	475	Commenced July 26; in sympathy with strikers at Toronto, July 17; terminated August 3; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
Meat packing plant workers, St. Boniface, Man.	1	(b)1,346	3,716	Commenced July 27; in sympathy with strikers at Toronto, July 17; terminated August 3; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
Meat packing plant workers, Edmonton, Alta.	1	(c) 571	2,855	Commenced July 30; in sympathy with strikers at Toronto, July 17; terminated August 6; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.

STRIKES AND LOCKOUTS IN CANADA DURING AUGUST, 1945*—*Continued*

Industry, occupation and locality	Number involved		Time loss in man-working days	Particulars†
	Estab-lishments	Workers		
Strikes and Lockouts in Progress Prior to August, 1945—Concluded				
MANUFACTURING— <i>Con</i> Meat packing plant workers, Vancouver, B.C.	1	(d) 146	292	Commenced July 30; in sympathy with strikers at Toronto, July 17; terminated August 2; conciliation, provincial, and return of workers pending reference to arbitration; indefinite
<i>Printing and Publishing—</i> Compositors, pressmen, etc., Quebec, P.Q.	1	59	413	Commenced July 9; against transfer of a worker from one job to another; terminated August 8; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.
<i>Metal Products—</i> Moulders, Moncton, N.B.	1	(e) 19	76	Commenced July 16; protesting change in working conditions due to change-over from incentive bonus to piece-work rates; terminated August 4; negotiations; compromise.
Metal factory workers, Vancouver, B.C.	1	446	4,000	Commenced July 27; for implementation of Minority Report of Conciliation Board <i>re</i> union shop and check-off; terminated August 10; government assumed control and return of workers pending reference to a Commissioner; indefinite.
Elevator mechanics and helpers, Montreal, P.Q.	3	9	27	Commenced July 31; against dismissal of a worker; terminated August 3; negotiations and return of workers pending reference to arbitration; indefinite.
CONSTRUCTION— <i>Buildings and Structures—</i> Plumbers, Windsor, Ont.	16	(f) 75	825	Commenced July 12; against Finding and Direction of NWLB‡ cancelling wage increase approved by RWLB‡; terminated August 15; conciliation, provincial, and further reference to RWLB; in favour of workers.
Strikes and Lockouts Commencing During August, 1945				
MINING— Coal miners, Drumheller, Alta.	1	110	110	Commenced August 13; <i>re</i> placement of a miner suspended for cause; terminated August 13; negotiations; compromise, miner placed at another job.
Coal miners, New Waterford, N.S.	1	900	1,800	Commenced August 24; refusal of a miner to transfer to a new working place without increased wages; terminated August 25; return of workers; in favour of employer.
Coal miners, Drumheller, Alta.	1	97	291	Commenced August 27; type of explosives to be used; terminated August 29; negotiations; compromise.
Coal miners, Drumheller, Alta.	1	90	270	Commenced August 27; against dismissal of two miners for refusal to do certain work; terminated August 29; negotiations; compromise, miners reinstated to perform work required.
Coal miners, Glace Bay, N.S.	1	900	900	Commenced August 31; protest against placing junior official at job of coal inspector suspended for absenteeism; terminated August 31; return of workers; in favour of employer.
MANUFACTURING— <i>Animal Foods, etc.—</i> Meat packing plant workers, Winnipeg, Man.	7	1,943	1,943	Commenced August 2; in sympathy with strikers at Toronto, July 17; terminated August 2; conciliation, provincial, and return of workers pending reference to arbitration; indefinite.

* Preliminary.

† Strikes untermiated at the end of the previous year are included in these totals.

The record of the Department includes lockouts as well as strikes but a lockout, or an industrial condition which is undoubtedly a lockout, is not often encountered. In the statistical table, therefore, strikes and lockouts are recorded together. A strike or lockout included as such in the records of the Department is a cessation of work involving six or more employees and lasting at least one working day. Strikes of less than one day's duration and strikes involving less than six employees are not included in the published record unless ten days or more time loss is caused but a separate record of such strikes is maintained in the Department and the figures are given in the annual review. The records include all strikes and lockouts which come to the knowledge of the Department and the methods taken to obtain information preclude the probability of omissions of strikes of importance. Information as to a strike involving a small number of employees or for a short period of time is frequently not received until some time after its commencement.

Strikes and Lockouts in Great Britain and Other Countries

THE latest available information as to strikes and lockouts in various countries is given in the LABOUR GAZETTE from month to month, bringing down to date that given in the March, 1945, issue in the review "Strikes and Lockouts in Canada and Other Countries." The latter includes a table summarizing the principal statistics as to strikes and lockouts since 1919 in the various countries for which such figures are available but many countries are no longer reporting due to war conditions. Statistics given in the annual review and in this article are taken as far as possible from the government publications of the various countries concerned.

Great Britain and Northern Ireland

The British *Ministry of Labour Gazette* publishes statistics dealing with disputes involving stoppages of work and gives some details of the more important ones.

The number of work stoppages beginning in June, 1945, was 183 and 22 were still in progress from the previous month, making a total of 205 during the month, in which 56,800 workers were involved and a time loss of 200,000 working days was caused.

Of the 183 stoppages which began during June, 17 arose out of demands for advances in wages; 52 on other wage questions; seven over questions as to working hours; 24 out of questions respecting the employment of particular classes or persons; 72 on other questions respecting working arrangements; and 11 over questions of trade union principle.

Australia

Figures for the fourth quarter of 1944 show 215 work stoppages, directly involving 58,473 workers, with a total time loss for workers directly and indirectly involved of 245,685 man-days. For the year 1944 there were 939 work stoppages, directly involving 260,624 workers, with a total time loss for workers directly and indirectly involved of 912,752 man-days.

British India

Preliminary figures for March, 1945, show 52 work stoppages, involving 35,701 workers, with a time loss of 97,776 man-days.

New Zealand

Preliminary figures for the first quarter of 1945 show 53 work stoppages, involving 12,584 workers, with time loss of 21,014 working days.

United States

Preliminary figures for July, 1945, show 500 strikes and lockouts beginning in the month, in which 290,000 workers were involved. The time loss for all strikes and lockouts in progress during the month was 1,500,000 man-days. Corresponding figures for June, 1945, are 485 strikes and lockouts, involving 292,000 workers, with a time loss of 1,725,000 man-days.

Prices

Prices, Retail and Wholesale, in Canada, August, 1945

Cost of Living, Prices of Staple Articles, and Index Numbers, as Reported
By the Dominion Bureau of Statistics

THE Dominion Bureau of Statistics cost-of-living index rose 0.2 points to 120.5 between July 3 and August 1, 1945, due mainly to food price increases. Substantially higher prices for eggs and smaller gains for butter and lamb overbalanced lower fresh vegetable quotations to move the index up 0.6 to 136.2. Among other groups, homefurnishings and services at 119.3 and miscellaneous items at 109.5 were each up 0.1, while clothing dropped 0.1 to 122.1. Rentals at an index level of 112.1, and fuel and light at 106.5 were unchanged in August.

Retail Prices

The accompanying table on retail prices of staple foods, coal and rentals (Table IV) is prepared each month by the Dominion Bureau

of Statistics. It shows the prices of these commodities in 64 cities across Canada at the date under review.

The prices of the staple food items included in the table are all used in the calculation of the index of the food group in the official cost-of-living index, and give a reasonably complete picture of prices throughout Canada as used in the calculation of the index of this particular group. They are the averages of prices of goods reported to the Bureau by independent stores. They do not include prices from chain stores. As the movement of chain store prices agrees closely with the movement of independent store prices it was considered that the extra work and cost involved in compiling and printing a separate

† Commodities in the cost-of-living index excluding rents and services.

table for chain store prices was not warranted although chain store prices are used in the calculation of the index.

The coal and rental figures given are also used in the official cost-of-living index. Quotations are shown for anthracite coal in the provinces of Ontario and Quebec, and for bituminous coal in the rest of Canada, where this type of coal is more generally used.

Rental figures given in the table are typical of rents being paid by tenant households in each city. In some cities, flats and apartments are more numerous than single houses; in such cases rents for flats and apartments are shown while figures for other cities represent single-house rentals. In all cases figures represent rents being paid, not the rent asked for vacant dwellings. The basis of these figures is the record of rents for every tenth tenant-occupied dwelling collected in the 1941 census of housing. The movement of rents since that time has been determined from reports submitted by real estate agents. The 1941 census averages have been adjusted in accordance with the change indicated by these reports, and the printed figures show a \$4 spread centred around each city average.

Table III is designed to show the variation in the retail prices of commodities since the beginning of the war. Taking the Dominion average retail price of each of the commodities at August, 1939, as 100, the table shows the percentage changes in prices since that date; also the actual price on the first of the current month.

The Dominion Bureau of Statistics issues an index number of retail prices of commodities included in the cost-of-living index excluding rents and services. This index is now being included in Table I.

The accompanying chart shows the trend of the cost of living and wholesale prices since the beginning of the present war compared with the trend in the period of 1914-1922.

Explanatory Note as to Cost-of-Living Index

The index number of the cost of living was constructed on the basis of a survey of expenditure by 1,439 families of wage-earners and salaried workers with earnings between \$600 and \$2,800 in 1938. The average expenditure was \$1,413.90, divided as follows: food (31.3 per cent), \$443; shelter (19.1 per cent), \$269.50; fuel and light (6.4 per cent), \$90.50; clothing (11.7 per cent), \$165.80; home-furnishings (8.9 per cent), \$125.70; miscellaneous (22.6 per cent), \$319.40.

The last-named group includes health (4.3 per cent), \$60.80; personal care (1.7 per cent), \$23.90; transportation (5.6 per cent), \$79.30; recreation (5.8 per cent), \$82.10; life insurance (5.2 per cent), \$73.30. Other expenditure not directly represented in the index brought the total family living expenditure to \$1,453.80.

A description of the cost-of-living index, how it is calculated, and the complete list of items included in each of the principal groups, food, fuel, rent, clothing, home-furnishings, etc., with their weights was published in the *LABOUR GAZETTE* for July, 1943, page 1057.

The control of prices under an Order in Council of November 1, 1941, P.C. 8527, became effective on December 1, 1941 (L.G., 1941, page 1371). The order provided that no person should sell any goods or supply services at prices higher than during the period September 15 to October 11, 1941, except under the regulations of the Wartime Prices and Trade Board. The activities of the Board in the operation of the price control policy are summarized from time to time in the *LABOUR GAZETTE* under the title *Price Control in Canada*.

Wholesale Prices, July, 1945

Wholesale prices registered further upturns in July as indicated by a rise of 0.8 points to 104.0 (1926=100) in the composite index. Due largely to seasonal strength in potatoes

Vancouver.....	119.4	139.4	100.2	114.2	126.1	115.7	108.8

and smaller increases in rye, hay, rosin and lemons, the vegetable products sub-group rose 2.1 points to 100.1 during the month. Onions averaged somewhat lower. Animal products gained 0.8 to 108.3, reflecting higher quotations for hogs, furs, fowl, butter and eggs which outweighed declines in steers, calves, lambs and salt spring mackerel. Among other groups, a price increase in quebracho extract was responsible for a gain of 0.3 to 98.9 in chemicals and allied products, while textile products moved up 0.2 to 91.9 due to higher quotations for rayon fabrics. Non-metallic minerals recorded the only decline, dropping 0.3 to 101.7 following recessions in

coal oil and lubricating oil prices, which over-balanced strength in British Columbia slack coal. Wood, wood products and paper at 117.6, iron products at 115.3 and non-ferrous metals at 79.7 remained unchanged in July.

Canadian farm product prices rose 2.1 points to an index level of 107.8 in July due principally to strength in field products. In this section sharp seasonal increases for potatoes and lesser gains for rye and hay over-balanced weakness for onions, advancing the index 3.4 points to 99.2. Animal products weakened 0.1 to 122.3 in the same period due to easier live stock prices. These outweighed strength in eggs and poultry.

TABLE III—DOMINION AVERAGE RETAIL PRICE RELATIVES FOR STAPLE FOODS, AUGUST, 1939—AUGUST, 1945, WITH DOMINION AVERAGES OF ACTUAL RETAIL PRICES FOR AUGUST, 1945
